

**Conversion of BR1015 to a Light
Commercial Kitchen Bay**

Project Scope Brief

- 1.0 Convert the existing science preparation room into a light commercial kitchen bay, including removal of all existing fixtures and fittings, altering the existing services and fitting out the room to meet VETAB accreditation and vocational training requirements aligned to the nationally recognised qualifications under the Australian Qualifications Framework and the current Food Act requirements. Allow to change the floor, wall and ceiling fabrics to meet the appropriate Standards, and provide mechanical ventilation for food preparation compliance.

This project will provide industry training in accordance with curriculum level 3 requirements enabling students to pursue and further develop a career in Hospitality.
