### **REQUEST FOR TENDER - PART A – OVERVIEW**

#### 1 Outcome

This Request for Tender ("RFT") is made by the State Contracts Control Board (the "Board") for the provision of Solar Power Systems to the NSW Government under the proposed Agreement of the Services defined in the Statement of Requirements of this RFT.

The Board is responsible for the delivery of the tender process, assisted by NSW Procurement – Contracting Services, whilst the proposed Agreement will be executed between the State Contracts Control Board and the successful tenderer/s.

The key outcome of this RFT is to provide purchasing solution (through the proposed Agreement) for the required Services which meets the needs of the NSW Government.

#### 2 Objectives

The objectives of the proposed Agreement in achieving the desired outcome, includes, but is not limited to the following:

- (a) Reduce the total cost of the Services;
- (b) Provide Services which are commercially competitive;
- (c) Establish a sustainable partnership between the State Contracts Control Board and the successful tenderer to deliver quality Services;
- (d) Best practice through continual review of delivery methods i.e value-engineering;
- (e) Effective management of risks;
- (f) Compliance with all applicable laws, standards, codes and policies.
- (g) To drive automation in procurement for greater efficiency and information management.

#### 3 Required Benefits

The required benefits to be achieved in delivering the objectives of the proposed Agreement are:

- (a) A sustainable, mutually beneficial supply chain partnership;
- (b) Savings and efficiency gains;
- (c) Reduced costs to the NSW Government by value-engineering its delivery methods;
- (d) Transparency of all transactions, including performance measurement, pricing and reporting;
- (e) Expanded utilisation of electronic procurement across NSW Government to drive efficiency and transparency through systems such as smartbuy®, and e-tendering.

#### 4 Scope of RFT

#### 4.1 Services

Through this Request for Tender (RFT), the State Contracts Control Board is intending to implement a procurement arrangement for solar power systems for the NSW Government. A significant driver of this procurement will be the Australian Governments National Solar Schools Program (NSS).

A complete end to end solution for the provision of solar power systems including solar panels, associated equipment, installation, training and maintenance is sought. The solar power systems included in this RFT are:

• monocrystalline

- multicrystalline
- rigid amorphous and
- flexible amorphous

A detailed description of the Services is described in the Statement of Requirements (RFT, Part F).

Tenderers may tender for one or multiple regions.

#### 4.2 Contract and Duration

It is envisaged that the term of the proposed Agreement will be of three (3) years, which may be extended for two (2) further periods each of up to one (1) year in duration at the discretion of the Principal.

#### 4.3 NSW Government requirements

The successful tenderer must comply with NSW Government codes, guidelines and Standards listed in Schedule 1 of Part D.

#### 5 RFT Structure

#### 5.1 Interpretation

5.1.1 Definitions of terms used in Parts A to C are contained in clause 1 of Part B.

#### 5.2 RFT Structure

This RFT comprises 6 Parts as follows:

#### • Overview – Part A

It is an executive summary of main outcomes, objectives, requirements and expectations for this proposed Agreement and the Statement of Requirements. It provides the tenderer with the essential information to make an informed decision on whether to tender or not.

#### • Conditions of Tender – Part B

It provides the terms, conditions and processes governing the tender phase of the RFT.

#### • Tender Response – Part C

These are response schedules which are required by the Board to evaluate the tenderers' offers.

#### • Agreement - Part D

This is the conditions of contract to be executed between the successful tenderer and the Principal.

#### • Special Conditions – Part E

This contains the unique conditions specific to the proposed Agreement. It will form part of the Agreement to be executed between the successful tenderer/s and the Principal

#### Statement of Requirements – Part F

A detailed description of the Services to be provided by the successful tenderer/s including technical specification, service levels and performance framework. It will form part of the Agreement to be executed between the successful tenderer/s and the Principal.

If submitting a Tender, retain Parts A, B, D, E and F. Part C, once completed, forms the Tender, and is to be submitted in accordance with Parts A, B and D.

Part D and E, if applicable, are to be executed later by the successful Tenderer(s) and the Principal to form the Agreement.

#### 6 Best Price and Cost Structure

Tenderers are encouraged to provide their best price(s) with their tender. Whilst the Board reserves the right to negotiate pre award, such negotiations may not occur and it is not the Board's preference.

It is important that tenderers realise that they may not be short-listed for further consideration, if they do not provide their best price with their initial tender.

This RFT seeks transparency in the tenderer's Cost Structure in the Tender Schedules (RFT, Part C) and is required to be fully completed by the tenderer to:

- Provide the Principal transparency of the tenderer's Cost Structure;
- Act as a basis for future Price variations, where applicable.

The Board expects the successful tenderer's to reduce its pricing during the term of the proposed Agreement by:

- (a) Continually improving delivery processes to improve efficiency;
- (b) Providing lower prices and discounts for large/bulk purchases;
- (c) Passing on the benefit of rebates received from its own suppliers to the Principal;
- (d) Matching prices as identified/recommended from the benchmarking process;
- (e) Other methods of savings identified during the term of the proposed Agreement;
- (f) Price matching as identified by the Principal.
- (g) Presenting and adopting NSW government, or any other electronic procurement systems to reduce the cost of doing business with customers.

#### 7 Benchmarking

Benchmarking with other suppliers within the market place may be the price-management mechanism under the proposed Agreement.

An independent benchmarking service provider may be engaged to compare prices of the Services with other comparable products available in the market place. The benchmarking service provider will be mutually agreed by the Board and successful tenderer/s.

Benchmarking may be undertaken by the benchmarking service provider after the first anniversary of the proposed Agreement and at 12 monthly intervals thereafter.

#### 8 Performance Framework

The Board is committed to engaging contractors who are able and willing to continually improve their performance during the term of the proposed Agreement.

The performance framework within the proposed Agreement provides both incentives for good performance and sanctions for poor performance.

Performance incentives and sanctions are based on the Contractor's performance. Schedule 7 to Part D describes the performance framework in detail and the measurement/targets of all performance indicators.

Typical incentives and sanctions that may be used by the Principal include, but are not limited to :

- (a) Additional or reduced performance reporting requirements;
- (b) Temporary suspension of all or parts of a proposed Agreement for a period not exceeding 12 months;
- (c) Scope variation ie. inclusion of additional Services/reduction;
- (d) Extensions of the proposed Agreement (if available);

(e) Non payment of price variations.

#### 9 Electronic Business

The use of electronic commerce is a mandatory requirement under this Agreement. Further details are included in the sample Agreement (RFT, Part D) and the Statement of Requirements (RFT, Part F)

The use of NSW government electronic procurement systems (smartbuy®, i-Tenders and NSW e-tendering, etc) is a mandatory requirement under this Agreement. Tenders are encouraged to present similar electronic solutions that can further support expanding adoption of electronic procurement by NSW government agencies and their suppliers.

### PART B Conditions of Tender

#### 1 Definitions

Unless the context indicates otherwise, the following terms, where used in Parts A-C of this RFT, shall have the meanings set out below.

"ABN" means an Australian Business Number as provided in GST law.

"Addendum" means an addition to this RFT made by the Board before Closing Date and Closing Time.

"Agreement" means the proposed agreement to be made between the Principal and the Contractor in the form of Part D (and Part E if applicable) to this RFT.

"Alternative Tender" A Non-Conforming Tender that is intended to offer a different method of meeting the object and intent of the requirement.

**"Board"** The State Contracts Control Board established under the Public Sector Employment and Management Act 2002 whose responsibilities include:

- (a) Inviting and accepting tenders;
- (b) Determining the conditions under which tenders are invited or accepted;
- (c) Entering into contracts on behalf of the Crown in right of the State of New South Wales; and
- (d) On-going contract administration and management, and includes the duly authorised delegates of the Board, including officers of NSW Procurement – Contracting Services.

"Closing Date and Closing Time" means the Closing Date and Closing Time for receipt of tenders specified in the cover sheet of this RFT.

"**Code**" means the NSW Government Code of Practice for Procurement as amended from time to time, together with any other codes of practice relating to procurement, including any amendments to such codes that may be applicable to the particular RFT. The Code can be viewed and downloaded from: *http://www.treasury.nsw.gov.au/\_\_data/assets/pdf\_file/0015/1356/code\_of\_praccurr.pdf* 

"Conforming Tender" means a tender that conforms in all material aspects to:

- (a) the Statement of Requirements;
- (b) the terms and conditions of Part D, and Part E if applicable.
- (c) other parts of this RFT, and
- (d) is in the prescribed form.

"Contractor" means a tenderer who has entered into an Agreement with the Principal.

"**Cost Structure**" means the individual tenderer's cost breakdown in accordance with the number of categories specified in Part C. Such breakdown must equate to 100% of the tenderer's cost for the supply of the Deliverables.

"**Deliverables**" means the goods and associated services, the Works sought under this RFT, as detailed in the Statement of Requirements.

"GST" means a goods and services tax and has the same meaning as in the GST Law.

"**GST Law**" means any law imposing a GST And includes A New Tax System (Goods & Services Tax) Act 1999 (C'th) or if that Act does not exist, means any Act imposing, or relating to a GST and any regulation made under those Acts.

"GST Free Supplies" and "Input Taxed Supplies" have the same meaning as in the GST Law.

"Non-Conforming Tender" means a tender that does not conform in all material aspects to:

- (a) the Statement of Requirements;
- (b) the terms and conditions of Part D, and Part E if applicable;
- (c) other Parts of this RFT;
- (d) is not in the prescribed form.

**"NSW Procurement - Contracting Services"** A business unit of the NSW Department of Commerce representing the Board and authorised to arrange and administer contracts on behalf of the Board.

"**Principal**" means the party executing the proposed Agreement with the successful tenderer.

**"Statement of Requirements"** means the detailed description of the Deliverables contained in Part F.

"State Contracts Control Board" is the Board.

#### 2 Tender Preparation

#### 2.1 Tenderer to inform itself

Before submitting its tender, a tenderer must:

- 2.1.2 Examine all information relevant to the risks and contingencies and other circumstances having an effect on its Tender; and
- 2.1.3 Satisfy itself:
  - (a) that the tender, including the tender price is correct; and
  - (b) that it is financially and practically viable for it to enter into and perform the proposed Agreement.

#### 2.2 Information Supplied in Part F

The information contained in Part F has been provided with due care for the tenderer's guidance, but is not guaranteed as being completely accurate. The Board shall not be held liable for any errors or omissions contained in Part F.

#### 3 Eligibility to Tender

#### 3.1 Legal Entity of Tenderer

- 3.1.1 Tenders must be submitted by a legal entity or, if a joint tender, by legal entities, with the capacity to contract. The Principal will only enter into an Agreement with such legal entity or entities.
- 3.1.2 The Board may ask a tenderer to provide evidence of its legal status or capacity to contract. If tenders from entities propose to contract in their capacity as trustees, such evidence may include copies of the relevant trust deeds. Any evidence requested is to be provided within 3 working days of the request.

#### 3.2 Financial Capability of Tenderer

- 3.2.1 The Board reserves the right to reject any tender if the Board judges the tenderer not to have appropriate financial capability.
- 3.2.2 Where the Board forms the view that the tenderer does not have the appropriate financial capability, the Board reserves the right to make acceptance of any tender conditional upon the tenderer entering into a bank, parent company or personal

guarantee, or an unconditional performance bond in a form satisfactory to the Board.

#### 3.3 ABN Requirements

- 3.3.1 The Principal will not enter into an Agreement with a company that does not have an Australian Business Number and is not registered for GST. Normally, tenderers must be registered for GST and state their ABN in their tender.
- 3.3.2 Tenders from tenderers that do not have an ABN and/or are not registered for GST, such as tenderers commencing business in Australia, may be considered at the Board's discretion if the tenderer demonstrates that it will obtain an ABN and GST registration before entering into an Agreement with the Principal. Such tenderers must state how and when they intend to obtain an ABN and register for GST in their tender response.

#### 4 Tender Process

#### 4.1 Provisional RFT Program

Given below is the Board's provisional RFT program. The Board may, at its absolute discretion, amend the provisional RFT program.

| Milestone                          | Estimated<br>Date |
|------------------------------------|-------------------|
| RFT issue                          | 13/10/08          |
| Tenderer briefing                  | 22/10/08          |
| RFT Close Date                     | 5/11/08           |
| Execution of Agreement             | 10/12/08          |
| Commencement of supply of Services | 1/1/09            |

#### 4.2 Tenderer Briefing

4.2.1 A tenderer briefing will be held on the date, time, and place, indicated below. The contact officer/s of NSW Procurement – will be available at that time to answer any queries regarding this RFT and the tender process generally. Names of persons attending the tenderer briefing must be provided to the contact officer 3 working days prior to the date. No more than 2 persons from each tenderer will be permitted to attend the tenderer briefing.

| Location: | NSW Department of Education and Training<br>Annex, Level 7<br>35 Bridge Street<br>Sydney |
|-----------|--|
| Date:     | Wednesday 22 October 2008  |
| Time:     | 10:00am  |

#### 4.3 Contact Officer

4.3.1 Tenderers should refer requests for information or advice regarding this RFT to:

| Name:      | Angela Burrell                     |
|------------|------------------------------------|
| Telephone: | 02 9372 7509                       |
| Facsimile: | 02 9372 7633                       |
| E-mail:    | angela.burrell@commerce.nsw.gov.au |

4.3.2 Any information given to a tenderer to clarify any aspect of this RFT will also be given to all other tenderers if in the Board's opinion the information would unfairly favour the inquiring tenderer over other tenderers.

#### 4.4 Conformity of Tenders

- 4.4.1 The Board seeks Conforming Tenders.
- 4.4.2 Non-Conforming Tenders may be excluded from the tender process without further consideration at the Board's discretion.

#### 4.5 Alternative Tenders

4.5.1 Tenderers may, if they choose, submit an Alternative Tender. Alternative Tenders will only be considered if submitted in conjunction with a Conforming Tender. An Alternative Tender must be clearly marked "Alternative Tender".

#### 4.6 Submission of Tenders

- 4.6.1 Prices, responses and other information provided in the tender are to be in writing and in English.
- 4.6.2 Tenderers must complete all of Part C of this RFT, as directed and must not amend any of the questions provided.
- 4.6.3 Tenderers should notify the contact officer in writing on or before the Closing Date and Closing Time if they find any discrepancy, error or omission in this RFT.

All tenders must be provided in electronic or hard copy.

- 4.6.4 Tenderers must ensure that all excel or word attachments can be opened and viewed by Microsoft Excel 2003 or Microsoft Word 2003. Other formats for the attachments are only to be submitted if an arrangement has first been made with the contact officer prior to lodgment of the tender.
- 4.6.5 It is recommended that electronic files be kept as small as practical and the lodgement files below an optimum size of 7 MB, as the limitations of the Internet and communications may affect the successful transmittal and receipt of large files.

#### 4.7 Tender Lodgement

- 4.7.1 Tenders must be fully received by the Closing Date and Closing Time.
- 4.7.2 A Tender must be lodged into the designated secure tender box/es, and must be submitted electronically to the electronic tender box for this RFT via the NSW Department of Commerce tenders website at: *https://tenders.nsw.gov.au/commerce* (Login in as a system user, locate the web page for this RFT, and follow the on screen instructions to lodge the tender).
- 4.7.3 The lodgement can only be made by a registered system user of the NSW Government eTendering system.
- 4.7.4 Hard Copy or Facsimile Lodgement
  - (a) Delivery into the Physical Tender Box at:
    - Tender Box

NSW Department of Commerce

Level 3 McKell Building (Ground floor west)

2-24 Rawson Place Sydney NSW

(b) The tender must be able to be lodged into the physical tender box deposit slot of 400mm by 90mm, and must be lodged during normal McKell Building opening hours of 7:30am to 6:30pm Monday to Friday (excluding Public Holidays).

- (c) No receipt can be given however written acknowledgement of delivery of a container may be given by prior arrangement. Contact Tenders Office on (02) 9372 8900.
- (d) If the tender is larger in physical size and cannot be broken down, or delivery personnel require a signature as evidence of delivery the tender must be delivered between 8:30am and 4:30pm Monday to Friday (excluding Public Holidays) and only by prior arrangement. Contact Tenders Office on (02) 9372 8900. Commerce personnel will not take delivery of containers that present an OH&S risk in terms of size or weight.
- (e) Tenders must be clearly marked with the RFT number "0801890".

#### Or Lodgement to the Facsimile Tender Box at Ph: (02) 9372 8974 :

Tenders which are sent by facsimile and which are not completely received at the specified location by the close of tenders may be excluded from consideration for acceptance even if transmission or receipt is delayed due to the receiving facsimile machine being engaged, faulty or otherwise inoperative.

If a tenderer intends to submit by facsimile it must consider the following:

The facsimile machine only allows one tender to be lodged at a time and is at its peak on the morning when tenders and tenders close. Due to the volume received on those closing dates, the State Contracts Control Board (SCCB) cannot guarantee the level or speed of access to these facilities at that time and tenderers should consider lodging in good time having regard to this

#### 4.8 Electronic Tenders

- 4.8.1 A tender submitted electronically will be treated in accordance with the *Electronic Transactions Act 2000* (NSW).
- 4.8.2 A tenderer, by electronically lodging a tender, is taken to have accepted conditions shown in the conditions and rules on the NSW Department of Commerce tenders website at *https://tenders.nsw.gov.au/commerce*.
- 4.8.3 A tenderer must follow the following directions:
  - (a) A RFT for which electronic lodgement is available through the website can be identified by the blue "Lodge a Response" link on the web pages for the RFT.
  - (b) To lodge a tender electronically, the files containing the tenderer's response must be up-loaded through the website to the NSW Government eTendering system. Access to the up-loading process is through the blue "Lodge a Response" link, then following the steps and instructions on the NSW Department of Commerce tenders website and any instructions which may have been supplied with the RFT documents, advertisement or invitation.
- 4.8.4 A tenderer must observe the following format for lodgements:
  - (a) An electronically lodged tender must be lodged in a file format required by the RFT.
  - (b) If a tenderer compresses files, it must be possible to decompress them using WinZip. A tenderer must not submit self-extracting (\*exe) zip files.
  - (c) A tenderer must not change pre-existing text in the RFT other than to insert the required information.
  - (d) The file/s name/s must have an extension and not have invalid characters or file names/loading path names too long for the system, as detailed on the NSW Department of Commerce tenders website.
- 4.8.5 Signatures are not required for an electronic tender. A tenderer must ensure that a tender response is authorised by the person or persons who may do so on behalf of the tenderer and appropriately identify the person and indicate the person's approval of the information communicated.

- 4.8.6 Electronically submitted tenders may be made corrupt or incomplete, for example by computer viruses. The Board may decline to consider for acceptance a tender that cannot be effectively evaluated because it is incomplete or corrupt. Tenderers must note that:
  - (a) To reduce the likelihood of viruses, a tenderer must not include any macros, applets, or executable code or files in a tender response.
  - (b) A tenderer should ensure that electronically submitted files are free from viruses by checking the files with an up to date virus-checking program before submission.
- 4.8.7 If a tenderer experiences any persistent difficulty with the NSW Department of Commerce tenders website in submitting a tender or otherwise, it is encouraged to advise the contact officer promptly in writing.
  - (a) If there is an extended defect or failure of the NSW Department of Commerce tenders website or eTendering system and the Board is advised, the tender Closing Date and Closing Time may be extended provided that, in the view of the Board, the RFT process will not be compromised by such an extension.
  - (b) Tenders must be fully received by the Closing Date and Closing Time.
- 4.8.8 Tenderers may break down the lodgement of large tenders into smaller packages if clearly identified e.g. package 1 of 3; 2 of 3; 3 of 3.
- 4.8.9 If a tenderer provides multiple lodgements, the latest tender received will be the tender to be evaluated unless the tenderer provides clear directions to whether the lodgement is:
  - (a) an alternative tender,
  - (b) supporting information
  - (c) a further part of a tender that has had previous lodgement

#### 4.9 Tender Validity Period

4.9.1 The Tender will remain open for acceptance by the Principal for a period of six (6). months from the Closing Date and Closing Time for tenders.

#### 4.10 Late Tenders

4.10.1 Late tenders should not be considered, except where the Board is satisfied that the integrity and competitiveness of the tendering process has not been compromised. The Board shall not penalise any supplier whose tender is received late if the delay is due solely to mishandling by the Board.

#### 4.11 Extension of Closing Date and Closing Time

4.11.1 The Board may, in its discretion, extend the Closing Date and Closing Time.

#### 4.12 Corruption or Unethical Conduct

- 4.12.1 Tenderers must comply with the requirements of the Commerce Business Ethics Statement, which is available at the link below and must disclose any conflicts of interests in Part C.
- 4.12.2 If a tenderer, or any of its officers, employees, agents or sub-contractors is found to have:
  - (a) offered any inducement or reward to any public servant or employee, agent or subcontractor of the Board, the Principal, or the NSW Government in connection with this RFT or the submitted Tender;
  - (b) committed corrupt conduct in the meaning of the Independent Commission Against Corruption Act 1988;
  - (c) a record or alleged record of unethical behaviour; or not complied with the requirements of Commerce Business Ethics Statement available at:

http://www.commerce.nsw.gov.au/About+Commerce/Business+ethics+statem ent/Business+ethics+statement.htm;

this may result in the tender not receiving further consideration.

- 4.12.3 The Board may, in its discretion, invite a relevant tenderer to provide written comments within a specified time before the Board excludes the tenderer on this basis.
- 4.12.4 If the Board and/or the Principal becomes aware of improper conflict of interests by a successful tenderer after an Agreement has been executed, then the Principal reserves the right to terminate the Agreement.

#### 4.13 Code of Practice for Procurement

- 4.13.1 In submitting its tender, the tenderer signifies agreement to comply with the Code.
- 4.13.2 Failure to comply with the Code may be taken into account by the Board when considering the tenderer's tender or any subsequent tender, and may result in the tender being passed over.

#### 4.14 Prescribed Form of Tender

- 4.14.1 The Tender, including any Alternative Tender, must comprise a completed Part C and any attachments to Part C, as may be necessary. Any attachments should be labelled to identify those clauses of the RFT to which they relate.
- 4.14.2 The Tender will be taken to be for the provision of the Services on the terms and conditions stated in Part D (and Part E if applicable) except to the extent that these are amended by the Tender and agreed by the Principal.

#### 4.15 Addenda to RFT

- 4.15.1 If, for any reason the Board, at its sole discretion, requires the RFT to be amended before the Closing Date and Closing Time, an Addendum will be issued.
- 4.15.2 In each case, an Addendum becomes part of the RFT.
- 4.15.3 The Board, during the tender period may issue Addenda altering the RFT. In such cases, it is the obligation of the tenderer to verify if any Addenda were issued prior to closing date, even if a tender has already been submitted.
- 4.15.4 Tenderers must check the web site address, *https://tenders.nsw.gov.au/commerce* and download the Addendum.

#### 4.16 Tenderer's Costs

The tenderer acknowledges that the Board will not be liable to it for any expenses or costs incurred by it as a result of its participation in this RFT, including where the RFT has been discontinued.

#### 4.17 Custody of Tenders after Receipt

- 4.17.1 Tenders lodged electronically to the NSW Department of Commerce Tenders website will be treated in accordance with the *Electronic Transactions Act 2000.*
- 4.17.2 On receipt of tenders lodged electronically to the NSW Government eTendering system, tenders are encrypted and stored in a secure "electronic tender box."
- 4.17.3 For reasons of probity and security, the Board and its agent are prevented from interrogating the electronic tender box to ascertain whether tenders have been received or for any reason, until after the Closing Date and Closing Time.
- 4.17.4 The e-mail receipt that is sent to system user lodging the tender after successfully lodging the tender electronically to the NSW Government eTendering system is the only evidence of tender lodgement provided.

#### 4.18 Ownership of Tenders

4.18.1 All tenders become the property of the Board on submission.

4.18.2 The Board may make copies of the tenders for any purpose related to this RFT.

#### 4.19 Discontinuance of Tender Process

4.19.1 Where the Board determines that awarding a contract would not be in the public interest, the Board reserves the right to discontinue the tender process at any point, without making a determination regarding acceptance or rejection of Tenders.

#### 4.20 Variations to Tenders

- 4.20.1 At any time after the Closing Date of tenders and before the Board accepts any tender received in response to this RFT, a tenderer may, subject to clause 4.20.2, vary its tenders:
  - (a) by providing the Board with further information by way of explanation or clarification;
  - (b) by correcting a mistake or anomaly; or
  - (c) by documenting agreed changes to the tender negotiated under clause 5.5 of this Part B.
- 4.20.2 Such a variation may be made either:
  - (a) at the request of the Board, or
  - (b) with the consent of the Board at the request of the tenderer; but only if,
    - (i) in the case of variation requested by the tenderer under clause 4.20.1(a)-(b), it appears to the Board reasonable in the circumstances to allow the tenderer to provide the information or correct the mistake or anomaly; or
    - (ii) in the case of variation under clause 4.20.1(c) the Board has confirmed that the draft-documented changes reflect what has been agreed.
- 4.20.3 If a tender is varied in accordance with clause 4.20.1(a) or (b), the Board will provide all other tenderers whose tenders have similar characteristics with the opportunity of varying their tenders in a similar way.
- 4.20.4 A variation of a tender under clause 4.20.1 will not be permitted if in the Board's view:
  - (a) it would substantially alter the original tender; or
  - (b) in the case of variation under clause 4.20.1(a) or (b), it would result in the revising or expanding of a tender in a way that would give a tenderer an unfair advantage over other tenderers.

#### 5 Evaluation Process

- 5.1.1 Tenders will be assessed against the evaluation criteria listed below which are not indicated in order of significance or be given equal weight.
- 5.1.2 The evaluation criteria for this RFT that do not relate to price will account for 40% of the total evaluation score. The evaluation for this RFT that relate to price for a complete solar power systems will account for 60% of the total evaluation score.
- 5.1.3 Information supplied by the tenderer in Part C will contribute to the assessment against each criterion. Tenderers are advised to respond clearly to all the evaluation criteria listed in this RFT.
- 5.1.4 Tenders that do not include a fully completed Part C, in particular those tenders which do not contain sufficient information to permit a proper evaluation to be conducted, or electronic tenders that cannot be effectively evaluated because the file has become corrupt, may be excluded from the tender process without further consideration at the Board's discretion.
- 5.1.5 The Board may assess an Alternative Tender against the evaluation criteria where submitted with a Conforming Tender.

#### 5.2 Evaluation Criteria

The evaluation criteria for this RFT (which include but are not limited to) are:

- (a) Fitness for purpose including:
  - (i) Quality, of product design;
  - (ii) range of products
  - (iii) innovative aspects;
  - (iv) performance;
  - (v) warranties
  - (vi) Maintenance
  - (vii) Ease of use of system in an educational environment;
- (b) Price;
- (c) Delivery requirements;
- (d) Capacity to perform the Agreement including:
  - (i) Production/technical capacity;
  - (ii) Ability to provide an end to end solution
  - (iii) Human resource capacity, qualifications, skills and experience;
  - (iv) Financial capacity and stability (including security considerations);
  - (v) Maintenance and support service levels including availability of help desk for repair and help calls;
  - (vi) Quality assurance systems
  - (vii) Suitability of sub-contractors;
  - (viii) Previous experience and performance on similar agreements for the products and services covered in this RFT or other products and services;
  - (ix) Record of ethical behaviour in service delivery;
  - (x) Referee Reports
  - (xi) Compliance with other requirements of the Principal, (including ability to market the proposed Agreement).
- (e) Compliance with the proposed conditions of Part D, and E if applicable.
- (f) Compliance with NSW Government procurement policy and other applicable NSW Government policies, including:

Industry impact and local industry participation plan;

SME involvement;

Regional development activity;

Workforce development;

Compliance with OHS&R requirements;

Compliance with NSW Government Environmental Management

Systems Guidelines:

- (g) Compliance with relevant legislation and standards.
- (h) Capacity and capability to facilitate electronic commerce through smartbuy®

(i) Compliance with the Statement of Requirements.

#### 5.3 Presentations/Site Inspections

- 5.3.1 The Board, may during the evaluation of tenders, undertake site inspections of tenderer's or their subcontractor's proposed premises.
- 5.3.2 The Board, may in its discretion, and as part of the evaluation process, invite any or some of the tenderers to make personal presentations regarding their tender. The tenderer shall make any presentations at its own cost.
- 5.3.3 Receiving a presentation by a tenderer in no way represents a commitment by the Board to accept any aspect of the tender.
- 5.3.4 All information obtained during the course of presentation or site inspection may be taken into consideration in the evaluation of tenders.

#### 5.4 Acceptance or Rejection of Tenders

- 5.4.1 The Board may assess an Alternative Tender against the evaluation criteria when submitted with a Conforming Tender.
- 5.4.2 The Board expressly reserves the right to accept, in its discretion, either or both of the following:
  - (a) Any Alternative Tender or part of an Alternative Tender, when submitted with a Conforming Tender; and
  - (b) Any other Non-Conforming Tender or part of a Non-Conforming Tender (not, in either case, being an Alternative Tender or part of an Alternative Tender) that, in the Board's opinion, is substantially a Conforming Tender.
- 5.4.3 The Board is not bound to accept the lowest tender.
- 5.4.4 If the Board rejects all the tenders received it may invite fresh tenders based on the same or different criteria (specifications and details contained in Alternative Tenders will not be used as the basis for the calling of new tenders).

#### 5.5 Post Tender Negotiations

- 5.5.1 Before making any determination as to acceptance or rejection of Tenders the Board may, at its discretion, elect to conduct limited negotiations with preferred tenderers, including those who have submitted Alternative Tenders or who have submitted Conforming Tenders, to mutually improve outcomes.
- 5.5.2 The Board will generally not enter into negotiations to amend standard conditions of contract contained in Part D and Part E if applicable.
- 5.5.3 If the Board considers that none of the tenders are fully acceptable either due to the level of non-conformance or because they do not represent sufficient value for money, but considers that full conformity is achievable, negotiations may be conducted with the tenderer that submitted the most conforming tender based on the evaluation criteria. The purpose of the negotiations will be advised by the Board and made clear to the participants before the commencement of negotiation.
- 5.5.4 The Board may at its absolute discretion elect to conduct post tender negotiations under clause 5.5.3 with more than 1 tenderer in the event that it decides that the closeness of the tenders or timing constraints warrants doing so.

#### 5.6 Exchange of Information between Government Agencies

5.6.1 Lodgement of a tender will itself be an authorisation by the tenderer to the Board to make available, on request, to any NSW government agency information, including but not limited to, information dealing with the tenderer's performance on any contract that may be awarded. Such information may be used by the recipient NSW Government agency for assessment of suitability for pre-qualification, selective tender lists, expressions of interest or the award of a contract or termination of contract.

- 5.6.2 The provision of the information by the Board to any other NSW Government agency is agreed by the tenderer to be a communication falling within *section 30 of the Defamation Act 2005 (NSW)*, and the tenderer shall have no claim against the Board and the State of New South Wales in respect of any matter arising out of the provision or receipt of such information, including any claim for loss to the tenderer arising out of the communication
- 5.6.3 In the evaluation of tenders, the Board may take into account any information about the tenderer that the Board receives from any source.
- 5.6.4 To avoid doubt, information that may be collected, exchanged and used in accordance with this provision includes "personal information" about the tenderer for the purposes of the Privacy and Personal Information Protection Act 1998. Lodgement of a tender will be an authorisation by the tenderer to the Board to collect such information from third parties, and to use and exchange such information in accordance with this clause 5.6.
- 5.6.5 The tenderer's attention is drawn to the Freedom of Information Act 1989 which obliges disclosure of the contract documents resulting from the tender and may confer rights, subject to the terms of that Act, to access, and to require the correction of, information held by certain agencies, including tenders held by the Board. A summary of the provisions is contained in the Annexure 1 to Part B (Disclosure Information).

#### 6 Method of Acceptance

6.1.1 Acceptance of a tender or part tender will be subject to the execution of a formal Deed of Agreement in the terms of Part D and Part E if applicable. Until the Principal and the successful tenderer(s) execute a formal Agreement there will be no legally enforceable agreement concluded between them.

#### 7 Disclosure Information

- 7.1.1 Following the Board's decision, all tenderers will be notified in writing of the outcome of their Tenders.
- 7.1.2 Details of tenderers and the outcome of the tender process will be disclosed in accordance with the Freedom of Information Act 1989 and the NSW Government Tendering Guidelines, available at: http://www.dpws.nsw.gov.au/Government+Procurement/Procurement+Policy+Fram ework/NSW+Government+Tendering+Guidelines.htm
- 7.1.3 An outline of these requirements can be found in Annexure 1 to Part B of this RFT.

#### 8 Complaints Procedure

It is the NSW Government's objective to ensure that industry is given every opportunity to win Government contracts. Should any entity feel that it has been unfairly excluded from tendering or unfairly disadvantaged by the Conditions in Part D and/or Part E, or the Statement of Requirements in Part F, it is invited to write to:

Chairperson State Contracts Control Board Level 22, McKell Building 2-24 Rawson Place Sydney NSW 2000

## **ANNEXURE 1 TO PART B (Disclosure of Information)**

# Disclosure of information concerning tenderers and outcome of the tender process

**1.** In accordance with the NSW Government Tendering Guidelines referred to in clause 7.1.2 and found at *http://www.dpws.nsw.gov.au/Government+Procurement/Procurement+Policy+Framework/NSW+Governm ent+Tendering+Guidelines.htm*, the following **tender information** is required to be disclosed -

| Tender Type  | Level of disclosure  | Basis of disclosure  |
|--|--|--|
| For all public calls for<br>tender, expressions of<br>interest or other such<br>public calls which may<br>result in a contract with<br>the private sector. | <ul> <li>As a minimum:</li> <li>a concise description of the proposed<br/>works, goods or services the subject of the<br/>tender call;</li> <li>the date responses to the tender call close<br/>and where responses are lodged; and</li> <li>location of the tender call documents.</li> </ul> | Routine public<br>disclosure at the time<br>tender calls are<br>advertised.                                |
|  | The names and addresses of all entities which submit responses.  | Routine public<br>disclosure within 7 days<br>of the date tender calls<br>closed.                          |
| In a multi-stage tender process.   | The names and addresses of the shortlisted<br>entities, except where such disclosure is likely<br>to compromise the competitiveness of the<br>subsequent tender process.   | Routine public<br>disclosure within 7 days<br>of these entities being<br>advised of their<br>shortlisting. |

**2.** In accordance with the NSW Government Tendering Guidelines referred to in clause 7.1.2, the following **contract** information is required to be disclosed -

| Contract size and type   | Level of disclosure   | Basis of disclosure  |
|--|---|--|
| Class 1 contracts<br>All government<br>contracts with estimated<br>value \$150,000 or<br>above). | <ul> <li>a) The name and business address of the contractor;</li> <li>b) Particulars of any related body corporate (within the meaning of the Corporations Act 2001 of the Commonwealth) in respect of the contractor, or any other private sector entity in which the contractor has an interest, that will be involved in carrying out any of the contractor's obligations under the contract;</li> <li>c) The date on which the contract became effective and the duration of the contract;</li> <li>d) Particulars of the project to be undertaken, the goods or services to be provided or the real property to be leased or transferred under the contract;</li> <li>e) The estimated amount payable to the contract or any provisions under which</li> </ul> | Basis of disclosure<br>Routine public<br>disclosure within 60<br>days after the contract<br>becomes effective. |

| Class 2 contracts<br>Class 1 contracts (i.e<br>government contracts<br>with estimated value<br>\$150,000 or above)<br>which also:<br>- result from a direct<br>negotiation where<br>there has not been a<br>tender process; or<br>- have been the<br>subject of a tender<br>process and where<br>the final contract<br>terms and conditions<br>are substantially<br>negotiated with the<br>successful tenderer<br>(this includes<br>alliance type<br>contracts); or<br>- involve operation or<br>maintenance<br>obligations for 10<br>years or longer; or<br>- involve a privately<br>financed project as<br>defined by relevant<br>Treasury guidelines;<br>or<br>- involve a transfer<br>of land or other<br>asset to a party in<br>exchange for the<br>transfer of land or<br>other asset to an | <ul> <li>g) A description of any provisions with respect to the renegotiation of the contract;</li> <li>h) In the case of a contract arising from a tendering process, the method of tendering and a summary of the criteria against which the various tenders were assessed; and</li> <li>i) A description of any provisions under which it is agreed that the contractor is to receive payment for providing operational or maintenance services.</li> <li>The information required for class 1 contracts and</li> <li>a) Particulars of future transfers of significant assets to the State at zero, or nominal, cost to the State, including the date of their proposed transfer;</li> <li>b) Particulars of future transfers of significant assets to the contractor, including the date of their proposed transfer;</li> <li>c) The results of any cost-benefit analysis of the contract conducted by the agency;</li> <li>d) The components and quantum of the public sector comparator if used;</li> <li>e) Where relevant, a summary of information used in the contract to undertake a specific project (such as construction, infrastructure or property development), is to be apportioned between the parties, quantified (where practicable) in net present-value terms and specifying the major assumptions involved;</li> <li>g) Particulars of any significant guarantees or undertakings between the parties, including any guarantees or undertakings with respect to loan agreements entered into or proposed to be entered into; and</li> </ul> | Routine public<br>disclosure within 60<br>days after the contract<br>becomes effective. |
|---|--|---|
| Class 3 contracts<br>Class 2 contracts where<br>the estimated value of<br>the government contract<br>is \$5 million or more.  | <ul> <li>The information for class 1 and 2 contracts and the complete contract, less confidential information.</li> <li>Note: if some or all of a class 3 contract is not disclosed for reasons of confidentiality, the agency is to disclose:</li> <li>the reasons for not publishing the contract or provisions;</li> <li>a statement as to whether the contract or</li> </ul>   | Routine public<br>disclosure within 60<br>days after the contract<br>becomes effective. |

| provisions will be published and, if so, when; and   |  |
|--|--|
| <ul> <li>where some but not all of the provisions of<br/>the contract have been disclosed, a<br/>general description of the types of<br/>provisions that have not been published.</li> </ul> |  |

#### 3. Requests for disclosure of additional contract information

Tenderers must acknowledge that any person may make a specific request to the State Contracts Control Board for any item of contract information for class 1 or class 2 contracts, or for a copy of a contract where it is a class 3 contract, which is not required to be routinely disclosed under section 15A of the Freedom of Information Act 1989. (" FOI Act") The State Contracts Control Board must provide the requested contract information or the requested copy of the contract to the requesting person (less any confidential information) within 60 days of receiving the request.

Where a copy of a contract has been requested and some or all of the contract is not provided for reasons of confidentiality, the State Contracts Control Board will disclose:

- the reasons for not providing some provisions or all of the contract;
- a statement as to whether the contract or provisions will be provided and, if so, when; and
- where some but not all of the provisions of the contract have been provided, a general description of the types of provisions that have not been provided.

#### 4. Disclosure of amendments or variations to contract information under the FOI Act

The FOI Act requires that, if there is an amendment to the contract terms or a material variation made under the contract that changes information already routinely disclosed under the FOI Act, the State Contracts Control Board must ensure that the information concerning the change is routinely disclosed within 60 days after such amendment or variation becomes effective, less any confidential information. In the case of class 3 contracts, the full amendment or material variation, less any confidential information, must be disclosed within the 60 day timeframe.

#### 5. Confidential information

None of the disclosure obligations contained in the FOI Act, or the requirements for disclosing tender information or a copy of a contract or information in relation to a contract under these guidelines, require the disclosure of:

- the commercial-in-confidence provisions of a contract (as defined in section 15A (14) of the FOI Act) (the contractor's financing arrangements; the contractor's cost structure or profit margins; the contractor's full base case financial model; any intellectual property in which the contractor has an interest; or any matter whose disclosure would place the contractor at a substantial commercial disadvantage in relation to other contractors or potential contractors, whether at present or in the future.);
- details of any unsuccessful tender;
- any matter that could reasonably be expected to affect public safety or security; or
- information which would be exempt from disclosure if it were the subject of an application under the FOI Act.

Where such confidential information is withheld, the State Contracts Control Board must inform the requesting person that access to that information may be sought in accordance with the Freedom of Information Act. This will enable a person seeking the information to challenge that decision under the Freedom of Information Act.

6. Tenderers are invited to nominate items they consider are confidential and why.

#### NSW Procurement – Contracting Services is a Business Unit of the NSW Department of Commerce

NSW Procurement – Contracting Services invites this tender for and on behalf of the NSW Government State Contracts Control Board

# PART C The Tender Response

### PART C1 Tender Response to Part B

### 1. Introduction

- 1.1 The information provided in this Part will be used in the assessment of Tenders. Questions have been framed to ensure responses that are relevant to the selection criteria. Please provide attachments where necessary, clearly labelled and cross-referenced.
- 1.2 References to "you" in this Part means the tenderer and all responses given will be taken to be responses of the tenderer.
- 1.3 Tenderers may tender for one or more locations and must tender for an end to end solution.

### 2 Pricing and related factors

#### 2.1 Price Schedule

Tenderers are to complete the pricing schedule detailed at C2.

**System scenarios** – A range of scenarios have been prepared, each scenario being a system of a particular output, with particular panel types for a range of installation scenarios that relate to actual circumstance in schools.

**Greater Sydney Metropolitan** – Sydney Metropolitan includes the following areas Greater Sydney Metropolitan, Blue Mountains, Hunter/Central Coast, Illawarra

**Regional Areas** – includes all areas not included in the Greater Sydney Metropolitan and is to be priced as follows North Coast, New England, South East, Riverina and Western NSW

**Component Pricing** - Pricing will be requested for components, being a unit price for panels, inverters, meters and other necessary equipment. Rates will be requested for such things as labour and materials, transport and delivery.

**System Pricing** - Pricing is requested for system scenarios. The pricing for scenarios will need to be "constructed" from the unit prices and rates as submitted. Tenderers will be required to estimate the hours of labour required for each scenario as well as the travel, transport and delivery costs.

**Pricing by region** - tenderers are able to provide different pricing for scenarios for different regions. However prices for components such as panels, inverters, meters and other equipment, and materials, will need to be the same for all regions. The pricing variations for regions are restricted to such components such as labour (no of hours), travel, transport and delivery. Only one price per region for reach systems scenario is requested.

#### 2.2 Price Basis

Tenderers must indicate below the price basis of your Tender. Select the price basis from one of the options below (tick corresponding box below):

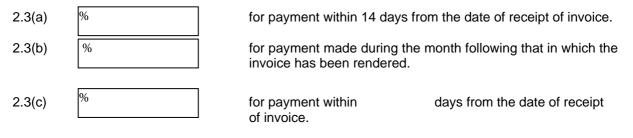

- Option 1:
   Firm for the entire duration of the Agreement \_\_\_\_\_(\_\_) months plus \_\_\_\_\_(\_\_) months optional extension period
- *Option 2:* Firm for the first twelve (12) months of the term of the Agreement then subject to review at the end of that period and each twelve (12) months following and at the request of the Contractor based on Benchmarking with other suppliers within the market place.

<indicate the appropriate box below>

| 1. |  |
|----|--|
| 2. |  |

#### 2.3 Settlement discounts

The Tender Prices are subject to a settlement discount of:-

#### 2.4 Other discounts

#### 2.4.1 Sole-Contractor discount

Indicate below whether you are willing to offer a discount from your tendered price in the event that you are the sole-Contractor for a Region

#### Yes/No

If "Yes", indicate below the size of the discount.

Indicate below whether you are willing to offer a discount from your tendered price in the event that you are the sole-Contractor for more than one Region.

#### Yes/No

If "Yes", indicate below the size of the discount.

Indicate below whether you are willing to offer a discount from your tendered price in the event that you are the sole-Contractor for the State.

#### Yes/No

If "Yes", indicate below the size of the discount.

#### 2.4.2 Rebates

Indicate below whether you are willing to offer Rebates for accumulative expenditure on all Government orders for the amounts specified below in each 12 month period. Tenderers may offer alternative amounts.

#### Yes/No

If "Yes", indicate below the size of the rebate and any conditions under which this discount will be given.

| Annual Sales                | Percentage Rebate |  |
|-----------------------------|-------------------|--|
| \$1,000,000 - \$5,000,000   |                   |  |
| \$5,000,001 - \$10,000,000  |                   |  |
| \$10,000,000 - \$20,000,000 |                   |  |
| >\$20,000,000               |                   |  |
| Other Please specify        |                   |  |
|                             |                   |  |
|                             |                   |  |

Tenderers are to note that any rebate will be payable directly to the NSW Department of Commerce.

#### 2.5 Locations Tendered

Please indicate what Location you are tendering for

| Location                       | Yes/No |
|--------------------------------|--------|
| Greater Sydney<br>Metropolitan |        |
| North Coast                    |        |
| New England                    |        |
| South East                     |        |
| Riverina                       |        |
| Western NSW                    |        |

### 3. Selection Criteria

The evaluation criteria for this RFT (which include but are not limited to) are:

### (a) Fitness for purpose including

### (i) Quality of product design and range of products,

| Schedule of Equipment                             |              |       |                             |                          |
|---|--------------|-------|-----------------------------|--------------------------|
| ltem  | Manufacturer | Model | Length of Time<br>on market | No of Units<br>Installed |
| 1.1 Rigid Monocrystalline<br>Photovoltaic Module  |              |       |                             |                          |
| For 1 kWp PV system                               |              |       |                             |                          |

• **Durability of product – used in an educational environment** Tenderers shall provide details in relation to the durability of the product and demonstrate that the Deliverables are suitable for installation within an educational environment

#### • Simplicity of connection to the school network

Tenderers shall provide details of how the Deliverables will be connected to the school network and provide details of any IT system requirements that may need to be considered.

#### Ease of use in an educational environment

Tenderers shall provide details of how the system can easily be used in an educational environment.

#### (ii) innovative aspects;

Tenderers shall provide details below of any innovative aspects of the systems offered

#### (iii) performance;

Tenderers shall provide details of the actual solar generation (kWh) versus predicted solar generation (kWh) for each unit offered.

#### (iv) Warranty and Servicing arrangements

Give full details of any guarantees or warranties relating to the Deliverables offered. If a specific warranty or warranties is or are stated to be a requirement or requirements in Part F, confirm that it is, or they are, offered. Where free service with respect to the Deliverables is offered during the period of guarantee or warranty, provide addresses (both Sydney and country areas) where service is available. State whether service is available at those points after the expiration of the period of guarantee or warranty and, if so, what charges are applicable.

The minimum extent of warranty offered is that prescribed by legislation, where applicable. Tenderers should refer to Part F, Annexure A for details of minimum warranty requirements

#### (v) Maintenance

#### **Maintenance Schedule**

Tenderers shall provide details of the recommended maintenance schedules for the solar power systems offered in the table below. All costs associated with maintenance are to be included at Part C2. Tenderers are advised that the customer may choose to use alternative maintenance providers. The use of alternative maintenance providers should not invalidate the warranty offered by tenderers.

| SYSTEM OR<br>COMPONENT     | MAINTENANCE ACTION   | FREQUENCY | REMARKS  |
|----------------------------|--|-----------|--|
|                            | Check for visual defects including:<br>a) Fractures<br>b) Browning or discolouration<br>c) Moisture penetration<br>d) Frame corrosion  |           | Modules with visual<br>defects should be<br>further inspected for<br>performance and<br>safety to determine<br>the need for<br>replacement |
| PV modules                 | <ul> <li>Inspect junction boxes for:</li> <li>a) Tightness of connections</li> <li>b) Water accumulation / build up</li> <li>c) Integrity of lid seals</li> <li>d) Integrity of cable entrance, glands and/or conduit sealing</li> <li>e) Integrity of clamping devices</li> <li>Verify by-pass diodes</li> </ul>  |           | Any defective seals,<br>clamps and by-pass<br>diodes should be<br>replaced   |
|                            | Verify mechanical integrity of conduits  |           | Any damaged<br>conduit should be<br>replaced   |
|                            | Verify insulation integrity of cables installed without conduit  |           | Any damaged cable should be replaced   |
| Wiring<br>installation     | <ul> <li>Check junction boxes for:</li> <li>a) Tightness of connections</li> <li>b) Water accumulation / build up</li> <li>c) Integrity of lid seals</li> <li>d) Integrity of cable entrance,<br/>glands and/or conduit sealing</li> <li>e) Integrity of clamping devices</li> <li>Verify:</li> <li>i. Blocking diodes</li> <li>ii. Surge arresters for degradation</li> </ul> |           | Any defective seals,<br>clamps, blocking<br>diodes and surge<br>arresters should be<br>replaced  |
|                            | Check earthing connections (if<br>applicable):<br>a) Tightness of connections<br>b) Corrosion  |           | Replace if<br>necessary  |
| Electrical characteristics | Measure open circuit voltages  |           | Record results in<br>maintenance<br>logbook  |

| SYSTEM OR<br>COMPONENT | MAINTENANCE ACTION  | FREQUENCY | REMARKS |
|------------------------|---|-----------|---------|
|                        | Measure short circuit currents  |           |         |
|                        | Check PV array electrical output is<br>consistent with prevailing weather<br>conditions |           |         |
|                        | Check inverter station operation is correct   |           |         |
|                        | Verify operation of circuit breaker(s)  |           |         |
| Protective devices     | Verify operation of earth fault current protection system                               |           |         |
|                        | Verify operation of solar array isolation device(s)                                     |           |         |
|                        | Verify tightness and integrity of bolts and other fastening devices                     |           |         |
| Mounting               | Check array mounting security   |           |         |
| structures             | Check damage to mechanical cable protection   |           |         |
|                        | Inspect for corrosion   |           |         |

Tenderers should provide any additional information in relation to warranty in the space below:

#### • Other comments on fitness for purpose

State here any other details you may wish to add, particularly regarding the innovative aspects and performance of the tendered Deliverables.

#### • Provide the following additional information:

Tenderers shall provide the following information as an attachment to their tender

Single Line Diagram (electrical configuration) of each proposed PV system. Include details of:

- Number of PV modules in series and in parallel
- Rating of circuit protection (fuses / switchgear)

| DC and AC cable sizes assuming 20m lengths  |
|---|
|   |
| Technical Specifications  |
| Tenderers shall provide full technical specifications for all products offered including but not limited to                               |
| Model and Brand   |
| <ul> <li>Proof of compliance to all standards and certification as detailed in Part F,<br/>Annexure A for all Products offered</li> </ul> |
| <ul> <li>Address all technical requirements detailed in Part F, Annexure A for all<br/>Products offered</li> </ul>                        |
| Methods of waterproofing roof/wall penetrations   |
| Additional Information  |
| Tenderers shall also provide the following information for all products offered   |
| <ul> <li>No of years the product has been on the Market</li> </ul>  |
| Availability of Product   |
| <ul> <li>No of each of the Products sold in the last 3 years</li> </ul>   |
| <ul> <li>No of Warranty claims made for each unit sold in the last 3 years</li> </ul>   |

#### (b) **Delivery requirements**

Provide details of your guaranteed delivery times from receipt of Order together with a production plan, detailing how you intend to maintain guaranteed delivery times. Tenderers should refer to Part E for details of the NSW Department of Education and Training's delivery requirements.

The production plan must provide full details of your supply chain process for the supply of the Deliverables. The plan must outline lead times, strategic alliances or specific arrangements with suppliers or sub-contractors.

Detail the outlets to which Orders may be directed, stating any limitations to the range of Deliverables that may be ordered at each.

Delivery shall be completed not later than ten (10) weeks from the date of receipt of an Order but before that date if possible. You must indicate below whether the stated delivery time will be met or, if not, the best delivery that can be offered. Delivery includes the full installation and commissioning of the solar power system.

Tenderers are to indicate below the lead-time for standard deliveries and installation in each of the following Regions.

| Location                       | Product class | Product class | Product class |
|--------------------------------|---------------|---------------|---------------|
| Greater Sydney<br>Metropolitan |               |               |               |
| North Coast                    |               |               |               |
| New England                    |               |               |               |
| South East                     |               |               |               |
| Riverina                       |               |               |               |
| Western NSW                    |               |               |               |

#### (c) Capacity to perform the Agreement including:

#### (i) **Production/technical capacity;**

Demonstrate the suitability of your resources/facilities/procedures for the purposes of fulfilling the Requirement, including your production processes, warehousing, dispatch, certification, transport and delivery arrangements. Include details of:

- (a) size of premises;
- (b) back up facilities and any significant equipment if available to ensure the completion of work;
- (c) maintenance schedules for any significant equipment nominated in (b).

Describe your current stock levels and any issues you may experience during different times of the year in maintaining necessary levels.

Tenderers are to provide details of the number of complete solar power systems of the type offered that they can supply and install within a 12 month period of each KW requested in this RFT. Tenderers are to provide this information for each type of solar power system offered.

#### Current Commitments

Please provide details on how you would integrate the operation of this requirement into your current business activities.

#### • High Demand

Tenderers shall provide details of how they would deal with an influx of orders and ensure availability of the Deliverables to meet delivery requirements.

#### • BSCE Accreditation (refer to Annexure A to Part F)

| Australian<br>Business Council<br>for Sustainable<br>Energy (BCSE)<br>grid-connected<br>photovoltaic power<br>system<br>accreditation | Accreditation<br>number | Accreditation<br>awarded | Accreditation expires |
|---|-------------------------|--------------------------|-----------------------|
| Design and<br>Supervise   |                         |                          |                       |

#### • In-service education and training (refer Annexure A to Part F)

Describe the in-service education and training that will be offered, where appropriate, in support of Deliverables supplied under this Agreement. All costs are to be included in the tendered price.

#### (ii) Ability to provide an end to end solution;

Tenderers shall provide details of how they will provide an end to end solution to meet DET's needs.

#### (iii) Human resource capacity, qualifications, skills and experience;

Provide details of qualifications and experience of key personnel to be involved in the operation of the proposed agreement.

#### (iv) Financial Capacity and stability (including years in business and security considerations)

State the number of years you have been in business in the form in which you are presently constituted.

State the number of years providing the required Service: \_\_\_\_\_

Scope of respondent's current business activities

• Financial Capacity and Viability of the respondent

Give the annual Australian turnover for the past three (3) years in \$A.

1. \_\_\_\_\_ 2. \_\_\_\_\_ 3. \_\_\_\_\_

During the course of the tender process, it may be required that you submit a copy of your last three annual financial reports to the Board, or to Kingsway Financial Assessments if so directed, in order to conduct financial analysis on behalf of the Board. Indicate below whether you will provide these reports if required.

Yes/No

If "**No**", comment below:

#### • Performance Management

Tenderers are to provide comments below in relation to the Performance Management at Schedule 7 to Part D. Tenderers shall also provide details of any additional performance measures which they believe should be considered as part of this Agreement.

Tenderers are to provide details in the table below of what they propose would be achievable measures for the Performance Management at Schedule 7, Part D

| Performance Measure           | % |
|-------------------------------|---|
| Time Management               |   |
| Standard of Work              |   |
| Personnel/Sub-Contractors     |   |
| Contract Administration       |   |
| Co-Operative Relations        |   |
| OH&S/Environmental Management |   |
| Solar Power Unit Performance  |   |

(v) Maintenance and support service levels including availability of help desk for repair and help calls;

If you have a toll-free help desk number specify the geographical area covered, the number(s) and help desk hours

Specify any non toll-free help desk number(s), corresponding toll charges, and help desk hours

#### (vi) Quality assurance systems

Indicate below whether you have attached any certification from approved testing authorities that confirm that the items tendered meet the relevant Australian, overseas or International Standards.

#### Yes/No

Indicate whether your company has attained certification under AS/NZS ISO 9001:2000 (including if you are in the process of transition from AS/NZS ISO 9001:1994 or AS/NZS ISO 9002:1994 to AS/NZS ISO 9001:2000) or is proceeding towards getting certification.

#### Yes/No

If you are in the process of attaining certification, provide evidence and a projected timetable and schedule for certification.

#### (vii) Suitability of sub-contractors;

Is any part of the Deliverables to be offered through a dealer or distributor? In this context, suppliers of raw materials and/or minor components to be incorporated into the Deliverables supplied by the Contractor are not regarded as dealers or distributors for the purpose of this question.

#### Yes/No

If "**Yes**", in respect of each nominated dealer or distributor please provide the following information, so far as applicable. If unable to provide this information in the format below, attach to your Tender the information required for each dealer or distributor.

| Dealer/distributor                 |  |
|------------------------------------|--|
| 1) If a company, Company           |  |
| Name                               |  |
| 2) If a partnership,               |  |
| Partnership Name                   |  |
| 3) If an individual,               |  |
| individual's name                  |  |
| 4) Trading Name                    |  |
| 5) Australian Business             |  |
| Number (ABN)                       |  |
| 6) Australian Company              |  |
| Number (ACN)                       |  |
| 7) Registered Office (if a         |  |
| company)                           |  |
| 8) Site Address (principal         |  |
| place of business)                 |  |
| 9) Postal Address                  |  |
| (principal place of                |  |
| business)                          |  |
| 10) Alternative Address            |  |
|                                    |  |

| 20) Switchboard Telephone          |  |
| No.                                |  |
| 21) Company E-mail                 |  |
| Address                            |  |
| 22) Website address                |  |
|                                    |  |
| 23)Items able to be                |  |
| supplied                           |  |

Is any part of the Deliverables to be offered through a sub-contractor? In this context, suppliers of raw materials and/or minor components to be incorporated into the Deliverables supplied by the Contractor are not regarded as sub-contractors for the purpose of this question.

#### Yes/No

If "**Yes**", in respect of each nominated sub-contractor, please provide the following information, so far as applicable:

| Sub-contractor                 |  |
|--------------------------------|--|
| If a company, Company Name     |  |
| If a partnership, Partnership  |  |
| Name                           |  |
| If an individual, individual's |  |
| name                           |  |
| 4) Trading Name                |  |
| 5) Australian Business         |  |
| Number (ABN)                   |  |
| 6) Australian Company          |  |
| Number (ACN)                   |  |
| 7) Registered Office (if a     |  |
| company)                       |  |
| 8) Site Address (principal     |  |
| place of business)             |  |
| 9) Postal Address (principal   |  |
| place of business)             |  |
| 10) Alternative Address        |  |
| 11) Contract Administration    |  |
| Contact Name                   |  |
| 12) Contract Administration    |  |
| Contact Telephone No.          |  |
| 13) Contract Administration    |  |
| Contact E-mail Address         |  |
| 14) Contract Administration    |  |
| Contact Fax No.                |  |
| 15) Sales Order Contact Name   |  |
| 16) Sales Order Phone No.      |  |
| 17) Sales Order E-mail         |  |
| Address                        |  |
| 18) Sales Order Fax No.        |  |
| 19) Chief Executive Officer's  |  |
| (CEO) Name                     |  |
| 20) Switchboard Telephone      |  |
| No.                            |  |
| 21) Company E-mail Address     |  |
| 22) Website address            |  |
| 23)Items able to be supplied   |  |

### (viii) Suitability of proposed dealers, distributors and sub-contractors

For each nominated dealer or distributor, provide details of their experience and qualifications in the provision of similar Deliverables.

For each nominated sub-contractor, provide details of their experience and qualifications in the provision of similar Deliverables.

# (ix) Previous experience and performance on similar agreements for the products and services covered in this RFT or other products and services;

#### • Previous contract experience and standard of contract performance

Describe at least three (3) recent and relevant grid-connect photovoltaic system design and installations your organisation has been involved in the previous 2 years. Include details such as client references, the nature of the project (i.e. rooftop or groundmount) and the size of the photovoltaic installation (kWp). Note a key selection criteria to identify those parties with whom DET will seek to further discussions is demonstrable experience with one enterprise of similar complexity to DET that is of a similar size or can be scaled to DET's size

| Project Description | Project<br>Size<br>(kWp) | Equipment/Brand<br>/ Model Installed |
|---------------------|--------------------------|--------------------------------------|
|                     |                          |                                      |
|                     |                          |                                      |
|                     |                          |                                      |
|                     |                          |                                      |
|                     |                          |                                      |
|                     |                          |                                      |
|                     |                          |                                      |
|                     |                          |                                      |
|                     |                          |                                      |

Describe any previous experience in coordinating a solar powered program. This may include maintenance programs, government or non-government programs. Include details such as client references , the nature of the project and the value of the contract (\$).

22

| Project Description | Project<br>Value (\$) | Equipment/Brand<br>/ Model Installed |
|---------------------|-----------------------|--------------------------------------|
|                     |                       |                                      |
|                     |                       |                                      |
|                     |                       |                                      |
|                     |                       |                                      |
|                     |                       |                                      |
|                     |                       |                                      |
|                     |                       |                                      |
|                     |                       |                                      |
|                     |                       |                                      |

If you have undertaken any previous Contracts provide details of any assessment undertaken of your performance. If performance reports were prepared in respect of your performance, please provide copies.

#### • Other comments on capacity or ability to perform the agreement

State here any other details you may wish to add. Please also address your capacity to perform the Agreement in the context of the current commitments of your organisation. (Note that details of previous performance of similar agreements are sought in cl.10 below, and should not be referred to here.)

#### (x) Record of ethical behaviour in service delivery

Please provide an explanation of how your enterprise would be structured in respect of this contract to ensure that at all times it operated in the best interests of the Government. Also

provide information on any identified potential conflicts of interest and how they would be addressed in the operation of the contract.

| Indicate the measures your enterprise has in plac<br>manner, in all business dealings. | e to ensure that it always acts  | in an ethical |

# (xii) Compliance with other requirements of the Principal, (including ability to market the proposed Agreement).

The marketing of this agreement may include:

- (a) the provision of promotional material,
- (b) direct marketing,
- (c) product literature, brochures and other sales related activities.

Indicate below which, if any, of the activities above you would be prepared to assume responsibility:

Provide any other relevant information below

## (d) Compliance with the proposed conditions of Part D, and E if applicable.

Do you agree to be bound by all the conditions contained in Part D and E of this RFT?

#### Yes/No

If "No", provide a full statement of all amendments sought, giving reasons.

Do you agree to comply with clause 11.11, Minimum Insurance Requirements, contained in Part D of this RFT?

#### Yes/No

If "No", provide a full statement of all amendments sought, giving reasons.

Please list the insurances you currently hold, the respective amount (or Limit of Liability) for each insurance policy and their expiry dates.

(e) Compliance with NSW Government procurement policy and other applicable NSW Government policies, including

#### (i) NSW Government Code of Practice for Procurement

"Code" means the NSW Government Code of Practice for Procurement, as amended from time to time. The NSW Government Procurement Policy and code are available from the NSW Department of Commerce and can be viewed and downloaded from Department of Commerce Government Guidelines: Goods & Services Procurement Publication.

Have you have read the <u>NSW Government Code of Practice for Procurement</u> and taken them into consideration in preparing and submitting your Tender?

#### Yes/No

Tenderers must comply with the Code and agree to provide periodic evidence of compliance with the Code and access to all relevant information to demonstrate compliance for the duration of any agreement that may be awarded? Will you comply with the Code and the requirements imposed by it?

#### Yes/No

#### (ii) Industry Impact Assessment and Local Industry Participation Plan

#### Local Industry Participation Plan

Tenderers are required to provide a Local Industry Participation Plan (LIPP) in response to this Industry Impact Statement to be attached, in each case. The LIPP submitted will, if the Tender is accepted, be incorporated in the Agreement. The LIPP must contain:

- (a) a clear statement as to how the Tender meets the Government's requirement of maximising opportunities for local participation;
- (b) actions to be undertaken to meet and manage the Government's requirements;
- (c) actions for the monitoring of performance and reporting under the plan.

The LIPP must describe the likely impact of the Agreement should it be awarded in terms of:

- (a) support for regional development;
- (b) support for small and medium enterprises;
- (c) workforce development and management;
- (d) technology development and technology transfer, particularly impacting on identified technology development needs;
- (e) research and development or other investment projects;
- (f) export opportunities; and
- (g) any other positive impact.

Tenderer is to attach your Local Industry Participation Plan

#### (iii) SME involvement

It is NSW Government policy to encourage the development of local industry and to support SMEs. Does your business support this policy objective?

#### Yes/No

If Yes provide details of the likely percentage of the value of the Deliverables to be provided under the agreement that will be sourced from SMEs and of the activities that will be carried out by SMEs under the agreement.

State below how you will provide opportunities for SMEs in performing any Period Contract awarded. If the project involves formation of a relationship with one or more SMEs, provide the following information:

- (a) Name of, and contacts for, each SME
- (b) Description of each SME's role
- (c) Estimated dollar value of each SME's contribution, and
- (d) Level of value-added activity and any other benefits associated with each SME.

#### (iv) Regional Development

It is NSW Government policy to encourage regional development. Will your business support this policy objective? Yes/No

If **Yes**, provide the following details:

- (a) The positive impact that the work flowing to the local region will generate, and any adverse effect should the same work be awarded to a capital city based organisation.
- (b) The level and range of activities under the Agreement that will be affecting the region.
- (c) The number and type of regionally based enterprises participating in your Tender
- (d) The expected regional economic impact of your Tender in terms of:
  - training, other skills enhancement and the uptake or maintenance of existing technologies and capabilities
  - expected increases in employment and investment and
  - the expected impact on existing and future R&D programs and innovation.

#### (v) Workforce Development

Indicate measures you intend to implement to improve workforce diversity and provide equal employment opportunity for women, people of non-English speaking backgrounds and people with a physical disability if awarded the agreement.

#### (vi) Opportunities for ATSI people

Indicate measures you intend to implement to improve Aboriginal employment, business skills and economic conditions of Aboriginal communities if awarded the agreement.

#### (vii) Occupational Health, Safety & Rehabilitation

Tenderers are required to develop and attach, in each case a specific Health and Safety Management Plan for the Agreement.

In order to complete a Health and Safety Management Plan, and for instructions as the required content of the Plan, Tenderers are referred to the NSW Government Procurement Guidelines - OHS&R, specifically to attachments 1 and 2. This document is available electronically at <a href="http://www.dpws.nsw.gov.au/nr/rdonlyres/efxtycbtexzihzty3nnlyzzob2ktnrpdlojq6gsaft4hybie4s2tzvlgcvv">http://www.dpws.nsw.gov.au/nr/rdonlyres/efxtycbtexzihzty3nnlyzzob2ktnrpdlojq6gsaft4hybie4s2tzvlgcvv</a> aneaugupzschzvlkslbkx5fqpr4nqoka/ohs% 2006.pdf

Attach a specific Health and Safety Management Plan for the agreement.

The successful tenderer will be required to develop Safe Work Procedures for the Agreement. Safe Work Procedures must include, as a minimum, the following:

- (a) procedures that are relevant to the Tenderer's operations;
- (b) a description of the tasks and associated hazards;
- (c) all precautions to be undertaken to protect health and safety;
- (d) control measures and methods to minimise health and safety risks;

(e) reference to health and safety legislation, codes or standards applicable to the work; and if requested, obtaining Safe Work Method Statements from Sub-Contractors 7 days before commencement of the Agreement.

Does your organisation have Safe Work Procedures or specific health and safety instructions in place relevant to its operations?

#### Yes/No

If "**Yes**", provide below, or provide reference to below and attach to the completed Part C, a summary listing of procedures or instructions.

Does your organisation have any "permits to work" issued by WorkCover?

#### Yes/No

If "**Yes**", provide below, or provide reference to below and attach to the completed Part C, a summary listing of permits.

Does your organisation have documented accident, incident and hazard investigation reporting procedures in place?

#### Yes/No

If "**Yes**", provide below, or provide reference to below and attach to the completed Part C, an outline of these procedures.

Set out below, or attach to the completed Part C, an outline of the Safe Work Procedures that you will develop for the agreement, if awarded for each scenario detailed in the pricing schedule at Part C2.

Set out below, or attach to the completed Part C, details of the methods of working on each type of roof (i.e. metal deck/corrugated metal/tiled).

Indicate below whether you will request Safe Work Procedures from any sub-contractors, and if so when you will obtain this if your tender is accepted.

Provide evidence of your OHS&R performance record with relation to accident statistics (lost time, frequency rates, and duration rates).

Attach to the completed Part C the specific Health and Safety Management Plan that you have developed for the agreement, if awarded.

#### (viii) Environmental Management

Describe in what way or ways your organisation promotes the development of Ecologically Sustainable Development. For assistance in answering this question, you may refer to the Procurement Guidelines on Environment Management available electronically at (refer to the link below and click link on environmental management under Goods and Services Procurement):

http://www.dpws.nsw.gov.au/Government+Procurement/Government+Procurement+Publications/ Government+Procurement+Publications.htm?Page={62654EC8-817C-4162-B21B-36722E646E9B}

Provide evidence below of your environmental management and performance capability and your commitment to waste management and energy conservation practices.

Indicate measures you intend to implement to improve environmental performance and management if awarded the agreement

#### (f) Compliance with relevant Legislation and standards

Tenderers shall provide details of how they will ensure that they will comply with the legislation and standards contained in this tender

#### (g) Capacity and capability to facilitate electronic commerce through smartbuy®

#### (i) Electronic Commerce (Smartbuy®)

The E-Commerce section reviews the ability of your organisation to operate in an E-commence marketplace. The review considers your E-commerce capabilities in web-based access (information) and your ability to trade in an on-line environment (online ordering, e-payment and web based catalogue services / integration to government marketplaces, etc).

If you require more information contact the NSW Procurement Client Support Centre on 1800 NSW BUY (679 289) or <u>NSWP\_Support@commerce.nsw.gov.au</u> <<u>MAILTO:NSWP\_Support@commerce.nsw.gov.au></u>

As a supplier on NSW Government SCCB contracts you must maintain contract data and pricing information in the smartbuy® system. Only valid and approved pricing as reflected in smartbuy® will be accepted for NSW Government SCCB contracts. The terms and conditions under which you will maintain these details are outlined in Part D. Do you agree to maintain your information for the purposes of purchasing from smartbuy®?

#### Electronic Commerce smartbuy®

Department of Commerce/eBusiness Solutions requires all SCCB suppliers to register with to facilitate smartbuy® NSW government agencies to view and purchase goods and services online. The Client Services Unit in the eBusiness Solutions provides support services for all suppliers in completing the supplier engagement process, thereby offering maximum exposure of suppliers items to the government market. The steps required for getting established in are outlined smartbuy® below.

The NSW Government has placed a heavy focus on the use of electronic procurement to move significant volumes of NSW Government purchasing through smartbuy® . If you require more information contact the NSW Procurement Client Support Centre on 1800 NSW BUY (679 289) or <u>NSWP\_Support@commerce.nsw.gov.au</u> <<u>MAILTO:NSWP\_Support@commerce.nsw.gov.au></u>. smartbuy® enables eligible clients to electronically procure goods and services, generally on terms

established in Government Contracts. It is intended that all goods and services provided under the Board?s Agreements will be browsed, searched and where appropriate, purchased online via smartbuy®

All successful tenderers are required to accept Orders and other business documents and communications by electronic communication in accordance with the Electronic Transactions Act (NSW) 2000.

#### Participating in smartbuy®

Successful tenderers will be required to engage smartbuy® which is a three step exercise conducted by eBusiness Solutions. The first step for a successful tenderer is to register the organisation online, through the smartbuy® website.

The second step is for the nominated smartbuy® Supplier Administrator to complete smartbuy® training. This training is conducted by registering and completing the smartbuy® elearning program.

The final step is to have the catalogue content prepared, submitted, reviewed, confirmed and loaded into smartbuy® Catalogue content must be provided to smartbuy®

in the electronic format specified by the Board.

Upon completion of the engagement process, the Supplier Administrator will be issued with a USERID and PASSWORD. This will provide access to their catalogue information as held in smartbuy® as well as their supplier's profile. Buyers will then be able to view and purchase these catalogued items held in smartbuy®.

#### Additional supplier establishment Requirements

In addition to enrolling in smartbuy®, as explained above, successful tenderer organisations will be required to:

a) submit supplier profile information about themselves and the Goods/Services to which the Agreement applies, to eBusiness Solutions, and keep this information up to date;

b) provide pricing/product information in the specified electronic format; the format and process will be provided to successful Tenderers at the time of notification of acceptance of their tender response.

#### smartbuy® Operational Requirements

The smartbuy® solution is comprised of a number of procurement applications and services including smartbuy® CONNECT. smartbuy® CONNECT is based on an IBM MQ Series platform, and is a full service B2B hub offering a wide range of integration, document transformation and trading partner management capabilities.

All electronic documents transmitted through smartbuy? TRADE are routed via smartbuy® CONNECT. smartbuy? CONNECT may also be used for document transmission directly between Agencies and Contractors, without passing through smartbuy® TRADE.

Part D outlines the Trading Channels supported by smartbuy® CONNECT for the transmission and receipt of electronic procurement documents. Successful tenderers must select a Trading Channel and meet the smartbuy®

Channel Specification and adhere to the smartbuy® Document Specifications for that Trading Channel. For each electronic document implemented, Contractors must be capable of reading and actioning all mandatory and optional fields defined in the document specification.

If you are a successful tenderer, please nominate your preferred method of document transmission via smartbuy® CONNECT Trading Channels.

HTTPS/xCBL3.0 FTP/CSV Email/PDF Fax/PDF

Specify the type of business documents that you are able to send and receive by the Trading Channel specified in the previous question

What is your nominated method?

" PO

- " PO Change
- " PO Acknowledgement
- " Receipt
- " Receipt Change

- <sup>"</sup> Advanced Shipping Notice
- " Invoice
- " Technical Message Acknowledgement

#### Invoices

It is a requirement that Successful Tenders provide electronic invoices to smartbuy® for all purchases by all NSW Government agencies against this contract - irrespective of how the purchase order is received (for example, via fax, telephone, mail, vendor online ordering system, etc). Refer to Part D for details.

What is your nominated method?

HTTPS/xCBL3.0 SFTP/Invoice Web portal

If you become a successful tenderer, you will be required to provide catalogue content information in the required electronic format. Do you comply?

#### Yes/No

If "yes", short listed tenderers will be required to provide catalogue content in the required electronic format specified by the Board. This will allow purchasing to begin on the new contract from inception.

Should your organisation be short-listed for this contract, please confirm your acceptance of this catalogue content preparation requirement.

I have read and understood the smartbuy® documents and agree to comply with all the requirements.

All successful tenderers are required to provide and accept Orders and other business documents and communications by electronic communication in accordance with the Electronic Transactions Act (NSW) 2000. More information on the NSW Government's policy about electronic procurement and smartbuy® can be seen at

a) http://www.smartbuy.nsw.gov.au/ and

b) <u>Click Here</u>

Do you fully comply, substantially comply or not comply?

Successful tenderers will be required to engage smartbuy® which is a three step exercise conducted by eBusiness Solutions. The first step for a successful tenderer is to register the organisation online, through the smartbuy® website. Do you fully comply, substantially comply or not comply?

In addition to engaging smartbuy® as explained above, supplier organisations will be required to:

a) submit specified information about themselves and the Goods/Services to which the Agreement applies, to smartbuy® and keep this information up to date.

b) provide pricing/product information in the electronic format required by the Board. This format will be provided to successful Tenderers at the time of notification of acceptance of their tender response

Do you fully comply, substantially comply or not comply?

In helping the NSW Department of Commerce lead eProcurement adoption across NSW government through smartbuy®, please outline proposed initiatives that your organisation could implement to support and increase the volume of orders being transmitted through the smartbuy® CONNECT during the life of the contract.

If you are a successful tenderer, you must accept orders placed by electronic communication in accordance with the Electronic Transactions Act (NSW) 2000. Do you comply with this Act?

#### Yes/No

Attached is a copy of the sample catalogue format that is indicative of the contract product information data required. Successful tenderers will be required to complete this document in the required electronic format when requested. This information may be changed from time to time throughout the contract period.

Do you have EAN Barcoding of your Goods?

#### Yes/No

If awarded the Agreement, do you undertake to provide the Board with details of all EAN Barcodes available, or which may become available for use from time to time, for any Goods supplied under any Customer Contract

#### Yes/No

#### (h) Compliance with the Statement of Requirements.

Do the tendered Deliverables fully comply with Statement of Requirements at Part F

#### Yes/No

If "**No**" a full statement of deviations must be given, specifying the relevant clause/s or Deliverable/s and the extent of non-compliance to each.

# 4. Other information required

#### 4.1 Details of ownership

If you are a company, please provide details of your ownership, that is, Australian, Overseas, name of each shareholder holding 20% or more of your issued share capital, paid-up capital and other relevant details.

If you are a partnership, please provide a list of partners and details of the partnership financial arrangements.

#### 4.2 Contracting as agent/trustee

If awarded the Agreement, do you intend to contract in your own right or as agent for some other entity or entities? If an agent, identify the principal who will be bound by the Deed of Agreement and any authority given by that principal to you to execute any such agreement as its agent.

If awarded the Agreement, do you intend to contract in your own right or as trustee for some other entity or entities? If a trustee, provide a copy of the trust deed, set out the names of the trustees, and provide full details below of your capacity to enter any Deed of Agreement as a result of this RFT.

#### 4.3 Current Legal Proceedings

Are you or any of your directors or close associates currently, or have you, or have your directors or close associates been at any time within the last five years, the subject of any or any pending:

- (a) legal proceedings, including winding up or bankruptcy proceedings,
- (b) insolvency administrations or investigations; and/or
- (c) investigations by ICAC or any other public body?

#### Yes/No

If "Yes", please supply full details below:

#### 4.4 Addenda to this RFT after issue

Are you aware of any Addenda issued by the Board to this RFT after the issue of this RFT?

#### Yes/No

If the answer is "Yes", indicate below whether you have read and allowed for the Addenda in your Tender.

Please specify how many Addenda have you read and allowed for in your Tender.

It is the responsibility of the tenderer in accordance with the conditions of tender to ensure that they are aware of all addenda issued during the tender period. Failure by the tenderer to allow the addenda in the tender may result in the tender not being considered.

Please attach any addenda issued during the Tender period at this point along with your company's responses to same

#### 4.5 Further information

Provide below any further information you believe is relevant to your Tender, and cross-reference to any clauses of this RFT if applicable.

#### 4.6 Tender validity period

Indicate below the period for which your Tender will remain valid for acceptance from the deadline for lodgement of tenders.

**N.B.** The minimum validity period is as stated in cl.4.9 of Part B.

#### 4.7 Supply of Australian Business Number

If you do not currently have an ABN, state how and when you intend to obtain an ABN and register for GST.

N.B. Tenderers that do not have an ABN cannot enter into an agreement with the Board.

#### 4.8 Conflict of Interests

In lodging a tender to this RFT, are you aware of any real or perceived conflict of interests (including any relevant relationships) existing, which require your disclosure,

#### Yes/No

If the answer is "Yes, disclose conflict of interest

#### 4.9 National Product Catalogue (NPC)

Is your organisation a member of GS1 Australia?

#### Yes/No

Is your organisation assigning Global Trade Item Numbers (GTINs) to all products as the primary item identifier?

#### Yes/No

Is your organisation registered for the NPC?

#### Yes/No

Has your organisation already loaded product and pricing data onto the NPC for the purposes of exchanging this information with any of your customers?

#### Yes/No

If your organisation is not a member of GS1 Australia will you become a member, register for the NPC and meet the NPC requirements if awarded this contract?

#### Yes/No

# 5. Tenderer Identification Details

Type or write your identification details as required below.

Type or write your identification details as required below.

| 1)  | If a company, Company<br>Name                   |  |
|-----|---|--|
| 2)  | If a partnership, Partnership<br>Name           |  |

# PART C2 Price Schedule

# **Scenario Definition**

The Pricing Schedules contained in this Part require tenderers to provide costings based on scenarios which are detailed below.

#### SCENARIO A

#### Configuration: Flush-to-roof type installation on corrugated metal roof or metal deck roof

- 1. Roof construction is a standard colour metal deck roof or corrugated metal roof;
- 2. The roof is orientated  $\pm$  45 degrees to true north;
- 3. The roof pitch is at  $\pm$  20 degrees to the angle of latitude of the location;
- 4. Installation is on the roof of a single or double storey school building;
- 5. There is sufficient room on the roof to install the solar panels and mounting frame;
- 6. The panel mounting frames will be installed at the same angle and pitch as the roof;
- 7. The roof structure is suitable for panel mounting and does not require additional structural support;
- 8. The roof is in good condition;
- The nearest electrical distribution board is in good condition, is sufficiently rated to withstand the maximum load of the solar PV system and has enough spare poles to install the required additional AC switchgear;
- 10. There is no need to upgrade any existing wiring or safety switches;
- 11. There is sufficient space for installing a wall-mounted inverter station located within a lockable cubicle;
- 12. The panel mounting location is no further than 20 metres from the inverter station;
- 13. The inverter station is no further than 20 metres from the nearest electrical distribution board;
- 14. The data-logger is located adjacent to the inverter station, which is located no further than 20 metres from the nearest school network building distributor;
- 15. The solar panel location is not shaded during the day by trees or other obstructions;
- 16. The type of development is exempt development and does not require any building approvals;
- 17. The roof and building does not contain any asbestos product.

#### SCENARIO B

#### Configuration: Flush-to-roof type installation on tiled roof

- 1. Roof construction is a standard concrete or clay tiled roof;
- 2. The roof is orientated ± 45 degrees to true north;
- 3. The roof pitch is at  $\pm 20$  degrees to the angle of latitude of the location;
- 4. Installation is on the roof of a single or double storey school building;
- 5. There is sufficient room on the roof to install the solar panels and mounting frame;
- 6. The panel mounting frames will be installed at the same angle and pitch as the roof;
- 7. The roof structure is suitable for panel mounting and does not require additional structural support;
- 8. The roof is in good condition;
- 9. The nearest electrical distribution board is in good condition, is sufficiently rated to withstand the maximum load of the solar PV system and has enough spare poles to install the required additional AC switchgear;
- 10. There is no need to upgrade any existing wiring or safety switches;
- 11. There is sufficient space for installing a wall-mounted inverter station located within a lockable cubicle;
- 12. The panel mounting location is no further than 20 metres from the inverter station;
- 13. The inverter station is no further than 20 metres from the nearest electrical distribution board;
- 14. The data-logger is located adjacent to the inverter station, which is located no further than 20 metres from the nearest school network building distributor;
- 15. The solar panel location is not shaded during the day by trees or other obstructions;
- 16. The type of development is exempt development and does not require any building approvals;
- 17. The roof and building does not contain any asbestos product.

#### SCENARIO C

#### Configuration: Raked type installation on flat roof < 5° pitch

- 1. Roof construction is a standard colour low pitch (< 5°) metal deck roof, corrugated metal roof or concrete slab roof with water proof membrane;
- 2. The roof pitch is < 5 degrees to the horizontal;
- 3. Installation is on the roof of a single or double storey school building;
- 4. There is sufficient room on the roof to install the solar panels and mounting frame such that they do not shade each other to any extent between 10:00am and 3:00pm throughout the year;
- 5. The panel mounting frames will be raked to an angle  $\pm$  20 degrees to the location's angle of latitude and orientated towards true north;
- 6. The roof structure is suitable for panel mounting and does not require additional structural support;
- 7. The roof is in good condition;
- 8. The nearest electrical distribution board is in good condition, is sufficiently rated to withstand the maximum load of the solar PV system and has enough spare poles to install the required additional AC switchgear;
- 9. There is no need to upgrade any existing wiring or safety switches;
- 10. There is sufficient space for installing a wall-mounted inverter station located within a lockable cubicle;
- 11. The panel mounting location is no further than 20 metres from the inverter station;
- 12. The inverter station is no further than 20 metres from the nearest electrical distribution board;
- 13. The data-logger is located adjacent to the inverter station, which is located no further than 20 metres from the nearest school network building distributor;
- 14. The solar panel location is not shaded during the day by trees or other obstructions;
- 15. The type of development is complying development and requires a complying development certificate from a certified authority;
- 16. The roof and building does not contain any asbestos product.

#### SCENARIO D

#### Configuration: Raked type installation on pitched corrugated metal roof or metal deck roof

- 1. Roof construction is a standard colour metal deck roof or corrugated metal roof;
- 2. The roof is orientated  $> \pm 45$  degrees to true north;
- 3. The roof pitch is < 30 degrees to the horizontal;
- 4. Installation is on the roof of a single or double storey school building;
- 5. There is sufficient room on the roof to install the solar panels and mounting frame such that they do not shade each other to any extent between 10:00am and 3:00pm throughout the year;
- 6. The panel mounting frames will be raked to an angle  $\pm$  20 degrees to the location's angle of latitude and orientated towards true north;
- 7. The roof structure is suitable for panel mounting and does not require additional structural support;
- 8. The roof is in good condition;
- 9. The nearest electrical distribution board is in good condition, is sufficiently rated to withstand the maximum load of the solar PV system and has enough spare poles to install the required additional AC switchgear;
- 10. There is no need to upgrade any existing wiring or safety switches;
- 11. There is sufficient space for installing a wall-mounted inverter station located within a lockable cubicle;
- 12. The panel mounting location is no further than 20 metres from the inverter station;
- 13. The inverter station is no further than 20 metres from the nearest electrical distribution board;
- 14. The data-logger is located adjacent to the inverter station, which is located no further than 20 metres from the nearest school network building distributor;
- 15. The solar panel location is not shaded during the day by trees or other obstructions;
- 16. The type of development is complying development and requires a complying development certificate from a certified authority;
- 17. The roof and building does not contain any asbestos product.

# TOTAL MINIMUM RATED CAPACITY OF 1 KILOWATTS PEAK

The lump sums tendered shall form part of the contract. The amounts shall be used to assess tenders. Items shall comply with the technical specification. Prices in the schedule must allow for materials, demolitions, waste, transport, labour, overheads and profit. **Prices shall exclude GST and RECS shall be retained by the purchaser**.

#### **1. PHOTOVOLTAIC MODULES**

| Technology  | Price (\$) |
|---|------------|
| Monocrystalline photovoltaic modules                  | \$         |
| Multicrystalline/polycrystalline photovoltaic modules | \$         |
| Rigid amorphous photovoltaic modules                  | \$         |
| Flexible amorphous photovoltaic modules               | \$         |

#### 2. BASE SYSTEM

| Item to Tender   | Price (\$) |
|--|------------|
| Grid-Connect Inverter  | \$         |
| Data-Logger  | \$         |
| DC Switchgear  | \$         |
| AC Switchgear  | \$         |
| DC Combiner Box  | \$         |

| Western NSW              | \$       | \$<br>\$ | \$ |

#### SCHEDULE OF OPTIONAL ADDITIONS

Supply and installation of the following items:

| Item | Description   | Price Excl GST |
|------|---|----------------|
|      |   | (\$)           |
| 1    | 12 year maintenance as per Clause 10 of the technical specification to NSW region:  |                |
|      | Greater Sydney Metropolitan   | \$             |
|      | North Coast   | \$             |
|      | New England   | \$             |
|      | South East  | \$             |
|      | Riverina  | \$             |
|      | Western NSW   | \$             |
| 2    | Large electronic sign displaying PV system performance and containing as a minimum: | \$             |
|      | • Cumulative energy generation (kWh)  |                |
|      | • Cumulative CO <sub>2</sub> reduction (kg)   |                |
| 3    | Wireless communication device for monitoring PV system performance                  | \$             |
| 4    | A scrolling LED display   | \$             |
| 5    | An LCD screen   | \$             |
| 6    | Electrical metering for billing purposes to NSW region:                             | \$             |
| 7    | Hourly Labour Rate (\$/hour)  | \$             |
| 8    | Discount for Government Agencies surrendering RECs to Contractor                    | \$             |

#### SCHEDULE OF RATES

Supply and installation of the following items:

| Item | Description   | Unit      | Price Excl GST (\$) |
|------|---|-----------|---------------------|
| 1    | D.C. cabling in excess of the 20 metre allowance  | Per Metre | \$                  |
| 2    | A.C. cabling in excess of the 20 metre allowance  | Per Metre | \$                  |
| 4    | Cat5e data cabling in excess of the 20 metre allowance  | Per Metre | \$                  |
| 5    | Ducting and flexible conduit in excess of the 20 metre allowance                                  | Per Metre | \$                  |
| 6    | New load centre where insufficient spare poles available on nearest electrical distribution board | Each      | \$                  |
| 7    | Additional electrical work / wiring upgrade   | Per Hour  | \$                  |
| 8    | Planning approval for Scenarios A & B if Complying Development certificate is required            | Each      | \$                  |

# TOTAL MINIMUM RATED CAPACITY OF 2 KILOWATTS PEAK

The lump sums tendered shall form part of the contract. The amounts shall be used to assess tenders. Items shall comply with the technical specification. Prices in the schedule must allow for materials, demolitions, waste, transport, labour, overheads and profit. **Prices shall exclude GST and RECS shall be retained by the purchaser**.

#### **1. PHOTOVOLTAIC MODULES**

| Technology  | Price (\$) |
|---|------------|
| Monocrystalline photovoltaic modules                  | \$         |
| Multicrystalline/polycrystalline photovoltaic modules | \$         |
| Rigid amorphous photovoltaic modules                  | \$         |
| Flexible amorphous photovoltaic modules               | \$         |

#### 2. BASE SYSTEM

| Item to Tender   | Price (\$) |
|--|------------|
| Grid-Connect Inverter  | \$         |
| Data-Logger  | \$         |
| DC Switchgear  | \$         |
| AC Switchgear  | \$         |
| DC Combiner Box  | \$         |
| AC Cable (20 meters in length)   | \$         |
| DC Cable (20 meters in length)   | \$         |
| Cat5e Data Cable (20 meters in length)                                     | \$         |
| Ducting for DC Cabling (20 meters in length)                               | \$         |
| Flexible PVC Conduit for AC/DC/Cat5e Cabling (20 meters in length)         | \$         |
| Lockable Cabinet for Inverter Station                                      | \$         |
| Site Installation Report, Training and Documentation                       | \$         |
| All work and obligations under the contract NOT INCLUDED ELSEWHERE in this |            |
| schedule. Tenderers must provide detailed costings below.                  |            |
|  | \$         |
|  | \$         |
| SUBTOTAL   | \$         |

#### 3. MOUNTING SYSTEM (SUPPLY ONLY)

#### SCHEDULE OF OPTIONAL ADDITIONS

Supply and installation of the following items:

| Item | Description  | Price Excl GST                   |
|------|--|----------------------------------|
|      |  | (\$)                             |
| 1    | 12 year maintenance as per Clause 10 of the technical specification to NSW region:         Greater Sydney Metropolitan         North Coast         New England         South East         Riverina         Western NSW | \$<br>\$<br>\$<br>\$<br>\$<br>\$ |
| 2    | <ul> <li>Large electronic sign displaying PV system performance and containing as a minimum:</li> <li>Cumulative energy generation (kWh)</li> <li>Cumulative CO<sub>2</sub> reduction (kg)</li> </ul>                  | \$                               |
| 3    | Wireless communication device for monitoring PV system performance   | \$                               |
| 4    | A scrolling LED display  | \$                               |
| 5    | An LCD screen  | \$                               |
| 6    | Electrical metering for billing purposes to NSW region:  | \$                               |
| 7    | Hourly Labour Rate (\$/hour)   | \$                               |
| 8    | Discount for Government Agencies surrendering RECs to Contractor (excluding DET)   | \$                               |
| 9    | Discount for DET surrendering RECs to Contractor   | \$                               |

# SCHEDULE OF RATES

| Item | Description   | Unit      | Price Excl GST (\$) |
|------|---|-----------|---------------------|
| 1    | D.C. cabling in excess of the 20 metre allowance  | Per Metre | \$                  |
| 2    | A.C. cabling in excess of the 20 metre allowance  | Per Metre | \$                  |
| 4    | Cat5e data cabling in excess of the 20 metre allowance  | Per Metre | \$                  |
| 5    | Ducting and flexible conduit in excess of the 20 metre allowance                                  | Per Metre | \$                  |
| 6    | New load centre where insufficient spare poles available on nearest electrical distribution board | Each      | \$                  |
| 7    | Additional electrical work / wiring upgrade   | Per Hour  | \$                  |
| 8    | Planning approval for Scenarios A & B if Complying Development certificate is required            | Each      | \$                  |

# TOTAL MINIMUM RATED CAPACITY OF 3 KILOWATTS PEAK

The lump sums tendered shall form part of the contract. The amounts shall be used to assess tenders. Items shall comply with the technical specification. Prices in the schedule must allow for materials, demolitions, waste, transport, labour, overheads and profit. **Prices shall exclude GST and RECS shall be retained by the purchaser**.

#### **1. PHOTOVOLTAIC MODULES**

| Technology  | Price (\$) |
|---|------------|
| Monocrystalline photovoltaic modules                  | \$         |
| Multicrystalline/polycrystalline photovoltaic modules | \$         |
| Rigid amorphous photovoltaic modules                  | \$         |
| Flexible amorphous photovoltaic modules               | \$         |

#### 2. BASE SYSTEM

| Item to Tender   | Price (\$) |
|--|------------|
| Grid-Connect Inverter  | \$         |
| Data-Logger  | \$         |
| DC Switchgear  | \$         |
| AC Switchgear  | \$         |
| DC Combiner Box  | \$         |
| AC Cable (20 meters in length)   | \$         |
| DC Cable (20 meters in length)   | \$         |
| Cat5e Data Cable (20 meters in length)                                     | \$         |
| Ducting for DC Cabling (20 meters in length)                               | \$         |
| Flexible PVC Conduit for AC/DC/Cat5e Cabling (20 meters in length)         | \$         |
| Lockable Cabinet for Inverter Station                                      | \$         |
| Site Installation Report, Training and Documentation                       | \$         |
| All work and obligations under the contract NOT INCLUDED ELSEWHERE in this |            |
| schedule. Tenderers must provide detailed costings below.                  |            |
|  | \$         |
|  | \$         |
| SUBTOTAL   | \$         |

# 3. MOUNTING SYSTEM (SUPPLY ONLY)

| Technology                       | Scenario                       |                                |                                  |                                |
|----------------------------------|--------------------------------|--------------------------------|----------------------------------|--------------------------------|
|                                  | Scenario A                     | Scenario B                     | Scenario C                       | Scenario D                     |
|                                  | (Flush-to-roof installation on | (Flush-to-roof installation on | (Raked installation on flat roof | (Raked installation on pitched |
|                                  | corrugated metal or metal deck | tiled roof)                    | $< 5^{\circ}$ pitch)             | corrugated metal or metal deck |
|                                  | roof)                          |                                |                                  | roof)                          |
| Monocrystalline modules          | \$                             | \$                             | \$                               | \$                             |
| Multicrystalline/polycrystalline | \$                             | \$                             | \$                               | \$                             |
| modules                          |                                |                                |                                  |                                |

# SCHEDULE OF RATES

| Item | Description   | Unit      | Price Excl GST (\$) |
|------|---|-----------|---------------------|
| 1    | D.C. cabling in excess of the 20 metre allowance  | Per Metre | \$                  |
| 2    | A.C. cabling in excess of the 20 metre allowance  | Per Metre | \$                  |
| 4    | Cat5e data cabling in excess of the 20 metre allowance  | Per Metre | \$                  |
| 5    | Ducting and flexible conduit in excess of the 20 metre allowance                                  | Per Metre | \$                  |
| 6    | New load centre where insufficient spare poles available on nearest electrical distribution board | Each      | \$                  |
| 7    | Additional electrical work / wiring upgrade   | Per Hour  | \$                  |
| 8    | Planning approval for Scenarios A & B if Complying Development certificate is required            | Each      | \$                  |

# TOTAL MINIMUM RATED CAPACITY OF 4 KILOWATTS PEAK

The lump sums tendered shall form part of the contract. The amounts shall be used to assess tenders. Items shall comply with the technical specification. Prices in the schedule must allow for materials, demolitions, waste, transport, labour, overheads and profit. **Prices shall exclude GST and RECS shall be retained by the purchaser**.

#### **1. PHOTOVOLTAIC MODULES**

| Technology  | Price (\$) |
|---|------------|
| Monocrystalline photovoltaic modules                  | \$         |
| Multicrystalline/polycrystalline photovoltaic modules | \$         |
| Rigid amorphous photovoltaic modules                  | \$         |
| Flexible amorphous photovoltaic modules               | \$         |

#### 2. BASE SYSTEM

| Item to Tender   | Price (\$) |
|--|------------|
| Grid-Connect Inverter  | \$         |
| Data-Logger  | \$         |
| DC Switchgear  | \$         |
| AC Switchgear  | \$         |
| DC Combiner Box  | \$         |
| AC Cable (20 meters in length)   | \$         |
| DC Cable (20 meters in length)   | \$         |
| Cat5e Data Cable (20 meters in length)                                     | \$         |
| Ducting for DC Cabling (20 meters in length)                               | \$         |
| Flexible PVC Conduit for AC/DC/Cat5e Cabling (20 meters in length)         | \$         |
| Lockable Cabinet for Inverter Station                                      | \$         |
| Site Installation Report, Training and Documentation                       | \$         |
| All work and obligations under the contract NOT INCLUDED ELSEWHERE in this |            |
| schedule. Tenderers must provide detailed costings below.                  |            |
|  | \$         |
|  | \$         |
| SUBTOTAL   | \$         |

# 3. MOUNTING SYSTEM (SUPPLY ONLY)

| 7    | Hourly Labour Rate (\$/hour)  | \$                                     |
| 8    | Discount for Government Agencies surrendering RECs to Contractor (excluding DET)  | \$                                     |
| 9    | Discount for DET surrendering RECs to Contractor  | \$                                     |

# SCHEDULE OF RATES

| Item | Description   | Unit      | Price Excl GST (\$) |
|------|---|-----------|---------------------|
| 1    | D.C. cabling in excess of the 20 metre allowance  | Per Metre | \$                  |
| 2    | A.C. cabling in excess of the 20 metre allowance  | Per Metre | \$                  |
| 4    | Cat5e data cabling in excess of the 20 metre allowance  | Per Metre | \$                  |
| 5    | Ducting and flexible conduit in excess of the 20 metre allowance                                  | Per Metre | \$                  |
| 6    | New load centre where insufficient spare poles available on nearest electrical distribution board | Each      | \$                  |
| 7    | Additional electrical work / wiring upgrade   | Per Hour  | \$                  |
| 8    | Planning approval for Scenarios A & B if Complying Development certificate is required            | Each      | \$                  |

# TOTAL MINIMUM RATED CAPACITY OF 5 KILOWATTS PEAK

The lump sums tendered shall form part of the contract. The amounts shall be used to assess tenders. Items shall comply with the technical specification. Prices in the schedule must allow for materials, demolitions, waste, transport, labour, overheads and profit. **Prices shall exclude GST and RECS shall be retained by the purchaser**.

#### **1. PHOTOVOLTAIC MODULES**

| Technology  | Price (\$) |
|---|------------|
| Monocrystalline photovoltaic modules                  | \$         |
| Multicrystalline/polycrystalline photovoltaic modules | \$         |
| Rigid amorphous photovoltaic modules                  | \$         |
| Flexible amorphous photovoltaic modules               | \$         |

#### 2. BASE SYSTEM

| Item to Tender   | Price (\$) |
|--|------------|
| Grid-Connect Inverter  | \$         |
| Data-Logger  | \$         |
| DC Switchgear  | \$         |
| AC Switchgear  | \$         |
| DC Combiner Box  | \$         |
| AC Cable (20 meters in length)   | \$         |
| DC Cable (20 meters in length)   | \$         |
| Cat5e Data Cable (20 meters in length)                                     | \$         |
| Ducting for DC Cabling (20 meters in length)                               | \$         |
| Flexible PVC Conduit for AC/DC/Cat5e Cabling (20 meters in length)         | \$         |
| Lockable Cabinet for Inverter Station                                      | \$         |
| Site Installation Report, Training and Documentation                       | \$         |
| All work and obligations under the contract NOT INCLUDED ELSEWHERE in this |            |
| schedule. Tenderers must provide detailed costings below.                  |            |
|  | \$         |
|  | \$         |
| SUBTOTAL   | \$         |

# 3. MOUNTING SYSTEM (SUPPLY ONLY)

| Technology                       | Scenario                       |                                |                                  |                                |
|----------------------------------|--------------------------------|--------------------------------|----------------------------------|--------------------------------|

# Part C3 Acknowledgment And Confirmation Of Tender

Note to tenderers: If submitting a hard copy Tender, execute cl. 14.4. If submitting an electronic Tender, only complete cl. 14.5.

- 1 Lodgement of a Tender will itself be an acknowledgment and representation by you that you are aware of the requirements of the Code; that you will comply with the Code; and that you agree to report to the Board any breaches of the Code for the duration of the agreement.
- 2 I affirm that this is my Tender to supply the Deliverables sought in the RFT at the prices tendered, and in accordance with the conditions of the RFT except as expressly amended in my Tender, and that the information given in my Tender is correct:

Print Name and Title

Signature of tenderer (if an individual, as identified in clause 12)

or

Signature of authorised officer of tenderer (as identified in clause 12)

or

Signature of partner completing tender on behalf of partnership (as identified in clause 12)

3. If submitting an electronic Tender, do you acknowledge and accept that electronic submission in accordance with the requirements of the RFT and any conditions of the NSW Department of Commerce tenders web site is sufficient to verify and affirm that this is your Tender to supply the Deliverables at the prices tendered on the conditions contained in Part D, except as expressly amended in your Tender and that the information contained in your Tender is correct?

Note that such acknowledgment and acceptance is a necessary prerequisite to consideration of your Tender.

#### BETWEEN

**NEW SOUTH WALES STATE CONTRACTS CONTROL BOARD** for and on behalf of the Crown in right of the State of New South Wales, of McKell Building, 2-24 Rawson Place, Sydney, in the State of New South Wales ("the Board").

#### AND

[.....name of contractor.....] of [.....address.....] in the State of [.....] ("the Contractor").

#### BACKGROUND

- A. The Board issued the Request for Tender for the supply of the Deliverables.
- B. The Contractor submitted a tender that was accepted by the Board.
- C. The Board and the Contractor have agreed to enter into an Agreement for the supply of the Deliverables in the form of this Deed.

#### NOW THE PARTIES AGREE:

#### 1 Interpretation

# 1.1 Definitions

"Administrators" means Personnel of the Contractor who are responsible for managing Authorised Users within its organisation and receiving notices sent by the Board for purposes of complying with the Contractor's smartbuy® obligations

**"Agreement"** means this Deed of Agreement including the Schedules and Part E, Special Conditions of Agreement, where applicable.

Agency Performance Indicator (API) means performance indicators in respect of the Contractor's performance of this Agreement and which are scored by the Customers.

**"Applicable Discount"** means an applicable discount in Schedule 3 Pricing, as varied from time to time in accordance with this Agreement, or any other Applicable Discount which may be offered by the Contractor from time to time.

"Authorised Users" means Personnel who the Contractor authorises to access and use smartbuy® on its behalf and who are given access to do so by the Board.

"**Benchmarker**" means the independent company providing price benchmarking services in accordance with clause 5.6 and whose details are indicated in Schedule 1 item 4.

"**Board's Material**" means any material, document, or Information supplied by the Board, a Customer or any department or agency of the Crown to the Contractor by whatever means.

**"Board's Delegate"** means the Board's employee named in Schedule 1 item 10 responsible for the overall administration of this Agreement on behalf of the Board.

"Catalogue Information" means details and images and information about the Deliverables and pricing contained in a catalogue placed on smartbuy® by the Contractor or provided by the Contractor to the Board for such placement.

"**Category**" means generic categories comprising of multiple Products inclusive of the associated services for its supply.

"Change in Control" means a circumstance in which control is or may be exercised over the Contractor:

(a) through removal or appointment of directors of the Contractor;

- (b) by virtue of the direct holding of at least 15% of the voting shares in the Contractor or a holding company of the Contractor; or
- (c) by any other means whatsoever.

"Circumstances Beyond the Control of the Contractor" include:

- (a) acts of God;
- (b) fire, flood, or earthquake;
- (c) national emergency (including terrorist acts) or war; or
- (d) a serious industrial dispute.

"Confidential Information" means, in relation to a Party, information that:

- (a) is by its nature confidential;
- (b) is designated by that Party as confidential; or
- (c) the other Party knows or ought to know is confidential.

"**Consequential Loss**" means any loss recoverable at law (other than loss arising in the usual course of things) which is:

- (a) consequential upon other loss;
- (b) a loss of opportunity or goodwill;
- (c) a loss of profits;
- (d) a loss of anticipated savings or business;
- (e) loss of value of any equipment,

and any costs or expenses in connection with the foregoing.

"Contract Material" means New Contract Material and Existing Contract Material.

"**Contract Price**" means the total amount payable by the Customer to the Contractor for the Deliverables ordered under a Customer Contract and calculated in accordance with clause 5.2.

"Contractor Information" means the information that must be provided by the Contractor in smartbuy® covering its own organisation and that of its Designated and Nominated Subcontractors and includes names, addresses and contact details.

"Contractor's Cost Structure" means the Contractor's overall cost structure comprising of individual cost components for each Category and/or Product listed in Schedule 3.

"Contractor's Insolvency" means any of the following:

- (a) insolvency;
- (b) the Contractor indicates that it does not have the resources to perform the Agreement or any Customer Contract;
- (c) an application for winding up is made and not stayed within 14 days;
- (d) a winding up order is made;
- (e) a controller, administrator, receiver and manager, provisional liquidator or liquidator is appointed;
- (f) a mortgagee enters the possession of any property of the Contractor;
- (g) notice is given of a meeting of creditors for the purposes of a deed of arrangement; or
- (h) any actions of a similar effect are taken.

"Customer" means the Eligible Customer that places the order with the Contractor under the Agreement.

"Customer Contract" means the contract that is made between the Contractor and a Customer when that Customer places an order.

"**Deed**" means a form in which a contract or agreement can be recorded which requires execution under the parties' seal.

"**Deliverables**" means the goods and associated services, the Works or the goods only to be supplied by the Contractor and itemised in Schedule 3.

"**Designated Subcontractors**" means the comprehensive list of subcontractors, resellers and distributors that the Contractor will use for the purposes of this Agreement and named in smartbuy® as such.

#### "Eligible Customer" means

- (a) any public sector service agency employing staff appointed under the *Public* Sector Employment and Management Act 2002 as amended from time to time;
- (b) a public body as defined by clause 18(4) of the *Public Sector Management* (Goods and Services) Regulation 2000 being:
  - (i) a government trading enterprise (including a State owned corporation);
  - (ii) a public or private hospital (including an area health service);
  - (iii) a local government agency;
  - (iv) a charity or other community non-profit organisation;
  - (v) a public or private school or a college or university;
  - (vi) a public authority of this State, the Commonwealth or of any other State or Territory;
  - (vii) a contractor to a public authority (but only in respect of things done as such a contractor);
- (c) a Nominee Purchaser provided that it satisfies the requirements of clause 3.6; and
- (d) such other persons or entities, which the Board may from time to time in its discretion, determine through a customer registration process.

"Existing Contract Material" means any material which is existing at the date of this Agreement and which may be incorporated in to the New Contract Material.

"Externally Hosted Catalogue" means Catalogue Information hosted in a system other than smartbuy®'s physical infrastructure which is accessible via smartbuy®.

**"Free to Desktop"** means free delivery to individual floors, departments and sections of a department and is the basis for purchase of products under which the Contractor is responsible for supply, delivery, insurance and off loading of products at the Customer's individual points of acceptance within a building, location, or site.

"FREE-INTO-STORE (FIS)" means free into store and is the basis for purchase of products under which the Contractor is responsible for supply, delivery, insurance and off loading of products at the Customer's premises at the point of acceptance.

"Guaranteed Delivery Time" means the guaranteed time for the supply of the Deliverables as specified in Schedule 2 of this Agreement, or such earlier time as may be agreed by the Customer and the Contractor in respect of a particular Customer Contract.

"Information" includes information in the form of data, text or images.

"Intellectual Property" includes copyright, patent, trademark, design, semiconductor or circuit layout rights, trade, business or company names, or other proprietary rights, or any rights to registration of such rights existing in Australia, whether created before or after the date of this Agreement. **"Key Performance Indicators"** means performance indicators in respect of the Contractor's performance of this Agreement, and which are scored by the Board.

**"Key Personnel"** means the personnel of the Contractor specified in Schedule 1 item 12.

"Management Fee" means the fee payable by the Contractor to the Board in accordance with clause 9.

**"Minimum Order Quantity"** means the minimum quantity of each Deliverable ordered by a Customer, given in Order Units.

"**New Contract Material**" means any material brought into existence as part of, or for the purpose of providing the Products including records, documents and Information stored by any means.

"**Nominated Subcontractors**" means a subcontractor nominated by the Board that must be used by the Contractor and indicated in smartbuy® as such.

"Nominee Purchaser" means a contractor to a Public Sector Service agency, nominated by the Public Sector Service agency authorised to place Customer Contracts under Agreements for things done as such a contractor and registered by NSW Procurement – Contracting Services.

"NON FREE-INTO-STORE (NFIS)" or "Ex Factory" or "Ex Works" is the basis for purchase of Deliverables under which the Contractor is responsible only for providing the products in a suitable condition for transport to a single delivery point within the Greater Sydney Metropolitan Area. The Customer is responsible for transport, insurance, unloading and assembly if necessary from the on-line delivery point.

"**NSW Procurement – Contracting Services**" means a business unit of the NSW Department of Commerce, representing the Board and authorised to arrange and administer contracts on behalf of the Board.

**"Order Units"** means the unit(s) used when ordering Deliverables from the Contractor. An Order Unit may be "each", "per box", "per carton" or some other unit.

"**Overall Performance Indicators**" means the holistic performance indicators used by the Board to measure the performance of the Contractor under this Agreement and comprise indicators scored by the Customers (ie.API) and the Board (KPI).

"**Payment Period**" means each period nominated in item 6 of Schedule 1 or where this Agreement expires or is terminated before the conclusion of one such period, the period up to and including the date of expiration or termination.

"Parties" means the Board, Contractor, and the Customer.

"**Personal Information**" has the same meaning as in Privacy and Personal Information Protection Act 1998 (NSW).

"Personnel" of a Party means;

- (a) the officers, employees, agents and contractors of the Board and the Customer,
- (b) in the case of the Contractor, includes subcontractors, resellers, distributors, ie.Designated Sub-Contractors in smartbuy®; and

"**Price**" means the price payable for a Deliverable as set out in Schedule 3 and, where relevant, means the price inclusive of any Applicable Discount specified in Schedule 3.

"**Price Schedule**" means Schedule 3 to this Agreement and/or variations made to it in accordance with this Agreement.

"**Product**" means an individual line item within a generic Category of products inclusive of associated services for its supply and delivery.

"Public Service" has the same meaning as that given to it in the *Public Sector Employment and Management Act 2002* (NSW).

"**Public Sector Service**" has the same meaning as that given to it in the *Public Sector Employment and Management Act 2002* (NSW).

"**Relationship Manager**" means the Contractor's employee named in Schedule 1 item 12.

"**Request for Tender**" means the request for tender issued by the Board, consequent to which this Agreement was awarded to the Contractor for the supply of the Deliverables.

"Schedule" means a schedule to this Agreement.

"**Security**" means the security in the amount and in the form specified by the Principal in its discretion, as set out in item 16 of Schedule 1. For example, the security may take the form of the undertaking in Schedule 9.

"Service Levels" means the service levels which need to be met by the Contractor under this Agreement in accordance with Schedule 7.

"smartbuy®TRADE" means an entry level product for organisations new to eProcurement. It delivers a single source, easy to use, electronic product and service ordering system.

**"smartbuy® CONNECT"** means the electronic document exchange providing the security, connectivity, transformation, and trading partner management services.

"**Statement of Requirements**" means the detailed description of the Deliverables to be provided under this Agreement in Schedule 2.

"**Standards**" means Australian Standards, where such exist and are applicable to the Deliverables, and includes international standards in the event of the lack of an applicable Australian Standard.

"State Contracts Control Board" means the State Contracts Control Board established by the *Public Sector Employment and Management Act 2002* and includes the duly authorised delegates of the Board, including officers of NSW Procurement – Contracting Services.

"State of New South Wales" means the Crown in right of the State of New South Wales.

"Statutory Requirements" means the laws relating to the performance of this Agreement or the lawful requirements of any authority with respect to the performance of this Agreement.

"Substantial Breach" means:

- (a) in the case of this Agreement and a Customer Contract, a substantial breach of a condition of this Agreement or a Customer Contract by the Contractor and includes any breach of the following clauses:
  - (i) clause 3.6.3 (Nominee Purchaser),
  - (ii) clauses 5.1 to 5.10 (Pricing),
  - (iii) clause 8.3 (Punctual Delivery) without being granted an extension of time under clause 8.4,
  - (iv) clause 9 (Management Fee),
  - (v) clause 10 (Confidentiality),
  - (vi) clause 12.6 (Minimum Insurance Requirements),
  - (vii) clause 13.1 (Service Levels),
  - (viii) clause 18.1 (No Assignment or Novation); and
  - (ix) clause 18.2 (Conflicts of Interests).

"**Term**" means the period of this Agreement, set out in item 2 Schedule 1 and any extension of the Term in accordance with clause 2.2.

**"Transaction"** means any use of smartbuy® including sale or purchase of Deliverables available through smartbuy®.

**"Transaction Data"** means any data created or generated or derived from the use of smartbuy® by any participant in smartbuy® service including any data about the purchase or sale of Deliverables that any participant in smartbuy® makes available or transmits to or through smartbuy® and includes any information which may identify the Customer from the smartbuy® database.

**"UNSPSC"** means United Nations Standards Products & Services Code, being a coding system which classifies both products and services for use on a global basis.

**"Warranty Period"** means, in relation to a particular Product, the period of warranty of that Product specified in Schedule 2.

"The Works" means, the Deliverables.

#### 1.2 Rules for interpreting this Agreement

- 1.2.1 Headings are for convenience only, and do not affect the interpretation. The following rules also apply in interpreting this document, except where the context makes it clear that a rule is not intended to apply.
- 1.2.2 A reference to:
  - (a) legislation (including subordinate legislation) is a reference to that legislation as amended, re-enacted or replaced, and includes any subordinate legislation issued under it;
  - (b) software, document or agreement, or a provision of a document or agreement, is a reference to that document, agreement or provision as amended, supplemented, replaced or novated;
  - (c) a person includes any type of entity or body of persons whether or not it is incorporated or has a separate legal entity;
  - (d) any thing (including a right, obligation or concept) includes each part of it.
- 1.2.3 Where:
  - the Contractor consists of more than one person or corporation, this Agreement binds each of them separately and any two or more of them jointly and severally;
  - (b) an obligation, representation or warranty made by the Contractor in this Agreement shall bind each person or corporation separately and jointly and each person or corporation shall alone be responsible for the performance of every obligation, representation or warranty contained in this Agreement.
- 1.2.4 A singular word includes the plural, and vice versa.
- 1.2.5 A word which suggests one gender includes the other genders.
- 1.2.6 If a word is defined, another part of speech of that word has a corresponding meaning.
- 1.2.7 The Parties may undertake business by the electronic exchange of information and the provisions of this Agreement will be interpreted to give effect to undertaking business in this manner.
- 1.2.8 In the event of any ambiguity, discrepancy or inconsistency in interpreting any term or terms of this Agreement, the order of priority in the interpretation of such term or terms will be in the order of:
  - (a) Part E, Special Conditions to this Agreement,

- (b) Schedule 6 to this Agreement;
- (c) The terms and conditions of this Agreement;
- (d) Schedule 1 and 2 to this Agreement;
- (e) Any other Schedules to this Agreement;
- (f) The Customer Contract;

#### 2 Term

#### 2.1 Duration

2.1.1 This Agreement commences on the commencement date specified in item 2 of Schedule 1 and expires on the expiry date specified in the same item 2, unless sooner terminated in accordance with this Agreement.

#### 2.2 Extension

2.2.1 The Board may in its sole discretion extend this Agreement for the period or periods specified in item 2 of Schedule 1.

#### 3 Formation

#### 3.1 Nature of the Agreement between the Board and the Contractor

- 3.1.1 This Agreement describes the terms and conditions between the Board and the Contractor under which the Contractor agrees with the Board that it will supply the Deliverables to Customers.
- 3.1.2 This Agreement together with Part E, Special Conditions constitutes the entire Agreement between the Parties. Any prior arrangements, Agreements, representations or undertakings are superseded.
- 3.1.3 The Parties agree that any Customer, although not a Party to this Agreement, may take the benefit of, and enforce, this Agreement in its own name.

## 3.2 No Assurance of Orders and Non-Exclusive Supply

- 3.2.1 This Agreement does not:
  - (a) imply that the Contractor will receive any orders for the Deliverables,
  - (b) imply that the Contractor is the exclusive provider of the Deliverables to the Customer; or
  - (c) oblige any Customer to place a Customer Contract for the Deliverables with the Contractor.
- 3.2.2 The Contractor acknowledges that the Board may, from time to time, in its discretion, appoint other suppliers under an agreement to supply the Deliverables and that the Contractor will make no objection to such appointment.

#### 3.3 Customer Contract

- 3.3.1 The Contractor agrees that each time a Customer places an order a separate Customer Contract is formed. The terms and conditions of the Customer Contract are those appearing in:
  - (a) this Agreement, any variations thereto, including any Schedules; and
  - (b) the order.

#### 3.4 Provisions of Agreement to apply to the Customer Contract

3.4.1 The provisions of this Agreement apply to the Customer Contract as if they were repeated in the Customer Contract.

3.4.2 Provided that in respect of the Customer Contract, "Agreement" and "Board" wherever appearing in the clauses described above shall be read as "Customer Contract" and "Customer" respectively.

#### 3.5 Contractor must supply to all Customers

3.5.1 If a Customer enters into a Customer Contract with the Contractor during the Term, the Contractor must supply the required Deliverables to the Customer on the terms and conditions of the Customer Contract and in accordance with this Agreement.

#### 3.6 Nominee Purchasers

Subject to clause 3.6.3, the Contractor must satisfy any Customer Contract placed under this Agreement by a Nominee Purchaser, provided that the Nominee Purchaser provides in its Customer Contract:

- (a) its NSW Procurement Contracting Services Registration Number;
- (b) the identity of the Eligible Customer nominating it;
- (c) the Agreement Number, name and location of the contract in respect of which the purchase is being made;
- (d) a statement that the Deliverables ordered are related to carrying out its obligations with the Eligible Customer; and
- (e) any other requirements in clause 8.1.2 of this Agreement applicable to Nominee Purchasers as determined by the Eligible Customer.
- 3.6.2 If at any time during the Term of this Agreement, the Contractor wishes to restrict its dealings with a Nominee Purchaser, the Contractor shall so request in writing to the Board. The Board may approve the request if there are genuine commercial reasons for the Contractor's request. If approved by the Board, the details of the restrictions will be included in item 3, Schedule 1.
- 3.6.3 Where the Board does not approve a request of the Contractor under clause 3.6.2 and the Contractor refuses to deal with a Nominee Purchaser, the Board may consider it a Substantial Breach of this Agreement.
- 3.6.4 The Contractor may at any time lift the restrictions it has sought to be placed on its dealings with a Nominee Purchaser and shall notify the Board accordingly.
- 3.6.5 If the Contractor makes a supply under the Agreement to an entity purporting to be a Nominee Purchaser, the Contractor is taken to be satisfied that the supply is properly made under this Agreement.

#### 3.7 Supply through Designated and Nominated Subcontractors

- 3.7.1 The Contractor must supply the Deliverables directly to Eligible Customers or through the Designated and Nominated Subcontractors indicated in smartbuy® in accordance with Schedule 6.
- 3.7.2 If an order is placed by a Customer on a Designated or Nominated Subcontractor, the Contractor is deemed to have entered into a Contract with the Customer.
- 3.7.3 The Contractor must ensure that its Designated and Nominated Subcontractors supply the Deliverables in accordance with the terms of this Agreement.
- 3.7.4 The Contractor must ensure that the Designated Subcontractors in smartbuy® are current and up to date. In the event of a change being required to smartbuy®, as a result of an addition or deletion of a Designated Subcontractor, the Contractor must give notice to the Board within 7 days of such event, in order that smartbuy® can be updated in a manner and format as required by the Board.
- 3.7.5 The Contractor's obligations under this Agreement are not affected in any way by the supply through Designated and Nominated Subcontractors.

# 4 The Deliverables

#### 4.1 List of Products and Categories

4.1.1 The Deliverables to be supplied by the Contractor under this Agreement are listed in Schedule 3.

#### 4.2 Variation of Product Description

- 4.2.1 The Contractor must notify NSW Procurement Contracting Services in writing as soon as practicable of any variation to the description of a Product offered in Schedule 3.
- 4.2.2 A variation under clause 4.2.1 may include a variation to the description of the number or name of the Product but excludes a variation:
  - (a) to the Price of the Product;
  - (b) that modifies or upgrades the Product; or
  - (c) that introduces a new Product to the Price Schedule.
- 4.2.3 NSW Procurement Contracting Services will notify the Contractor of its acceptance or rejection of the variation to the description of a Product. If the variation is accepted, it shall be taken to be incorporated into Schedule 3.

#### 4.3 Improvements to Products

- 4.3.1 If during the Term the Contractor makes available on a general commercial basis Products that:
  - (a) are modified versions or upgrades of a Product; or
  - (b) have a function or purpose similar to that performed by a Product; or
  - (c) have a new function or purpose consistent with the nature of the Product,

then the Contractor must offer the Board the same Product under this Agreement within 30 days of such Product being available on a general commercial basis.

- 4.3.2 The Product offered by the Contractor under clause 4.3.1 will form part of Schedule 3 when the Board notifies its acceptance of the offer. Prior to accepting or rejecting the Contractor's offer, the Board may request the Contractor to provide any further data reasonably required within 14 days to enable the making of an informed decision on the offer. The Contractor must supply the data within the nominated time frame.
- 4.3.3 In the event that the Board has not notified the Contractor of its acceptance of the Contractor's offer within 30 days, the offer will be deemed not to have been accepted by the Board.

#### 5 Pricing

#### 5.1 Contractor's Obligations

5.1.1 The Contractor must supply the Products on the basis of the Prices in Schedule 3.

#### 5.2 Calculating the Contract Price

5.2.1 The Pricing for the Products in Schedule 3, includes all applicable levies, duties, taxes, insurances, packaging, imposts, overheads and profits, any Applicable Discounts, but is exclusive of GST.

#### 5.3 Conduct of Price Negotiations

5.3.1 The Contractor will not conduct or participate in price negotiations with any Customer to supply the Deliverables at Prices different from those in this Agreement. All negotiations with the Contractor relating to Prices under this Agreement will be conducted by the Board.

# 5.4 Price Variation

- 5.4.1 The Contractor may not seek to vary the Price of a Product and/or Category listed in Schedule 3 except in accordance with the frequencies and methodology indicated in Schedule 3. Subject to the Contractor having provided the Board with sufficient documentation to justify the application, and subject to clause 13.1.2(a), the Board may in writing, approve the application within 30 days of lodgement.
- 5.4.2 Price variations approved by the Board shall apply to all Customer Contracts made on or after the date upon which the Board publishes the varied price on smartbuy®.
- 5.4.3 Where the Price variation is accepted, Schedule 3 will include the varied Price. The varied Price becomes the basis from which any future applications for Price variations will be calculated.
- 5.4.4 The Board reserves the right to delete a Product and/or Category from Schedule 3 if it considers a Price variation application to be unreasonable.
- 5.4.5 Notwithstanding any other provision in this Agreement, the Contractor may apply in writing to the Board to decrease its Prices at any time without any supporting documentation.

#### 5.5 Transparency of the Contractor's Cost Structure

- 5.5.1 The Parties acknowledge that this Agreement is based on a transparent and open approach to the Contractor's Cost Structure. Where the Contractor's Cost Structure of any Category and/or Product undergoes any change to that specified in Schedule 3, the Contractor must notify the Board within 15 days of the change.
- 5.5.2 If requested by the Board, the Contractor must provide details of its cost prices and margins, and copies of invoices from its own subcontractors (including any sub suppliers) for specified Categories and/or Products during a specified period and the Contractor must ensure that the Contractor is able to comply with this clause for the Term (including not entering into any confidentiality agreements which prevent compliance with this clause).

#### 5.6 Benchmarking

- 5.6.1 Throughout the Term of this Agreement the Contractor must ensure that the Price of each Product remains competitive to the prices of the same or similar products available in the market place.
- 5.6.2 For the purposes of determining whether the Prices under this Agreement are competitive, the Board will at any time after the first anniversary of the Agreement commencement date indicated in Schedule 1 item 2, and at 12 monthly intervals thereafter, engage the services of the Benchmarker indicated in Schedule 1 item 4. The Benchmarker will review whether the Price of those Categories and/or Products in Schedule 3 as nominated by the Board, are competitive when compared to Prices of such Categories and/or Products supplied under comparable arrangements including arrangements for the supply to the private sector.
- 5.6.3 The Contractor must give proper and considered weight to any recommendation that the Benchmarker may make with respect to whether the Prices are competitive and take prompt appropriate action to vary its Prices.
- 5.6.4 The costs of the Benchmarker will be based on the rates specified in Schedule 1 item 4 and will be paid for as follows:
  - (a) Where the Prices of any Services (as nominated by the Board), are higher than the average industry price, the full costs of the Benchmarker must be met by the Contractor;
  - (b) Where the Prices of any Services (as nominated by the Board), are lower than the average industry price, the full costs of the Benchmarker will be met by the Board.

# 5.7 Rebates

5.7.1 The Contractor warrants that if at any time during the Term of this Agreement, it receives any rebate, discount, commission or other subsidy on any Product that it purchases from its subcontractors or other third party suppliers, the benefit of such rebate, discount, commission or subsidy will be directly passed on to Customers under this Agreement.

#### 5.8 Bulk Purchase Discounts

- 5.8.1 If the volume to be purchased by Customers of any Category or Product under this Agreement increases or is anticipated to increase, the Board may negotiate a Price reduction or an increase in the Applicable Discount from the Contractor.
- 5.8.2 The Parties agree that the new Price or the new Applicable Discount under clause 5.8.1 shall be taken to be a variation of the Agreement in accordance with clause 7.

#### 5.9 Continuous Best Price

- 5.9.1 Notwithstanding any other clause in this Agreement, where the Board has been able to confirm that the external market pricing for any Product or Category in Schedule 3 is consistently more competitive than under this Agreement, the Board will provide the Contractor with reasonable evidence of such market situation and request the Contractor vary its Prices to align with the market.
- 5.9.2 Where the Contractor offers more favourable prices to any other purchaser of similar Deliverables in NSW purchased in similar circumstances, including volumes (where Price is volume dependent), timing and terms and conditions where they have a substantial impact on price, it must promptly make the more favourable price available to all Customers entitled to the benefit of this Agreement for future orders, and amend Schedule 3 accordingly. The Contractor must further update its catalogue in smartbuy® to reflect the favourable price.

#### 5.10 Goods and Services Tax

5.10.1 In this clause and Agreement:

"Consideration", "Tax Invoice", "Taxable Supply" and "Supply" have the same meaning as provided for in the GST Law.

"GST" is a goods and services tax and has the same meaning as in the GST Law.

"**GST Law**" means any law imposing a GST and includes *A New Tax System* (Goods & Services Tax) Act 1999 (Cth) or if that Act does not exist, means any Act imposing, or relating, to a GST and any regulation based on those Acts.

- 5.10.2 The Contractor must hold an Australian Business Number (ABN) and be registered for GST.
- 5.10.3 Every invoice issued by a person making a Supply must be in the form of, or be accompanied by, a valid Tax Invoice. No amount is payable until a valid Tax Invoice is received.
- 5.10.4 If there is any abolition or reduction of any tax, duty, excise or statutory charge associated with the GST, or any change in the GST, the Consideration payable for the Supply must be varied so that the Contractor's net dollar margin for the Supply remains the same.
- 5.10.5 Any contract entered into by a Party to this Agreement with a third party which involves a Supply being made, the cost of which will affect the cost of any Supply made under or in connection with this Agreement, must include a clause in equivalent terms to clause 5.10.4.
- 5.10.6 The Parties agree that this clause will apply to the Management Fee payable by the Contractor to the Board.

# 6 Payment

#### 6.1 Payment of Contract Price

- 6.1.1 In consideration of the Contractor providing the Deliverables under this Agreement, the Customer shall, subject to the terms and conditions of the Customer Contract, pay the Contractor the Contract Price in the amounts set out in the Customer Contract.
- 6.1.2 Failure by any Customer to pay the Contract Price at the due time will not be grounds to avoid performance of the Customer Contract.

#### 6.2 Invoices and Time for Payment

- 6.2.1 All claims for payment made by the Contractor shall be in the form of a Tax Invoice. A claim for payment shall be substantiated by an itemised account and the Contractor shall provide any further details in regard to the account that are reasonably requested by the Customer, including consolidated monthly invoicing on behalf of its branches/business units.
- 6.2.2 Subject to this clause 6.2, the Customer shall make payment within 30 days from the end of the month after receipt of a valid Tax Invoice and documents necessary to evidence delivery to the Customer.
- 6.2.3 The parties agree the making of a payment is not intended to be an acknowledgment that the Deliverables have been supplied in accordance with the Customer Contract.
- 6.2.4 If the Customer disputes an invoice amount the Customer shall certify the amount it believes is due for payment and shall pay that amount and the liability for the balance of payment shall be determined in accordance with the Customer Contract.
- 6.2.5 The Contractor will not be entitled to any credit charge, service fee or any other fee or charge for extending credit or allowing time for the payment by any Customer of money becoming due for the supply of the Deliverables.

#### 6.3 Set-Off/Money Recoverable by Customer

- 6.3.1 The Customer may deduct from amounts which may be payable or which may become payable to the Contractor, any amount due from the Contractor to the Customer in connection with the supply of the Deliverables.
- 6.3.2 Without limiting clause 6.3.1, any damages, costs and expenses recoverable by the Customer from the Contractor in consequence of the Contractor's breach of the Customer Contract may be deducted from money then due to the Contractor under the Customer Contract. If that money is insufficient for that purpose, the balance remaining unpaid will be a debt due by the Contractor to the Customer and may be:
  - (a) set off against any other money due to the Contractor by the Customer under this or any other Agreement between the Customer and the Contractor; or
  - (b) recovered from the Contractor by the Customer in an appropriate court.
- 6.3.3 For the purposes of this clause, the Board may act for and on behalf of any Customer for the purpose of assessing and certifying any damages, losses, costs and expenses sustained or incurred by the Customer as a result of the breach of the Customer Contract.

#### 6.4 Suspension of Payments

Should the Contractor refuse or neglect to carry out the instructions or requirements of the Board in regard to any matter connected with this Agreement, a Customer may, when directed by the Board, suspend all payments to the Contractor until such instructions or requirements have been complied with by the Contractor and in complying with a direction of the Board, the Customer shall not be in breach of this Agreement or any Customer Contract.

- 6.13.1 The Contractor must provide the Security to the Principal within 7 days of entering into this Agreement with the Principal.
- 6.13.2 The Principal will hold the Security as security for the due and proper performance and completion of all the obligations of the Contractor under this Agreement and any Customer Contract.
- 6.13.3 If the Contractor fails to properly perform and complete its obligations under this Agreement or any Customer Contract and the Principal or any Customer suffers loss or damage arising from, or in connection with, such failure by the Contractor, the Principal may deduct any or all such loss or damage (as ascertained and certified by the Principal) from the Security.
- 6.13.4 If the Security is not sufficient to meet payment of all the loss or damage suffered by the Principal and any Customer, the balance remaining will be a debt due and owing from the Contractor to the Principal and may be recovered by the Principal in any appropriate court.
- 6.13.5 If the Contractor fails to deposit the Security as requested by the Principal in accordance with clause 6.13.1 the Principal may terminate this Agreement.
- 6.13.6 The Security must be issued by an Australian domiciled bank, insurance company or other financial institution ("Issuer") acceptable to the Principal in its discretion.
- 6.13.7 The Contractor agrees that the Principal will have no liability to the Contractor of any nature (whether in negligence or otherwise) for any loss or damage suffered or incurred by the Contractor where the Principal exercises its rights under this clause in good faith.
- 6.13.8 The Contractor must not take any action to injunct or otherwise prevent the Principal from making a claim or receiving a payment under the Security. This clause does not prevent the Contractor from taking action to recover from the Principal any amount invalidly received by the Principal under any such Security.
- 6.13.9 The Principal must release the Security to the Contractor (or to whom the Contractor directs) if:
  - (a) the Contractor has fully performed and discharged all of its obligations under this Agreement and all Customer Contracts; and
  - (b) in the reasonable opinion of the Principal:
    - (i) there is no prospect that money or damages will become owing (whether actually or contingently) by the Contractor to the Principal or any Customer; and
    - (ii) no payment by the Contractor or the provider of the Security is likely to be void, voidable or refundable under any law, including without limitation any law relating to insolvency.

# 7 Variations

#### 7.1 Variations to Agreement

- 7.1.1 This Agreement may not be varied except in writing signed by both the Board and the Contractor.
- 7.1.2 At any time during the Term of this Agreement, the Board may, as variations to this Agreement, negotiate with the Contractor to include new items as Products in Schedule 3, being items which are logical inclusions to the overall Categories covered by this Agreement but were not included in the Board's Request for Tender.

#### 7.2 Restricted Tenders to Increase Contractors

- 7.2.1 The Board may at any time during the Term of this Agreement, conduct a restricted tender for the purpose of increasing the number of Contractors for Categories covered by the Request for Tender, but not included in this Agreement. Evaluation criteria for such restricted tender will be similar to those used to evaluate the Request for Tender. Should the Contractor be successful in being awarded additional Categories, it will be treated as a variation to this Agreement.
- 7.2.2 Nothing in clause 7.1.2 allows the variation of this Agreement by the adding of separate Categories and discrete Products within such Category into this Agreement if such Category and or/Product was not included in the Board's Request for Tender.

# 8 Delivery

## 8.1 Customer Contracts

- 8.1.1 The Contractor must not supply the Deliverables unless the Customer issues a Customer Contract. Such Customer Contracts may be made by:
  - (a) Written request to the Contractor by facsimile, email or by hand, containing the details outlined in clause 8.1.2;
  - (b) Electronic issue in accordance with the Customer's and/or the Contractor's ordering system and this Agreement;
  - (c) Any other method required by the Customer which is in keeping with the NSW Government's financial and audit policies.
- 8.1.2 A Customer Contract in whichever form it is issued, must provide the following details:
  - (a) a description of the Deliverables;
  - (b) the Price for the Deliverables;
  - (c) this Agreement reference number;
  - (d) delivery date;
  - (e) delivery site;
  - (f) name of officer placing the Customer Contract;
  - (g) NSW Commerce Customer Number; and
  - (h) address to which the Contractor's invoice is to be sent for payment.
- 8.1.3 If the Customer Contract is issued in incomplete form, the Contractor must notify the officer placing the Customer Contract of the details required under clause 8.1.2 that have not been provided prior to supply of the Deliverables which are the subject of the Customer Contract.

#### 8.2 Contractor to Fulfil all Customer Contracts

8.2.1 The Contractor must fulfil all Customer Contracts placed by Eligible Customers during the Term in accordance with this Agreement and the Customer Contract.

8.2.2 A Customer may place a single Customer Contract for the Deliverables to be supplied in a single delivery, or a single Customer Contract to be supplied in multiple deliveries, ie. "Blanket Orders".

#### 8.3 Punctual Delivery

- 8.3.1 The Contractor must deliver the Products within the specified Guaranteed Delivery Times in Schedule 2, or by the delivery times specified in the Customer Contract.
- 8.3.2 As soon as practicable after becoming aware of any matter which is likely to change or which has changed the time for delivery, the Contractor must notify the Customer in writing of the circumstances which the Contractor considers will give rise to the delay, and the extent or likely extent of the delay.

#### 8.4 Extension of Time

- 8.4.1 Where there is likely to be a delay in the Contractor discharging an obligation under this Agreement because of a Circumstance Beyond the Contractor's Control (other than a circumstance arising out of any act or omission on the part of the Contractor), the Contractor will:
  - (a) within 3 days of becoming aware of the possibility of such a delay, notify the Customer, in writing of the circumstances which the Contractor considers will give rise to the delay, and the extent or likely extent of the delay and strategies proposed to manage the consequences of the delay; and
  - (b) request a reasonable extension of time.
- 8.4.2 The Customer may consent to a request for extension of time under this clause 8.4.2 provided that:
  - (a) the Contractor uses its best endeavours to minimise the delay and recover lost time; and
  - (b) where appropriate, the Contractor provides the Customer with a plan indicating in detail the steps the Contractor proposes to take to minimise the impact of the Circumstance Beyond its Control.
- 8.4.3 The Customer may terminate the Customer Contract in accordance with clause 17.1 if the delay continues beyond the time consented to in this clause 8.4.
- 8.4.4 The Contractor will not be entitled to any increase in the Contract Price or damages, costs or expenses in connection with the delay.

#### 8.5 Packaging

8.5.1 The Contractor must ensure that all Deliverables are properly, safely and securely packaged and labelled for identification and country of origin.

#### 8.6 Expenses of Delivery

- 8.6.1 The cost of packaging, freight, insurance and other charges, in connection with the delivery of the Deliverables shall be charged at the rates detailed in the Pricing Schedules. No additional delivery charges are to applied.
- 8.6.2 The Contractor shall pay all costs associated with the return of wrongly supplied Deliverables or replacement Deliverables are to be paid by the Contractor.

#### 8.7 Delivery and Acceptance

- 8.7.1 The Contractor must deliver the Deliverables to the place or places and within the Guaranteed Delivery Time and shall obtain a receipt of their delivery.
- 8.7.2 Delivery and receipt of the Deliverables shall not be taken to be an acceptance of the Products by the Customer.
- 8.7.3 Delivery may be either Free to Desktop, Free-Into-Store (FIS) throughout NSW and the ACT or Non-Free-Into-Store (NFIS) in accordance with Schedule 2 and in accordance with the Minimum Order Quantity specified by the Customer. Where

the contract is awarded on the basis of NFIS pricing, the Contractor must hand over Products to the third party for delivery, as arranged by the Customer.

- 8.7.4 If the Contractor is unable to provide the Deliverables for any reason, the Contractor must arrange for the supply of equivalent items from an alternative supplier within the Guaranteed Delivery Time. The Contractor is to liaise with the Customer to ensure that the alternative item is acceptable and meets the Customer's needs. Any additional cost in arranging an alternative supply is to be borne by the Contractor.
- 8.7.5 The Contractor will replace Deliverables at no cost (including freight and handling charges) where stocks are delivered with unreasonably short use-by dates.

#### 8.8 Rejection of Deliverables

- 8.8.1 The Customer may reject Deliverables which are not in accordance with the Customer Contract.
- 8.8.2 Upon rejection of any Deliverables the Customer shall notify the Contractor and may direct that the rejected Deliverables be removed and replaced or rectified at the Contractor's risk and expense within such reasonable time as the Customer may direct.
- 8.8.3 If the Contractor fails to remove or rectify the rejected Deliverables within the time directed, the Customer may have the rejected Deliverables re-delivered at the Contractor's risk and expense.
- 8.8.4 Where the Contractor fails to deliver the Deliverables within the Guaranteed Delivery Time, or such other time agreed by the Customer, or where Deliverables are rejected and the Contractor fails to replace the rejected Deliverables in conformity with the Agreement, the Customer may:
  - (a) purchase from another supplier substitute Deliverables of the kind and quality ordered; or
  - (b) where it is not possible or practicable to purchase from another supplier substitute Deliverables of the kind and quality ordered, the Customer may purchase Deliverables of a superior kind and quality to the Deliverables under this Agreement.
- 8.8.5 In both cases listed in clause 8.8.4 any extra cost or expense incurred over and above the Contract Price, shall be a debt due from the Contractor to the Customer.

#### 8.9 Risk and Title

8.9.1 Title in the Deliverables shall pass to the Customer on satisfactory delivery to the Customer, as evidenced by the signature on the delivery docket of a duly authorised representative of the Customer. Such signature is not an acknowledgement of the acceptability of the Deliverables. Notwithstanding that the Customer has taken delivery, the Contractor will remain liable for any loss or damage to the Deliverables, which may have occurred prior to delivery, and for any non-compliance of the Deliverables with the Customer Contract.

#### 9 Management Fee

#### 9.1 Administration of Management Fee

- 9.1.1 The Contractor must pay to the Board a Management Fee in accordance with this clause.
- 9.1.2 The Contractor shall act in good faith in respect of all its obligations under this clause 9.1 and shall use its best endeavours to ensure that the obligations imposed on it in relation to the Management Fee are met including ensuring that:
  - (i) all Eligible Customers use an Order for placing orders for Deliverables;
  - (ii) the Contractor, its agents, Designated and Nominated Subcontractors sell the Deliverables to Eligible Customers on the terms and conditions of this Agreement.

- 9.1.3 The Management Fee is the GST-exclusive cost of the Deliverables supplied to a Customer, multiplied by the percentage shown in Item 5 of Schedule 1 (the Management Fee Rate), plus the GST payable on this amount. The Management Fee is payable where the supply of Deliverables to the Customer was made under this Agreement.
- 9.1.4 The amount of the Management Fee will not under any circumstances be shown as a separate charge in any quote or invoice to a Customer.
- 9.1.5 The Parties agree that for the purpose of determining if an Order has been placed under this Agreement the following criteria shall apply, whether or not a customer number is quoted:
  - (i) All New South Wales government departments and agencies are Eligible Customers and are required to place their Orders under this Agreement;
  - (ii) All other Eligible Customers located in or affiliated with New South Wales, including State owned corporations, councils established under the Local Government Act 1993 and not for profit organisations, will be treated as having placed their Orders under this Agreement unless the Contractor can provide evidence to the satisfaction of the Board that the purchase was made under another contract between the Eligible Customer and the Contractor;
  - (iii) All Eligible Customers not located in or affiliated with New South Wales, including other State and Territory governments and the Commonwealth, will be treated as having placed their Orders under this Agreement only where they have so advised the Contractor at the time of placing their Order. The Board otherwise bears the onus of establishing that any such orders were placed under this Agreement.
- 9.1.6 All orders placed by an Eligible Customer (as described in clause 9.1.5(i) and (ii)) for Deliverables, howsoever placed, shall be treated as Orders placed under this Agreement, unless the Contractor can provide evidence to the reasonable satisfaction of the Board that the order was placed under another contract between that Eligible Customer and the Contractor. Further, the Contractor agrees to ensure that all Eligible Customers (as described in clauses 9.1.5(i), (ii), or (iii)) submit an Order in the required form in respect of all Deliverables acquired in accordance with this Agreement.
- 9.1.7 The Contractor agrees that the Management Fee payable has been allowed for in the Prices specified in the Price Schedule together with all costs associated with its calculation and proof of payment of the Management Fee and compliance with this clause 9.1.
- 9.1.8 Within 7 days of the end of each Payment Period, the Contractor shall provide electronically through smartbuy® to the Board a sales report ("the Report") which relates to the relevant Payment Period reporting the:
  - total amount, exclusive of GST, all Customers are liable to pay in respect of all Deliverables invoiced by or on behalf of the Contractor, to Customers under the Agreement;
  - (b) the sales information as set out in Item 7 of Schedule 1 ("the Sales Information"); and
  - (c) such other relevant information as the Board may, by notice in writing to the Contractor, reasonably require.
- 9.1.9 In the event that the Contractor does not complete a Report within 7 days of the end of a Payment Period, the Contractor will be liable for interest, at the rate specified in item 8 of Schedule 1, on the outstanding Management Fee for the relevant Payment Period, calculated from 7 days after the end of the relevant Payment Period until the Management Fee is paid.

9.1.10

- (a) After receipt of the completed Report from the Contractor, the Board shall then compile a Tax Invoice for the Management Fee payable based on the Report and forward that Tax Invoice to the Contractor.
- (b) The Contractor shall then forward payment to the Board in accordance with the Tax Invoice compiled by the Board within fourteen [14] days of the date of the Tax Invoice;
- (c) In the event that the Contractor does not provide payment within fourteen [14] days of the date of the Tax Invoice it will be liable for interest at the rate specified in item 8 of Schedule 1 on the invoiced amount, calculated from [14] days after the date of the Tax Invoice
- 9.1.11 The Tax Invoice referred to in clause 9.1.10 will set out the Management Fee payable by the Contractor to the Board and the GST payable on the Management Fee.
- 9.1.12 The Board may alter the above procedure for the collection of the Management Fee as advised in writing from time to time during the Term.
- 9.1.13 Where the Contractor considers that an accounting adjustment to the amount of the Management Fee paid or payable during a Payment Period is required, it should advise the Board in writing. The Parties may then agree on the amount of any adjustment.
- 9.1.14 Where the Contractor has not issued an invoice to any Eligible Customer during a relevant Payment Period the Contractor must provide, within 7 days of the end of that Payment Period, a report stating that no Deliverables were provided by the Contractor to any Eligible Customer during that Payment Period.
- 9.1.15 The Contractor must set up and maintain a system which:
  - to the reasonable satisfaction of the Board is suitable for identifying all purchasers of the Deliverables under the Agreement that are Eligible Customers whether pursuant to Customer Contracts or otherwise;
  - (b) enables monitoring by the Board of Customer Contracts placed with, and invoices issued, by the Contractor, on behalf of the Contractor, or by its Designated and Nominated Subcontractors;
  - (c) enables the provision of Sales Information; and
  - (d) accommodates the use of the Customer's corporate credit card if the Parties have agreed to use that card for the purchase of Deliverables, and failure to establish such a system to the reasonable satisfaction of the Board shall constitute a breach of this Agreement and the Board may, it is discretion, terminate the Agreement.
- 9.1.16
- (a) The Board may, at its own cost, take such measures as it considers reasonable in the circumstances (including the appointment of an auditor) to verify the Contractor has paid the correct amount of Management Fee due to the Board and the Contractor agrees to cooperate with the Board.
- (b) If the Board appoints an auditor, the Board will inform the Contractor in writing of the appointment. The Contractor agrees to cooperate with any auditor appointed by the Board, including providing, or providing access to, within 10 working days of the written notification from the Board that an audit will take place, information about all sales of Deliverables made to Eligible Customers (whether pursuant to an Order or otherwise), copies of all contracts, orders and invoices between the Contractor and any Eligible Customers. The Contractor agrees to provide the auditor appointed by the Board access for the purpose of this clause 9.1.16 on the basis of the appointed auditor entering into an Auditor Confidentiality Agreement in the form set out in Schedule 5.

- 9.1.17 If the measures taken in clause 9.1.16 verify that the Contractor has not paid in full the Management Fee that is actually due to the Board, the Contractor:
  - (a) must pay the difference between the Management Fee paid to the Board and the Management Fee actually due to the Board within 30 days of a written direction from the Board;
  - (b) will be liable for interest at the rate specified in item 8 of Schedule 1, on the additional amount calculated from 30 days after the expiry of the relevant Payment Period, and
  - (c) will, at the discretion of the Board, reimburse the Board's costs and expenses of the measures taken (including any auditor's fees) under clause 9.1.16 to the Board in accordance with the sliding scale set out below to compensate the Board for the cost incurred in ensuring the correct Management Fee is paid:

Difference between Management Fee paid and payable:

- (a) 99% or more of Management Fee was paid
- (b) 90-98% of Management Fee paid
- (c) 75-89% of Management Fee paid
- (d) 50-74% of Management Fee paid
- (e) less than 50% of payable Management Fee paid

Portion of Audit costs to be borne by Contractor:

- (a) \$0
- (b) 25% of Audit and other costs
- (c) 50% of Audit and other costs
- (d) 75% of Audit and other costs
- (e) 100% of Audit and other costs.
- 9.1.18 The Contractor shall during the Term of this Agreement and for a 12 month period after the Agreement has expired or is terminated, keep secure all relevant documents and information for the purposes of this clause and give any auditor appointed by the Board access to those documents and information at all reasonable times.
- 9.1.19 The Parties agree that a breach of this clause 9.1 (including without limitation, a failure by the Contractor to cooperate satisfactorily with the audit referred to in clause 9.1.17) shall be a Substantial Breach of this Agreement which will entitle the Board to terminate this Agreement pursuant to clause 16.1.1 and this right of termination shall be in addition to the right of the Board to recover from the Contractor any sums payable to the Board under this Agreement or otherwise, or the right of the Board to deduct those sums from any money that may be or become payable by the Board to the Contractor on any other account.

# 10 Confidentiality

#### 10.1 Obligations of Parties

- 10.1.1 Except to the extent necessary to comply with any statutory requirements or government policy relating to the public disclosure of Confidential Information, neither Party will make public, disclose or use any Confidential Information of the other Party except in accordance with this Agreement or a Customer Contract, unless the other Party gives its prior written consent.
- 10.1.2 Each Party may disclose Confidential Information to its officers, employees and subcontractors where such disclosure is essential to carrying out their duties or in accordance with this Agreement or a Customer Contract.

- 10.1.3 Each Party must ensure the Confidential Information of the other Party is used solely in connection with or for the purposes of fulfilling its obligations under this Agreement or a Customer Contract.
- 10.1.4 The Board or the Customer may at any time require the Contractor to arrange for its Personnel engaged in the performance of this Agreement or a Customer Contract to execute without delay a Deed of Confidentiality, substantially in the form of Schedule 4.
- 10.1.5 This clause will survive the termination of this Agreement.

#### 11 Intellectual Property

#### 11.1 Ownership

- 11.1.1 Intellectual Property created in relation to New Contract Material will be owned by the Contractor upon their creation.
- 11.1.2 The Contractor irrevocably grants to the Customer a non-exclusive royalty free transferable licence to use the Intellectual Property in the New Contract Material for so long as the Customer may require.
- 11.1.3 The Parties acknowledge and agree that the Parties or, where applicable, particular third parties, are the sole owners of their Intellectual Property rights in or in relation to the Existing Contract Material.
- 11.1.4 The Contractor must ensure all licence fees and/or consents required under law are paid and/or obtained as a result of any reproduction, adaptation or use of any Intellectual Property or Contract Material necessary for the provision of the Deliverables.
- 11.1.5 Upon completion of the Customer Contract, or at such other time as the Customer may require, the Contractor must fully and promptly disclose to the Customer all New Contract Material created or developed under or in connection with this Agreement.

# 12 Specific Obligations of Contractor

#### 12.1 Marketing by the Contractor

12.1.1 The Contractor is responsible for the proactive marketing of its organisation's capability to Customers.

#### 12.2 Provision of Catalogue Information for E-commerce Initiatives

- 12.2.1 From time to time the Board may request the Contractor to supply information in the nature of catalogue information for use in e-commerce initiatives in NSW Government contracting.
- 12.2.2 The Contractor must promptly supply any such information that is reasonably requested by the Board in the format, and using the method of delivery, specified by the Board at the time of the request.
- 12.2.3 The Contractor consents to the use of such information, including any personal information, in any catalogue created by the NSW Department of Commerce to facilitate e-commerce in NSW Government contracting.

#### 12.3 Licences and Approvals

12.3.1 The Contractor must obtain at its own cost all licences, approvals and consents necessary to perform this Agreement.

# 12.4 Compliance with Laws and Standards

- 12.4.1 The Contractor must, in carrying out this Agreement, comply with:
  - (a) all applicable Statutory Requirements;

- (b) the NSW Government codes, policies, guidelines and Standards listed in item 9 of Schedule 1 or any other codes, policies, guidelines and Standards specified in writing by the Board to the Contractor; and
- (c) a particular Standard which has been agreed between the Contractor and the Board, and that Standard is revised, the Contractor must submit evidence of compliance with the revised Standard within a reasonable period of time.
- (d) the obligations imposed on the Board by the Privacy and Personal Information Protection Act 1998 (NSW) in relation to Personal Information that is disclosed to, or acquired by, or in possession of the Contractor in accordance, or in connection, with the Contract. The Contractor must, and must ensure that its officers, employees, agents and sub-contractors, comply with the obligations imposed on the Board by the Privacy and Personal Information Protection Act as though the Contractor were, as far as reasonably practicable, the Board in relation to any such Personal Information. The Contractor will comply with any request of the Board in relation to Personal Information and will not do anything that would cause the Board to be in breach of its obligations under the Privacy and Personal Information Protection Act.

#### 12.5 Minimum Insurance Requirements

- 12.5.1 The Contractor must hold and maintain, and must ensure that all subcontractors are beneficiaries under or otherwise hold and maintain, the following insurances for the Term, or for such other period as may be specifically required by this Agreement for the particular policy:
  - (a) a broad form liability policy of insurance which includes public liability insurance for at least the amount specified in item 11(a) of Schedule 1 in respect of each claim; and
  - (b) products liability insurance for at least the amount specified in item 11(b) of Schedule 1 for the total aggregate liability for all claims arising out of the Contractor's products for the period of cover; and
  - (c) workers' compensation insurance in accordance with applicable legislation for all the Contractor's employees; and
  - (d) such other insurances as are specified in Schedule 1 item 11 of the Agreement Details.
- 12.5.2 All policies of insurance must be effected with an insurer insurer rated A or better by AM Best or an equivalent rating organisation.
- 12.5.3 The Contractor must ensure that each policy is in effect for the Term of this Agreement or such other period as required by the Board.
- 12.5.4 The Contractor shall, and shall ensure sub-contractors, as soon as practicable, inform the Board in writing of the occurrence of an event that may give rise to a claim under a policy of insurance effected as required by the Agreement and shall ensure that the Board is kept fully informed of subsequent action and developments concerning the claim.
- 12.5.5 The Contractor must, when requested in writing by the Board, arrange for its insurer to complete a "Certificate of Currency of Insurance Obtained".
- 12.5.6 Where the Contractor is insured under its parent company's insurance policy, the parent company's insurance policy must clearly indicate that it applies and extends coverage to the Contractor.
- 12.5.7 The effecting of insurance shall not limit the liabilities or obligations of the Contractor under other provisions of this Agreement.

#### 12.6 General Indemnity

- 12.6.1 The Contractor will be liable in respect of, and indemnifies, and shall keep indemnified, the Board and the Customers and their officers, employees and agents against any claim, loss or expense (including a claim, loss or expense arising out of personal injury or death or damage to property) which any of them pays, suffers, incurs or is liable for (including legal costs on a solicitor and client basis) (together "the loss") as a result of any unlawful, negligent, reckless or deliberately wrongful act or omission of the Contractor (or its employees, agents or subcontractors or their employees) in the performance of this Agreement.
- 12.6.2 The Contractor's liability in respect of, and indemnity given in, clause 12.7.1 shall be reduced proportionally to the extent that any unlawful, negligent, or deliberately wrongful act or omission of the Board, its officers, employees or agents caused or contributed to the loss.

#### 12.7 Contractor's Warranties for the Deliverables

- 12.7.1 In relation to the Deliverables, the Contractor warrants that:
  - (a) at the time title to a Deliverable passes to the Customer, the Deliverable will be free from any charge or liability;
  - (b) during the Warranty Period, each Deliverable:
    - (i) shall be new and shall conform with the Statement of Requirements;
    - (ii) shall conform to the description, and sample (if any) approved by the Board or Customer in Schedules 2 and 3 (except that if a sample is inconsistent with the Statement of Requirements, the latter must prevail);
    - (iii) shall be free from defects; and
  - (c) it will provide the associated services in accordance with the requirements of Schedule 2 and the Customer Contract and with due care and skill.

## 12.8 Contractor's Warranties (General)

- 12.8.1 The Contractor warrants:
  - (a) that the Deliverables do not infringe the Intellectual Property rights of a third party; and
  - (b) the Deliverables shall conform to any legally applicable Australian Standards;
  - (c) it has capacity to enter into this Customer Contract and perform the obligations imposed on the Contractor; and
  - (d) the Contractor has not entered into any arrangement, whether a trust arrangement or otherwise, that impedes or is likely to impede the performance of the Customer Contract by the Contractor.

#### 12.9 Warranty Period

- 12.9.1 The Contractor shall rectify any error or defect in a warranted Deliverable that has been notified to it by a Customer during the Warranty Period in Schedule 2 at the Contractor's sole cost and expense.
- 12.9.2 If the Contractor fails to rectify an error or defect in a Deliverable within 30 days after notification by the Customer, the Customer may arrange for performance of the necessary remedial work by a third party at the Contractor's expense.

#### 12.10 Maintenance by the Contractor

12.10.1 Maintenance is to be offered as an option to Customers. Customers retain the right to use alternative maintenance providers and undertake the maintenance in accordance with the Contractor's recommended maintenance schedule.

12.10.2 The warranties offered by the Contractor will not be invalidated by the Customer using alternative maintenance providers.

## 12.11 Third Party Warranties

- 12.11.1 Where the Contractor supplies Deliverables that have been procured from third parties, the Contractor agrees to assign to the Customer, to the extent permitted by law, the benefits of any warranties given by the third parties.
- 12.11.2 The parties agree that the assignment of any third party warranties is in addition to the warranties offered directly by the Contractor under this Customer Contract and does not relieve the Contractor from the obligation to comply with the Contractor's own warranties.

# 12.12 Mistakes in Information

12.12.1 The Contractor must pay for any additional costs incurred by the Board or any Customer for errors or omissions in material or other Information supplied by it, even though that material or Information may have been approved by the Board.

#### 12.13 Notification of Change in Control or Transfer of Ownership

12.13.1 During the Term, the Contractor must immediately notify the Board and any Customers under an existing Customer Contract in writing of any Change in Control or other action to reconstruct or amalgamate itself.

# 12.14 Notification of Contractor's Insolvency

- 12.14.1 The Contractor must immediately notify the Board in writing of the Contractor's Insolvency and disclose the details of any:
  - (a) Action taken in relation to the Contractor's Insolvency in so far as it affects this Agreement and any Customer Contracts;
  - (b) Existing Customer Contracts which the Contractor has entered into under this Agreement.
- 12.14.2 The Contractor must immediately notify all Customers under an existing Customer Contract of the Contractor's Insolvency.

#### 12.15 Financial Security

- 12.15.1 If requested by the Principal, the Contractor must provide Financial Security within 7 days of such request. The Financial Security must be substantially in the form set out in Schedule 9 and must be issued by a financial institution acceptable to the Principal. The Principal will hold the Financial Security as Security for the due and proper performance of all obligations of the Contractor under this Agreement.
- 12.5.2 If the Financial Security is not sufficient to meet payment of all the loss or damaged suffered by the Principal, the balance remaining will be a debt due and owing from the Contractor to the Principal and may be recovered in any appropriate court.
- 12.5.3 The Contractor agrees that the Principal will have no liability to the Contractor for any loss or damage suffered or incurred by the Contractor where the Principal exercises its rights under this clause in good faith.
- 12.5.4 The Contractor must not take any action to injunct or otherwise prevent the Principal from making a claim or receiving payment under the Financial Security. This clause does not prevent the Contractor from taking action to recover from the Principal the amount invalidly received by the Principal under any such Financial Security.
- 12.5.5 The Principal must release the Financial Security to the Contractor (or to whom the Contractor directs) if in the reasonable opinion of the Principal;

- (a) there is no prospect that money or damages will become owing (Whether actual or contingent) by the Principal; and
- (b) no payment by the Contractor or the provider of the Financial Security is likely to be void, voidable or refundable under any law, including without limitation any law relating to insolvency.

#### 13 Performance Management

#### 13.1 Service Levels

- 13.1.1 The Contractor must meet the specified Service Levels in Schedule 7 during the Term of this Agreement. Performance against the Service Levels must be tracked by the Contractor and reported to the Board's Delegate in accordance with the frequencies and formats in Schedule 7.
- 13.1.2 Where the Contractor does not meet the Service Levels in Schedule 7, the Board may, at its discretion, take one or more of the following actions in relation to the Contractor:
  - (a) refuse to agree to all or a portion of the price variation requested by the Contractor under clause 5.4.1,
  - (b) temporarily suspend the use of all or parts of this Agreement by all Customers, for a period not exceeding 12 months; and
  - (c) require the Contractor to undertake more frequent performance reporting in addition to those specified in Schedule 7, to ensure performance is improved;

until such time as the Contractor has demonstrated its ability to meet the Service Levels in accordance with Schedule 7.

- 13.1.3 The remedies in clause 13.1.2 are in addition to any other provisions available to the Board to deal with the inability of the Contractor to meet its Service Level obligations under this Agreement and at law.
- 13.1.4 The measurements and tolerances in the Service Levels specified in Schedule 7 may be amended, added to, or deleted by the Board and the Contractor in writing during the Term of this Agreement.

#### 13.2 Board's Delegate

13.2.1 The Board has nominated the Board's Delegate in Schedule 1 item 10 to oversee the performance of this Agreement. The Board may, by notice in writing to the Contractor, nominate a replacement Board Delegate.

#### 13.3 Contractor's Relationship Manager

- 13.3.1 For the purpose of ensuring an efficient relationship with the Board the Contractor has appointed the Relationship Manager indicated in Schedule 1 item 12. The Relationship Manager must:
  - (a) act as the representative of the Contractor and have the legal power to bind the Contractor in all matters pertaining to this Agreement;
  - (b) serve as the principal point of contact for the Contractor with respect to the overall administration of the Agreement;
  - (c) have the authority to implement such actions (including issuing of directives through the Contractor's organisation), as may be required for the Contractor to comply with this Agreement;
  - (d) meet with the Board's Delegate at least once each month to provide information regarding the Contractor's performance under this Agreement, with particular reference to the Service Levels in clause 13.1.1; and

- (e) answer the Board's queries and work with the Board to address issues relating to matters deemed urgent by the Board arising out of this Agreement.
- 13.3.2 The Relationship Manager must be available at all times during business hours and at all other times on reasonable notice by the Board's Delegate to meet with the Board's Delegate to discuss any queries, concerns or issues arising in connection with this Agreement or a Customer Contract.
- 13.3.3 The Relationship Manager must be supported by the Key Personnel in Schedule 1 item 12 in respect of Customers. The Relationship Manager and/or the Key Personnel named in Schedule 1 item 12 must be available to attend periodic meetings as required by Customers.

#### 13.4 Meetings

- 13.4.1 Key contractors personnel must be available for quarterly meetings with NSWP Contracting Services to review the performance of the contractor, the Agreement overall, and discuss any issues of which either Party is aware that may have a material adverse impact on its obligations under this Agreement.
- 13.4.2 All quarterly reports must be available 1 week before the quarterly meeting.
- 13.4.3 During implementation, from the letter of acceptance being issued to the contractor, several meetings at short intervals may be required to manage implementation issues.
- 13.4.4 The Contractor is also required to meet with Customers during the term of the Contract. Such meetings are to be quarterly or at mutually agreed times. The cost of these meetings are to be included in the contract prices.

#### 13.5 Innovation and Continuous Improvement

- 13.5.1 The Contractor must identify innovative solutions for mutual value enhancement in connection with this Agreement, with a view to achieving continuous improvement.
- 13.5.2 The Contractor must submit in writing to the Board, at its own cost, detailed proposals for changes to the Products and associated supply chain solutions which are likely to offer significant (including repeated and long term) benefits to the Board in accordance with the requirements of Schedule 2.
- 13.5.3 The Contractor must ensure that such solutions do not include anything which might adversely affect the quality of the Products and that any proposed changes are consistent with the purpose and intent of this Agreement.
- 13.5.4 The Board must consider the Contractor's proposals, but is not bound to accept any proposal. The Board may also accept the proposed changes subject to conditions. The Contractor shall have no claim arising out of the Board's failure to accept any proposal or proposed changes.
- 13.5.5 If the Board accepts any changes proposed by the Contractor, any direct savings in the cost to the Contractor of supplying the Products will be for the benefit of the Customer.
- 13.5.6 For the purposes of monitoring performance and providing incentives for the Contractor to improve its performance level, the Board will construct and maintain an Overall Performance Indicator (OPI).
- 13.5.7 Data input into the OPI will be provided by the Board which will monitor the Key Performance Indicators (KPI) and by the Customer which will monitor the Agency Performance Indicator (API).
- 13.5.8 The performance framework and the performance indicators are set out in Schedule 7.
- 13.5.9 Where the Contractor has consistently met the levels set out in Schedule 7, the Board, may in its absolute discretion:

- (a) extend the period of the Agreement with the Contractor subject to the original term and any relevant policy consideration, and/or
- (b) reduce the level and frequency of the Board's reporting requirements.

#### 13.6 Contractor Performance Monitoring

- 13.6.1 The Board will monitor the sales performance of the Contractor under this Agreement. Where after 12 months of operation of this Agreement the:
  - (a) sales of the Contractor are minimal, or
  - (b) the Contractor consistently has nil returns,

it may be treated as unacceptable performance of this Agreement by the Board.

#### 13.7 Exchange of Information Between Government Agencies

- 13.7.1 The Contractor authorises the Board and its employees and agents to make available to NSW Government departments or agencies Information concerning the Contractor, including any Information provided by the Contractor to the Board and any Information relating to the Contractor's performance under the Agreement, or the Contractor's financial position.
- 13.7.2 The Contractor acknowledges that Information about the Contractor from any source including any substantiated reports of unsatisfactory performance, may be taken into account by NSW Government agencies in considering whether or not to offer the Contractor future opportunities for NSW Government work.
- 13.7.3 The Board regards the provision of Information about the Contractor to any New South Wales Government department or agency as privileged within section 30 of the *Defamation Act 2005* (NSW).
- 13.7.4 The Contractor releases and indemnifies the Board and the State of New South Wales from any claim in respect of any matter arising out of the provision of Information. Without limiting the above, the Contractor releases the Board and the State of New South Wales from any claim it may have for any loss to the Contractor arising out of the provision of Information relating to the use of such Information by the recipient of the Information.

#### 14 Personnel

#### 14.1 The Contractor's Personnel

- 14.1.1 The Contractor warrants that all personnel engaged in the provision of the Deliverables are appropriately qualified, competent and experienced including the Contractor's Relationship Manager and the Key Personnel.
- 14.1.2 The Contractor must:
  - (a) employ only such persons as are careful, skilled and experienced in the provision of the Deliverables or similar Deliverables; and
  - (b) (where applicable) hold, or ensure appropriate personnel hold, all necessary licences, permits and authorities.
- 14.1.3 The Board may object to and direct the Contractor to remove any of its Personnel (including the Relationship Manager and Key Personnel) who in its opinion are incompetent, unsuitable, or who has been guilty of neglect, or other improper behaviour. Such named personnel so removed may not be re-employed by the Contractor under this Agreement.
- 14.1.4 Any replacement Key Personnel provided by the Contractor must be approved by the Board.

# 15 Conduct and Dispute Management

#### 15.1 Co-operation

15.1.1 The Parties must do all they reasonably can to co-operate in matters relating to this Agreement and/or the Customer Contract, but their rights and responsibilities under the Agreement and/or the Customer Contract remain unchanged unless the Parties agree in writing to vary them.

#### 15.2 Duty not to Hinder Performance

15.2.1 Each Party must do all it reasonably can to avoid hindering the performance of the other under the Agreement and the Customer Contract.

#### 15.3 General

- 15.3.1 In order to resolve any conflicts or issues between the Parties promptly and to the satisfaction of the Parties, the issue resolution process stated below is to be followed:
  - (a) Amicable Resolution (clause 15.4.);
  - (b) Expert Determination (clause 15.5)

#### 15.4 Amicable Resolution

- 15.4.1 Either Party may give notice to the other Party of an issue, including a dispute or difference, ("the Issue Notice") about the meaning or effect of the Agreement, Customer Contract or about any matter arising under or out of the Customer Contract. The Issue Notice must be given within a reasonable time of the Party becoming aware of the issue.
- 15.4.2 The Party submitting the Issue Notice must submit it to the other Party's authorised representative, which in the case of the Board is to the Board's Delegate, and in the case of the Contractor is the Relationship Manager.
- 15.4.3 The Parties must follow the issue resolution process in this clause before either commences proceedings or takes similar action except to seek an urgent injunction or declaration.
- 15.4.4 If a Party gives an Issue Notice under this clause, each Party will nominate in writing a senior executive who will promptly confer to resolve the issue.
- 15.4.5 A Party is not entitled to refer an issue to Expert Determination until 21 days after the giving of the Issue Notice to the person or persons specified.
- 15.4.6 A Party may only refer an issue to Expert Determination by giving notice in writing specifying the issue to be decided ("the Referral Notice").
- 15.4.7 If the Party giving the Referral Notice is the Contractor it must give the Referral Notice to the Customer and the Board.
- 15.4.8 If the Party giving the Referral Notice is the Customer, it must give the Referral Notice to the Contractor and the Board.
- 15.4.9 If a Referral Notice has not been given to the person or persons specified within 28 days, then the issue is barred from Expert Determination or any other action or proceedings (including court proceedings).

#### 15.5 Expert Determination

- 15.5.1 If a Referral Notice is given under clause 15.4, the expert is to be agreed between the Board and the Contractor. If they cannot agree within 28 days of the Referral Notice, the expert is to be nominated by the Chief Executive Officer, Australian Commercial Disputes Centre, Sydney.
- 15.5.2 The expert nominated must be a lawyer unless otherwise agreed. The expert must not be:
  - (a) an employee of the parties;

- (b) a person who has been connected with the Agreement or the Customer Contract as the case may be; or
- (c) a person who the Parties have been unable to agree on.
- 15.5.3 When the person to be the expert has been agreed or nominated, the Board, on behalf of both Parties, must engage the expert by letter of engagement (and provide a copy to the Contractor) setting out:
  - (a) the issue referred to the expert for determination;
  - (b) the expert's fees;
  - (c) the procedure for determination set out in Schedule 9;
  - (d) any other matter which is relevant to the engagement.
- 15.5.4 The Parties must share equally the fees and out-of-pocket expenses of the expert for the determination, and bear their own expenses.
- 15.5.5 If the expert determines that one Party must pay the other an amount exceeding the amount shown in Item 13 Schedule 1 (calculating the amount without including interest on it, and after allowing for set offs), then either Party may commence litigation, but only within 56 days after receiving the determination.
- 15.5.6 Unless a party has a right to commence litigation under clause 15.5.5:
  - (a) the Parties must treat each determination of the expert as final and binding and give effect to it; and
  - (b) if the expert determines that one Party owes the other money, that Party must pay the money within 28 days.

#### 16 Termination by the Board

#### 16.1 Termination for Cause

- 16.1.1 Without prejudice to its rights at common law, the Board may immediately terminate this Agreement, in whole or in part, by written notice to the Contractor ("Notice of Termination for Cause"):
  - (a) where the Contractor makes any statement, fact, information, representation or provides material in the Tender which is false, untrue, or incorrect in a way which materially affects the Agreement;
  - (b) where proceedings or investigations are commenced or threatened by the Independent Commission Against Corruption or similar public body against the Contractor including for corrupt conduct or for collusive pricing;
  - (c) where the Contractor commits a Substantial Breach of the Agreement that is not capable of remedy;
  - (d) where the Contractor commits a Substantial Breach of the Agreement in a manner that is capable of remedy and does not remedy the breach within 7 days of receiving a notice from the Board requiring it to do so ("Notice of Breach"), or such further time, having regard to the nature of the breach and a reasonable time to remedy it, as the Board may reasonably allow;
  - (e) where the Contractor assigns its rights and/or obligations, or novates this Agreement or subcontracts the Customer Contract except in accordance with this Agreement;
  - (f) in the case of the Contractor's Insolvency;
  - (g) where the Contractor has not for three consecutive Payment Periods issued any invoice to a Customer or received any order; or
  - (h) if in the Board's view a conflict of interest exists for the Contractor which prevents the proper performance of this Agreement.

#### 16.2 Effect of Termination for Cause

- 16.2.1 If the Board terminates this Agreement for cause the Board may:
  - (a) contract with any other person to complete the provision of the Products including but not limited to any order remaining to be filled;
  - (b) deduct loss or damages arising from or in connection with the termination, including any loss or damages incurred by a Customer under any Customer Contract (which may be ascertained and certified by the Board), from any money due, or which may become due to the Contractor (whether under this Agreement or any Customer Contract) and/or from the Financial Security (if any); and
  - (c) recover from the Contractor in an appropriate court the balance of any monies remaining unpaid as a debt due and payable by the Contractor to the Board.
- 16.2.2 The Board's termination under this clause will not affect any Customer Contract unless the context requires it.

#### 16.3 Termination for the Board's Convenience

16.3.1 The Board may terminate this Agreement in whole or in part for its convenience by giving 14 days written notice ("Notice of Termination for Convenience") with effect from the date stated in the notice and without the need to provide reasons.

#### 16.4 Effect of Termination for Convenience

- 16.4.1 The Board's termination under this clause will not affect any Customer Contract unless the context requires it.
- 16.4.2 The Board shall reimburse the Contractor its unavoidable costs directly incurred as a result of termination provided that any claim by the Contractor:
  - (a) must be supported by written evidence of the costs claimed;
  - (b) will be in total satisfaction of the liability of the Board to the Contractor in respect of this Agreement and its termination.
- 16.4.3 The Board shall not in any circumstances be liable for any Consequential Loss or loss of profits suffered by the Contractor as a result of the termination of this Agreement by the Board.

#### 17 Termination by Customer

#### **17.1** Termination of Customer Contract

- 17.1.1 Without prejudice to its rights at common law, the Customer may immediately terminate the Customer Contract, by written notice to the Contractor ("Notice of Termination"):
  - (a) where proceedings or investigations are commenced or threatened by the Independent Commission Against Corruption or similar public body against the Contractor including for corrupt conduct or for collusive pricing;
  - (b) where the Contractor commits a Substantial Breach of the Customer Contract that is not capable of remedy;
  - (c) where the Contractor commits a Substantial Breach of the Customer Contract in a manner that is capable of remedy and does not remedy the breach within 7 days of receiving a notice from the Customer requiring it to do so ("Notice of Breach"), or such further time as the Customer may reasonably allow;
  - (d) where the Contractor assigns its rights and/or obligations, or subcontracts the Customer Contract otherwise than in accordance with the Customer Contract; or

(e) in the case of the Contractor's Insolvency.

## 17.2 Effect of Termination of Customer Contract

- 17.2.1 In the event of termination, the Customer:
  - (a) may procure from any other source a reasonably similar alternative to the Product suitable to the Customer and the Contractor shall be liable to the Customer for any reasonable extra expense incurred together with any loss sustained by the Customer;
  - (b) may, by notice in writing to the Contractor, require the Contractor at its expense to remove the specified Product not accepted by the Customer and to dismantle or remove specified work from the Customer's premises by a date specified in the notice;
  - (c) shall be liable under the Customer Contract to pay only for the Products delivered and accepted by the Customer or performed to the satisfaction of the Customer, in accordance with the Customer Contract; and
  - (d) may recover from the Contractor the amount of any loss or damage suffered by the Customer as a result of the termination.
- 17.2.2 This clause will survive the termination of the Customer Contract.
- 17.2.3 If the Customer terminates this Customer Contract the Customer may:
  - (a) deduct any loss or damages arising from or in connection with the termination, from any money due, or which may become due to the Contractor and/or from the Financial Security (if any); and
  - (b) recover from the Contractor in an appropriate court the balance of any monies remaining unpaid as a debt due and payable by the Contractor to the Customer.
- 17.2.4 The Customer's termination under this clause will not affect the Agreement, unless the context requires it.
- 17.2.5 Any termination by the Customer is without prejudice to any accrued rights or remedies of the Customer under the Customer Contract.

#### 18 General

#### 18.1 No Assignment or Novation

- 18.1.1 The Contractor must not assign or novate this Agreement or a Customer Contract without first obtaining the prior written consent of the Board or the Customer as applicable, which consent may be withheld at their absolute discretion.
- 18.1.2 The Contractor acknowledges that the Board may make financial checks and due diligence checks on the entity proposing to take over this Agreement before determining whether or not to give consent to the assignment or novation.

#### 18.2 Conflicts of Interest

- 18.2.1 The Contractor promises that, to the best of its knowledge, no conflict of interest of the Contractor, its employees, agents or sub-contractors exists or is likely to arise in the performance of its obligations under the Agreement.
- 18.2.2 The Contractor must:
  - (a) notify in writing, and consult with, the Board immediately upon becoming aware of the existence, or possibility, of a conflict of interest; and
  - (b) comply with any direction given by the Board in relation to those circumstances designed to manage that conflict of interest.
- 18.2.3 For the purposes of this clause, a "conflict of interest" includes engaging in any activity, or obtaining any interest, likely to conflict with the performance by the

Contractor of, or to restrict the Contractor in performing, its obligations under the Agreement.

#### 18.3 Records and Access to Records

- 18.3.1 The Contractor must keep proper accounts and records in accordance with the accounting principles generally applied in commercial practice.
- 18.3.2 During the Term, the Contractor must, within a reasonable time of a request from the Board, give the Board access to, and copies of, any material relevant to the performance of the Contractor's obligations under this Agreement, and any financial information, that the Board reasonably requires.

#### 18.4 Waiver

18.4.1 A waiver in respect of a breach of a term of this Agreement by the other Party shall not be taken to be a waiver in respect of any other breach. The failure of either Party to enforce a term of this Agreement will not be interpreted as a waiver of that term.

#### 18.5 Severability

18.5.1 If any part of this Agreement is void or voidable, then that part is severed from this Agreement but without affecting the continued operation of the remainder of the Agreement.

#### 18.6 Notices

- 18.6.1 Notices must be sent to the other Party at the address shown in items 15 or 16 of Schedule 1, or the address last notified to the other Party in writing, or in the case of the Contractor, at the Contractor's registered office.
- 18.6.2 All notices must be in writing and signed by the relevant Party and must be given either by hand delivery, post or facsimile transmission.
- 18.6.3 If delivery or receipt of a notice is not made on a business day, then it will be taken to be made on the next business day.

## 18.7 Counterparts

18.7.1 If there are a number of counterparts of this Agreement, the counterparts taken together constitute one and the same instrument.

#### 18.8 Applicable Law

18.8.1 This Agreement is governed by the laws of the State of New South Wales and the Parties submit to the non-exclusive jurisdiction of the courts of the State of New South Wales and the Commonwealth of Australia.

#### 18.9 No agency/no employment/no partnership

18.9.1 The Contractor agrees that the Contractor will not be taken to be, nor will it represent that it is, the employee, partner, officer and/or agent of the Board.

# 18.10 Disengagement Period

- 18.10.1 For 6 months following the expiry or termination of a Customer Contract (or part thereof) the Contractor will provide such assistance as is reasonably requested by the Customer for the supply of the Deliverables to continue without interruption to facilitate an orderly, prompt and efficient transition to an alternative service provider or to the Customer. Such assistance includes (without limitation):
  - (a) providing reasonable co-operation with a third party supplier nominated by the Customer, and
  - (b) providing the Customer data, information and materials that may be required to enable transacting with a new provider as requested by the Board or Customer.

# 18.11 Pricing Information

The Contractor agrees that, subject to clause 10 (Confidentiality), product pricing information (including discounts, commissions and rebates as appropriate) may be disclosed to any person by the Board at its sole discretion in the form of a User Guide or in any medium of communication it deems appropriate.

# Schedule 1 Agreement Details

| Item 1 | Contractor's Name  |  |  |
|--------|--|--|--|
| Item 2 | Term: (clause 2.1.1)   |  |  |
|        | Period 3 years from contract commencement  |  |  |
|        | Period of extended term (if any): (clause 2.2.1)   |  |  |
|        | Period: 2 options each of up to 1 year in duration   |  |  |
| Item 3 | Restrictions on Nominee Purchasers (clause 3.6)  |  |  |
| Item 4 | Benchmarker (clause 5.6)   |  |  |
|        | Name:  |  |  |
|        | Address:   |  |  |
|        | Telephone:   |  |  |
|        | Facsimile  |  |  |
|        | Hourly Rate:   |  |  |
| Item 5 | Management Fee Rate (clause 9.1.3)   |  |  |
|        | 2.5%   |  |  |
| ltem 6 | Payment Period of Management Fee (clause 9.1)<br>Monthly   |  |  |
| Item 7 | Sales Information (clause 9.1.8)   |  |  |
|        | <b>1.</b> The names of the ten largest Customers listed by dollar value invoiced by the Contractor in the relevant Payment Period.   |  |  |
|        | Every three months, reports will be provided, in an excel spreadsheet, showing the following.  |  |  |
|        | • <b>Quotations</b> – for each quotation offered, provide details of the number and type of equipment offered, power output, labour, total cost, cost breakup to show alignment with contract pricing, proposed completion time, date of site inspection, date to commence work on site. Name of school/location/entity at which installation is proposed. Contact details of the school/agency/entity officer requesting the quotation. |  |  |
|        | • <b>Orders received</b> – as above, with any variation from original quotation clearly defined.   |  |  |
|        | • <b>Completed work</b> – same details with dates of actual commencement and completion.   |  |  |
|        |  |  |  |

# Schedule 4 Deed of Confidentiality

THIS DEED DATED THE \_\_\_\_\_ day of \_\_\_\_\_ 200\_\_\_

**BETWEEN** (*insert name of Principal*) of (*insert address of Principal*), in the State of New South Wales ("the Principal")

**AND** [*Name and address of Contractor*] ("the Contractor ")

#### RECITALS:

- A. In the course of the Contractor supplying certain Deliverables for the Principal (whether directly or indirectly) pursuant to the Agreement, the Contractor will have access to and may become aware of Confidential Information belonging to or in the possession of the Principal.
- B. Improper use or disclosure of the Confidential Information would severely damage the Principal's ability to perform its governmental/statutory functions and would severely damage the commercial interests of the NSW Government.
- C. The Principal requires, and the Contractor agrees, that it is necessary to take all reasonable steps (including the execution of this Deed) to ensure that the Principal's Confidential Information is kept confidential and that the Contractor provides the Deliverables faithfully and without any conflicting interest.
- D. This Deed sets out the terms on which the Contractor will have access to the Confidential Information

#### **OPERATIVE PROVISIONS:**

### 1. Recitals

The Parties acknowledge the truth and accuracy of the Recitals in every particular.

# 2. Interpretation

#### 2.1 Definitions

In the interpretation of this Deed unless a contrary intention appears requires the following expressions will have the following meanings:

"**Agreement**" means the Agreement between the Board and the Contractor dated [*insert date*] for the supply of the Deliverables as defined in the Agreement.

"**Board**" means the State Contracts Control Board established by the Public Sector Employment & Management Act 2002 and includes duly authorised delegates of the Board, including officers of NSW Procurement – Contracting Services.

"Confidential Information" means information that:

- (a) is by its nature confidential;
- (b) is designated by the Principal as confidential; or

(c) the Contractor knows or ought to know is confidential;

and includes but is in no way limited to:

- (d) the Contract Material;
- (e) The Principal's Material including the financial information, the corporate information and the commercial information of the Principal or any Customer;
- (f) any material which relates to the affairs of a third party;
- (g) information relating to the policies, strategies, practices and procedures of the NSW Government and any information in the Contractor's possession relating to the NSW Public Service.

"Contractor" means [insert name of Contractor]

#### "Contract Material" means:

- (a) any material created, written or otherwise brought into existence as part of, or for the purpose of performing the Deliverables including but not in any way limited to all Records, working papers, programs, flow charts, reports, including documents, equipment and information and data stored by any means ("New Contract Material");
- (b) any material which is existing at the date of this Agreement and which is incorporated with the New Contract Material ("Existing Contract Material").

"Customer" has the same meaning as in the Agreement;

**"Express Purpose"** means the Contractor performing the obligations under the Agreement.

"Intellectual Property Rights" includes copyright, patent, trademark, design, semi-conductor or circuit layout rights, trade, business or company names, or other proprietary rights, or any rights to registration of such rights existing in Australia, whether created before or after the date of this Agreement;

"Notice" means notice in writing given in accordance with this Deed; and

#### "Principal" means [insert name of Principal].

"**Principal's Material**" means any documentation, information or material supplied by or on behalf of the Principal, or a Customer to the Contractor

"**Records**" includes the Contract Material and any other information, documents or data brought into existence by any means and stored by any means in connection with the performance of the Agreement;

#### 2.2 General

2.2.1 Headings are for convenience only, and do not affect interpretation. The following rules also apply in interpreting this document, except where the context makes it clear that a rule is not intended to apply.

#### 2.2.2 A reference to:

- (a) legislation (including subordinate legislation)is a reference to that legislation as amended, re-enacted or replaced, and includes any subordinate legislation issued under it;
- (b) a document or agreement, or a provision of a document or agreement, is a reference to that document, agreement or provision as amended, supplemented, replaced or novated;
- (c) a person includes any type of entity or body of persons whether or not it is incorporated or has a separate legal entity;
- (d) anything (including a right, obligation or concept) includes each part of it.
- 2.2.3 If this Agreement expressly or impliedly binds more than one person then it shall bind each such person separately and all such persons jointly.
- 2.2.4 A singular word includes the plural, and vice versa.
- 2.2.5 A word which suggests one gender includes the other genders.
- 2.2.6 If a word is defined, another part of speech of that word has a corresponding meaning.

# 3. Non disclosure

- 3.1.1 The Contractor must not disclose the Confidential Information to any person without the prior written consent of the Principal.
- 3.1.2 The Principal may grant or withhold its consent in its discretion.
- 3.1.3 If the Principal grants its consent, it may impose conditions on that consent, including a condition that the Contractor procure the execution of a Deed in these terms by the person to whom the Contractor proposes to disclose the Confidential Information.
- 3.1.4 If the Principal grants consent subject to conditions, the Contractor must comply with those conditions.
- 3.1.5 Despite cl.3.1.1, the Contractor may disclose the Confidential Information to its directors, officers, employees, and contractors ("permitted recipients") where such disclosure is essential to carrying out their duties owed to the Contractor or in accordance with this Deed.
- 3.1.6 Before disclosing the Confidential Information to a permitted recipient, the Contractor will ensure that the permitted recipient is aware of the confidentiality requirements of this Deed and is advised that it is strictly forbidden from disclosing the Confidential Information or from using the confidential information other than as permitted by this Deed.
- 3.1.7 The Confidential Information must not be copied or reproduced by the Contractor or the permitted recipients without the expressed prior

written permission of the Principal, except as for such copies as may be reasonably required for the purposes of this Deed.

- 3.1.8 The Principal may at any time require the Contractor to promptly arrange for the permitted recipients to execute a Deed of Confidentiality substantially in the form of this Deed.
- 3.1.9 If any person being any director, officer, contractor or employee of the Contractor, who has had access to the Confidential Information in accordance with this clause leaves the service or employ of the Contractor then the Contractor will ensure that that person does not do or permit to be done anything which, if done or permitted to be done by the Contractor, would be a breach of the obligations of the Contractor under this Deed.
- 3.1.10 The requirements of this Deed do not affect the obligation of the Contractor to disclose any Confidential Information where it is required to be disclosed at law.

# 4. Restriction on use

- 4.1 The Contractor must use the Confidential Information only for the Express Purpose and must not without the prior written consent of the Principal use the Confidential Information for any purpose other than the Express Purpose.
- 4.2 The Contractor must, unless otherwise authorised by the prior written consent of the Principal:
  - treat as confidential and secret all of the Confidential Information which the Contractor has already acquired or will acquire from the Principal;
  - (b) take proper and adequate precautions at all times and enforce such precautions to preserve the confidentiality of the Confidential Information and take all necessary action to prevent any person obtaining access to the Confidential Information other than in accordance with this Deed;
  - (c) not directly or indirectly use, disclose, publish or communicate or permit the use disclosure, publication or communication of the Confidential Information to any person other than in accordance with this Deed;
  - (d) not copy or disclose to any person in any manner any of the Confidential Information other than in accordance with this Deed; and
  - (e) ensure that the permitted recipients comply with the terms of this Deed and keep the Confidential Information confidential and not use or disclose the Confidential Information other than as permitted by this Deed.

# 5. Survival

This Deed will survive the termination or expiry of the Agreement.

# 6. Rights of the Board

## 6.1 **Production of Documents**

- 6.1.1 The Principal may demand the delivery up to the Principal of all documents in the possession or control of the Contractor containing the Confidential Information.
- 6.1.2 The Contractor must immediately comply with a demand under this Clause 6.
- 6.1.3 If the Principal makes a demand under this clause 6, and the Contractor has placed or is aware that documents containing the Confidential Information are beyond his or her possession or control, then the Contractor must provide full particulars of the whereabouts of the documents containing the Confidential Information, and the identity of the person in whose possession or control they lie.
- 6.1.4 In this clause 6, "documents" includes any form of storage of information, whether visible to the eye or not.

# 6.2 Legal Proceedings

The Principal may take legal proceeding against the Contractor or third parties if there is any actual, threatened or suspected breach of this Deed, including proceedings for an injunction to restrain such breach.

# 7. Indemnity and release

- 7.1 The Contractor is liable for and agrees to indemnify and keep indemnified the Principal or a Customer in respect of any claim, damage, loss, liability, cost, expense, or payment which the Principal or a Customer suffers or incurs as a result of:
  - (a) a breach of this Deed (including a breach of this Deed which results in the infringement of the rights of any third party); or
  - (b) the disclosure or use of the Confidential Information by the Contractor or the permitted recipients other than in accordance with this Deed.

# 8. No exclusion of law or equity

This Deed does not exclude the operation of any principle of law or equity intended to protect and preserve the confidentiality of the Confidential Information.

# 9. Waiver

- 9.1 No waiver by the Principal of one breach of any obligation or provision of this Deed will operate as a waiver of another breach of any other obligation or provision of this Deed.
- 9.2 None of the provisions of this Deed will be taken to have been varied, waived, discharged or released by the Principal unless by its express consent in writing.

# **10.** Remedies Cumulative

#### 10.1 Cumulative

The rights and remedies provided under this Deed are cumulative and not exclusive of any other rights or remedies.

#### **10.2** Other Instruments

Subject to the other covenants of this Deed, the rights and obligations of the parties pursuant to this Deed are in addition to and do not derogate from any other right or obligation between the parties under any other deed or agreement to which they are parties.

# 11. Variations and amendments

No term or provision of this Deed may be amended or varied unless reduced to writing and signed by the parties in the same manner as this instrument.

# 12. Applicable law

This Deed will be governed and construed in accordance with the law of New South Wales and the Commonwealth of Australia.

# 13. Notices

- 13.1 Notices must be sent to the other party at the address shown in this Deed, or the address last notified to the other party in writing, or in the case of the Contractor, at the Contractor's registered office.
- 13.2 All notices must be in writing and signed by the relevant party and must be given either by hand delivery, post or facsimile transmission.
- 13.3 If delivery or receipt of a notice is not made on a business day, then it will be taken to be made on the next business day.

#### Executed as a Deed

# Schedule 5 Management Fee Audit Confidential Disclosure Deed of Agreement

Effective Date: Auditor (Company):

This Confidential Disclosure Deed of Agreement is entered into by and between the Contractor ("Contractor") ABN and the "Auditor", which has been engaged by the State Contracts Control Board ("Board") under an Agreement with the Contractor to carry out a review of the Contractor's records and systems in connection with the Agreement dated......for the supply of.....

- 1. In accordance with the clause 9 of the Agreement the Contractor will disclose to the Auditor all information that the Auditor may reasonably require to enable the Auditor to determine the amount of the Management Fee payable by the Contractor.
- 2. **Representatives**. The officer(s) responsible for disclosing or receiving Confidential Information are:

On behalf of the Contractor:

Name: Title: The Contractor's address: Other officer: On behalf of Auditor: Name: ------and any other partner or employee of the Auditor who is involved in the Audit or has a need to know in connection with the Audit. Title: Work Address of Auditor's representative above:

- 3. **Definition of Confidential Information**. The "Confidential Information" disclosed under this Agreement is all information in any form received in connection with the Audit. A recipient of Confidential Information under this Agreement shall have a duty to protect all such Confidential Information whether expressly disclosed as Confidential Information or not.
- 4. **Disclosure Period and Term**. The information disclosed by the Contractor to the Auditor will remain confidential for a period of 2 years from the date of this Deed.
- 5. **Use of Confidential Information**. The Auditor shall use, and shall ensure that any of its employees or contractors use, the Confidential Information for the sole purpose of fulfilling the Auditor's obligations to the Board in relation to the Audit.
- 6. **Protection of Confidential Information**. The Auditor shall not disclose the Confidential Information to a third party other than the Board, and solely for the purposes for which the Confidential Information was disclosed. The Auditor shall take all reasonable steps to prevent the unauthorised use, dissemination or publication of the Confidential Information. For the avoidance of doubt, the Auditor's partners and employees referred to in clause 2 are not third parties for the purposes of this clause.
- 7. **Exclusions**. This Agreement imposes no obligation upon a Recipient of the Auditor with respect to the Confidential Information which:
  - (a) is or becomes a matter of public knowledge through no fault of the Recipient;
  - (b) is required to be disclosed under operation of law; or
  - (c) is disclosed by the Recipient with the Discloser's prior written approval; or
  - (d) is disclosed to a party's legal adviser in connection with the Audit or this Deed of Agreement.

- 8. **Proprietary Rights**. Neither party to this Deed of Agreement acquires any intellectual property rights or any other rights under this Deed of Agreement except the limited right to use set out in paragraph 5 above.
- 9. **General**. The parties do not intend that any agency or partnership relationship be created between them by this Deed of Agreement. This Agreement sets forth the entire agreement with respect to the Confidential Information disclosed herein and supersedes all prior or contemporaneous agreements concerning such Confidential Information, whether written or oral. All additions or modifications to this Deed of Agreement must be made in writing and must be signed by both parties.

This Deed of Agreement shall be governed by the laws of the State of New South Wales and shall be subject to the jurisdiction of the Courts in Sydney, Australia.

# Schedule 6 smartbuy® Requirements

#### 1. smartbuy® Licence

1.1 The Board grants to the Contractor a non-exclusive, non-transferable, revocable licence to use smartbuy® for the performance of its obligations under this Agreement.

#### 2. Authorised User

- 2.1 The Board may approve a person nominated by the Contractor and allow such person to access or use smartbuy® and become an Authorised User or an Administrator.
- 2.2 The Board may in its discretion decline to accept a person nominated by the Contractor as an Authorised User or an Administrator, without stating its reasons.

#### 3. Contractor Obligations

- 3.1 The Contractor must provide any information that is reasonably required by the Board for use by smartbuy® including Contractor Information. The Contractor must ensure that all information provided to the Board (including maintaining information in the smartbuy® system) is current, correct, and complete at all times. The Contractor must immediately notify the Board of any changes required to the Contractor Information.
- 3.2 The Contractor agrees that Contractor Information will be published on smartbuy® by the Board. Contractors are responsible to ensure that Designated and Nominated Sub-Contractors are aware that their information will be published by the Board on smartbuy® as a part of Contractor Information.
- 3.3 The Contractor must:
  - a) conform to the Board's current password policies;
  - b) comply with all directions given by the Board in relation to the Contractor's access and/or use of smartbuy®; and
  - c) ensure that Transactions are only made for and on behalf of the Contractor and in accordance with this Agreement
  - d) provide the Board with an appropriate number of dedicated personnel to ensure the appropriate use of smartbuy®.

#### 4. Catalogues

- 4.1 The Board requires the Contractor (unless otherwise specified by the Board) to take responsibility to update and actively maintain Catalogue Information provided by the Contractor on smartbuy®, or its Externally Hosted Catalogue.
- 4.2 The Contractor is responsible for the accuracy and completeness of Catalogue Information including any images supplied by the Contractor.
- 4.3 The Contractor is required to provide Catalogue Information to an acceptable data standard, approved by the Board. Catalogue Information must include all required item attributes including United Nations Standards Products & Services Codes (UNSPSC). The Contractor may either provide developed Catalogue Information to the Board or may request the Board to provide it with assistance, at a fee.
- 4.4 The Board may transform data provided by the Contractor in order to load it into smartbuy® however the values and meaning of the data will not be modified without the prior agreement of the Contractor.
- 4.5 If the Board produces formatted Catalogue Information for the Contractor, then the Contractor must ensure that the formatted Catalogue Information is current, correct, and complies with its obligations under this Agreement.
- 4.6 The Board may review any Catalogue Information and require the Contractor from time to time to update or take off-line its existing Catalogue Information, add new

Catalogue Information and/or verify that the Catalogue Information is accurate, current and in accordance with its obligations under this Agreement or applicable Codes and Standards.

- 4.7 The Board reserves the right to audit the Contractor's Externally Hosted Catalogue Information from time to time for compliance with this Agreement.
- 4.8 The Contractor may only make available information or data, including any Catalogue Information in an Externally Hosted Catalogue to NSW agencies with the Board's prior written consent. Where such approval is given the Contractor will provide the Board with administrator access to it's Externally Hosted Catalogue to enable the Board to conduct audits as required.
- 4.9 When approved to connect an Externally Hosted Catalogue, the Contractor must set up accounts for Eligible Customers within two working days from receipt of lodgement of a completed request and ensure that all Eligible Customers can access Catalogue Information.
- 4.10 Externally Hosted Catalogues shall not provide functionality that allows Eligible Customers to directly place orders for Deliverables. The Contractor agrees that, after an Eligible Customer has finished its browse activities, the Customer Contract for the Deliverables in Externally Hosted Catalogues must be transmitted via smartbuy®.
- 4.11 The Contractor's Externally Hosted Catalogue(s) should be available 7 days a week excluding any scheduled maintenance. Contractors must, in relation to their Externally Hosted Catalogues, give the Board reasonable prior notice of any scheduled maintenance and the time it will occur. The Contractor agrees to monitor the performance of its system and notify the Board immediately of any outage of its Externally Hosted Catalogue, except for any scheduled maintenance that the Contractor has notified the Board about.
- 4.12 The Contractor agrees to nominate in writing to the Board within 2 days of entry into this Agreement a person who can be contacted between 9am and 5pm during normal business days to receive and respond to enquiries relating to its Externally Hosted Catalogues.
- 4.13 The Contractor agrees to include on its webpage a customised error message confirming that the error is with the Externally Hosted Catalogue and not with smartbuy®.

#### 5. Provision and Updating of Catalogue Information

- 5.1 The Contractor is required to provide electronic Catalogue Information in a smartbuy® format acceptable to the Board no later than 30 days from the commencement of this Agreement, inclusive of Catalogue Information specific to particular Eligible Customers.
- 5.2 All Catalogue Information including that pertaining to particular Eligible Customers must be updated in strict accordance with the frequency and conditions outlined in this document from the date on which the Catalogue Information is initially hosted on smartbuy® as per clause 4 above.

#### 6. Availability

- 6.1 The Board may in its discretion limit or suspend the Contractor's access or use of smartbuy® during the Term of this Agreement.
- 6.2 Unless otherwise notified by the Board, smartbuy® will be accessible 7 days a week except during any necessary scheduled maintenance, unscheduled maintenance or unavailability caused by a circumstance beyond the reasonable control of the Board or its third party suppliers.
- 6.3 The Board will endeavour where reasonably practicable to notify the Contractor of any:
  - a) changes or upgrades to smartbuy®'s functionality that materially affect the Contractor's use of smartbuy®;

- b) changes in equipment or configuration requirements of smartbuy® that materially affects the Contractor's ability to access and use smartbuy®.
- 6.4 The Board agrees to make available the NSW Procurement Client Support Centre to assist the Contractor in relation to any defects it experiences in the operation or functionality of smartbuy®. The Contractor agrees to report any issues or defects to the Client Support Centre on 1800 NSW BUY (679 289) or *NSWP\_Support@commerce.nsw.gov.au* Unless the Contractor is otherwise notified by the Board, the Client Support Centre will be available from 8.30 am to 5.00 pm Monday to Friday, excluding public holidays. The Board may change the times during which the Client Support Centre is available from time to time.

# 7. smartbuy® Security

- 7.1 smartbuy® security systems have been created to protect buyers, suppliers and information maintained on or transmitted from or to smartbuy®.
- 7.2 Key elements of the security regime include:
  - a) Data Centre certified to BS7799, ASIO T4 rating and Suntone 2 Accreditation;
  - b) Robust firewalls;
  - c) Multi level system design;
  - d) Virus protection;
  - e) Password protection and restricted access permissions;
  - f) Intrusion detection systems;
  - g) Audit trails of user activities;
  - h) Where encryption is used, HTTPS protocol with 128 bit technology has been selected;
  - i) Programme of system upgrades to ensure security compliance.
- 7.3 The Contractor must:
  - a) have in place procedures to prevent any unauthorised use of smartbuy® by any person on its behalf (including Administrators, Authorised Users or an unauthorised third party) and these procedures must include provision to ensure its Administrators and Authorised Users are prevented from accessing or using smartbuy® upon them ceasing to be authorised to do so;
  - b) make all reasonable efforts to ensure that any information (including documents) that it transmits via smartbuy<sup>®</sup> will be free from viruses, worms or trojan horses or any other malicious program that is capable of causing damage to smartbuy<sup>®</sup> or smartbuy<sup>®</sup>'s users;
  - c) make all reasonable efforts to ensure that its systems are secure and are kept up to date with adequate anti-virus software;
  - d) notify the Board immediately of any significant security breaches that it suffers or threats that it is aware of.
- 7.4 The Contractor acknowledges that user logins and passwords used to access smartbuy® are transmitted using HTTPS protocol. Delivery of business documents (such as purchase orders and/or Invoices) is done through the following mechanisms, depending on the election of the Contractor:
  - a) Facsimile;
  - b) Unencrypted emails;
  - c) SFTP: File Transfer Protocol over Secure Sockets Layer (SSL) (Secure Shell (SSH) available on request);
  - d) HTTPS protocol: Hypertext Transport Protocol over Secure Sockets Layer (SSL).

- 7.5 While the Board will make reasonable endeavours at all times to make smartbuy® secure, the Board does not guarantee:
  - a) the security of smartbuy®, the internet, and any other system, including the system used by the Board to access or use smartbuy®;
  - b) that the delivery of business documents will be uninterrupted or secure;
  - c) that smartbuy® will be uninterrupted, timely, secure or error-free;
  - d) that smartbuy®, the internet, and any other system, including the system used by the Contractor, will be free of viruses or errors.

The Contractor must immediately notify the Board if it suspects, becomes aware, or has knowledge of any unauthorised use of smartbuy® by another person.

- 7.6 The Board may provide access and password details ("Passwords"):
  - a) to Administrators to be supplied to Authorised Users; and/or
  - b) directly to the e-mail addresses of Authorised Users who are acceptable to the Board.
- 7.7 The Contractor must take all reasonable steps to protect and keep secret any Passwords that the Board provides to it as per clause 7.6. The Contractor acknowledges and agrees that Board will rely on their use of a Password as conclusive evidence of their identity and authority, without further investigation. The Contractor must immediately notify the Board if it suspects, knows about or has knowledge that a Password has become compromised or known to another person and/or of any unauthorised use of a Password by another person has occurred, as per clause 7.5.

#### 8. Minimum Configuration

- 8.1 To access and use smartbuy® TRADE the Contractor must have the following minimum configuration and the Contractor warrants that it has:
  - a) Windows 95, 98, 2000 or XP, IE 5.5 or later, a recommended video resolution of 1024X768; and
  - b) will configure its web browser to use SSL3.0 and ensure that the auto-complete or similar function is switched off for "Contractor name and passwords on forms".
- 8.2 These configurations may be varied by the Board due to changes or upgrades to smartbuy® from time to time. The Board will, wherever practicable, notify the Contractor of any variations to the configurations. The Contractor acknowledges that any access speed to smartbuy® and the performance of smartbuy® is limited by the Contractor's Internet service or other infrastructure and equipment.
- 8.3 If the Contractor has any queries in relation to these configuration requirements it may contact the Client Support Centre .

#### 9. Improper Use of smartbuy®

- 9.1 The Contractor must not intentionally, recklessly or negligently interfere with any other parties' use of smartbuy<sup>®</sup>. The Contractor must not use smartbuy<sup>®</sup> or any service provided by the Board to post or transmit any information or provide a link to any third party website that:
  - a) defames, threatens or menaces any person;
  - b) breaches any law or regulation or infringes a third party's rights;
  - c) is indecent, pornographic or obscene;
  - knowingly transmits any virus, computer programme, code, device, product, components or other disabling feature that prevents, inhibits or impairs the performance of smartbuy®;
  - e) is an unsolicited commercial electronic message promoting the supply of goods or services.

- 9.2 The Contractor must ensure that its employees, officers and agents view or access any material published or made available on smartbuy® TRADE and/or smartbuy® CONNECT in accordance with this Agreement.
- 9.3 The Contractor must not use smartbuy<sup>®</sup> to sell, buy or dispose of, or attempt to sell, buy or dispose of any goods or services that are not specified by the Board under this contract, are unlawful or unauthorised.

#### 10. Disclaimer

10.1 The Board makes no warranties in relation to the condition, fitness, merchantability, quality and title of the Deliverables purchased by the Customer using smartbuy®. To the extent permitted by law, the Board expressly excludes all conditions, warranties and terms whether express, implied, or statutory, which would otherwise be implied by law, conduct or otherwise into this Agreement.

#### 11. Privacy

- 11.1 The Contractor warrants, in respect of any personal information provided in connection with the use of smartbuy®, that the information is accurate, up to date and complete, and that individuals to which the personal information refers authorise its collection and are aware:
  - a) that personal information is being collected, and will be held by the Board at the address shown in smartbuy® or by its third party suppliers;
  - b) that the information is being collected for the purpose of managing smartbuy®, and the administration of this Agreement, and may be made available to Eligible Customers for those purposes;
  - c) whether the supply of the information by the individual is required by law or is voluntary, and any consequences for the individual if the information (or any part of it) is not provided; and
  - d) of the existence of any right of access to, and correction of, the information.
- 11.2 The Contractor acknowledges that its use of smartbuy® indicates its knowledge and acceptance of the privacy policy displayed on smartbuy®. smartbuy® may contain links to other websites. The Board is not responsible for the privacy practices or the content of such sites. The Board requires the Contractor to read the privacy statements in these linked sites, as their privacy policies may differ from those of the Board.

#### 12. Integration with smartbuy® CONNECT

- 12.1 All electronic documents transmitted through smartbuy® TRADE are routed via smartbuy® CONNECT. smartbuy® CONNECT may also be used for document transmission directly between Eligible Customers and Contractors, without passing through the smartbuy® TRADE.
- 12.2 The following Transmission Types and Document Types are supported by smartbuy® CONNECT. The combination of Transmission Type and Document Type is termed a Trading Channel:

| Transmission Type | Document Type | Trading Channel |
|-------------------|---------------|-----------------|
| HTTPS             | xCBL3.0 (XML) | HTTPS/xCBL3.0   |
| SFTP              | CSV           | SFTP/CSV        |
| Email (SMTP)      | PDF           | Email/PDF       |
| Fax               | PDF           | Fax/PDF         |

- 12.3 smartbuy® CONNECT supports the following business documents via the Trading Channels outlined above.
  - a) PO
  - b) PO Change

- c) PO Acknowledgement
- d) Receipt
- e) Receipt Change
- f) Advanced Shipping Notice
- g) Invoice
- h) Technical Message Acknowledgement
- 12.4 Contractors must adhere to the smartbuy® Transmission specifications and smartbuy® Document specifications for the Trading Channel selected (specifications available on request If you require more information contact the NSW Procurement Client Support Centre on 1800 NSW BUY (679 289) or *NSWP\_Support*@*commerce.nsw.gov.au*). For all documents implemented, Contractors must be capable of reading and actioning all mandatory and optional fields as defined in the document specifications.
- 12.5 The Board may assist in the development of an estimate of the costs of any integration to smartbuy® CONNECT. Firm pricing cannot be determined until the conclusion of a specific implementation planning study. Costs will vary depending upon the level of integration and their capability. Any integration of their systems with smartbuy®, including any Externally Hosted Catalogues may only take place with the Board's prior consent. The Contractor acknowledges that they will support and fund the establishment, maintenance and regular content update costs associated with integrating their systems with smartbuy® CONNECT. The Contractor is responsible and liable for any damage or claim that the Board suffers or incurs resulting from or in connection with the integration or interoperation of their systems with smartbuy®.

#### **13 Invoices**

13.1 It is a requirement that the Contractor provides electronic invoices to smartbuy® for all purchases by all NSW Government agencies against this Agreement - irrespective of how the purchase order is received (for example, via fax, telephone, mail, vendor online ordering system, etc). Contractors must send invoices via one of three channels:

a). Via the HTTPS/xCBL3.0 Trading Channel adhering to the smartbuy® HTTPS Channel Specification and the smartbuy® xCBL3.0 Document Specification. Contractors are responsible for all costs associated with implementing and maintaining the channel.

b). Via the SFTP/CSV Trading Channel adhering to the smartbuy® SFTP Channel Specification and the smartbuy® CSV Invoice Document Specification. Contractors are responsible for all costs associated with implementing and maintaining the channel.

c). Via a hosted web-portal provided by smartbuy® that allows Contractors to enter invoices online.

#### 14 Externally Hosted Catalogues

14.1 Where Contractors are required to provide an Externally Hosted Catalogue the catalogue must utilise the OCI v3.0 protocol over HTTPS for both inbound and outbound requests.

# Schedule 7 Performance Management

#### Time Management

- ability to achieve milestones and completion of the works
- timely allocation of appropriate resources management of delays due to inclement weather management of industrial conditions
- fair consideration of delays caused by the Principal or other parties, outside the Contractor's control

#### Standard of Work

- standard of work as measured against the specification.
- remedial work required
- conformance with specified performance criteria compliance with specified tolerances and finishes
- rectification of defects

# Personnel/Sub-Contractors

- adequacy of the number of site personnel engaged by the Contractor in terms of efficient use of resources for the work
- control of personnel
- payment of workers of all monies due in respect of their employment
- establishment of site protocols
- effective coordination and flow of trades on site
- observance of site rules and procedures
- compliance with NSW Government Security of Payment provisions
- suitability of workers including compliance with the requirements set out in the NSW Government for Code of Practice Procurement including management, administrative, scientific or industry skills and overall experience relevant to the tasks undertaken.
- compliance with contractual and legal obligations with respect to subcontractors, consultants and suppliers
- payment to all subcontractors, consultants and suppliers in accordance with contract conditions

#### **Contract Administration**

- adequacy of documentation in meeting the requirements of the contract
- timeliness of the provision of information such as quotations, drawings, reports or other documentation
- timeliness of submission of claims for payment including the adequacy of supporting evidence and provision of statutory declarations required by the contract accuracy of details in claims for payment including rates charged, variations

#### **Co-Operative Relations**

- co-operation in all matters relating to the contract and facility staff and occupants.
- promptly informing of anything which is likely to affect the timing, cost or quality of the Works.
- commitment to a co-operative non-adversarial approach through open and effective communication with litigation reserved as a last resort
- evidence of a co-operative culture

#### **OH&S/Environmental Management**

- compliance with requirements in the NSW Government's OHS Management Systems Guidelines
- compliance with Project OH&S and Environmental Management Plan or Site-specific Safety Management Plan.
- compliance with safety issues specifically nominated in the contract and/or the Contractor's OH&S Management System/plan for the contract

- quality of and compliance with Safe Work Method Statements
- risk identification, assessment and management
- the number of infringement notices and directions issued to the Contractor concerning safety or environmental management
- results of audits
- fulfilling the Contractor's obligations for subcontractor OH&S management
- compliance with WorkCover Codes of Practice
- accidents and/or serious incidents
- evidence of a safety and environmentally aware culture
- compliance with environmental obligations

## **Solar Power Unit Performance**

- Actual solar generation (kWh) versus predicted solar generation (kWh)
- Number of breakdowns

# Schedule 8 Expert Determination Procedure

# 1. Questions to be determined by the Expert

- 1.1 The expert must determine for each issue the following questions (to the extent that they are applicable to the issue):
  - 1.1.1 Is there an event, act or omission which gives the claimant a right to compensation:

under the Agreement:

- (a) for damages for breach of the Agreement, or
- (b) otherwise in law?
- 1.1.2 If so:

what is the event, act or omission?

- (a) on what date did the event, act or omission occur?
- (b) what is the legal right which gives rise to the liability to compensation?
- (c) is that right extinguished, barred or reduced by any provision of the Agreement, estoppel, waiver, accord and satisfaction, set-off, cross-claim, or other legal right?
- 1.1.3 In the light of the answers to clauses 1.1.1 and 1.1.2 of this Expert Determination Procedure:
  - (a) What compensation, if any, is due from one Party to the other and when did it fall due?
  - (b) What interest, if any, is due when the expert determines that compensation?
- 1.2 The expert must determine for each issue any other questions required by the parties, having regard to the nature of the issue.

#### 2. Submissions

- 2.1 The procedure for submissions to the expert is as follows:
- 2.2 The Party to the Agreement which has referred the issue to Expert Determination must make a submission in respect of the issue, within 15 business days after the date of the letter of engagement referred to in clause 15.5.3 of the Agreement.
- 2.3 The other party must respond within 15 business days after receiving a copy of that submission. That response may include cross-claims.
- 2.4 The Party referred to in clause 2.2 may reply to the response, but must do so within 10 business days after receiving the response, and must not raise new matters.
- 2.5 The other Party may comment on the reply, but must do so within 10 business days after receiving the reply, and must not raise new matters.
- 2.6 The expert must ignore any submission, response, reply, or comment not made within the time given in clauses 2.2 to 2.5 of this Expert Determination Procedure, unless the Principal and the Contractor agree otherwise.
- 2.7 The expert may request further information from either Party. The request must be in writing, with a time limit for the response. The expert must send a copy of the response to the other Party, and give the other Party a reasonable opportunity to comment on the response.

2.8 All submissions, responses, replies, requests and comments must be in writing. If a Party to the Agreement gives information to the expert, it must at the same time give a copy to the other Party.

# 3. Conference

- 3.1 The expert may request a conference with both Parties to the Agreement. The request must be in writing, setting out the matters to be discussed.
- 3.2 The Parties agree that such a conference is considered not to be a hearing which would give anything under this Expert Determination Procedure the character of an arbitration.

# 4. Role of Expert

- 4.1 The Expert:
  - 4.1.1 acts as an expert and not as an arbitrator;
  - 4.1.2 must make its determination on the basis of the submissions of the Parties, including documents and witness statements, and the expert's own expertise; and
  - 4.1.3 must issue a certificate in a form the expert considers appropriate, stating the expert's determination and giving reasons, within 12 weeks after the date of the letter of engagement referred to in clause 15.5.3 of the Agreement.
  - 4.1.4 If a certificate issued by the expert contains a clerical mistake, an error arising from an accidental slip or omission, a material miscalculation of figures, a mistake in the description of any person, matter or thing, or a defect of form, then the expert must correct the certificate.

# Schedule 9 Financial Security

**BETWEEN** [Name, ACN and address of financial institution] )("**Provider**")

**AND** [STATE CONTRACTS CONTROL BOARD for and on behalf of the Crown in the right of the State of New South Wales] ("**Beneficiary**")

# IT IS AGREED

At the request of <u>Insert name of the Contractor's Company Name</u>, trading as "<u>Insert</u> <u>Cotnractor's Trading Name</u>," ACN Number <u>(Insert ACN Number</u>) ("**Customer**") and in consideration of, the Beneficiary accepting this undertaking in connection with the supply of Solar Power Systems, the Provider unconditionally undertakes to pay to the Beneficiary on demand in writing any sum or sums from time to time up to a maximum aggregate sum of twenty thousand dollars (\$20,000) ("**Sum**"). The Provider unconditionally and irrevocably agrees to pay such moneys to the Beneficiary immediately without reference to the Customer and regardless of any notice given by the Customer to the Provider not to pay.

This undertaking is to continue until a notification has been received from the Beneficiary that the Sum is no longer required by the Beneficiary or until this undertaking is returned to the Provider or until payment to the Beneficiary by the Provider of the whole of the Sum or such part as the Beneficiary may require.

The Provider may at any time without being required to do so pay to the Beneficiary the Sum less any amount or amounts it may previously have paid under this undertaking or such lesser sum as may be required by the Beneficiary and thereupon the Provider shall cease to be liable.

This deed is governed by and must be construed in accordance with the laws of *[insert applicable State or Territory*).

# 1. Design And Construction

- **1.1** The Contractor is to supply all materials and construct the Works in accordance with the Customer's design and any further development of the Customer's design allowed under the Contract. Minor items not included in the agreed design which are needed for the satisfactory completion of the Works are to be provided by the Contractor.
- **1.2** If the Contractor is to undertake design as part of the Works, the Contractor is to develop the Customer's design and submit the completed design comprising drawings, specifications, calculations and any statutory certificates required to the Customer within the agreed period.
- **1.3** The Contractor is not to depart from the Customer's design, unless directed by the Customer.
- **1.4** The Contractor's completed design is to comply with the Contract and be fit for the intended purpose of the Works which can be reasonably inferred from the Contract Documents.
- **1.5** The Customer is not bound to check the completed design for errors, omissions or compliance with the requirements of the Contract. Neither the Principal nor the Customer is liable to the Contractor for any claim whatsoever due to the Principal/Customer not detecting or notifying the Contractor of any errors, omissions or non-compliance with the requirements of the Contract in the completed design.
- **1.6** Responsibility for the completed design and its satisfaction of the Contract requirements remains solely with the Contractor and the Principal/Customer is relying on the Contractor's knowledge, skill and judgment to carry out this responsibility.
- 1.7 The Contractor is to grant to the Principal/Customer an irrevocable licence to use the Contractor's design for the Works. Such licence is also to include any subsequent repairs to, maintenance or servicing of (including the supply of replacement parts) or additions or alterations to the Works.

# 2. Care Of The Works And Other Property

**2.1** From and including the date the Site is made available to the Contractor to the date of Completion of the Works, the Contractor is responsible for the care of the Works, constructional plant and things entrusted to the Contractor by the Principal/Customer for the purpose of the Works.

The Contractor is to make good at the Contractor's expense any damage which occurs to the Works while responsible for their care.

The Contractor is also liable for damage caused by the Contractor during the Defects Liability Period.

- **2.2** The Contractor is to indemnify and keep the Principal/Customer indemnified against any loss or damage to the property of the Principal (including existing property in, about or adjacent to the Works) and against any legal liability for injury, death or damage to property of others arising from the performance of the Works.
- **2.3** Nothing in Clause 2 relieves the Principal/Customer from liability for the Principal's/Customer's own default and defaults of others for whom the Principal/Customer is liable.

# 3. Defects Liability Period

- **3.1** The Contractor is to make good any part of the Works which is not in conformity with the Contract either at Completion or which becomes apparent during the Defects Liability Period stated in this clause.
- **3.2** The Principal's/Customer's Representative may direct the Contractor to correct, including remove or replace, any non-conforming work during the Defects Liability Period and specify a reasonable time within which the Contractor is to comply with the direction.
- **3.3** If the Contractor does not correct the non-conforming work within the time specified, the Principal's/Customer's Representative may have the work corrected by others.
- **3.4** The Principal's/Customer's Representative is to assess the reasonable costs of having the nonconforming work corrected by others and the Contractor is to pay the Principal/Customer those costs.
- **3.5** At the end of the Defects Liability Period the Principal is to pay the Contractor retention moneys or return any unconditional undertakings less any amounts the Contractor is to pay the Principal/Customer.
- 3.6 The Nominated defects liability period is 52 weeks from the time of completion of the job.

# 4 Contract and Statutory Requirements

# 4.1 Appointment as Principal Contractor

Unless instructed otherwise at time of order, the Contractor, having responsibility for the construction work at all times until the work is completed on a site, is appointed principal contractor and controller of the premises for the construction work under Clause 210 of the *Occupational Health and Safety Regulation 2001* (NSW), and is authorised to exercise such authority of the owner as is necessary to enable it to discharge the responsibilities of principal contractor and controller of premises imposed by the *Occupational Health and Safety Act 2000* (NSW) and Chapter 8 of the *Occupational Health and Safety Regulation 2001* (NSW).

#### 4.2 Site-specific Safety Management Plan

Develop and implement a Site-specific Safety Management Plan for the contract that complies with the OHSM Guidelines.

Submit the Site-specific Safety Management Plan for the contract when requested by the Principal/Customer. The Contractor will not be allocated any work by the Principal/Customer until a complying Site-specific Safety Management Plan has been submitted.

Failure to obtain the Principal's/Customer's approval to the Site-specific Safety Management Plan and Safe Work Method Statements prior to commencing the Works will result in termination of the contract.

When requested by the Principal/Customer, submit a Site-specific Safety Management Plan for a specific site no later than 7 days before work commences. Do not start work before a complying Site-specific Safety Management Plan has been submitted.

# 4.3 Safe Work Method Statements

Prepare and implement Safe Work Method Statements that comply with the OHSM Guidelines for all work activities under the contract.

Details of licences, permits or certificates, as may be required to carry out any portion of the works, are to be clearly shown on the Safe Work method Statement.

Prepare Safe Work Method Statements for works at each site and submit to the Principal/Customer prior to commencing work. Work on site is not to proceed without authorisation by the Principal/Customer.

# 4.4 Site Safety Rules

Develop site safety rules that are equal to or better than the following minimum set of site safety rules, include them in the Site-specific Safety Management Plans and ensure implementation.

Site safety rules must make it a condition of entry to the applicable work site that all employees and visitors comply with their provisions, including:

- **Construction OHS Induction**. All persons must display evidence of completing OHS Induction training prior to being inducted to commence work on the Site.
- **Site Induction**. All persons working on the Site must attend a Site Induction prior to entering it. Visitors may enter a work site if, either, they first attend a Site Induction, or if they are accompanied by a person who has attended a Site Induction. All persons each day must sign in and out on the Site Register.
- **Safe Work Method Statements**. Safe Work Method Statements must be prepared and used for all work activities assessed as having a safety risk.
- **Toolbox Talks**. Weekly or more regular discussions must be held with workers to consult on site safety matters.
- Safety Helmets, Safety Footwear and Safety Vests. Safety helmets and steel-capped safety footwear must be worn by all supervisors, employees, and visitors in the construction area at all times. The footwear must comply with AS 2210. Safety vests must be worn when moving plant is present or work is undertaken near traffic.
- **Personal Protective Equipment** (PPE). PPE, such as safety eye protection, hearing protection, safety gloves and masks and the like, must be worn when welding, drilling and with all other tasks with similar risks.
- Accidents and Incidents. Accidents, incidents and injuries must be reported immediately to the Contractor's and applicable subcontractor's site representative in charge.
- **Alcohol and Drugs**. The consumption of, or being under the influence of, alcohol and illegal drugs on the Site is prohibited.
- Amenities. Access to clean toilets and meal facilities, cool, clean drinking water, and the other requirements of the WorkCover Code of practice: Amenities for construction work must be provided for all persons.
- **Electrical**. All electrical work and electrical plant must comply with the WorkCover Code of practice: Electrical practices for construction work.
- **Emergency evacuation**. Arrangements must be included in the Site Induction and clearly identified.
- **Excavations**. Barricading and signage for all excavations must be provided, with excavations 1.5 metres or more deep also to be benched, battered or shored. See the WorkCover Code of practice: Excavation.
- **Fire Prevention**. Fire prevention must be used by all persons on the Site. An appropriate fire extinguisher must be on hand for all welding sets and oxy acetylene work.

- **First Aid**. All persons requiring first aid treatment must contact the first aid officer who will administer the treatment and record the injury in the WorkCover Register of Injuries, including the person's name and the nature of the injury.
- **Hazardous Substances**. Chemicals and hazardous substances must be used and stored in compliance with up to date Material Safety Data Sheets (MSDS) and details recorded in the Register of Hazardous Substances.
- **Housekeeping.** Work areas must be kept clean and tidy, with rubbish and other safety hazards cleaned up promptly. All protruding nails must be removed immediately from timber.
- Leads and Power Tools. All leads, power tools and electrical equipment must be inspected and tagged by a qualified person prior to their use and then at monthly intervals. See the WorkCover Code of practice: Electrical practices for construction work.
- **Mobile Plant**. Every owner of plant must ensure plant is registered with WorkCover when required and operators are appropriately qualified. Plant must be fitted with working hazard lights/reversing lights and beepers. See the WorkCover Code of Practice for Moving Plant on Construction Sites.
- **Overhead Power Lines**. The requirements of the WorkCover Code of Practice Work near Overhead Power Lines must be complied with.
- Site Security and Public Access. Security measures, including perimeter fencing, must be used to prevent unauthorised access to construction areas and ensure safe access and passage for all those on and adjacent to the Site. Security must comply with Clause 235 of the OHS Regulation 2001 and the WorkCover Position paper: The requirements for fencing.
- **Underground Services**. Prior to any underground work being carried out, services must be located using Dial Before You Dig, a services locator, potholing and the other precautions identified in the WorkCover Work Near Underground Assets Guideline.
- Working at Height. Working at heights must be in accordance with WorkCover requirements, including certification of formwork and scaffolding. See the WorkCover Guide to Safe Working at Heights.

# 4.5 OHS Management Monthly Report

When requested by the Principal, submit, no later than the seventh (7<sup>th</sup>) day of each month, an OHS Management Monthly Report, detailing *Inspection, testing and servicing* activities, *Internal reviews* and *Incident management and corrective action*, and including the information listed below, as evidence of the implementation of the Site-specific Safety Management Plan during the previous month.

# **Contract Details**

- Contract
- Contractor
- Customer
- Location of site
- Contractor's representative
- Signature and Date
- Period Covered

# Implementation of Risk management (OHSM Guidelines Section 5, element 1)

Summary of OHS inspections and reviews carried out to identify risks and hazards and ensure risk management controls are being implemented for:

- plant and equipment
- incoming products
- work site conditions
- adherence to and completeness of Risk Assessments, Safe Work Method Statements and Site Safety Rules
- work site access and exits

• personal protective equipment

# Implementation of OHS training (OHSM Guidelines Section 5, element 3)

An up to date copy of the Induction Register and details of OHS training carried out.

# Implementation of Incident management (OHSM Guidelines Section 5, element 4)

Details of:

- any OHS incidents or OHS issues, including non-compliance with OHS procedures and near misses
- implementation of incident management
- implementation of corrective action
- OHS statistics for entire the Contract including:

# This Month

# **Total Cumulative**

Number of Lost Time Injuries

|                                       | This Month | Total Cumulative |
|---------------------------------------|------------|------------------|
| Number of Lost Time Injuries          |            |                  |
| Number of Hours Worked                |            |                  |
| Number of Hours Lost Due to Injury    |            |                  |
| Lost Time Injury Frequency Rate LTIFR |            |                  |
| Number of OHS Management Audits       |            |                  |
| Number of OHS Inspections             |            |                  |

**Implementation of** Safe Work Method Statements (OHSM Guidelines Section 5, element 6) An up to date copy of the register of Safe Work Method Statements, including confirmation that the principal contractor has ensured that all Safe Work Method Statements comply with the OHS Regulation 2001 and that their implementation is being monitored.

# 4.6 Incident Reports

Ensure compliance with the notification and other requirements of *OHS Regulation 2001* Clauses 341 and 344 for accidents, incidents and non-disturbance occurrences, including immediate notification of WorkCover where required.

Immediately notify the Principal/Customer of any accident or incident defined in *OHS Regulation 2001* Clauses 341 and 344.

Provide a written report to the Principal/Customer within twenty-four hours of the incident, giving details of the incident and evidence that notification requirements have been met.

When requested, provide an incident investigation report, including identification of the cause of the incident and corrective actions taken, in the form directed.

# 4.7 Prohibition and Improvement Notices and On-The-Spot Fines

Immediately notify the Principal/Customer of any Prohibition and Improvement Notice (PIN) or on-thespot fine issued by WorkCover. Provide the Principal/Customer with a copy of the PIN or fine notice and written details of the corrective action taken by the Contractor and/or the applicable subcontractor to rectify the breach and to prevent recurrence.

# 4.8 Electrical work on electrical installations

In compliance with section 207 of the *OHS Regulation 2001*, ensure that electrical work on an electrical installation is not carried out while the circuits and apparatus of the part of the installation that is being worked on are energised, unless it is necessary to do so in the interests of safety and the risk of harm would be greater if the circuits and apparatus were de-energised before work commenced.

# 4.9 Independent Certification of Formwork

In this clause, the terms "qualified engineer" and "formwork" have the meanings given in Clause 209 of the *OHS Regulation 2001*. "Related Entities" means businesses, one of which is owned wholly or in part by the other or that have proprietors, directors, officers, shareholders or employees in common.

Inspection and certification of formwork, if required by Clause 233 of the *OHS Regulation 2001*, must be carried out by a qualified engineer who is not a proprietor, director, officer, or employee either of the entity carrying out the formwork erection or a Related Entity to that entity. In addition, if the Contractor carries out the design of the formwork, then the qualified engineer must not be a proprietor, director, officer or employee either of the Contractor or a Related Entity to the Contractor.

If such inspection and certification are required, the Contractor and any subcontractors involved must include the inspection and certification as actions in Safe Work Method Statements for the erection and use of formwork, and they must be hold points in the Contractor's and subcontractors' Inspection and Test Plans.

Submit formwork certification before commencing the use of the formwork. Do not use the formwork before this certification is submitted.

# 4.10 Failure to Comply

If at any time the Contractor has not carried out its obligations under the Contract in relation to occupational health and safety management, then notwithstanding any other provisions of the Contract, no payment will be due to the Contractor until the 7<sup>th</sup> day after the required action has been carried out.

# 5 Hazardous Substances

# 5.1 Definition

Hazardous Substance means a substance that is listed in the document entitled *List of Designated Hazardous Substances* published by Worksafe Australia; or a substance that fits the criteria for a hazardous substance set out in the document entitled *Approved Criteria for Classifying Hazardous Substances* published by Worksafe Australia.

Asbestos, material containing asbestos, polychlorinated biphenyl (PCB) and lead based paints are recognised as hazardous substances. Other substances in certain situations are also considered hazardous and therefore require controlled handling. Examples are glues, solvents, cleaning agents, paints, and water treatment chemicals.

Work involving stone, rock, concrete, masonry and such materials containing silica, is work under the Contract whether explicitly identified in the Specification or not. The Contractor is responsible for the control of any hazard which may arise from the presence of silica.

# 5.2 Response to Unexpected Discovery

If any hazardous substance not specified in work under the Contract is discovered on the Site the Contractor must suspend all work which may result in exposure to such hazardous substance and notify the Principal's/Customer's Representative immediately of the type of substance and its location.

With the initial notification, or as soon as practicable thereafter, submit details, including:

- the additional work and additional resources the Contractor estimates to be necessary to deal with the substance so that work and subsequent use of the Works may proceed safely and without risk to health
- the time the Contractor anticipates will be required to deal with the substance and the expected delay in achieving Completion;
- the Contractor's estimate of the cost of the measures necessary to deal with the substance; and
- other details reasonably required by the Principal's/Customer's Representative

The Contractor must, in planning and carrying out any work dealing with the substance take all reasonable steps:

- to carry out the work concurrently with other work wherever possible; and
- to otherwise minimise effects of the work on the Contractual Completion Date.

# 5.3 Responsibility For Decontamination

Control and decontamination of any hazardous substances is the responsibility of:

- the Principal, in respect of any such substances not identified in the Contract Documents, which are discovered on the Site; and
- the Contractor, in respect of any such substances identified in the Contract Documents.

#### 5.4 Decontamination By Principal/Customer

Where the Principal/Customer is responsible for the control and decontamination of any hazardous substances, the Principal's/Customer's Representative may suspend the whole or any part of the Works until the hazardous substances are isolated or removed.

# 5.5 Decontamination By Contractor

Where the Contractor is responsible for the control and decontamination of the Site following the discovery of hazardous substances, handle, use, isolate, remove and dispose of such substances in accordance with statutory requirements.

The Environment Protection Authority or Waste Service NSW may advise of suitable disposal sites.

# 6 Asbestos Removal

#### 6.1 Requirement

Where the Contractor is responsible for asbestos removal work, comply with the relevant statutory requirements, standards, codes and guidelines, including but not limited to the:

- Occupational Health and Safety Act 2000 (NSW)
- Occupational Health and Safety Regulation 2001 (NSW)
- WorkCover Authority of NSW requirements

- Australian Safety and Compensation Council Code of Practice for the Safe Removal of Asbestos 2<sup>nd</sup> Edition (2005)
- Australian Safety and Compensation Council Code of Practice for the Management and Control of Asbestos in Workplaces (2005)
- Australian Safety and Compensation Council Guidance Note on the Membrane Filter Method for Estimating Airborne Asbestos Fibres 2<sup>nd</sup> Edition (2005)
- Environmentally Hazardous Chemicals Act 1985 (NSW)
- Waste Avoidance and Resource Recovery Act 2001 (NSW)

# 6.2 Notification and Permit

Not less than seven days prior to commencing any asbestos removal work, notify the local office of WorkCover and the Principal/Customer of the intention to carry out that work.

Where the regulations require a licence for asbestos removal work, before the work commences, submit a copy of the current licence held by the entity that will undertake the work and a copy of any WorkCover permit required for the work.

# 6.3 Monitoring

Provide air monitoring by an independent testing authority on each day during asbestos removal and on completion of each area where removal has been undertaken.

# 6.4 Clearance Certificate

Submit to the Principal/Customer a clearance certificate from an independent testing authority at the completion of the asbestos removal work.

# 7. Site and Possession

The Customer is to give the Contractor possession of the site by the time stated in the Order.

The Customer is to give the Contractor sufficient possession to allow the Contractor to perform the Works but is not required to give the Contractor sole or uninterrupted possession of or access to the site.

The Contractor is to begin work on the site as soon as practicable after being given possession of the site by the Customer.

The Contractor is to give the Customer, agents and contractors reasonable access to the site for any purpose.

# 8. Care of people and Property

From and including the date the site is made available to the Contractor to the date of completion of the Works, the Contractor is responsible for the care of the Works, construction plant and things entrusted to the Contractor by the Principal/Customer for the purpose of the works.

The Contractor is to make good at the Contractor's expense any damage which occurs to the Site and Works while the Contractor is responsible for their care.

The Contractor is also liable for damage caused by the Contractor during the Defects Liability Period.

The Contractor must indemnify and keep the Principal/Customer indemnified against any loss or damage to the property of the Principal/Customer (including existing property in, about, or adjacent to the Works) and against any legal liability for injury, death or damage to property of others arising from the performance of the Works.

# 9. Tools or Plant Required to Complete the Works

The schedule of rates detailed in the Price Schedule include the provision of all normal trade tools, plant and normal access equipment necessary to complete the Works.

# 10 Environmental Management

#### 10.1 Requirement

The Contractor must comply with the NSW Government *Environmental Management Systems Guidelines* available on the Internet at:

www.managingprocurement.commerce.nsw.gov.au/system/index\_procurement\_guideline\_documents.do

## 10.2 Environmental Management Plan

When requested by the Principal/Customer, develop and implement an Environmental Management Plan that complies with the *EMS* Guidelines.

The Contractor may elect to complete Schedule 5 Part E - **Environmental Management Plan**, adding objectives and actions as required to suit the risks/hazards associated with the work under the Contract, and implement the completed version as the Environmental Management Plan.

Submit the Environmental Management Plan no later than 7 days before construction work commences when requested by the Principal/Customer. Do not start construction work before a complying Environmental Management Plan has been submitted.

## 10.3 Incident reports

Ensure compliance with the notification and other requirements of the *Protection of the Environment Operations Act 1997 (POEO Act).* 

Immediately notify the Principal/Customer of any pollution incident that may cause material harm to the environment, providing evidence that notification requirements of the POEO Act have been met, where applicable.

Report immediately the details of any waste removed from the Site and not disposed of at a lawful facility. When requested, provide an incident investigation report, including identification of the cause of the incident and corrective actions taken, in the form directed.

# 10.4 Failure to comply

If at any time the Contractor has not carried out its environmental management obligations under the Contract, then notwithstanding any other provisions of the Contract, no payment is due to the Contractor until the 7<sup>th</sup> day after the required action has been carried out.

# 11. Ecologically Sustainable Development

# 11.1 Requirement

Apply strategies to maximise the achievement of ecologically sustainable development in the design, construction and operation of the Works, including reducing pollutants, greenhouse gas emissions and demand on non-renewable resources such as energy sources and water.

# 11.2 Restricted timbers

Do not use the following timbers or their products for work under the Contract:

• rainforest timbers, unless certification is provided that they are plantation grown;

• timber from Australian high conservation forests.

#### 12. Waste Management

#### 12.1 Requirement

Implement waste minimisation and management measures, including:

- recycling and diverting from landfill surplus soil, rock, and other excavated or demolition materials, wherever practical;
- separately collecting and streaming quantities of waste concrete, bricks, blocks, timber, metals, plasterboard, paper and packaging, glass and plastics, and offering them for recycling where practical.

Ensure that no waste from the Site is conveyed to or deposited at any place that cannot lawfully be used as a waste facility for that waste.

## 12.2 Monitoring

Monitor and record the volumes of waste and the methods and locations of disposal.

Submit a progress report and a summary report when requested by the Principal/Customer, on the implementation of waste management measures, including the total quantity of material purchased, the quantity purchased with recycled content, the total quantity of waste generated, the total quantity recycled, the total quantity disposed of and the method and location of disposal in the form of a *Waste Recycling and Purchasing Report* available on the Internet at:

www.managingprocurement.commerce.nsw.gov.au/contract\_management/cm\_sf\_waste\_recycling\_and\_ purchasing\_report.doc

With the *Waste Recycling and Purchasing Report*, submit waste disposal certificates and/or company certification confirming appropriate, lawful disposal of waste.

# 13. Pest Control

Do not use any chemical pesticides or termicides for new construction work. Use preventive treatment by physical means to minimise the risk of pest infestations.

Chemical treatments may be used in existing buildings only as a last resort for the eradication of pest and termite infestations. Chemical pesticides used for this purpose must be registered by the National Registration Authority for Agricultural and Veterinary Chemicals and applied by a Pest Control Operator licensed by WorkCover.

Pest preventive methods must comply with AS 3660.1-2000 Protection of Buildings from Subterranean Termites (except for references to chemical soil barriers), as well as supplementary standards for existing buildings.

#### 14. Standards

Where the Contract requires compliance with a standard or Code, unless otherwise specified that Standard or Code shall be the one current at the closing date for tenders, except for the Building Code of Australia, which shall be the one current at the date of completion of the Works.

Where the Contract refers to an Australian Standard it does not preclude the adoption of a relevant international standard.

#### 15. Prohibition on Site

The Contractor shall not permit its employees to take animals, alcohol or illegal drugs on site. Smoking is not permitted on any site.

# 16. Protection of Existing Flora

Protect from all damage all trees and other plants that are shown or specified to be retained, or which are beyond the limits allowed to the Contractor or which need not be removed or damaged for maintenance or construction operations. All grassed areas to be fully restored to levels and growth as existing.

#### 17. Industrial Relations management

## 17.1 Requirement

The Contractor must comply with the NSW Government *Industrial Relations Management Guidelines*. Submit, before beginning work on the Site, confirmation that the Contractor will comply with the industrial relations aspects of the NSW Government *Code of Practice for Procurement* and the associated Implementation Guidelines.

The Contractor must provide the Statutory Declaration at Schedule 3 with its invoice for payment.

# 17.2 Failure to comply

If at any time the Contractor has not carried out its obligations under this clause - **Industrial Relations Management**, then notwithstanding any other provision of the Contract, no payment is due to the Contractor until the 7<sup>th</sup> day after the required action has been carried out.

# 18. Register of Contractor's Personnel

The Contractor is to maintain a register of all personnel who will carry out any part of the Works.

The Contractor is responsible for submitting the register to the Ordering Officer within 28 days of the time of acceptance.

The register is to be maintained regularly to keep it up to date and is to be submitted for inspection by the Ordering Officer at three (3) monthly intervals as advised by the Principal/Customer.

The names and identification numbers of each employee are to be included on the service reports when submitted to the Ordering Officer.

The register is to include but not be limited to:

- All details about the employee ID Card etc
- Date when persons were issued with photo identification cards.
- Date identification cards returned.
- Date Induction Session (in accordance with clause 20) was conducted and lists those in attendance.
- Material presented at the induction session
- Specific job training undertaken during the term of the contract

Dates and certificates awarded at all induction courses attended as required by Statutory Regulations or site-specific requirements (e.g. Code of Conduct when working in facilities used by children).

# 19 Induction of Contractor's Personnel

The Contractor is to induct all personnel involved in the Works in all aspects of the Contract.

The induction of personnel is to include but not be limited to;

- Operation of the Contract
- Occupational Health and Safety and site evacuations/emergency procedures
- Site Access and Responsibilities, site risks, hazards, access and responsibilities
- Code of Conduct when working in facilities used by children
- Wearing of Identification Cards

# 20 Protection of Children and Other Vulnerable Persons

# 20.1 Employees

The Contractor must not employ or permit to be employed on work under the Contract at the Site a person whom the Principal/Customer advises the Contractor poses unacceptable risks to children or other vulnerable people cared for at that site.

The Contractor must not employ or permit to be employed on work under the Contract at the Site a person who has been convicted of a serious sex offence and is a prohibited person under the *Child Protection (Prohibited Employment) Act 1998* (NSW).

The Contractor must not employ or permit to be employed, on work under the Contract at the Site, any person who has not completed the *Prohibited Employment Declaration* available on the Internet at: *www.kids.nsw.gov.au*.

Completion of the *Prohibited Employment Declaration* must be included in all Site-specific inductions and compliance must be recorded in the Induction Register. (refer Schedule 1)

# 20.2 Code of behaviour

The Contractor must ensure that all persons working on the Site, including but not limited to the Contractor's employees and managers, consultants, subcontractors and suppliers (Contractor Employees) understand and comply with the requirements shown below:

- All Contractor Employees must gain permission to enter the school or facility before commencing work and may only enter approved areas. The Contractor's representative or where a subcontractor is working without the supervision of the Contractor, the subcontractor's representative must report their presence to the person in charge of the school or facility on arrival each day and record, in the Site Visit Log, the details of all Contractor's or subcontractor's employees working at that site that day.
- Contractor Employees should avoid talking with, touching or interacting with any children or residents or other users of the school or facility except where the work requires it or in an emergency or safety situation.
- Contractor Employees must only use approved toilets and other facilities, unless the person in charge of the school or facility gives written authority to use alternative arrangements.
- The work area must not be able to be used or accessed by children, or residents or other users of the school or facility while work is in progress. Clear signs and barricades (where appropriate) must be used to prevent any inadvertent or unauthorised access.
- Appropriate privacy must be maintained when working on toilets and similar facilities. Contractor Employees must ensure that toilets and similar facilities are not occupied or in use by children, residents or other users before entering to perform work, and that work does not continue when use of the facilities is required. Where practicable male employees should perform work on male facilities and female employees on female facilities.
- Contractor Employees must wear clothing that is tidy and in good condition, including a shirt and shorts, trousers or a skirt at all times.

- Contractor Employees should report any concerns about children's behaviour or child abuse to the person in charge of the school or facility.
- Contractor Employees must wear or carry an identity card at all times when on the Site.

# 20.3 Failure to Comply

If at any time the Contractor has not carried out its obligations under this clause – **Protection of children and other vulnerable people**, then notwithstanding any other provision of the Contract, no payment shall be due to the Contractor until the 7<sup>th</sup> day after the required action has been carried out.

## 21 Photographic Identification on Cards

The Contractor is to provide all staff, employees and Sub-Contractors' staff attending all sites with an identification card as authorisation to carry out work on the Contractor's behalf.

All Contractors' staff must wear their ID Card in a prominent easily seen position on their person at all times.

Contractors' staff must present this card on request from the Principal, the Customer, School Staff, Police or Security Patrol Officers.

By procising this card the Contractor is declaring that the cardholder has completed an induction into the Code for working on or near facilities used by Children.

# 22 Temporary Services Required by the Principal

The Principal/Customer will provide no temporary services to the Contractor.

The Contractor may use, free of charge, water and electricity from the existing outlets within the premises, subject to the use of those services not disrupting the normal operation of the premises in any way, not causing any associated problems such as overloading and not being abused or misused. Generally, only single-phase power is available.

Liaise with the Customer Representative before connecting to any such service to ensure that no disruption occurs and to ensure that access to them does not adversely impact on other aspects of the premises such as safety, security, free movement of staff etc.

The Contractor must satisfy himself that the existing water and electrical services meet it's needs and, where required, supplement them from other sources.

# 23 Interruption to Services

Where there is a possibility of interruption to any service, the Customer is to be notified of the time and likely duration of the disruption to normal services.

# 24 Site Access and Limitations

#### General

The Contractor is responsible for providing and maintaining access to the Works.

As far as practicable, use existing roads and tracks. If access is gained from an adjacent property, obtain the written permission of the owner.

Install temporary barricades fences, gates, signs, temporary access bridges, lighting, etc. necessary for the safety of workers, staff, occupants of the premises and the general public at all times. Maintain such devices for the full duration of the Works.

# Compliance with Department of Commerce Code when Working in Facilities Occupied or Used by Children is mandatory.

Contractors and Subcontractors are to abide by the Department of Commerce Code for Working on or near facilities occupied or Used by Children – refer Schedule 1.

The Code states "All persons must read and certify that they have read and understood the code before commencing work and/or entering premises used by children."

The Contractor is to ensure all persons who are performing duties under this Contract have read the code and certified their understanding of the requirements contained in the code and have agreed to abide by the code.

# 25 Sites with Heritage Significance

Contractors should be aware that sites can have heritage significance that can extend to and include fences, walls, trees, paving, etc, NOT JUST BUILDINGS.

The Contractor must ensure that all of their staff and Subcontractor's staff are aware that some sites or parts of sites have been identified as having heritage significance. In such circumstances, take care to preserve the heritage.

It is critical when carrying out work on sites that have a heritage significance that the following is adhered to: -

- When components, sub-assemblies or minimum replacement sections are to be replaced, they must be exact replicas of the original (matching profile of timber, matching roof or floor tiles, etc). If difficulties are experienced obtaining exact replicas, advise the Ordering Officer.
- Stonework, especially sandstone, often has heritage significance. Care should be taken in matching mortar and materials.
- Cleaning of masonry to reveal deterioration or to remove harmful substances or graffiti should be done with care using low-pressure water jets with soft bristle brushes. Abrasive blasting and the use of power tools to clean joints are not permitted.

# 26 Advertising Signs and Sign Boards

The Contractor shall not display or erect any advertising signs at any site without the written approval of the Customer.

# 27 Quality of Work

The Contractor must supply materials (which are new, free from defects and suitable for the purpose and generally like for like unless directed otherwise) and use standards of workmanship and work methods which comply with the Contract, the Building Code of Australia, relevant Australian Standards and Commonwealth and State legislation and subordinate regulations, ordinances, by-laws, orders and proclamations.

# 28 "Dial Before You Dig"

# 28.1: Location of Existing Services – Dial Before You Dig

The Contractor is responsible for locating existing services.

Before commencing excavation the Contractor must obtain, from the Dial Before You Dig information service or all relevant public authorities or owners of underground services, written confirmation of the exact position of underground services at and around the Site, and verify and prominently mark the location of all underground services at the Site.

# 28.2: Dealing with Existing Services

Existing services (such as drains, watercourses, public utility, telecommunications, and other services) obstructing the Works or if damaged in the course of the Contract, must be dealt with as follows:

- a) if the service is to be continued: repair, divert, relocate as required;
- b) if the service is to be abandoned: cut and seal or disconnect and make safe as required

## 28.3: Resulting Cost and Delay

Where an existing service obstructs the Works and requires diversion or relocation, the Contractor must notify the Principal/Customer immediately with a description of work and estimated cost to carry out the diversion or relocation. When approved, an approval number will be given.

Where the Contractor for any reason whatsoever damages an existing service, the Contractor shall bear all costs and any delays for repairing or disconnecting the service.

#### 28.4: Notification

The Contractor is to notify the Principal/Customer immediately upon the discovery of services obstructing the Works not shown in the Principal's Documents. Attention is drawn to General Conditions of Contract clause "Site Conditions".

## 29 Additional Requirements

Each Order placed under the Standing Offer Contract may include additional clauses relating specifically to that Order.

Such additional clauses may relate to site or Works requirements, special access provisions, specific requirements or any other matter.

These additional requirements will be conveyed to the Contractor at the time of requesting a quotation and will form a part of the Contract for that Order.

#### 30 Special Requirements

Schedules 1 to 5 hereto describe requirements specific to individual Departments. These requirements form part of any Order placed with the Contractor for that Department.

# SCHEDULES TO THE SPECIAL CONDITIONS OF CONTRACT

# SCHEDULE 1 EMPLOYMENT REQUIREMENTS

Prior to commencing any work on the Contractor the Contractor, staff involved in the project and subcontractors must complete all of the attached forms and submit them to DET for processing and approval:

- Code for working on or near facilities occupied or used by children (FORM A)
- Prohibited Employment Declaration form (FORM B)
- Working with Children Background Check Consent form (FORM C)

Please not that no Work is to be undertaken unless DET notifies the Contractor that all proposed staff and subcontractors have received approval. Under no circumstances are uncleared staff permitted to undertake any Work on a DET site.

- Ensure that **all** of the information requested is supplied.
- It is essential to ensure that the applicant has been inducted in the Department of Commerce Code for working on or near facilities occupied or used by children.
- It is essential that each applicant meets the Industry OH&S Induction requirements of WorkCover and provides the required documentation as evidence of that Induction (attach copy of Construction Industry OHS Induction card – card number must start with "CGI").
- The employer must sight the original forms of identification noted on the application form ie. Passport, licence, etc and check that the passport photo supplied is that of the applicant. Proof of identification must add to a minimum of 100 points as required by the 100 point check under the *Financial Transaction Reports Act 1988 (Details attached)*. The Employer must sight original documents and certify copies and provide these certified copies with the application.
- The applicant and the employer must sign the forms.
- Each person (applicant) shall complete the Prohibited Employment Declaration Form (FORM A) and return with application.
- Each person (applicant) shall complete the Working with Children Background Check Consent Form (FORM B).
- If the information required is not supplied or if the forms are not signed, the forms will not be processed.
- Submit the completed forms and supporting documentation to the address noted

NSW Department of Education and Training

NOTE: The Contractor is responsible for ensuring that all of its staff have photographic identification which to be worn at all times whilst they are on the premises of the NSW Department of Education and Training.

# FORM A PROHIBITED EMPLOYMENT DECLARATION

The Commission for Children and Young People Act 1998 makes it an offence for a prohibited person (a person convicted of a serious sex offence, the murder of a child or a child-related personal violence offence, as well as a Registrable person under the Child Protection (Offenders Registration) Act 2000) to apply for or otherwise attempt to obtain, undertake or remain in, child-related employment. It does not

apply if an order from the Industrial Relations Commission, Administrative Decisions Tribunal or Commission for Children and Young People, declares that the Act does not apply to a person in respect of a specific offence.

For further information on what is child-related employment see the Working With Children Employer Guidelines.

# Section 33B of the Commission for Children and Young People Act 1998 defines a serious sex offence as:

- an offence, involving sexual activity or acts of indecency, committed in New South Wales and that was
- punishable by penal servitude or imprisonment for 12 months or more; or
- an offence, involving sexual activity or acts of indecency, committed elsewhere and that would have been
- an offence punishable by penal servitude or imprisonment for 12 months or more, if it had been committed
- in New South Wales; or
- an offence under section 80D or 80E (sexual servitude) of the Crimes Act 1900, committed against a child; or
- an offence under Sections 91D-91G (child prostitution, other than if committed by a child prostitute) of the
- Crimes Act 1900 or a similar offence under a law other than a law of New South Wales; or
- an offence under Section 91H, 578B or 578C (2A) (child pornography) of the Crimes Act 1900 or a similar
- offence under a law other than a law of New South Wales; or
- an offence of attempting, or of conspiracy or incitement, to commit an offence referred to in the preceding
- paragraphs; or
- any other offence, whether under the law of New South Wales or elsewhere, prescribed by the regulations.

#### NOTE: A conviction for carnal knowledge is classified as a serious sex offence under this legislation.

Section 33B of the Commission for Children and Young People Act 1998 defines a child-related personal violence offence as an offence committed by an adult:

- involving intentionally wounding or causing grievous bodily harm to a child; or
- of attempting, or of conspiracy or incitement, to commit such an offence.

#### Under Commission for Children and Young People Act 1998:

it is an offence for a prohibited person to apply for or otherwise attempt to obtain, undertake or remain in child related employment;
employers must ask existing employees, both paid and unpaid, and preferred applicants for child-related employment to declare if

they are a prohibited person or not; • all people in child-related employment must inform their employers if they are a prohibited person or remove themselves from child-

related employment; and

• penalties are imposed for non compliance.

I am aware that I am ineligible to apply for or otherwise attempt to obtain, undertake or remain in, child-related employment if I have been convicted of a serious sex offence or child-related personal violence offence as defined in the *Commission for Children and Young People Act 1998*, or if I am a Registrable Person under the *Child Protection (Offenders Registration) Act* 2000.

I have read and understood the above information in relation to the *Commission for Children and Young People Act 1998*. I am aware that it is an offence to make a false statement on this form.

I consent to a check of my relevant criminal records, to verify the statements I have made here, being undertaken by the NSW Commission for Children and Young People for monitoring and auditing purposes in accordance with Section 36 (1)(f) of the *Commission for Children and Young People Act 1998*.

I declare that I am not a person prohibited by the Act from seeking, obtaining, undertaking or remaining in child related employment.

I understand that this information may be referred to the Commission for Children and Young People and/or to NSW Police for law enforcement purposes and for monitoring and auditing compliance with the procedures and standards for the Working With Children Check in accordance with Section 36 (1)(f) of the *Commission for Children and Young People Act 1998*.

All fields must be completed. Please use block letters.

|                                 |                |  |

NOTE: Seek legal advice if you are unsure of your status as a prohibited person This form should be returned to Heritage and Building Services, PO Box 285 Doonside 2767.

# FORM B WORKING WITH CHILDREN BACKGROUND CHECK CONSENT

This form is to be completed by persons whose names are to be submitted for employment screening as part of the Working With Children Check.

No background checks can be completed on a person without this consent being provided.

Employers are required to sight applicant's original identifying documents.

All fields must be completed. Please use block letters.

| Surname:   | Given name(s):          |                           |
|--|-------------------------|---------------------------|
| Previous names/aliases:                              |                         | Date of birth:            |
|  | Gender: (Please         | tick)                     |
| Place of birth (city, state, country):               | D Male                  |                           |
| Identification type (eg. Driver's licence/passport): | Identii                 | fication number:          |
| Address:   |                         |                           |
| Suburb/Town:   | State:                  | Postcode:                 |
| Contact telephone number:                            | Contact Email:          |                           |
| Title of position (eq. Carpenter):                   | Type of position: (Plea | ase tick) 🛛 Paid employee |

I certify that the above information is accurate and understand that if I have provided false or misleading information it may result in a decision not to employ me, or, if already employed, may lead to my dismissal.

I am aware that if considered for child-related employment, several checks will be undertaken to ascertain my suitability, including:
 a national criminal record check for charges and/or convictions (including spent convictions) for:

- any sexual offence (including but not limited to, sexual assault, acts of indecency, child pornography, child prostitution and carnal knowledge);
- any child-related personal violence offence;
- any assault, ill treatment or neglect of, or psychological harm to a child and any registrable offence; punishable by imprisonment for 12 months or more.

I understand that this check includes convictions or charges that:

- may have not been heard or finalised by a court; or
- are proven but have not led to a conviction; or
- have been dismissed, withdrawn, or discharged by a court.
- 2. a check for relevant Apprehended Violence Orders taken out by a police officer or other public official for the protection of a child/ren;
- 3. a check for relevant employment proceedings involving an act of violence committed in the course of employment and in the presence of children or reportable conduct. Reportable conduct means any sexual offence, or sexual misconduct committed against, with or in the presence of a child (including a child pornography offence), any child-related personal violence offence, or any assault, ill treatment or neglect of a child, or any behaviour that causes psychological harm to a child.

I understand that a conviction for a serious sex offence (including, but not limited to, sexual assault, acts of indecency, child pornography, child prostitution and carnal knowledge) or child-related personal violence offence (including but not limited to, intentionally wounding or causing grievance bodily harm to a child) will automatically prohibit me from child-related employment. This includes a charge that is proven in court but does not proceed to a conviction. I am aware that if I am a Registrable person under the *Child Protection (Registrable Offenders) Act 2000,* I am prohibited from child-related employment.

I consent to these checks being conducted and am aware that if any relevant record is identified, additional information relating to that record may be sought by an Approved Screening Agency from sources such as courts, police, prosecutors and past employers to enable a full and informed estimate of risk.

I acknowledge that:

- the above information and any information obtained during the Working With Children background check may be collected and used by and/or disclosed to the Commission for Children and Young People or any Approved Screening Agency for the purposes of the Working With Children Check;
- the Commission for Children and Young People or any Approved Screening Agency may share the information obtained during the Working With Children background check with each other to support further estimates of risk arising from additional Working With Children background checks;
- the outcome of an estimate of risk conducted with information obtained through the Working with Children Check by the Approved Screening Agency may be provided to my current or prospective employers or an employer-related body (where applicable) only for background checking purposes;
- details of my relevant records will not be released to my current or prospective employers;
- any information obtained as part of this process may be used by Australian Police Services for law enforcement purposes, including the investigation of any outstanding criminal offences; and
- the information provided may be referred to the Commission for Children and Young People and/or to NSW Police for law enforcement purposes and for monitoring and auditing compliance with the procedures and standards for the Working With Children Check in accordance with Section 36 (1) (f) of the *Commission for Children and Young People Act 1998*.

#### ATTACH CERTIFIED COPIES OF FORMS OF IDENTIFICATION AS PER 100 POINT CHECK REQUIREMENTS

Date:

# **Proof of Identification – 100 Point Check**

#### Identifying the preferred applicant accurately

Before you request a Photo Identification Card and Working With Children background check you must ask preferred applicants to provide documents to support their identity. This must include original documents adding up to a minimum of 100 points as required by the 100 Point Check under the *Financial Transaction Reports Act 1988*. A copy of these original documents shall be certified by the Employer and provided with the application.

The following lists set out the value of each document according to the 100 Point Check.

#### 70 points

Name of preferred applicant verified from one of the following (more than one document from this list cannot be counted):

- Birth Certificate
- Birth Card issued by the NSW Registry of Births, Deaths and Marriages
- Citizenship Certificate
- Current Australian passport
- Expired Australian passport which has not been cancelled and was current within the preceding 2 years
- Current passport from another country or diplomatic documents.

For a preferred applicant under 18 years, one document from the above list, or the following, is sufficient:

• Identity of the applicant verified by an educational institution, either on a student card or a letter signed by the principal, deputy principal, head teacher, deputy head teacher or enrolment officer, confirming that the applicant currently attends the institution.

#### 40 points

Name and photograph/signature of preferred applicant verified from one of the following (more than one document can be counted):

- Current driver photo licence issued by an Australian state or territory
- Identification card issued to a public employee
- Identification card issued by the Australian or any state government as evidence of a person's entitlement to a financial benefit
- Identification card issued to a student at a tertiary education institution.

#### 35 points

Name and address of preferred applicant verified from any of the following (more than one document can be counted):

- Document held by a cash dealer giving security over property
- A mortgage or other instrument of security held by a financial body
- Council rates notice
- Document from current employer or previous employer within the last two years
- Land Titles Office record
- Document from the Credit Reference Association of Australia.

#### 25 points

Name of preferred applicant verified from any of the following (more than one document can be counted):

- Current credit card or account card from a bank, building society or credit union
- Local council rates notices
- Current telephone, water, gas or electricity bill
- Foreign driver's licence
- Medicare Card
- Electoral roll compiled by the Australian Electoral Commission
- Lease/rent agreement
- Current rent receipt from a licensed real estate agent

- Records of a primary, secondary, or tertiary educational institution attended by the applicant within the last 10 years
- Records of a professional or trade association of which the applicant is a member.

# SCHEDULE 2 ADDITIONAL REQUIREMENTS WHEN WORKING IN SCHOOLS

All personnel when attending work in schools must at all times wear their photographic identity card in a prominent easily seen position on their person in addition to any site specific identity symbol.

All personnel must report to the school's administration office on arrival and before departure, to record their visit at the school and to sign the School Site Visit Log-book.

#### Access to Sensitive Areas:

When working in sensitive areas, the Contractor is to erect appropriate signs advising that work is in progress and directing users elsewhere to the closest facilities available.

Special care must be taken when accessing or carrying out work in change rooms, bathrooms, toilets, showers etc. and generally work in such areas in schools is to be undertaken outside normal school hours.

The work may be performed during normal school hours only where alternative facilities are available and with the written approval of the School Principal.

The Ordering Officer is to advised when alternative facilities are not available and that the work required will need be performed at the "outside normal hours" schedule rate

<u>Note:</u> Normal school hours will vary, depending on the school's timetable. Work may be able to be programmed with the School Principal for early morning, late afternoon or on sports afternoon to enable the works to be completed quickly and without the additional cost of performing the work at the "out of normal hours" rate. The hours of operation for attending may be clarified with the Ordering Officer, when accepting the Work Order.

# SCHEDULE 3 SITE-SPECIFIC SAFETY MANAGEMENT PLAN

In accordance with Conditions of Contract clause - Occupational Health and Safety, the Contractor must develop and implement a Site-specific Safety Management Plan that complies with the NSW Government Occupational Health &

Safety Management Systems Guidelines 2004 Please refer to How to prepare Site-Specific Safety

Management Plans and Safe Work Method Statements (June 2004) Provide Both documents are available from: www.managingprocurement.commerce.nsw.gov.au/system/index\_procurement\_guideline\_documents.doc

#### The Contractor's Site-specific Safety Management Plan

For this contract the Contractor's Site-specific Safety Management Plan must:

- □ be on the Contractor's letterhead, and
- □ signed and dated by a senior manager, and
- must cover:
  - □ Statement of responsibilities names and positions of people on site who will be responsible for OHS management, with a description of those responsibilities.
  - Risk Management identified hazards associated with each work activity, with the risks assessed and actions proposed to eliminate or minimise the risks and methods for monitoring the risk controls documented. Include OHS risks identified by the Principal.
  - **OHS Training** arrangements for OHS training, including Induction training and toolbox meetings.
  - □ Incident and Emergency Management arrangements for managing accidents and near misses, with the name(s) of responsible persons and their contact details, including after-hours contact.
  - □ Site Safety Rules a copy of the rules, which must also be displayed on the site and make it a condition of entry to the site that all employees and visitors comply with their provisions, and which must include as a minimum:
    - **Construction OHS Induction**. All persons must display evidence of completing OHS Induction training prior to being inducted to commence work on the site.
    - Site Induction. All persons working on the site must attend a Site Induction prior to entering it. Visitors may enter the site if, either, they first attend a Site Induction, or they are accompanied by a person who has attended a Site Induction. All persons each day must sign in and out on the Site Register.
    - Safe Work Method Statements. Safe Work Method Statements must be prepared and used for all work activities assessed as having a safety risk.
    - Toolbox Talks. Weekly or more regular discussions must be held with workers to consult on site safety matters.
    - Safety Helmets, Safety Footwear and Safety Vests. Safety helmets and steel-capped safety footwear must be worn by all supervisors, employees, and visitors in the construction area at all times. The footwear must comply with AS 2210. Safety vests must be worn when moving plant is present or work is undertaken near traffic.
    - Personal Protective Equipment (PPE):. PPE, such as safety eye protection, hearing protection, safety gloves and masks and the like, must be worn when welding, drilling and with all other tasks with similar risks.
    - Accidents and Incidents. Accidents, incidents and injuries must be reported immediately to the Contractor's and applicable subcontractor's site representative in charge.
    - Alcohol and Drugs. The consumption of, or being under the influence of, alcohol and illegal drugs on the site is prohibited.
    - Amenities. Access to clean toilets and meal facilities, cool, clean drinking water, and the other requirements of the WorkCover Code of practice: Amenities for construction work, must be provided for all persons.
    - **Electrical**. All electrical work and electrical plant must comply with the WorkCover Code of practice: Electrical practices for construction work.
    - **Emergency evacuation**. Arrangements must be included in the Site Induction and clearly identified.
    - Excavations. Barricading and signage for all excavations must be provided, with excavations 1.5 metres or more deep also to be benched, battered or shored. See the WorkCover Code of practice: Excavation.
    - **Fire Prevention**. Fire prevention must be used by all persons on the site. An appropriate fire extinguisher must be on hand for all welding sets and oxy acetylene work.
    - **First Aid.** All persons requiring first aid treatment must contact the first aid officer who will administer the treatment and record the injury in the WorkCover Register of Injuries, including the person's name and the nature of the injury.

- Hazardous Substances. Chemicals and hazardous substances must be used and stored in compliance with up to date Material Safety Data Sheets (MSDS) and details recorded in the Register of Hazardous Substances.
- **Housekeeping.** Work areas must be kept clean and tidy, with rubbish and other safety hazards cleaned up promptly. All protruding nails must be removed immediately from timber.
- Leads and Power Tools. All leads, power tools and electrical equipment must be inspected and tagged by a qualified person prior to their use and then at monthly intervals. See the WorkCover Code of practice: Electrical practices for construction work.
- Mobile Plant. Every owner of plant must ensure plant is registered with WorkCover when required and operators are appropriately qualified. Plant must be fitted with working hazard lights/reversing lights and beepers. See the WorkCover Code of Practice for Moving Plant on Construction Sites.
- Overhead Power Lines. The requirements of the WorkCover Code of Practice Work near Overhead Power Lines must be complied with.
- Site Security and Public Access. Security measures, including perimeter fencing, must be used to prevent unauthorised access to construction areas and ensure safe access and passage for all those on and adjacent to the site. Security must comply with Clause 235 of the OHS Regulation 2001 and the WorkCover Position paper: The requirements for fencing.
- **Underground Services**. Prior to any underground work being carried out, services must be located using Dial Before You Dig, a services locator, potholing and the other precautions identified in the WorkCover Work Near Underground Assets Guideline.
- Working at Height. Working at heights must be in accordance with WorkCover requirements, including certification of formwork and scaffolding. See the WorkCover Guide to Safe Working at Heights.
- Safe Work Method Statements for activities identified as having an OHS risk, which must:
  - be on the letterhead of the organisation carrying out the work, showing the name and registered office address of the organisation;
  - o be signed as authorised by a senior manager, and dated; and
  - must describe:
    - work activities to be undertaken, including the step-by-step sequence involved in doing the work
    - potential hazards and health and safety risks associated with each step of the work activity
    - □ safety controls that will be in place to minimise these hazards and risks
    - all health and safety instructions to be given to persons involved with the work activity
    - safety legislation, codes or standards applicable to the work activity and where these are kept
    - names and qualifications of those who will supervise the work activity and inspect and approve for use work areas, work methods, protective measures, plant, equipment and power tools
    - □ the training required, and when it was or will be given each person involved with the work activity
    - names of all those involved with the work activity and those who have been or will be or have been relevantly trained, and the names and qualifications of those responsible for training them
    - □ plant and equipment that will most likely be used in the work activity (eg. ladders, scaffolds, grinders, electrical leads, welding machines, fire extinguishers and the like)
    - any WorkCover permits required to complete the work activity
    - □ the inspection and maintenance checks that have been or will be carried out on the equipment listed prior to its use.

# SCHEDULE 4 STATUTORY DECLARATION

|                       |    |   |
|                       |    | do hereby solemnly declare and affirm that:   |
| Insert position title | 1  | I am the representative of the Contractor in the Office Bearer capacity of  |
| of the Declarant      | 2  | I am in a position to make this statutory declaration about the facts attested to.  |
|                       |    | REMUNERATION OF CONTRACTOR'S EMPLOYEES ENGAGED TO CARRY OUT<br>WORK IN CONNECTION WITH THE CONTRACT   |
|                       | 3  | All remuneration payable to the Contractor's relevant employees for work done in connection with the Contract to the date of this statutory declaration has been paid and the Contractor has made provision for all other benefits accrued in respect of the employees.   |
|                       |    | Relevant employees are those engaged in carrying out the work done in connection with the Contract.   |
|                       |    | Remuneration means remuneration or other amounts payable to relevant employees by legislation, or under an industrial instrument, in connection with work done by the employees [s127 (6) of the Industrial Relations Act 1996].  |
|                       |    | REMUNERATION OF THE EMPLOYEES OF SUBCONTRACTORS ENGAGED TO CARRY<br>OUT WORK IN CONNECTION WITH THE CONTRACT  |
|                       | 4  | The Contractor <i>is/is not</i> a principal Contractor for the work done in connection with the Contract, as defined in section 127 of the Industrial Relations Act 1996. (Delete the words <i>in italics</i> that are not applicable.)   |
|                       | 5  | Where the Contractor is also a principal Contractor for work done in connection with the Contract, the Contractor has been given a written statement in its capacity of principal Contractor under section 127(2) of the Industrial Relations Act 1996 by each subContractor in connection with that work stating that all remuneration payable by each subContractor to the subContractor's relevant employees for work done in connection with the Contract to the date of this declaration has been paid, and each subContractor has made provision for all other benefits accrued in respect of each subContractor's employees. |
|                       | 6  | I am aware that the Industrial Relations Act 1996 requires any written statement provided by subContractors must be retained for at least 6 years after it was given and declare that the Contractor has accordingly made arrangements for the secure retention of the written  |

#### WORKERS COMPENSATION INSURANCE OF THE CONTRACTOR'S WORKERS

7 All workers compensation insurance premiums payable by the Contractor to the date of this statutory declaration in respect of the work done in connection with the Contract have been paid. This statutory declaration is accompanied by a copy of any relevant certificate of currency in respect of that insurance.

# WORKERS COMPENSATION INSURANCE FOR WORKERS OF SUBCONTRACTORS

- The Contractor *is / is not* a principal Contractor for work done in connection with the Contract, as defined in section 175B of the Workers Compensation Act 1987. (Delete the words *in italics* that are not applicable.)
- 9 Where the Contractor is also a principal Contractor for work done in connection with the Contract, the Contractor has been given a written statement under section 175B of the Workers Compensation Act 1987 in the capacity of principal Contractor in connection with that work to the intent that all workers compensation insurance premiums payable by each subContractor in respect of that work done to the date of this statutory declaration have been paid, accompanied by a copy of any relevant certificate of currency in respect of that insurance.
- 10 I am aware that the Workers Compensation Act 1987 requires any written statement provided by subContractors and any related certificate of currency must be retained for at least 7 years after it was given and declare that the Contractor has accordingly made arrangements for the secure retention of the written statements.

## EMPLOYER UNDER THE PAY-ROLL TAX ACT

The Contractor *is registered as / is not required to be registered as* an employer under the Pay-roll Tax Act 1971.
 (Delete the words *in italics* that are not applicable.)

All nav-roll tay navable by the Contractor in respect of wares paid or payable

- All pay-roll tax payable by the Contractor in respect of wages paid or payable to the relevant employees for work done in connection with the Contract to the date of this statutory declaration has been paid.
- The Contractor *is / is not* a principal Contractor for work done in connection with the Contract, as defined in section 31G of the Pay-roll Tax Act 1971.
   (Delete the words *in italics* that are not applicable.)
- 14 Where the Contractor is also a principal Contractor for work done in connection with the Contract, the Contractor has been given a written statement under section 31H of the Pay-roll Tax Act 1971 in the capacity of principal Contractor in connection with that work to the intent that all pay-roll tax payable by each subContractor in respect of the wages paid or payable to the relevant employees for that work done to the date of this statutory declaration has been paid.
- <sup>15</sup> I am aware that the Pay-roll Tax Act requires any written statement provided by subContractors must be retained for at least 5 years after it was given and declare that the Contractor has accordingly made arrangements for the secure retention of the written statements.

## PAYMENTS TO SUBCONTRACTORS

- The Contractor has paid every SubContractor, Supplier and Consultant all amounts payable to each of them by the Contractor as at the date of this statutory declaration with respect to engagement of each of them for the performance of work or the supply of materials for or in connection with the Contract.
- 17 The provisions of clause "SECURITY OF PAYMENT", if included in the Contract, have been complied with by the Contractor.
- The Contractor has been informed by each SubContractor and Consultant to the Contractor (except for SubContracts and agreements not exceeding \$25,000 at their commencement) by written statement in equivalent terms to this declaration (made no earlier than the date 14 days before the date of this declaration):
  - 1. that their subContracts with their subContractors, consultants and suppliers comply with the requirements of clause "SECURITY OF PAYMENT", if included in the Contract, as they apply to them; and
  - 2. that all of their employees, subContractors, consultants and suppliers, as at the date of the making of such a statement have been paid all remuneration and benefits due and payable to them by, and had accrued to their account all benefits to which they are entitled from, the SubContractor or Consultant of the Contractor or from any other of their subContractors or consultants (except for their subContracts and agreements not exceeding \$25,000 at their commencement) in respect of any work for or in connection with the Contract.
- 19 I am not aware of anything to the contrary of any statutory declaration referred to in paragraph 18 of this declaration and on the basis of the statements provided, I believe the matters set out in paragraph 18 to be true.
- And I make this solemn declaration, as to the matters aforesaid, according to the law in this behalf made, and subject to the punishment by law provided for any wilfully false statement in any such declaration.

#### Notes:

- 1. In this declaration:
  - 1. the words "principal", " Contractor", "employee", "employees" and "relevant employees" have the meanings applicable under the relevant Acts;
  - 2. the word "subContractor" in paragraphs 5, 6, 9, 10, 14 and 15 has the meaning applicable under the relevant Act; and
  - 3. otherwise the words "Contractor", "SubContractor", "Supplier", "Consultant", "subContractor", "supplier" and "consultant" have the meanings given in or applicable under the Contract.
- 2. \* the declaration must be made before one of the following persons:(a) where the declaration is sworn within the State of New South Wales:

- (ii) (iii) a justice of the peace of the State of New South Wales;
- a solicitor of the Supreme Court of New South Wales with a current practising certificate;
- (iv) a notary public; or
- (v) another prescribed person legally authorised to administer an oath under the Oaths Act (NSW); or
- (b) where the declaration is sworn in a place outside the State of New South Wales:
  - a notary public; or (i) (II)
  - any person having authority to administer an oath in that place.

# SCHEDULE 5 ENVIRONMENTAL MANAGEMENT PLAN

In accordance with the *Environmental Management* clause, the Contractor must develop and implement an acceptable site-specific Environmental Management Plan in the following form, incorporating additional objectives and actions applicable to the risks and opportunities associated with this contract.

| The environmental risk management objectives  | The environmental risk management measures:   |  |
|---|---|--|
| 1. CONSERVATION OF PLANTS & WILDLIFE  |   |  |
| Protection of trees, plants and animals   | <ul> <li>Protect existing trees and plants at and around the Site from damage and do not remove flora without approval from the Principal</li> <li>Protect birds, fish and animals at and around the Site from harm and do not remove flora without approval from the Principal</li> <li>Ensure that animals and plants are not brought onto the Site without the written agreement of the Principal</li> <li>Minimise the use of pesticides and herbicides and ensure minimal impact on the environment</li> <li>Use site roads or approved access routes for vehicular and equipment access</li> <li>Park all vehicles and equipment in designated or approved areas</li> <li>Use approved access routes for all pedestrian and goods movements to vehicles, equipment, facilities and construction sites</li> <li>The Contractor nominates the following additional measures:</li> </ul> |  |
|   | The Contractor identifies the following person who will be responsible for managing the above measures:   |  |
| 2. CONSERVATION OF RESOURCES  |   |  |
| <ol> <li>Manage Materials used under contract to minimise:</li> <li>resource use</li> <li>ozone depleting effects</li> <li>detrimental effects on air, water, quality.</li> </ol> | <ul> <li>Minimise the use of imported topsoil</li> <li>Reuse all topsoil on site</li> <li>Use only timber from sustainable managed sources</li> <li>Maximise the use of materials from a sustainable source, that are, and/or can be, recycled</li> <li>Use low energy usage construction, fittings and appliances (including heating/cooling and lighting)</li> <li>Use low potable water demand fittings and appliances (dual flush toilets, water conserving shower roses and taps)</li> <li>Ensure packaging is minimised and recycled</li> <li>Minimise the use of solvents, glues, paints and other materials which release odours or vapour</li> <li>The Contractor nominates the following additional measures:</li> </ul>  |  |
| 3. POLLUTION CONTROL  |   |  |
| Vehicles and plant  | <ul> <li>Do not use vehicles or plant producing excessive emissions</li> <li>Do not bring vehicles or plant with fuel or oil leaks to the Site</li> <li>Wash down vehicles only in areas approved by the Principal.</li> </ul>  |  |

| The environmental risk management objectives  | The environmental risk management measures:  |
|---|--|
|   | The Contractor nominates the following additional measures:  |
|   | <ul> <li>The Contractor identifies the following person who will be responsible for managing the above measures:</li> </ul>  |
| Stormwater is not polluted by cleaning activities and plants/grass are not adversely affected           | <ul> <li>Use only water based, non-toxic paints</li> <li>Use only water to clean brushes and rollers</li> <li>The Contractor nominates the following additional measures:</li> </ul>   |
|   | <ul> <li>The Contractor identifies the following person who will be responsible for managing the above measures:</li> </ul>  |
| Soil Erosion controlled   | <ul> <li>Install the following sediment control devices prior to commencement of construction:</li> </ul>  |
|   | The Contractor nominates the following additional measures:  |
|   | <ul> <li>The Contractor identifies the following person who will be responsible for managing the above measures:</li> </ul>  |
| Soil contamination is not disturbed or released to the environment                                      | <ul> <li>Establish, in consultation with the Principal, if contaminated soil is present at the site prior to commencing work at the site</li> <li>The Contractor nominates the following additional measures:</li> </ul>   |
|   | <ul> <li>The Contractor identifies the following person who will be responsible for managing the above measures:</li> </ul>  |
| Charging and/or disposal of refrigerants meet statutory<br>requirements, eg. for licensing and disposal | <ul> <li>Ensure procedures are used to meet statutory obligations for the charging and disposal of refrigerants</li> <li>Use appropriately trained employees</li> <li>Document disposal and retain documentation</li> <li>The Contractor nominates the following additional measures:</li> </ul> |
|   | <ul> <li>The Contractor identifies the following person who will be responsible for managing the above measures:</li> </ul>  |
| Noise impact on neighbours, occupants or users of facility minimised                                    | <ul> <li>Keep within EPA and Council noise limits</li> <li>Use equipment in good repair and condition</li> <li>Use noise suppression equipment (eg. silencers on compressors)</li> <li>Do not expose workers and visitors to excessive noise</li> </ul>  |

| The environmental risk management objectives  | The environmental risk management measures:  |
|---|--|
|   | The Contractor nominates the following additional measures:  |
|   | The Contractor identifies the following person who will be responsible for managing the above measures:  |
| Trade Waste Licence conditions applicable to the facility are not breached.   | <ul> <li>Ensure procedures are in place to avoid breaches of the trade Waste Conditions         <ul> <li>(May apply to discharges from cooling water systems, condenser water systems, heating water systems, cooking facilities, engine discharges etc where water is treated with chemicals or where large sediment loads exist)</li> <li>The Contractor nominates the following additional measures:</li> </ul> </li> </ul> |
|   | <ul> <li>The Contractor identifies the following person who will be responsible for managing the above measures:</li> </ul>  |
| Air Pollution from dust and emissions minimised   | <ul> <li>Minimise areas of exposed earth</li> <li>Use water sprays and/or other means to control dust</li> <li>Keep emissions within statutory or required limits</li> <li>The Contractor nominates the following additional measures:</li> </ul>  |
|   | The Contractor identifies the following person who will be responsible for managing the above measures:  |
| <ul> <li>Disposal of waste, including -</li> <li>Packaging materials</li> <li>Replaced or redundant parts or materials.</li> <li>Chemicals</li> <li>Oils and greases from machinery and cooking processes</li> <li>Paints and solvents including the cleaning of equipment, tools and brushes</li> <li>Cleaning materials and rags</li> </ul> | <ul> <li>Ensure appropriate procedures are used for the disposal of all waste items.</li> <li>EITHER</li> <li>Provide valid disposal certificates for each applicable item.</li> <li>OR</li> <li>Provide company certification of appropriate disposal of the following:</li> </ul>  |
| • Other waste,<br>in accordance with statutory requirements   | The Contractor nominates the following additional measures:  |
|   | The Contractor identifies the following person who will be responsible for managing the above measures:  |
|   |  |

| The environmental risk management objectives   | The environmental risk management measures:  |
|--|--|
| <b>Emergencies</b><br>Incidents and spills are contained, and damage to the  | <ul> <li>Ensure emergency procedures are used to manage all reasonably foreseeable harm, including spills and other environmental emergencies</li> <li>Agree with the Principal to procedures for handling oil and chemicals before placing on the Site</li> </ul> |
| environment is minimised and rectified with appropriate  | Document key contacts  |
| and approved emergency response procedures   | The Contractor nominates the following additional measures:  |
|  | <ul> <li>The Contractor identifies the following person who will be responsible for managing the above measures:</li> </ul>  |
| Compliance Audit   | <ul> <li>Inspect the Site daily to ensure the appropriate environmental controls are in place and are operating effectively, and to ensure all</li> </ul>  |
|  |  |
| Compliance with Principal environmental requirements   | environmental management requirements are being met  |
| and, where breaches are detected, rectification of defects   | Cooperate with environmental audits by others  |
| within the time period set in the audit process  | Rectify any environmental breaches identified within the time frame specified in an audit or by the Principal  |
|  | The Contractor nominates the following additional measures:  |
|  |  |
|  | □ The Contractor identifies the following person who will be responsible for managing the above measures:  |
|  |  |
| 4. <b>RECORDS AND REPORTING</b>  |  |
| Records  | □ Update the contract specific EMP   |
| Sufficient documentation to demonstrate:   | Report on the implementation of the contract specific EMP  |
| Approved management plans  | Submit Incident reports to the Principal and to regulators where required  |
| Training records   | Submit waste disposal certificates or certification of appropriate disposal to the Principal where applicable  |
| <ul> <li>Valid disposal certificates and/or company</li> </ul>   | <ul> <li>Keep training records for inspection</li> </ul>   |
| certification of appropriate disposal as applicable  | □ The Contractor nominates the following additional measures:  |
| <ul> <li>Correspondence with regulators including evidence<br/>that the cause of non-compliances has been fixed</li> </ul> |  |
| that the cause of non-comphances has been fixed  | <ul> <li>The Contractor identifies the following person who will be responsible for managing the above measures:</li> </ul>  |
|  |  |
| Incident Reporting   | Immediately report all environmental incidents to the Principal  |
| All environmental incidents are immediately reported to Principal  | The Contractor nominates the following additional measures:  |
|  |  |
|  | □ The Contractor identifies the following person who will be responsible for managing the above measures:  |

# **Statement of Requirements**

# 1. Introduction

Through this request for tender, the State Contracts Control Board is intending to implement a procurement arrangement for solar power systems for the NSW Government. That arrangement will be a contract with a duration of three years with two options for extension of up to 12 months in duration. The intention of the arrangement is to ensure:

- economy through consolidation of volume
- quality of equipment, materials, design and workmanship by requiring conformance to well considered technical specifications and selection of contractors of high competence and experience.

Due to the impact of federal government funding initiatives that are designed to help Australian schools tackle climate change, the requirements of NSW Department of Educations and Training (DET) are very much to the fore in establishing the proposed arrangement. However the arrangement will also need to serve other NSW Government agencies.

As well, local governments, non for profit organisations and educational institutions other than those under DET (including private schools, colleges and universities) may access the contract.

# 2. Background

Over the next few years, it is expected that the NSW Government will be procuring Solar Power Systems. A significant driver of this procurement will be the Australian Governments National Solar Schools Program (NSS).

The NSS program commenced from July 2008, and will run until 30 June 2015. The programs funding is available for solar power systems and related items, solar hot water systems, solar or heat pump hot water systems, other renewable energy generation, energy efficient items, rainwater tanks, and safety items.

The NSS offers grants of up to \$50,000 to each school, and potentially two grants of \$50,000 for schools with multiple campuses. Contingent on accessing the full \$50,000 is the inclusion, as a part of the project to be funded, of a solar power system of at least 2KW in capacity. Otherwise, there is only \$30,000 available.

# 3. Objectives

## Competitive pricing

Through a competitive tender process, with the significant volume of business at stake, and guarantee of business to the winning tenderers. Competitive pricing will enable schools to make the best use of the funding available.

## High quality of Equipment and Installations

Conformance to the applicable Australian standards will be required. This document includes specifications that cover the equipment, the installations and their maintenance in line with best practise in the photovoltaic industry.

# Genuine Environmental Outcomes

Through competitive pricing and quality of equipment and installations, replacement of fossil fuel generated power will be optimised. For schools that opt for a solar power system, lower pricing than would otherwise be available will enable more funds to be available for the other energy and water saving options under the National Solar Schools program.

# 4. Scope

Tenders will not be considered unless they offer a complete end to end solution, with all of the following elements included.

- 1. **Solar Panels -**Four types of solar panels are being tendered for use in the systems being installed. They include rigid types, being multi-crystalline, mono-crystalline and amorphous. As well, flexible amorphous types will be tendered.
- 2. **Associated equipment -** Including inverters, cabling, data loggers, meters, mounting hardware and any other equipment required along with the panels to make a complete operational solar power systems.
- 3. **Installation** Site inspection, quotation, required labour, testing and commissioning, reports, associated works and hardware.
- 4. **Training** As required for operation and maintenance.
- 5. Warranties
- 6. **Complete systems –** systems up to 5KW in capacity to be tendered
- 7. Maintenance is to be offered as an option

# 5. Pricing

# Relationship of pricing to quotations

The Contractor will be required to honour the system scenario prices offered for a particular region in Part C of this RFT, which is one price for the entire region no matter where the installation is required within that region. Variations may be allowed where more cable or other material is required due to site conditions. However, variations will not be allowed for more hours of labour, travel, accommodation, transport or delivery.

# 6. Technical Specification

The Technical Specification has been prepared by the Government Architects Branch of NSW Department of Commerce, and is attached to this document.

All tenders must comply with the technical specification detailed in Annexure A to Part F.

# 7. NSW Department of Education (DET)

The NSW Department of Education will be the prime Customer for this arrangement.

The NSW Department of Education and Training (DET) delivers high quality, internationally competitive public education and training from early childhood (pre-school), through to the

compulsory years of schooling (Kindergarten to Year 10), and senior secondary education leading to the award of the NSW Higher School Certificate (in Years 11 and 12).

It strongly promotes lifelong learning, and aims to provide students with a smooth transition from school to work or further study, and from post-compulsory education and training to work or further study.

The Department is the largest single organisation, public or private, in Australia. With a recurrent budget of \$11.8 billion, the Department is responsible for around one quarter of the State's total budget.

Around 741,000 students are taught by over 50,000 full time teachers in more than 2,200 NSW Government schools - including pre-schools, primary schools, central schools, high schools, colleges and specialist schools.

# 8. Important Contract Characteristics

## **Incorporated Works Contract**

As installation of systems is by nature akin to a building works contract, once a quotation is accepted by a Customer, a Customer contract incorporating terms and conditions of a works contract nature will be automatically put in place. The parameters of the Works contract are set by the Contractor's quotation document.

The Works contract will cover such issue as completion time, OH&S on site, care of people and property, and all such issues as typically covered by Works contracts.

## **Completion Time**

There will be a maximum period from receipt of an order to completion and commissioning of the installation of 10 weeks.

# 9. Implementation

The following is the proposed implementation timeline, and the periods stated are only approximate. This is provided only to give a guide to tender participants. This timeline may change due to unforseen circumstances and issues arising during the implementation. The SCCB is not bound by the periods suggested.

Tender period – 5 weeks Evaluation and approval by the board – 5 weeks Final negotiation, signup and commencement of contract - 4 weeks

As with any project, these timelines may slip. It is the intention of the board to have a contract in place well before the end of February 2009.

# 10. Regions

Tenderers will be able to offer for one, several or all of the regions below. These regions are the same as the regions used by DET. For the purposes of deciding which region a site belongs, treat the site as being in the same region as the nearest institution administered by DET. The regions and the institutions are given in the DET Directory, copy of which is included in the attachments to this statement of requirements.

Region 1 – Greater Sydney Metropolitan (Sydney, Northern Sydney, Western Sydney, South Western Sydney, Hunter/Central Coast, Blue Mountains, Illawarra Region 2 – North Coast Region 3 – New England Region 4 – Riverina Region 5 – Western NSW Region 6 – South East

# 11. Engagement

The sequence of engagement between the Contractor and Customer is as follows

- 1) Request for quotation (RFQ)
- 2) Site inspection
- 3) Quotation
- 4) Purchase Order
- 5) Installation
- 6) Handover

## Request for Quotation (RFQ)

Issued to Contractor from Customer. The request for quotation should state the size and type of installation required, however the requirements may vary once the Contractor is engaged.

## Site Inspection

Contractors representative to visit the site, confirm requirements with the Customer, investigate options for location, and take a full appreciation of site conditions. All issues required to finalise a quotation should be canvassed. There will be no basis for claims of site conditions requiring variation if the Contractor had full opportunity to make a full inspection. (refer Annexure A to this section)

The site inspection must be completed within four weeks of the request for quote being issued.

## Quotation

When a contracted supplier is contacted by a Customer, and the Customer indicates that installation will be required, the supplier must arrange a site visit within one month. Once the site visit is carried out, within one week a quotation is to be provided.

All purchase orders received under the contract must be preceded by a formal quotation from the supplier.

Quotations are to include the following elements

- Drawings of the intended installation
- An itemised manifesto of the parts and materials, with prices
- Hours of labour
- Number of personnel
- Time for completion
- Cost of RECs
- Total Price

The quotation may offer alternatives, as long as they are within the contract specifications and pricing. The quotation must show whether RECs are retained by the Customer or assigned to the Contractor, and whether maintenance is included, and the price impact of those decisions.

DET has indicated it will retain the REC's but require a price for/without REC's

The quotation may not include any conditions that are not inline with the contract.

The site quotation must be completed within six weeks of the request for quote being issued.

## **Purchase Order**

Once a quotation is submitted that the Customer is satisfied with, a purchase order may be issued which will be an acceptance of the quotation. The purchase order should state the desired completion time and the period over which the work may be done. If no completion time is stated then the work must be completed within the time set by the contract.

## Installation

Must be completed within 10 weeks of the purchase order being issued, unless the purchase order states otherwise. Once installation has commenced the Contractor has two weeks to complete the installation and commission the system.

The contracted supplier must complete the project within the contracted period. Any request to complete the project at a time beyond the contracted period must be copied to the NSW Procurement vendor manager, whether it arises from the Customer or the Contractor. It is the responsibility of the Contractor to inform the NSW Procurement Vendor Manager in any event.

## Handover

Once the system has been commissioned, the Customer must be provided with an installation report, with a form for them to sign a copy to indicate their acceptance of the handover of the system, with a copy to be retained by the Contractor.

# 12. Renewable Energy Certificates (RECs)

Customers will have the retain RECs or assign them to the Contractor. Tenderers are asked to provide alternative prices for each system, one for when RECs are retained by the Customer, and a price for when the RECs are assigned to the Contractor.

DET has indicated it will retain the REC's and not assign them to the Contractor but require a price for/without REC's All RECs are to be forwarded to DET's Regional Asset Management Unit.

# 13. DET Requirement

The DET has a strong interest in ensuring that the solar power systems and the installations are of a high quality, robust as the technology allows and long lasting. As well, that the installations must not cause damage to school infrastructure, either in the short term or over time due to such issues as moisture ingress through penetrations made in roofs.

DET have indicted that they are likely to order systems which are either 2KW or 3KW in capacity.

The Contractor will be required to configure and quote systems that are fully claimable through the National Solar Schools program. If elements are requested that may not be claimed or any other requirements are made that may prejudice against the full funding being provided, the Contractor will be required to inform the school of those difficulties.

# 14. Warranties

- Photovoltaic panels will have a full replacement warranty of 20 Years
- Inverters will have full replacement warranty of 10 years
- Mounting Structure warranty of 20 years (structural)
- Installation Roof penetrations guaranteed against ingress of moisture for the life of the installation.

Further details of warranty requirements are stated in the technical specifications at Annexure A.

# 15. Maintenance

Customers may choose for maintenance to be provided by the Contractor as specified in the Technical Specification, or to arrange maintenance themselves.

Tenderers are asked to price maintenance separately, as an option for the Customer.

# 16. Applications for funding

To assist any school in gaining the funding through the NSS the Contractor will provide to the school on completion of the project

- An installation report (as described in the technical specification) signed by the Contractor
- An estimate of the energy savings achieved

# 17. List of Annexures

## A) Technical Specification

## B) 2008 DET Directory

The directory is an annual publication which provides information about the NSW Department of Education and Training. The information in the directory is up-to-date as at March 2008. It includes a manifesto of all schools under DET, DET offices and DET senior management, with contact details.

# Photovoltaic Solar Power Generator – Technical Specification

## 1 **GENERAL**

## 1.1 AIMS

Provide photovoltaic generating system(s) as documented for NSW DET school premises.

## 1.2 SCOPE OF WORK

The works in this contract shall comprise the provision of all materials, labour, transport, tools, plant, applications, payment of fees and everything else necessary for the design, supply, installation, commission and maintenance of photovoltaic (PV) grid-connect rooftop system(s) as documented and shall include:

- Mandatory site inspection of proposed installation site
- Photovoltaic modules
- Grid-connect inverter(s)
- Mounting frame for rooftop installation
- DC and AC cabling from the photovoltaic array to the DC and AC switchboards and inverters, and to the nearest existing electrical distribution board
- Electrical metering for all photovoltaic system ≥ 5 kilowatts peak nominal capacity as per Electricity Distributor requirements for billing purposes
- Data-logger for monitoring PV system performance
- Web-service for publishing PV system performance
- Testing and commissioning
- Inspections of the PV system by the local Electricity Distributor
- Training of local staff in the basic operation, maintenance, and trouble-shooting of the PV system
- Installation report and photographs of completed projects
- Operating warranty
- Periodic maintenance for a 12 year period to be offered as an option
- Sundry minor works as specified herein
- All supports, brackets, drilling, penetrations, fire stops, water proofing and other building works associated with the above

The typical electrical configuration of the expected grid-connected photovoltaic system is described in Sketch-E01 attached.

The tenderer shall advise any ambiguities in the document at the time of tender for the works specified. Claims for extra costs based on lack of knowledge of the documents will not be accepted after submission of the tender.

Provide all apparatus, appliances, materials, labour and services not specifically mentioned, that are necessary to form a complete fully operational system in all respects and without any additional cost. Price variation or extensions of time will not be allowed on the basis of lack of knowledge or familiarisation with other documentation for the project.

## 1.3 STANDARDS

In carrying out the installation of grid-connected solar power systems, the Contractor will be required to undertake the work in accordance with the following most recent Australian Standards:

| AS 5033  | Installation of Photovoltaic Arrays                |  |
|--|--|--|
| AS 3000  | Electrical Wiring Rules                            |  |
| AS 1768  | Lightning Protection                               |  |
| AS 1170.2                                      | Wind Loads   |  |
| AS 4777  | Grid Connections of Energy Systems via Inverters   |  |
| AS 2053  | Conduits and Fittings for Electrical Installations |  |
| AS 4509  | Stand-Alone Power Systems                          |  |
| Building Code of Au                            | istralia   |  |
| National Building an                           | nd Services Reference Specification 2008 Edition   |  |
| Electricity Distribute                         | or Service and Installation Rules                  |  |
| New South Wales Service and Installation Rules |  |  |
|  |  |  |

Other appropriate Australian Standards

## 1.4 CROSS REFERENCES

#### General

Electrical services design and installation is to comply with the following sections from the NATSPEC ELECTRICAL SERVICES specification:

- General requirements
- General requirements (Electrical)
- Fire-stopping
- Cable support and duct systems
- Low voltage power systems
- Switchboards proprietary
- Switchboards custom-built
- Switchboard components
- Lightning protection
- Telecommunications cabling
- Power Generation Photovoltaic

## 1.5 NATSPEC REFERENCE SPECIFICATION

This project specification and the associated drawings have been prepared as a two-part specification i.e.

- NATSPEC ELECTRICAL SERVICES
- this specification containing specific requirements of the contract.

The NATSPEC ELECTRICAL SERVICES specification is referred to without reference to edition. Use the edition of the NATSPEC ELECTRICAL SERVICES specification that is

current at the date of tenders closing. For additional information including current edition of NATSPEC ELECTRICAL SERVICES refer to www.natspec.com.au. NATSPEC is published by and is obtainable from Construction Information Systems Pty Ltd. A copy of NATSPEC has been provided as an attachment.

The NATSPEC REFERENCE specification is being referred by implicit selection. NATSPEC REFERENCE specification provisions apply unless the project specific documents say they do not. This is being done implicitly, by context. For example, if the project clearly (e.g. from the drawings and specification) has no steel conduit then the clauses dealing with metallic conduit in the *Cable support and duct systems* section do not apply. Statements in the project specification do not exclude such items explicitly.

At a finer level of detail, if the NATSPEC REFERENCE specification contains a default provision for an applicable element, but the project specification describes a different provision, then the provision in the project specification will override that in the NATSPEC REFERENCE specification.

**Site Copy** 

Keep a hard copy of NATSPEC ELECTRICAL SERVICES on site during installation.

## 2 CONTRACTOR REQUIREMENTS

## 2.1 ACCREDITATION

The Contractor must be accredited by the Clean Energy Council of Australia, formerly the Australian Business Council for Sustainable Energy (BCSE) in order to carry out PV design and installation works.

The designer of each grid-connected photovoltaic power system must have full BCSE accreditation – provisional accreditation will not be accepted.

At least one person carrying out installation work at each work site must have full BSCE installers accreditation. No work is permitted to be carried out at any time on-site unless a fully BCSE accredited installer is physically present within the work-site.

For further information please see the Australian Business Council for Sustainable Energy Website at: <u>http://cleanenergycouncil.org.au/</u>

### 2.2 LICENCES AND TRADE QUALIFICATIONS

All work shall be carried out by persons or tradespersons fully qualified and trained for the particular trade work or service required.

A licenced electrician must carry out all Low Voltage electrical work (i.e. exceeding Extra-Low Voltage of 50V a.c. or 120V ripple free d.c.) and all electrical work associated with connecting the photovoltaic system into the building's power system and electricity grid.

Apprentices, trade assistance and labourers are to be under the supervision of a qualified tradesperson, where appropriate.

## 2.3 OCCUPATIONAL HEALTH AND SAFETY (OH&S)

In carrying out the installation of grid-connected solar power systems, the Contractor will be required to undertake the work in accordance with the BCSE OH&S requirements and the NSW OH&S requirements including, but not limited to, the following:

• Occupational Health and Safety Act (2000) No 40 – Clause 8: Duties of employers

- Occupational Health and Safety Regulation 2001 Division 6: Working at heights (all sections)
- Occupational Health and Safety Regulation 2001- Division 8: Electricity (all sections)
- Codes of Practice, approved and issued pursuant to the above Act and or Regulations made under the Act, and
- the NSW Government Occupational Health and Safety Management Systems Guidelines 4<sup>th</sup> Edition (OHSM Guidelines), and

The Contractor must ensure that the Contractor's Sub-Contractors comply with the OH&S requirements listed in this clause in the performance of any contract awarded.

A summary of relevant Occupational Health and Safety Laws and Regulations is available from WorkCover NSW.

### 2.4 SITE INSPECTION

The Contractor shall undertake a site inspection of the proposed installation site prior to providing a quotation for the works. The Contractor will be responsible for all site conditions when undertaking the works. Site inspection shall include, but is not limited to:

- Assessing the suitability of building roof for system installation by taking into consideration:
  - Orientation and pitch of the roof
  - Whether there is sufficient space on the roof to install the solar panels
  - Whether the roof is in good condition or likely to be replaced in the next 10 years
  - o Suitability of roof structure for solar PV system wind loading
  - Trafficability of the roof such that no damage is likely to occur to the school infrastructure during installation and maintenance
- Nearby obstructions or trees that may shade the solar panels during the day
- Whether there is a suitable location for the inverter station
- Suitability of nearest electrical distribution board for AC grid-connection by taking into consideration:
  - Age and condition of the nearest electrical distribution board
  - Whether the electrical distribution board is appropriately rated to include the maximum load of the proposed solar PV system
  - Whether the electrical distribution board's main switch is appropriately rated to include the maximum load of the proposed solar PV system
  - Whether the electrical submains are appropriately rated to include the maximum load of the proposed solar PV system
  - Whether the are sufficient spare poles available on the electrical distribution board for installing the required AC switchgear
- Note the type of existing circuit breaker protection located on the nearest electrical distribution board. New AC switchgear is to match existing
- Whether the building contains any asbestos product by checking the asbestos registry

# 3 SUBMISSIONS

### 3.1 WORK METHODOLOGY

Prior to commencing installation at each work site provide a work methodology to the relevant School Principal that includes, but is not limited to:

- Site specific safe work method statement for compliance with NSW OH&S requirements
- Methods of waterproofing any necessary roof and/or wall penetrations
- Work method practices to be carried out to ensure school infrastructure will not be damaged during installation (i.e. methods for preventing damage to existing roof during installation)

## 3.2 INSTALLATION REPORT

For each grid-connected photovoltaic power system submit to the relevant School Principal a completed National Solar Schools Program solar power system installation report (as attached) no later than 1 calendar week after system installation practical completion. The installation report shall also include, as additional to the National Solar Schools Program requirements:

- Technical description, specifications and manuals for each system component (i.e. solar panels, inverter(s), data-logger, mounting frame and balance of system components).
- Calculations and assumptions for all selections and systems including predicted annual energy generation calculations and voltage drop calculations.
- Physical layout of photovoltaic array showing location of photovoltaic modules, mounting equipment, inverter station and cable runs.
- Single line schematic showing the configuration of photovoltaic strings and inverter and the interconnection with the building electrical system.
- Product warranties such that the relevant School Principal can make a warranty claim as per Clause 9.2.
- Trouble shooting guide for common solar array faults (i.e. start-up and shut-down procedure, inverter LED signals and descriptions, grid failure, inverter failure and insulation failure).
- Testing records and certificates as per Clause 8.

## 4 PV SYSTEM REQUIREMENTS

### 4.1 GENERAL SYSTEM REQUIREMENTS

The photovoltaic array must comprise sufficient number of photovoltaic modules whose individual nominal rating under Standard Test Conditions (STC) results in a minimum kilowatt peak total array nominal rated capacity nominated in the contract agreement.

## 4.2 MAINTENANCE ACCESS

The arrangement of all the components of the photovoltaic system will be arranged so that the photovoltaic modules, inverters, data loggers, and any other component, is readily accessible for maintenance and replacement when required.

### 4.3 **PV MODULE REQUIREMENTS**

#### **Selection of Modules**

No particular brand or model of photovoltaic modules is specified. The Contractor will nominate the brand and model of photovoltaic module proposed for this contract.

#### **Australian Standards**

The proposed photovoltaic modules must comply with AS/NZS 5033:2005.

#### Certification

Crystalline photovoltaic modules must be certified with IEC-61215. Amorphous photovoltaic modules must be certified with IEC-61646. Evidence of this must be demonstrated by submitting a copy of the testing certificate from an IEC certification body at the time of tender.

#### **Equipment Class**

PV modules must be Class II or better.

#### **Encapsulation**

PV modules must be encapsulated in toughened glass.

#### **Protection Rating**

PV modules and PV array junction boxes exposed to the environment shall be at least IP56 compliant in accordance with AS 60529 and shall be UV resistant.

#### **Temperature Coefficient**

Maximum allowable temperature coefficient of maximum power is -0.5% / °C.

**Operating Temperature** Operating module temperature -20°C to +80°C.

#### **Mechanical Protection**

Hailstone impact testing: Required. Maximum allowable mechanical load > 450 kg/m<sup>2</sup>

#### Warranty

Crystalline photovoltaic modules must meet the following minimum warranted power percentage:

20 years - at 80% power output

Amorphous photovoltaic modules must provide a minimum warranty of 20 years.

The Contractor is responsible for ensuring the photovoltaic modules are installed as per manufacturer's installation, operation or maintenance instructions.

#### **Other requirements**

The photovoltaic modules supplied must be chosen with price-per-performance in mind i.e. dollars per watt peak should be considered. It is recommended that photovoltaic modules rated at 80 watts nominal peak capacity or greater should be nominated for the system.

#### 4.4 PHOTOVOLTAIC MODULE ARRAY ARRANGEMENT

Notwithstanding the total photovoltaic array power capability as required under this specification, the number of individual photovoltaic modules must be such, and the array so arranged, that the physical arrangement of the array is grouped together symmetrically or geometrically ordered.

The photovoltaic array must also be arranged such that photovoltaic modules will not be shaded to any extent by buildings, trees or the photovoltaic modules themselves between the hours of 10:00am and 3:00pm on all summer and winter months.

### 4.5 MOUNTING FRAME

General

The PV array shall be either:

- Proprietary fixed frame surface mounted flush-to-roof type system; or
- Proprietary raked on mounting frames to maximise solar insolation.

The mounting system shall be mechanically fixed to the building structure. Custom made mounting systems will not be accepted.

#### Location

The location of the PV array should be designed to maximise solar generation so that, as much as possible, the photovoltaic modules point with a tilt angle of  $\pm$  20 degrees to the latitude of the installation and orientated  $\pm$  45 degrees to true north. Locate the PV array such that there is minimal risk of vandalism.

#### **Structural Suitability**

The array mounting structure shall generally be suitable for Region B (intermediate) Terrain Category 2 maximum wind speed regions as outlined in AS1170. In areas which are deemed to be prone to cyclones, the array mounting structure must be suitable for Region C (cyclonic) Terrain Category 2 maximum wind speeds.

The mounting structure must comply with the requirements of AS1170.2: Structural design actions – Wind actions. The Contractor must demonstrate compliance with AS1170.2 by submitting wind load calculations for the typical project scenarios outlined in the tender schedules and certified by a structural engineer at the time of tender.

#### Mounting

Typical NSW school building roof structures and profiles are attached for information only. Generally provide a flush-to-roof type mounting frame with 60-100mm airgap between the rear of the photovoltaic module and roof material for all pitched roofs.

Provide raked mounting frames to tilt the photovoltaic modules to the angle of latitude  $\pm 20$  degrees for flat roofs with less than 5 degree pitch or when an orientation of  $\pm 45$  degrees to true north cannot be achieved using a flush-to-roof type mounting system.

Any bolts, washers, screws, nails or metal objects in contact with the mounting frame must be rust-proof or not cause a galvanic reaction.

The PV mounting frame and fixings to PV modules shall be fitted with either pin-torque, antivandal screws or tri-lobial, tamper-resistant end-cap screws.

#### Installation

The mounting system shall be fixed through the roof into purlins or rafters using existing roofing screw positions wherever possible. All penetrations must be resealed and waterproofed as required.

All roof and wall penetrations must be conducted such that there is a 20 year barrier to the ingress of water or moisture. The Contractor shall provide a 20 year guarantee for waterproofing all roof and wall penetrations and is liable for any damage caused by water ingress through roof and wall penetrations for the first 20 years of operation.

Wherever possible the rails for module mounting should run vertically up the slope of the roof, perpendicular to the gutter, along the common rafters up to the apex of the building. Locating mounting frame railing horizontally, parallel to the gutter, along the purlins should be avoided.

Warranty

The mounting system must have a minimum warranty of 20 years in meeting the requirements of AS1170.2 for normal operating conditions. The Contractor must supply a warranty to which the School Principal can make a warranty claim.

## 4.6 INVERTER REQUIREMENTS

#### **Selection of Inverter**

The selection of the inverter brand and model is not specified, but must be fully compliant with Australian Standards and all other relevant Authorities' requirements.

The Contractor will nominate the brand and model of inverter(s) proposed for this project. The inverter system must be suitable for use with the specified photovoltaic system.

#### **Australian Standards**

The inverter(s) supplied must be certified with AS4777. Evidence of this must be demonstrated by submitting a copy of the Certificate of Suitability from the NSW Office of Fair Trading or equivalent at the time of tender.

#### **Technical Requirements**

The total capacity of the inverter(s) must be such that it is rated sufficiently for the total capacity of the photovoltaic array. However, the rated capacity of the inverter(s) must be as small as possible without sacrificing generated energy.

The inverter(s) must be also be well ventilated to prevent over-heating and must be capable of autonomously synchronizing with the existing grid voltage.

Waveform: True sine wave.

Waveform quality: to AS 4777.

Voltage regulation:  $\pm$  8%.

Harmonic distortion of output current:< 4%.

Frequency regulation:  $\pm 1\%$ .

Efficiency:  $\geq$  90% at 10% load.

Protection: Overload, short circuit and transient required.

Automatic no-load shutdown: required.

Display:

- Output power.
- Grid stability.

**Load Balancing** 

A three phase system configuration will be required for all grid-connect photovoltaic power systems  $\geq 6$  kilowatts peak nominal rated capacity. The system must be balanced over three (3) phases within 5% and to the approval of the Electricity Distributor's requirements.

Warranty

The inverter must have a minimum warranty of 10 years. The Contractor must supply a warranty to which The School Principal can make a warranty claim to the inverter manufacturer.

## 4.7 DATA-LOGGER REQUIREMENTS

A data-logger must be supplied, installed and connected to the solar PV power system's inverter(s). The data-logger must be fully compatible with the nominated inverter(s).

Locate the data-logger directly adjacent to the inverter station.

**Technical Requirements** 

The data-logger must be capable of recording the following information:

- Energy Total (kWh)
- A calculation of CO2 saved (kg)
- Power now (W, kW)
- Energy today (Wh, kW)
- Time period / date for energy generated
- Instantaneous voltage of PV system (V)
- Instantaneous current of PV system (A)

The data-logger(s) must be capable of monitoring multiple inverters at once and must be able to record individual inverter performance and operation parameters of the PV, such as DC voltage and current, and AC voltage, current and frequency.

The data-logger and interface must have the following capabilities:

Storage data capacity  $\geq 1$  gigabyte

Save cycles  $\leq$  30 minutes

Connection interfaces: USB-interface, USB socket, 8-pin data cable (RS 485), network plug (RJ 45-sockets) and RS232.

The data-logger must come complete with PC software with an open source protocol for automatically transferring the PV system data to a NSW Department of Education and Training database or website.

**Web Service** 

Provide a free proprietary web service and internet platform for Photovoltaic plant monitoring and visualisation.

The web service must provide the following functions:

- System information via e-mail (energy yield, maximum output, CO<sub>2</sub> reduction, system fault messages)
- Presentation of system data in diagrams and tables
- Ability to publish web data on other websites, including the NSW Department of Education and Training website
- Ability to customise individual web pages through HTML and insert own images

The service provider shall register the web service product and test the system for functionality. Data shall be broadcasted on the web service daily.

Make all necessary applications and pay any licence fees in relation to registering the photovoltaic solar power system to the web service.

The Contractor shall provide training to the School Principal and nominated staff in the use and functionality of the web service product and shall supply all information necessary to maintain the system upon practical completion, including necessary licences, usernames and passwords.

Installation

General: To manufacturers recommendations.

Interface the data-logger(s) to the new inverter station and all existing PV system inverters located on the school site if compatible. Connect the data-logger(s) to the school's structured cabling computer network. Liaise with the school network administrator to modify the existing fire-wall settings. Test for functionality.

## 4.8 LIGHTNING PROTECTION

Bond the metal portions of photovoltaic array to the existing lightning protection system if available as per AS1768 and AS3000.

### 4.9 MOULDED CASE AND MINIATURE CIRCUIT BREAKERS

Moulded case breakers: To AS 60947.1, AS 2184 and AS 60947.2.

Miniature circuit breakers: To AS/NZS 60898.1 or AS 3111.

Operation: Independent manual operation including positive ON/OFF indicator.

Trip type:

- Moulded case breakers: Adjustable thermal, fixed magnetic.
- Miniature circuit breakers: Fixed thermal, fixed magnetic.

Current limiting:

- Moulded case breakers: Required.

Isolation facility: Required.

Mounting: Mount circuit breakers so that the ON/OFF and current rating indications are clearly visible with covers or escutcheons in position. Align operating toggles of each circuit breaker in the same plane.

Utilisation category: Moulded case breakers:

- Final subcircuits category: Category A.
- Mains and submains: Category B.

Trip units: Connect interchangeable and integrally fused trip units so that trip units are not live when circuit breaker contacts are open.

#### 4.10 **POWER CABLES**

Standard

PVC and XLPE cables: To AS/NZS 5000.1.

#### Cable

General: Select multi-stranded copper cable generally, except for mineral insulated metal sheathed (MIMS).

Minimum size:  $2.5 \text{ mm}^2$ .

Voltage drop: Select final subcircuit cables within the voltage drop parameters dictated by the route length and load.

Fault loop impedance: Select final subcircuit cables selected to satisfy the requirements for automatic disconnection under short circuit and earth fault/touch voltage conditions. Distribution cables: To AS/NZS 4961.

#### **Conductor colours**

General: For fixed wiring, provide coloured conductor insulation. If this is not practicable, slide at least 150 mm of close fitting coloured sleeving on to each conductor at the termination points.

Active conductors in single phase circuits: Red.

Active conductors in polyphase circuits:

- A phase: Red.
- B phase: White.
- C phase: Blue.

#### **DC Cabling Sizing**

DC cables must be sized to maximise system performance. The voltage drop of the photovoltaic system between the photovoltaic array and inverter must be lower than 3% of the total PV array D.C. voltage.

#### **AC Cabling Sizing**

The Contractor must allow the shortest possible A.C. cable runs with a secure cable installation and while providing cable access without obstructing any walkways, passages or windows, and must have the capacity to handle the PV system AC output.

The A.C. cable must be sized such that the voltage drop between the inverter station and the distribution board is less than 2% of the total PV inverter A.C. voltage.

## 5 ELECTRICAL INSTALLATION REQUIREMENTS

### 5.1 AUSTRALIAN STANDARDS

In addition to the standards listed elsewhere, grid protection devices must be installed in accordance with AS4777.

The photovoltaic system must also be installed in accordance with AS/NZS 5033:2005.

The installation must also comply with AS/NZS 3000.

#### 5.2 INVERTER STATION LOCATION

The inverter station shall be located such that:

- There is minimal exposure to excessive heat, dust and weather elements such as rain
- The inverter station is located indoors unless there are exceptional circumstances
- There is provision for adequate ventilation
- The inverter station is safeguarded from theft and vandalism and installed in a lockable location with restricted public access
- There is easy access for periodic maintenance and inspection from maintenance staff
- There are minimal DC cable losses by locating the inverter station as close as possible to the PV array and DC switchgear
- There are minimal AC cable losses by locating the inverter station as close as possible to the nearest electrical distribution board

### 5.3 DC CABLING INSTALLATION

The DC cabling from the array to the DC combiner box / DC switchboard will be laid out together into a single run across the roof, and within a Colorbond box system with clip down cover or UV protective conduit.

The DC cables shall not be positioned in locations of water drainage or in locations that are likely to prevent the egress of rainwater.

DC cables shall not dangle or hang from PV modules and shall be firmly tied against the rear of the PV module.

Provide a D.C. isolator directly adjacent to the PV array as per AS3000. If the D.C. isolator is exposed to the environment, provide an IP56 rated D.C. isolator.

Wherever possible the DC conduit and cable will enter the building through the end wall gable rather than through the roof. Waterproof and seal all penetrations such that they provide a 20 year barrier against the ingress of water or moisture. The Contractor shall provide a 20 year guarantee for waterproofing all roof and wall penetrations and is liable for any damage caused by water ingress through roof and wall penetrations for the first 20 years of operation

The Contractor must allow for the shortest possible DC cable run with facilitated cable installation and cable access without obstructing any walkways, passages or windows.

### 5.4 AC CABLING INSTALLATION

Connect the A.C. cable from the inverter station to the nearest existing electrical Distribution Board. Provide new circuit breaker protection to AS3000 within the existing electrical Distribution Board and ensure the nominated switchboard and new circuit breaker(s) are adequately rated to safely withstand the additional load of the nominated PV system. The new circuit breakers(s) shall be of similar make and model to the existing circuit breakers located within the electrical existing electrical Distribution Board.

Connect the photovoltaic solar power system to the non-essential side of the nominated electrical Distribution Board.

The Contractor must allow for the shortest possible AC cable run with facilitated cable installation and cable access without obstructing any walkways, passages or windows.

### 5.5 WIRING

Conceal cables and conduits wherever practicable.

## 5.6 CONDUITS

Type: Rigid. Conduit size:  $\geq 20$  mm.

## 5.7 COLOUR CODE

The following colour code must be used throughout the installation:

Busbars and cabling within switchboards, and all submains cores and polyphase subcircuits must be coloured red, white and blue in accordance with the Electricity Distributor's phase rotation and consistent throughout the site. Wrong phase rotation and consequences shall be rectified at the Contractor's expense.

Single-phase subcircuits for lighting and power must be coloured as follows:

| Active conductors  | Three Phase  | red, white, blue |
|--------------------|--------------|------------------|
|                    | Single Phase | red              |
| Neutral conductors | black        |                  |
| Switchwires        | white        |                  |
| Earth conductors   | green/yellow |                  |

## 5.8 MARKING AND LABELLING

General: Provide labels including control and circuit equipment ratings, functional units, notices for operational and maintenance personnel, incoming and outgoing circuit rating, sizes and origin of supply.

ADDITIONAL MARKINGS: Provide marking as follows in addition to that required by AS 3000. Labelling of switchboards must be in accordance with AS 4777.1. Signs shall be installed in

Labelling of switchboards must be in accordance with AS 4777.1. Signs shall be installed in prominent positions on the Main Switchboard and all immediate distribution boards. The warning label wording must be identical to the SIGN EXAMPLES given in APPENDIX A of AS 4777.1.

Lettering heights: Include the following requirements:

- Isolating switches:  $\geq 5 \text{ mm}$
- Switchboards, main assembly designation:  $\geq 25 \text{ mm}$
- Switchboards, outgoing functional units:  $\geq 8 \text{ mm}$
- Switchboards, sub assembly designations:  $\geq 15 \text{ mm}$
- Warning notices:  $\geq 4$ mm

### 5.9 SINGLE-LINE DIAGRAMS

Provide a single-line diagram of the photovoltaic solar power generator on the inside door of the DC combiner box.

Format: Non-fading print, at least A3 size, showing the situation as installed.

## 5.10 ELECTRICITY DISTRIBUTOR NOTIFICATION

Notify the local Electricity Distributor and comply with the Electricity Distributor's service and installation rules which includes, but is not limited to:

- Lodging a Application for Connection form and Supplementary Application for Connection form;
- Providing Notice of Electrical Work;
- Undertaking a mandatory site inspection by the Electricity Distributor.

Make all necessary applications and pay any fees in relation to connecting the photovoltaic solar power system to the local Electricity Distributor's network.

## **6** SITE REQUIREMENTS

### 6.1 WORK METHOD STATEMENT AND SAFETY PROCEDURE

The Contractor must ensure the provision and maintenance of WorkCover approved stable and securely fenced work platform, secure perimeter screens, fencing, handrails or other forms of physical barriers that are capable of preventing the fall of a person, or tools and equipment.

All anchorage points must be inspected by a competent person before their first use and then on a regular basis so they are capable of supporting the design loads.

### 6.2 OTHER REQUIREMENTS

The Contractor is responsible for keeping the works area and adjacent surroundings clean and tidy at all times. At the completion of each days work, the work areas must be left clean and secure to the satisfaction of the School Principal.

Any damage to school infrastructure, including roof material or other equipment is to be repaired to the satisfaction of the School Principal.

## 7 METERING REQUIREMENTS

The service provider will arrange all metering requirements for the connection and export of electricity for all photovoltaic solar power systems  $\geq 5$  kilowatts peak nominal capacity to the grid for billing purposes. This includes the provision of appropriate meters, which meet the requirements of the local distribution network service provider, and the physical connection of the Photovoltaic system to the electricity grid.

The metering equipment and metering installation must comply with the following:

- NSW Service and Installation Rules;
- Electricity Distributor's service and installation rules
- AS/NZS 3000 Wiring Rules;
- The National Electricity Rules.

## 8 **TESTING AND COMMISSIONING**

### 8.1 TESTS

Commissioning tests as listed below must be performed in accordance with AS/NZS 5033:2005 Appendix I.

In addition to the commissioning tests outlined below all photovoltaic equipment must be tested that they are operating correctly including the photovoltaic modules, modules strings, inverter(s), meter, data-logger and electrical protection devices.

- Open Circuit Voltage Measurements
- Short Circuit Current Measurements
- Earth Fault Protection Test (if relevant)

Before completion, provide one copy of each Ready for Test certificate, now called Certificate of Compliance Electrical Work, as submitted to the Electricity Distributor and as required by the Electricity Distributor and the Department of Fair Trading.

# 9 COMPLETION

## 9.1 ON-SITE TRAINING

On completion of the installation, the Contractor will provide instructions to the School Principal and nominated staff on the main components of the system (including cabling, wiring and shutdown procedure) and instruct them in basic maintenance and trouble shooting (for a minimum of one hour).

### 9.2 WARRANTEES OR GUARANTEES

The Contractor shall obtain, and ensure the School Principal will have the benefit of all warranties or guarantees on all new equipment and materials installed by the Contractor.

Copies of any warranty documents must be forwarded to the School Principal and Department of Education and Training Regional Asset Management Unit.

## 9.3 OTHER REQUIREMENTS

Fully clear the Site and clean the works of this contract on completion. Cleaning must include the removal of all cement, paint droppings, plaster and other foreign matter from conduit and pipework, plant equipment and fittings. All damaged finishes must be made good.

## **10 MAINTENANCE**

The Customer will have the option of of obtaining maintenance and servicing from either the Contractor or may use the services of another provider. Using the services of another provider will not invalidate any warranties offered by the Contractor

Maintenance and servicing is to be provided as a costed option for the PV system for a 12 year period. A suggested Maintenance Schedule is detailed below. Tenderers are to provide details of their maintenance schedules and costs associated with maintenance at Part C.

In the event that a Customer selects the Contractor to provide maintenance the Contractor is required to record and log all maintenance inspections and provide the completed maintenance logbook at the conclusion of the 12 year maintenance period.

Call out: Respond to call outs for breakdowns or other faults requiring corrective maintenance. Attend on site within 1 calendar week of notification if required. Rectify faults and replace faulty materials and equipment as agreed with the School Principal.

Maintenance Schedule

| SYSTEM OR<br>COMPONENT     | MAINTENANCE ACTION   | FREQUENCY     | REMARKS   |
|----------------------------|--|---------------|---|

|                        | Check inverter station operation is correct   | Every 3 Years |         |
|                        | Verify operation of circuit breaker(s)  | Every 3 Years |         |
| Protective<br>devices  | Verify operation of earth fault current protection system                               | Every 3 Years |         |
|                        | Verify operation of solar array isolation device(s)                                     | Every 3 Years |         |
|                        | Verify tightness and integrity of bolts and other fastening devices                     | Every 3 Years |         |
| Mounting               | Check array mounting security   | Every 3 Years |         |
| structures             | Check damage to mechanical cable protection   | Every 3 years |         |
|                        | Inspect for corrosion   | Every 6 years |         |

## 11 OTHER REQUIREMENTS

## 11.1 PLANNING APPROVAL

The Contractor must make all arrangements and must pay all necessary fees to obtain planning approval to install photovoltaic solar power systems at every site.

Under no circumstances should construction and installation proceed without the proper planning approval.

The following advice is offered:

### **State Environmental Planning Policy (Infrastructure) 2007**

Photovoltaic systems come generally under Clause 39 of the State Environmental Planning Policy (Infrastructure) 2007 as 'Exempt development' if they are undertaken by or on behalf of Public Authorities and:

- Comply with Clause 20 of the SEPP (Infrastructure) 2007 i.e.
  - o Must not cause the building to contravene the Building Code of Australia
  - Must involve no more than minimal impact on the environment or amenity of the surrounding area

- If the building / school is a State or local heritage item or within a heritage conservation area, the PV system must involve no more than minimal impacts on the heritage significance of the item or area
- The system is integrated into the building or is flush or parallel with the surface of its roof
- The development does not:
  - Reduce the structural integrity of, or involve structural alterations to the building
  - Necessitate the removal of trees from near the building to ensure that solar energy is available for the system
- On average, over any 5 year period, at least 75% of the electricity generated by the system in a 12 month period is used in or for the building
- The system is not located on a building that is a State or local heritage item or is in a heritage conservation area.

If the requirements for Clause 39 'Exempt development' are not met, the photovoltaic system may fall under Clause 37 'Complying development' if:

- It does not necessitate the removal of trees from near the building to ensure solar energy is available
- It does not create excessive glare or reflection onto any adjacent building
- It does not block views or otherwise adversely affect any adjacent property
- It is not located on a building that is a State or local heritage item or is in a heritage conservation area.

Complying development requires a Complying Development certificate to be obtained from an accredited authority (normally the local council) and submitted to the local consent authority.

All other types of photovoltaic systems that neither meet Clause 37 or 39 of the SEPP (Infrastructure) 2007 will require development consent from the local consent authority.

SEPP (Infrastructure) 2007 is available at: http://www.legislation.nsw.gov.au/

#### **11.2 INSPECTION AND PUBLICATION OF PV SYSTEM INFORMATION**

Parties chosen at the School Principal's discretion will be allowed to visually inspect all parts of the photovoltaic system after practical completion, at the School Principal's own risk. This does not include physical intervention with any part of the system, other then simple operation of the data logger or inverter, or for physical intervention during emergency situations.

In addition, pictures of any part of the photovoltaic installation, or documents regarding the photovoltaic system, and any other information obtained by the system's data-logger, are the property of the NSW Department of Education and Training.

The Contractor must obtain the approval of the NSW Department of Education and Training before the project can be used in any marketing or advertising material. If no approval is provided, then marketing or advertising is prohibited.

## **11.3 WORKING HOURS AND WORKING DAYS**

The Contractor is to contact the School Principal to arrange a suitable time to carry out the Work.

### 11.4 REMOVAL OF TREES

Under no circumstances should trees be removed to improve solar generation. Photovoltaic systems should be located in areas away from trees wherever possible.

#### END OF SECTION - TECHNICAL SPECIFICATION

Department of the Environment, Water, Heritage and the Arts

# National Solar Schools Program – solar power system installation report

## Part A – to be completed by school authorised person

| 1 | 1 Project ID<br>School name   |                      |
|---|---|----------------------|
| 2 | Installation details     Date the photovoltaic system installation was completed     / /          |                      |
|   | Name of electrician who carried out 240V AC wiring  |                      |
|   | Licence number of electrician who carried out 240V AC wiring                                      |                      |
| 3 | 3 Checklist – before signing and returning this form please ensure you have inclu following list: | ded all items on the |

Part B and C of this form have been completed and signed by **either** the system installer **or** the installing electrician and the system designer that supervised the installation.

A diagram from your installer of the electrical layout of the solar power system, including as a minimum:

- all new and all existing equipment items
- fuses and earths
- an indication of how the panels are wired

Photographs clearly showing:

- the position of the solar panel array including the building on which it is mounted
- mounting and external cabling
- the inverter and control system layout
- smart meter and display
- on the back of one of the photos a signed statement to certify that the system has been installed at the school address

A copy of a Certificate of Electrical Safety, Notice of Completion, or equivalent as required in your state

## 4 School's authorised person's certification

I hereby certify that:

- to best of my knowledge the information contained in this report is current, truthful and correct
- the photovoltaic system was installed, or the installation was supervised, by a person who
  has current accreditation with the Clean Energy Council

| Signed                   | Date |

Postcode

# Part B – Installer's certification (to be completed by the system installer)

I hereby certify that:

- I have installed the photovoltaic system at the following address:
- I am **EITHER** an installer accredited by the Clean Energy Council **OR** a licensed electrician who has been supervised by a designer accredited by the Clean Energy Council
- I have installed the photovoltaic system to meet all relevant standards, building codes and local council requirements and in such a way that no manufacturer's warranty on any piece of equipment is invalidated
- All information contained in this report is current, truthful, and correct
- I understand that the Department of the Environment, Water, Heritage and the Arts or their approved representative may, with reasonable notice, inspect this system at any time and that any faults found will be reported to the Clean Energy Council or any subsequent accreditation body
- The performance, maintenance and design of the photovoltaic system has been explained in full and I have provided a diagram of the system electrical layout to the school
- I have given the school a 12 month warranty on my workmanship
- I have arranged for the photovoltaic system to be connected to the grid

| Supplier name             |      |                  |
|---------------------------|------|------------------|
| AND                       |      |                  |
| Designer name             | Accr | editation number |
| Signed                    |      | Date / /         |
| AND                       |      |                  |
| Installer/supervisor name | Accr | editation number |
| Signed                    |      | Date / /         |
| AND                       |      |                  |
| Electrician name          |      | Licence number   |
| Signed                    |      | Date / /         |

## Part C – to be completed by the system installer

| The installed solar p    | ower system is:                 |
|--------------------------|---------------------------------|
| New                      | OR Extension to existing system |
| PV panels installed:     |                                 |
| Manufacturer             |                                 |
| Model number             |                                 |
| Capacity (watts per pa   | iel)                            |
| Quantity                 |                                 |
| Total capacity installed | (watts)                         |
| Existing PV panels (i    | applicable):                    |
| Capacity (watts)         |                                 |
| Inverter installed:      |                                 |
| Manufacturer             |                                 |
| Model number             |                                 |
| Capacity (watts)         |                                 |
| Existing inverter incl   | ided in system (if applicable): |
| Capacity (watts)         |                                 |

## INTRODUCTION

### PREFACE

# This Introduction does not form part of the contract

NATSPEC *Reference – Electrical Services* is for use with a specification written for a specific project (the project specification). NATSPEC Reference – *Electrical Services* IS NOT A STAND-ALONE DOCUMENT and is only useable in conjunction with a project specification.

Refer to the NATSPEC Schedules – Electrical for guidance on how to incorporate this document into a specification in a legally binding way. NATSPEC Schedules – Electrical are supplied to NATSPEC subscribers.

## COPYRIGHT

NATSPEC is a not-for-profit company owned by key industry stakeholders.

This document and all other NATSPEC material is copyright. To reference it in your specification you must be a current NATSPEC subscriber. If you use it in a specification without being a current NATSPEC subscriber you not only infringe NATSPEC's copyright but you diminish your industry.

Contractors and others may use it only as part of contract documents prepared by a current NATSPEC subscriber for an individual project.

# 0171 GENERAL REQUIREMENTS

## 1 GENERAL

## 1.1 PRECEDENCE

## Precedence

General: Requirements of subsequent worksections of the specification override conflicting requirements in this worksection.

## 1.2 CROSS REFERENCES

# **Common requirements**

Associated worksections: Conform to the following:

- Adhesives, seals and fasteners.
- Fire-stopping.
- Metals and prefinishes.
- Termite management.
- Timber finishes and treatment.
- Building IT components.

#### **Cross referencing**

Within the text:

- Worksection titles are indicated by Italicised text.
- Clause titles are indicated by Bold text.

#### 1.3 REFERENCED DOCUMENTS

#### **Contractual relationships**

General: Responsibilities and duties of the principal, contractor and contract administrator are not altered by requirements in the documents referenced in this specification.

#### **Current editions**

General: Use referenced documents which are the editions, with amendments, current 3 months before the closing date for tenders, except where other editions or amendments are required by statutory authorities.

# 1.4 INTERPRETATION

# Abbreviations

General: For the purposes of this contract the abbreviations given below apply.

- AS: Australian Standard.
- BCA: Building Code of Australia.
- CFC: Compressed fibre cement.
- CSIRO CMSE: ActivFire Register of Fire Protection Equipment.
- DPC: Damp proof course.
- MS: Mild steel.
- MSDS: Material safety data sheets.
- NATA: National Association of Testing Authorities.
- NZS: New Zealand Standard.
- PCA: Plumbing Code of Australia.
- SS: Stainless steel.
- VOC: Volatile organic compound.

#### Definitions

General: For the purposes of this contract the definitions given below apply.

- Attendance: 'Attendance', 'provide attendance' and similar expressions mean 'give assistance for examination and testing'.
- Contract administrator: 'Contract administrator' has the same meaning as 'architect' or 'superintendent' and is the person appointed by the 'owner' or 'principal' under the contract.
- Default: Specified value, product or installation method which is to be provided unless otherwise documented.
- Design life: The period of time for which it is assumed, in the design, that an asset will be able to perform its intended purpose with only anticipated maintenance but no major repair or replacement being necessary.
- Documented: 'Documented', 'as documented' and similar terms mean contained in the contract documents.
- Economic life: The period of time from the acquisition of an asset to when the asset, while still physically capable of fulfilling its function and with only anticipated maintenance, ceases to be the lowest cost alternative for satisfying that function.
- Geotechnical site investigation: The process of evaluating the geotechnical characteristics of the site in the context of existing or proposed construction.
- Give notice: 'Give notice', 'submit', 'advise', 'inform' and similar expressions mean 'give notice (submit, advise, inform) in writing to the contract administrator'.
- Hold point: The activity cannot proceed without the approval of the contract administrator.
- IP: 'IP', 'IP code', 'IP rating' and similar expression have the same meaning as 'IP Code' in AS 60529.
- Maintenance period: Synonymous with 'Defects liability period'.
- Obtain: 'Obtain', 'seek' and similar expressions mean 'obtain (seek) in writing from the contract administrator'.
- Metallic-coated: Steel coated with zinc or aluminium-zinc alloy as follows:
- . Metallic-coated steel sheet: To AS 1397. Metal thicknesses specified are base metal thicknesses.
- . Ferrous open sections zinc coated by an in-line process: To AS/NZS 4791.
- . Ferrous hollow sections zinc coated by a continuous or specialised process: To AS/NZS 4792.
- Pipe: Includes pipe and tube.
- Principal: 'Principal' has the same meaning as 'owner', 'client' and 'proprietor' and is the party to whom the Contractor is legally bound to construct the works.
- Professional engineer: A person who is listed on the National Professional Engineers Register

(NPER) in the relevant discipline at the relevant time.

- Proprietary: 'Proprietary' means identifiable by naming manufacturer, supplier, installer, trade name, brand name, catalogue or reference number.
- Provide: 'Provide' and similar expressions mean 'supply and install' and include development of the design beyond that documented.
- Registered testing authority:
- An organisation registered by the National Association of Testing Authorities (NATA) to test in the relevant field; or
- . An organisation outside Australia registered by an authority recognised by NATA through a mutual recognition agreement; or
- . An organisation recognised as being a Registered Testing Authority under legislation at the time the test was undertaken.
- Required: Means required by the documents, the local council or statutory authorities.
- If required: A conditional specification term for work which may be shown in the documents or be a legislative requirement.
- Samples: Includes samples, prototypes and sample panels.
- Supply: 'Supply', 'furnish' and similar expressions mean 'supply only'.
- Tests:
  - . Pre-completion tests: Tests carried out before completion tests.
    - \* Type tests: Tests carried out on an item identical with a production item, before delivery to the site.
    - \* Production tests: Tests carried out on a purchased item, before delivery to the site.
    - \* Site tests: Tests carried out on site.
  - . Completion tests: Tests carried out on completed installations or systems before the date for practical completion, to demonstrate that the installation or system, including components, controls and equipment, operates correctly, safely and efficiently, and meets performance and other requirements. The superintendent may direct that completion tests be carried out after the date for practical completion.
- Tolerance: The permitted difference between the upper limit and the lower limit of dimension, value or quantity.
- Verification: Provision of evidence or proof that a performance requirement has been met or a default exists.
- Witness points: Provides an opportunity to attend an activity but does not involve an obligation. The activity can proceed without approval from the contract administrator.

# 1.5 CONTRACT DOCUMENTS

## Services diagrammatic layouts

General: Layouts of service lines, plant and equipment shown on the drawings are diagrammatic only, except where figured dimensions are provided or calculable.

Before commencing work:

- Obtain measurements and other necessary information.
- Coordinate the design and installation in conjunction with all trades.

## Levels

General: Spot levels take precedence over contour lines and ground profile lines.

# 1.6 PERFORMANCE

## General

General: If required, provide structures, installations and components as follows:

- Fixed access ways: To AS 1657.
- Structural design actions: To AS/NZS 1170.0 and the **Structural design actions schedule**.

# 1.7 NOTICE

## Inspection

Concealment: If notice of inspection is required in respect of parts of the works that are to be concealed, advise when the inspection can be made before concealment.

Minimum notice for inspections to be made: Conform to the **Notices schedule.** 

Light level requirements: to AS 1680.2.4.

## Submissions

Proposed products schedules: If major products are not specified as proprietary items, submit a schedule of those proposed for use within 3 weeks of site possession.

## Tests

General: Give notice of the time and place of nominated tests.

Minimum notice for witnessing of tests to be made: Conform to the **Notices schedule**.

## Attendance

General: Provide attendance for inspection and tests.

# 1.8 SUBMISSIONS

# General

Default timing: Make submissions at least 5 working days before ordering products for, or starting installation of, the respective portion of the works.

## Authorities

Authorities' approvals: Submit documents showing approval by the authorities whose requirements apply to the work.

Correspondence: Submit copies of correspondence and notes of meetings with authorities whose requirements apply to the work.

Hard copy submissions Quantity:

- Loose documents larger than A3: One transparency on heavyweight plastic film the same size as the standard contract drawings.
- Loose documents up to and including A3: One copy.

# Errors

General: If a submission contains errors, make a new or amended submission as appropriate, indicating changes made since the previous submission.

## Identification

General: Identify the project, contractor, subcontractor or supplier, manufacturer, applicable product, model number and options, as appropriate and include pertinent contract document references. Include service connection requirements and product certification. Identify proposals for noncompliance with project requirements, and characteristics which may be detrimental to successful performance of the completed work.

## Inspection and testing plan

General: Submit an inspection and testing plan which is consistent with the construction program. Include particulars of test stages and procedures.

Test reports: Submit written reports on nominated tests.

## Materials and components

Product certification: If products must conform to product certification schemes, submit evidence of conformance.

Product data: For proprietary equipment, submit the manufacturer's product data as follows:

- Technical specifications and drawings.
- Type-test reports.
- Performance and rating tables.
- Recommendations for installation and maintenance.
- Additional product data for services equipment:
- . Model name, designation and number.
- . Country of origin and manufacture.
- . Capacity of all system elements.
- . Size, including required clearances for installation.
- . Materials used in the construction.

## Substitution

Identified proprietary items: Identification of a proprietary item does not necessarily imply exclusive preference for the item so identified, but indicates the necessary properties of the item.

Performance: Equal to or greater than that specified.

Alternatives: If alternatives to the documented products, methods or systems are proposed, submit sufficient information to permit evaluation of the proposed alternatives, including the following:

- Evidence of conformity to a cited standard.
- Samples.
- Essential technical information, in English.
- Reasons for the proposed substitutions.

- Statement of the extent of revisions to the contract documents.
- Statement of the extent of revisions to the construction program.
- Statement of cost implications including costs outside the contract.
- Statement of consequent alterations to other parts of the works.

Evidence: If the documented products or systems are unavailable within the time constraints of the construction program.

Criteria: If the substitution is for any reason other than unavailability, that the substitution:

- Is of net enhanced value to the principal.
- Is consistent with the contract documents and is as effectual as the identified proprietary item.

# Samples

Submission: Submit nominated samples.

Incorporation of samples: If it is intended to incorporate samples into the works, submit proposals. Incorporate samples in the works which have been endorsed for incorporation. Do not incorporate other samples.

Retention of samples: Keep endorsed samples in good condition on site, until practical completion.

## Shop drawings

General: If required, submit dimensioned drawings showing details of the fabrication and installation of services and equipment, including relationship to building structure and other services, cable type and size, and marking details.

Diagrammatic layouts: Coordinate work shown diagrammatically in the contract documents, and submit dimensioned set-out drawings.

Checking: Ensure that the drawings have been checked before submission.

# 1.9 DESIGN

# General

Design by contractor: If the contractor provides design, use only appropriately qualified persons and comply with all statutory requirements.

Conflict with the documents: If it is believed that a conflict exists between statutory requirements and the documents, notify the contract administrator immediately and provide a recommendation to resolve the conflict.

# 2 PRODUCTS

# 2.1 GENERAL

## Manufacturers' or suppliers' recommendations

Provide, including select, if no selection is given, transport, deliver, store, handle, protect, finish, adjust and prepare for use, manufactured items in accordance with the current written recommendations and instructions of the manufacturer or supplier.

Proprietary items/systems/assemblies: Assemble, install or fix to substrate in accordance with the

current written recommendations and instructions of the manufacturer or supplier.

Project modifications: Advise of activities that supplement, or are contrary to, manufacturer's or suppliers' written recommendations and instructions.

## **Sealed containers**

General: If materials or products are supplied by the manufacturer in closed or sealed containers or packages, bring the materials or products to point of use in the original containers or packages.

# 2.2 TESTS

## Attendance

General: Provide attendance on tests.

# **Testing authorities**

General: Except for site tests, have tests carried out by a Registered testing authority and submit test reports.

- Reports: Submit copies of test reports, including certificates for type tests, showing the observations and results of tests and conformance or non-conformance with requirements.
- Site tests: Use instruments calibrated by authorities accredited by a Registered testing authority.

# 2.3 MATERIALS AND COMPONENTS

## Consistency

General: For each material or product use the same manufacturer or source and provide consistent type, size, quality and appearance.

## **Corrosion resistance**

General: Conform to the following corrosivity category with regard to worksection corrosion resistance tables.

## Situation

The following classification of situation applies to tables in the worksection corrosion resistance tables.

- Internal:
- . Building fabric protected from salt and moisture by vapour barriers, sarking, sheathing and building wraps.
- External:
  - . Includes external leaf and air spaces behind external leaf brickwork or blockwork walls.

# Galvanizing

Severe conditions: Galvanize mild steel components (including fasteners) to AS 1214 or AS/NZS 4680 as appropriate, if:

- Exposed to weather.
- Embedded in masonry.
- Exposed to or in air spaces behind external leaf of masonry walls.
- In contact with chemically treated timber, other than CCA.

## 3 EXECUTION

# 3.1 WALL CHASING

## Holes and chases

General: If holes and chases are required in masonry walls, provide proposals to demonstrate that the structural integrity of the wall is maintained. Do not chase walls nominated as fire rated or acoustic. Parallel chases or recesses on opposite faces of a wall shall not be closer than 600 mm to each other.

Chasing of blockwork: Only in core-filled hollow blocks or in solid blocks which are not designated as structural and shall be to the **Concrete blockwork chasing table**.

## Concrete blockwork chasing table

| Block thickness ( mm) | Depth of chase (maximum mm) |
|-----------------------|-----------------------------|
| 190                   | 35                          |
| 140                   | 25                          |
| 90                    | 20                          |

## 3.2 FIXING

## General

Suitability: If equipment and services are not suitable for fixing to non-structural building elements, fix directly to structure and trim around penetrations in non-structural elements.

#### Fasteners

Use proprietary fasteners capable of transmitting the loads imposed, and sufficient to ensure the rigidity of the assembly.

# 3.3 COMPLETION

## Samples

General: Remove unincorporated samples on completion.

## Warranties

General: If a warranty is documented or if a manufacturer's standard warranty extends beyond the end of the defects liability period, name the principal as warrantee . Register with manufacturers as necessary. Retain copies delivered with components and equipment.

Commencement: Commence warranty periods at practical completion or at acceptance of installation, if acceptance is not concurrent with practical completion.

Approval of installer: If installation is not by manufacturer, and product warranty is conditional on the manufacturer's approval of the installer, submit the manufacturer's written approval of the installing firm.

# 3.4 RECORD DRAWINGS

# General

General: Submit record drawings. Show the 'as installed' locations of building elements, plant and equipment. Include 'as installed' amendments to shop drawings. Show off-the-grid dimensions where applicable.

Date for submission: Within 2 weeks after practical completion.

# Accuracy

Documents: Incorporate all modifications made during the progress of the work and testing period. Show any provisions for the future.

Endorsement: Sign and date all record drawings. Keep one set of shop drawings on site at all times expressly for the purpose of marking changes made during the progress of the works.

# **Drawing layout**

General: Use the same borders and title block as the contract drawings.

## **Quantity and format**

General: Refer to Submissions.

# 3.5 OPERATION AND MAINTENANCE MANUALS

## General

General: Submit operation and maintenance manuals for installations.

Authors and compilers: Personnel experienced in the maintenance and operation of equipment and systems installed, and with editorial ability.

Referenced documents: If referenced documents or technical worksections require that manuals be submitted, include corresponding material in the operation and maintenance manuals.

Subdivision: By installation or system, depending on project size.

Date for draft submission: 2 weeks prior to commencement of training.

Date for final submission: Within 2 weeks after practical completion.

# Contents

General: Include the following:

- Certificates:
- . Certificates from authorities.
- . Copies of manufacturers' warranties.
- . Product certification.
- Directory: Names, addresses, and telephone and facsimile numbers of principal consultant, subconsultants, contractor, subcontractors and names of responsible parties.
- Drawings:
- . Record drawings, full size.
- Drawings and technical data: As necessary for the efficient operation and maintenance of the installation.
- Equipment descriptions:
- . Name, address and telephone and facsimile numbers of the manufacturer and supplier of items of equipment installed, together with catalogue list numbers.
- . Schedules (system by system) of equipment, stating locations, duties, performance figures and dates of manufacture. Provide a unique code number cross-referenced to the record and diagrammatic drawings and schedules, including

spare parts schedule, for each item of equipment installed.

- Maintenance procedures:
  - . Detailed recommendations for preventative maintenance frequency and procedures.
  - . Manufacturer's technical literature as appropriate. Register with manufacturer as necessary. Retain copies delivered with equipment.
  - . Safe trouble-shooting, disassembly, repair and reassembly, cleaning, alignment and adjustment, balancing and checking procedures. Provide logical step-by-step sequence of instructions for each procedure.
  - . Schedule of spares recommended to be held on site, being those items subject to wear or deterioration and which may involve the principal in extended deliveries when replacements are required. Include complete nomenclature and model numbers, and local sources of supply.
- Maintenance records:
  - . Documentation to AS 1851 clause 18.2.5.
- Operation procedures:
- . Manufacturers' technical literature as appropriate.
- Table of contents: For each volume. Title to match cover.

# Format – electronic copies

Printing: Provide material that can be legibly printed on A4 size paper.

Scope: Provide the same material as specified for hardcopy in electronic format.

# Quantity and format: Refer to **Electronic** submissions.

# Format – hard copy

General: A4 size loose leaf, in commercial quality, 4 ring binders with hard covers, each indexed, divided and titled. Include the following features:

- Cover: Identify each binder with typed or printed title 'OPERATION AND MAINTENANCE MANUAL', to spine. Identify title of project, volume number, volume subject matter, and date of issue.
- Dividers: Durable divider for each separate element, with typed description of system and major equipment components. Clearly print short titles under laminated plastic tabs.
- Drawings: Fold drawings to A4 size and accommodate them in the binders so that they may be unfolded without being detached from the rings. Provide with reinforced punched binder tabs.
- Pagination: Number pages.
- Ring size: 50 mm maximum, with compressor bars.
- Text: Manufacturers' printed data, including associated diagrams, or typewritten, single-sided on bond paper, in clear concise English.

Number of copies: 3.

## 3.6 CLEANING

#### **Final cleaning**

General: Before practical completion, clean throughout, including all exterior and interior surfaces except those totally and permanently concealed from view.

Labels: Remove all labels not required for maintenance.

#### 3.7 POST-CONSTRUCTION MANDATORY INSPECTIONS AND MAINTENANCE

#### General

General: For the duration of the defects liability period, provide inspections and maintenance of safety measures required by the following:

- The Building Code of Australia.
- AS 1851.
- Other statutory requirements applicable to the work.

Records: Provide mandatory records.

Certification: Certify that mandatory inspections and maintenance have been carried out and that the respective items comply with statutory requirements. Submit certification.

Annual inspection: Provide an annual inspection and maintenance immediately prior to the end of the defects liability period.

# 0172 GENERAL REQUIREMENTS (INTERIOR AND ALTERATIONS)

# 1 GENERAL

# 1.1 PRECEDENCE

#### Precedence

General: Requirements of subsequent worksections of the specification override conflicting requirements in this worksection.

## 1.2 CROSS REFERENCES

#### **Common requirements**

General: Conform to associated worksections as follows:

- Adhesives, sealants and fasteners.
- Fire-stopping.
- Metals and prefinishes.
- Building IT components.
- Cross referencing

Within the text:

- Worksection titles are indicated by Italicised text.
- Clause titles are indicated by Bold text.

#### Precedence

General: Requirements of subsequent worksections of the specification override conflicting requirements in this worksection.

## 1.3 REFERENCED DOCUMENTS

#### **Contractual relationships**

General: Responsibilities and duties of the principal, contractor and contract administrator are not altered by requirements in the documents referenced in this specification.

#### **Current editions**

General: Use referenced documents which are the editions, with amendments, current 3 months before the closing date for tenders, except where other editions or amendments are required by statutory authorities.

# 1.4 INTERPRETATION

## Abbreviations

General: For the purposes of this contract the abbreviations given below apply.

- AS: Australian Standard.
- BCA: Building Code of Australia.
- CFC: Compressed fibre cement.
- CSIRO CMSE: ActivFire Register or Fire Protection Equipment.
- DPC: Damp proof course.
- MS: Mild steel.
- MSDS: Materials Safety data sheets.
- NATA: National Association of Testing Authorities.
- NZS: New Zealand Standard.

- PCA: Plumbing Code of Australia.
- SS: Stainless steel.
- VOC: Volatile organic compound.

## Definitions

General: For the purposes of this contract the definitions given below apply.

- Attendance: 'Attendance', 'provide attendance' and similar expressions mean 'give assistance for examination and testing'.
- Contract administrator: 'Contract administrator' has the same meaning as 'architect' or 'superintendent' and is the person appointed by the 'owner' or 'principal' under the contract.
- Default: Specified value, product or installation method which is to be provided unless otherwise documented.
- Design life: The period of time for which it as assumed, in the design, that an asset will be able to perform its intended purpose with only anticipated maintenance but no major repair or replacement being necessary.
- Documented: 'Documented', 'as documented' and similar terms mean contained in the contract documents.
- Economic life: The period of time from the acquisition of an asset to when the asset, while still physically capable of fulfilling its function and with only anticipated maintenance, ceases to be the lowest cost alternative for satisfying that function.
- Geotechnical site investigation: The process of evaluating the geotechnical characteristics of the site in the context of existing or proposed construction.
- Give notice: 'Give notice', 'submit', 'advise', 'inform' and similar expressions mean 'give notice (submit, advise, inform) in writing to the contract administrator'.
- Hold point: The activity cannot proceed without the approval of the contract administrator.
- IP: 'IP', 'IP code', 'IP rating' and similar expression have the same meaning as 'IP Code' in AS 60529.
- Maintenance period: Synonymous with 'Defects liability period'.
- Metallic-coated: Steel coated with zinc or aluminium-zinc alloy as follows:
- . Metallic-coated steel sheet: To AS 1397. Metal thicknesses specified are base metal thicknesses.
- . Ferrous open sections zinc coated by an in-line process: To AS/NZS 4791.
- . Ferrous hollow sections zinc coated by a continuous or specialised process: To AS/NZS 4792.
- Obtain: 'Obtain', 'seek' and similar expressions mean 'obtain (seek) in writing from the contract administrator'.
- Principal: 'Principal' has the same meaning as 'owner', 'client' and 'proprietor' and is the party to whom the Contractor is legally bound to construct the works.

- Professional engineer: A person who is listed on the National Professional Engineers Register (NPER) in the relevant discipline at the relevant time.
- Proprietary: 'Proprietary' mean identifiable by naming manufacturer, supplier, installer, trade name, brand name, catalogue or reference number.
- Provide: 'Provide' and similar expressions mean 'supply and install' and include development of the design beyond that documented.
- Registered testing authority:
  - . An organisation registered by the National Association of Testing Authorities (NATA) to test in the relevant field; or
  - . An organisation outside Australia registered by an authority recognised by NATA through a mutual recognition agreement; or
  - . An organisation recognised as being a Registered Testing Authority under legislation at the time the test was undertaken.
- Required: Means required by the documents, the local council or statutory authorities.
- Samples: Includes samples, prototypes and sample panels.
- Supply: 'Supply', 'furnish' and similar expressions mean 'supply only'.
- Tests:
  - . Pre-completion tests: Tests carried out before completion tests.
    - \* Type tests: Tests carried out on an item identical with a production item, before delivery to the site.
    - \* Production tests: Tests carried out on a purchased item, before delivery to the site.
    - \* Site tests: Tests carried out on site.
  - . Completion tests: Tests carried out on completed installations or systems before the date for practical completion, to demonstrate that the installation or system, including components, controls and equipment, operates correctly, safely and efficiently, and meets performance and other requirements. The superintendent may direct that completion tests be carried out after the date for practical completion.
- Tolerance: The permitted difference between the upper limit and the lower limit of dimension, value or quantity.
- Verification: Provision of evidence or proof that a performance requirement has been met or a default exists.
- Witness points: Provides an opportunity to attend an activity but does not involve an obligation. The activity can proceed without approval from the contract administrator.

# 1.5 CONTRACT DOCUMENTS

## Services diagrammatic layouts

General: Layouts of service lines, plant and equipment shown on the drawings are diagrammatic only, except where figured dimensions are provided or calculable.

Before commencing work:

- Obtain measurements and other necessary information.
- Coordinate the design and installation in conjunction with all trades.

# 1.6 NOTICE

#### Inspection

Concealment: If notice of inspection is required in respect of parts of the works that are to be concealed, advise when the inspection can be made before concealment.

Minimum notice for inspections to be made: Conform to the **Notices schedule.** 

Light level requirements: to AS/NZS 1680.2.4.

#### Submissions

Proposed products schedules: If major products are not specified as proprietary items, submit a schedule of those proposed for use within 3 weeks of site possession.

## Tests

General: Give notice of the time and place of nominated tests.

Minimum notice for witnessing of tests to be made: Conform to the **Notices schedule**.

#### Attendance

General: Provide attendance for inspection and tests.

# 1.7 SUBMISSIONS

Default timing: Make submissions at least 5 working days before ordering products for, or starting installation of, the respective portion of the works.

## Authorities

Authorities' approvals: If required, submit documents showing approval by the authorities whose requirements apply to the work.

Correspondence: Submit copies of correspondence and notes of meetings with authorities whose requirements apply to the work.

# Hard copy submissions

Quantity:

- Loose documents larger than A3: One transparency on heavyweight plastic film the same size as the standard contract drawings.
- Loose documents up to and including A3: One copy.

#### Errors

General: If a submission contains errors, make a new or amended submission as appropriate, indicating changes made since the previous submission.

#### Identification

General: Identify the project, contractor, subcontractor or supplier, manufacturer, applicable product, model number and options, as appropriate and include pertinent contract document references. Include service connection requirements and product certification. Identify proposals for noncompliance with project requirements, and characteristics which may be detrimental to successful performance of the completed work.

## Inspection and testing plan

General: Submit an inspection and testing plan which is consistent with the construction program. Include particulars of test stages and procedures.

Test reports: Submit written reports on nominated tests.

## Materials and components

Product certification: If products must conform to product certification schemes, submit evidence of conformance.

Product data: For proprietary equipment, submit the manufacturer's product data as follows:

- Technical specifications and drawings.
- Type-test reports.
- Performance and rating tables.
- Recommendations for installation and maintenance.
- Additional product data for services equipment:
- . Model name, designation and number.
- . Country of origin and manufacture.
- . Capacity of all system elements.
- . Size, including required clearances for installation.
- . Materials used in the construction.

Proposed products schedules: If major products are not specified as proprietary items, submit a schedule of those proposed for use within 3 weeks of site possession.

#### Substitution

Identified proprietary items: Identification of a proprietary item does not necessarily imply exclusive preference for the item so identified, but indicates the necessary properties of the item.

Performance: Equal to or greater than that specified.

Alternatives: If alternatives to the documented products, methods or systems are proposed, submit sufficient information to permit evaluation of the proposed alternatives including the following:

- Evidence of conformity to a cited standard.
- Samples.
- Essential technical information, in English.
- Reasons for the proposed substitutions.
- Statement of the extent of revisions to the contract documents.
- Statement of the extent of revisions to the construction program.
- Statement of cost implications including costs outside the contract.
- Statement of consequent alterations to other parts of the works.

Evidence: If the documented products or systems are unavailable within the time constraints of the construction programme.

Criteria: If the substitution is for any reason other than unavailability, that the substitution:

- Is of net enhanced value to the principal.
- Is consistent with the contract documents and is as effectual as the identified proprietary item.

#### Samples

Submission: Submit nominated samples.

Incorporation of samples: If it is intended to incorporate samples into the works, submit proposals. Incorporate samples in the works which have been endorsed for incorporation. Do not incorporate other samples.

Retention of samples: Keep endorsed samples in good condition on site, until practical completion.

#### Shop drawings

General: If required, submit dimensioned drawings showing details of the fabrication and installation of services and equipment, including relationship to building structure and other services, cable type and size, and marking details.

Diagrammatic layouts: Coordinate work shown diagrammatically in the contract documents, and submit dimensioned set-out drawings.

Checking: Ensure that the drawings have been checked before submission.

## 1.8 DESIGN

#### General

Design by contractor: If the contractor provides design, use only appropriately qualified persons and comply with all statutory requirements.

Conflict with the documents: If it is believed that a conflict exists between statutory requirements and the documents, notify the contract administrator immediately and provide a recommendation to resolve the conflict.

# 2 PRODUCTS

# 2.1 GENERAL

#### Manufacturers' or suppliers' recommendations

Provide, including select, if no selection is given, transport, deliver, store, handle, protect, finish, adjust and prepare for use, manufactured items in accordance with the current written recommendations and instructions of the manufacturer or supplier.

Proprietary items/systems/assemblies: Assemble, install or fix to substrate in accordance with the current written recommendations and instructions of the manufacturer or supplier.

Project modifications: Advise of activities that supplement, or are contrary to, manufacturer's or suppliers' written recommendations and instructions.

#### Sealed containers

General: If materials or products are supplied by the manufacturer in closed or sealed containers or packages, bring the materials or products to point of use in the original containers or packages.

#### 2.2 TESTS

#### Attendance

General: Provide attendance on tests where nominated in worksections.

#### **Testing authorities**

General: Except for site tests, have tests carried out by a Registered testing authority and submit test reports.

- Reports: Submit copies of test reports, including certificates for type tests, showing the observations and results of tests and conformance or non-conformance with requirements.
- Site tests: Use instruments calibrated by authorities accredited by a Registered testing authority.

## 2.3 MATERIALS AND COMPONENTS

## Consistency

General: For of each material or product use the same manufacturer or source and provide consistent type, size, quality and appearance.

# **Corrosion resistance**

General: Conform to the following corrosivity category with regard to worksection corrosion resistance tables.

# Situation

The following classification of situation applies to tables in the worksection corrosion resistance tables.

- Internal:
  - building fabric protected from salt and moisture by vapour barriers, sarking, sheathing and building wraps.
- External:
  - . includes external leaf and air spaces behind external leaf brickwork or blockwork walls.

#### Galvanizing

Severe conditions: Galvanize mild steel components (including fasteners) to AS 1214 or AS/NZS 4680 as appropriate, if:

- Exposed to weather.
- Embedded in masonry.
- Exposed to or in air spaces behind external leaf of masonry walls.
- In contact with chemically treated timber, other than CCA.

## 2.4 BASE BUILDING SUBSTITUTIONS

#### Ownership

General: If any base building items are removed for replacement by the tenant they remain the property of the building owner. Arrange storage for future reinstallation.

# 3 EXECUTION

# 3.1 WALL CHASING

# Holes and chases

General: If holes and chases are required in masonry walls, provide proposals to demonstrate that the structural integrity of the wall is maintained. Do not chase walls nominated as fire rated or acoustic. Parallel chases or recesses on opposite faces of a wall shall not be closer than 600 mm to each other.

Chasing of blockwork: Only in core-filled hollow blocks or in solid blocks which are not designated as structural and shall be to the **Concrete blockwork chasing table**.

# Concrete blockwork chasing table

| Block thickness ( mm) | Depth of chase (maximum mm) |
|-----------------------|-----------------------------|
| 190                   | 35                          |
| 140                   | 25                          |
| 90                    | 20                          |

## 3.2 FIXING

## General

Suitability: If equipment and services are not suitable for fixing to non-structural building elements, fix directly to structure and trim around penetrations in non-structural elements.

#### Fasteners

Use proprietary fasteners capable or transmitting the loads imposed, and sufficient to ensure the rigidity of the assembly.

## 3.3 COMPLETION

## Samples

General: Remove unincorporated samples on completion.

## Warranties

General: If a warranty is documented or if a manufacturer's standard warranty extends beyond the end of the defects liability period, name the principal as warrantee. Register with manufacturers as necessary. Retain copies delivered with components and equipment.

Commencement: Commence warranty periods at practical completion or at acceptance of installation, if acceptance is not concurrent with practical completion.

Approval of installer: If installation is not by manufacturer, and product warranty is conditional on the manufacturer's approval of the installer, submit the manufacturer's written approval of the installing firm.

# 3.4 RECORD DRAWINGS

## General

General: Submit record drawings. Show the 'as installed' locations of building elements, plant and equipment. Include 'as installed' amendments to shop drawings. Show off-the-grid dimensions where applicable.

Extensions and/or changes to existing: If a drawing shows extensions and/or alterations to existing installations, include sufficient of the existing installation to make the drawing comprehensible without reference to drawings of the original installation.

Date for submission: Within 2 weeks after practical completion.

# Accuracy

Documents: Incorporate all modifications made during the progress of the work and testing period. Show any provisions for the future.

Endorsement: Sign and date all record drawings. Keep one set of shop drawings on site at all times expressly for the purpose of marking changes made during the progress of the works.

## **Drawing layout**

General: Use the same borders and title block as the contract drawings.

#### Quantity and format

General: Refer to SUBMISSIONS.

# 3.5 OPERATION AND MAINTENANCE MANUALS

# General

General: Submit operation and maintenance manuals for installations.

Authors and compilers: Personnel experienced in the maintenance and operation of equipment and systems installed, and with editorial ability.

Referenced documents: If referenced documents or technical worksections require that manuals be submitted, include corresponding material in the operation and maintenance manuals.

Subdivision: By installation or system, depending on project size.

Date for draft submission: 2 weeks prior to commencement of training.

Date for submission: Within 2 weeks after practical completion.

## Contents

General: Include the following:

- Certificates:
  - . Certificates from authorities.
  - . Copies of manufacturers' warranties.
  - . Product certification.
- Directory: Names, addresses, and telephone and facsimile numbers of principal consultant, subconsultants, contractor, subcontractors and names of responsible parties.
- Drawings:
  - Record drawings, full size.
- Drawings and technical data: As necessary for the efficient operation and maintenance of the installation.
- Equipment descriptions:
  - . Name, address and telephone and facsimile numbers of the manufacturer and supplier of items of equipment installed, together with catalogue list numbers.

- . Schedules (system by system) of equipment, stating locations, duties, performance figures and dates of manufacture. Provide a unique code number cross-referenced to the record and diagrammatic drawings and schedules, including spare parts schedule, for each item of equipment installed.
- Maintenance procedures:
- . Detailed recommendations for preventative maintenance frequency and procedures.
- . Manufacturer's technical literature as appropriate. Register with manufacturer as necessary. Retain copies delivered with equipment.
- . Safe trouble-shooting, disassembly, repair and reassembly, cleaning, alignment and adjustment, balancing and checking procedures. Provide logical step-by-step sequence of instructions for each procedure.
- . Schedule of spares recommended to be held on site, being those items subject to wear or deterioration and which may involve the principal in extended deliveries when replacements are required. Include complete nomenclature and model numbers, and local sources of supply.
- Maintenance records:
- . Documentation to AS 1851 clause 18.2.5.
- Operation procedures:
- . Manufacturers' technical literature as appropriate.
- Table of contents: For each volume. Title to match cover.

## Format – electronic copies

Printing: Except for drawings required in the **Record drawings** clause provide material that can be legibly printed on A4 size paper.

Scope: Provide the same material as specified for hardcopy in electronic format.

# Quantity and format: Refer to **Electronic** submissions.

## Format – hard copy

General: A4 size loose leaf, in commercial quality, 4 ring binders with hard covers, each indexed, divided and titled. Include the following features:

- Cover: Identify each binder with typed or printed title 'OPERATION AND MAINTENANCE MANUAL', to spine. Identify title of project, volume number, volume subject matter, and date of issue.
- Dividers: Durable divider for each separate element, with typed description of system and major equipment components. Clearly print short titles under laminated plastic tabs.
- Drawings: Fold drawings to A4 size and accommodate them in the binders so that they may be unfolded without being detached from the rings. Provide with reinforced punched binder tabs.
- Pagination: Number pages.
- Ring size: 50 mm maximum, with compressor bars.

- Text: Manufacturers' printed data, including associated diagrams, or typewritten, single-sided on bond paper, in clear concise English.

Number of copies: 3.

## 3.6 POST-CONSTRUCTION MANDATORY INSPECTIONS AND MAINTENANCE

# General

General: For the duration of the defects liability period, provide inspections and maintenance of safety measures required by the following:

- The Building Code of Australia.
- AS 1851.
- Other statutory requirements applicable to the work.

Records: Provide mandatory records.

Certification: Certify that mandatory inspections and maintenance have been carried out and that the respective items comply with statutory requirements. Submit certification.

Annual inspection: Provide an annual inspection and maintenance immediately prior to the end of the defects liability period.

# 0175 GENERAL REQUIREMENTS (ELECTRICAL)

## 1 GENERAL

# 1.1 AIMS

## Responsibilities

General: Provide electrical systems. Selections: As scheduled

## 1.2 PRECEDENCE

## Precedence

General: Requirements of subsequent worksections of the specification override conflicting requirements in this worksection.

## 1.3 CROSS REFERENCES

## Associated worksections

Associated worksections: Conform to the following:

- Adhesives, sealants and fasteners.
- Fire-stopping.
- Metals and prefinishes.
- Termite management.
- Timber finishes and treatment.
- Building IT components.
- Demolition.
- Service trenching.

## **Cross referencing**

## Within the text:

- Worksection titles are indicated by Italicised text.
- Clause titles are indicated by Bold text.

## 1.4 STANDARDS

## General

General: To AS/NZS 3000 Part 2 unless otherwise documented.

Electrical systems: To AS/NZS 3008.1.1 and SAA HB 301.

Degrees of protection (IP code): To AS/NZS 60529. EMC: To AS/NZS 61000.

Telecommunications systems: To AS/ACIF S008, AS/ACIF S009, AS/NZS 3080, SAA HB 243 and SAA HB 29.

# 1.5 REFERENCED DOCUMENTS

## **Contractual relationships**

General: Responsibilities and duties of the principal, contractor and contract administrator are not altered by requirements in the documents referenced in this specification.

## **Current editions**

General: Use referenced documents which are the editions, with amendments, current 3 months before the closing date for tenders, except where other editions or amendments are required by statutory authorities.

## 1.6 INTERPRETATION

## Abbreviations

General: For the purposes of this contract the abbreviations given below apply.

- AS: Australian Standard.
- BCA: Building Code of Australia.
- CFC: Compressed fibre cement.
- CSIRO CMSE: ActivFire Register or Fire Protection Equipment.
- DPC: Damp proof course.
- EMC: Electromagnetic compatibility.
- EMI: Electromagnetic interference.
- MS: Mild steel.
- MSDS: Material safety data sheets
- NATA: National Association of Testing Authorities.
- NZS: New Zealand Standard.
- PCA: Plumbing Code of Australia.
- SS: Stainless steel.

## Definitions

- .

General: For the purposes of this contract the definitions given below apply.

- Accessible: Readily accessible to AS/NZS 3000.
- Attendance: 'Attendance', 'provide attendance' and similar expressions mean 'give assistance for examination and testing'.
- Contract administrator: 'Contract administrator' has the same meaning as 'architect' or 'superintendent' and is the person appointed by the 'owner' or 'principal' under the contract.
- Default: Specified value, product or installation method which is to be provided unless otherwise documented.
- Design life: The period of time for which it is assumed, in the design, that an asset will be able to perform its intended purpose with only anticipated maintenance but no major repair or replacement being necessary.
- Documented: 'Documented', 'as documented' and similar terms mean contained in the contract documents.
- Economic life: The period of time from the acquisition of an asset to when the asset, while still physically capable of fulfilling its function and with only anticipated maintenance, ceases to be the lowest cost alternative for satisfying that function.
- Geotechnical site investigation: The process of evaluating the geotechnical characteristics of the site in the context of existing or proposed construction.
- Give notice: 'Give notice', 'submit', 'advise', 'inform' and similar expressions mean 'give notice (submit, advise, inform) in writing to the contract administrator'.
- High level interface: Systems transfer information in a digital format using an open system interface.
- Hold point: The activity cannot proceed without the approval of the contract administrator.

- Hot-dip galvanized: Zinc coated to AS/NZS 4680 after fabrication with coating thickness and mass to AS/NZS 4680 Table 1.
- If required: A conditional specification term for work which may be shown in the documents or be a legislative requirement.
- Industrial: IP56 to AS/NZS 60529.
- IP: 'IP', 'IP code', 'IP rating' and similar expression have the same meaning as 'IP Code' in AS 60529.
- Low level interface: Systems transfer information via terminals and voltage free contacts.
- Maintenance period: Synonymous with 'Defects liability period'.
- Obtain: 'Obtain', 'seek' and similar expressions mean 'obtain (seek) in writing from the contract administrator'.
- Professional engineer: A person who is listed on the National Professional Engineers Register (NPER) in the relevant discipline at the relevant time.
- Metallic-coated: Steel coated with zinc or aluminium-zinc alloy as follows:
- . Metallic-coated steel sheet: To AS 1397. Metal thicknesses specified are base metal thicknesses.
- . Ferrous open sections zinc coated by an in-line process: To AS/NZS 4791.
- . Ferrous hollow sections zinc coated by a continuous or specialised process: To AS/NZS 4792.
- Pipe: Includes pipe and tube.
- Principal: 'Principal' has the same meaning as 'owner', 'client' and 'proprietor' and is the party to whom the Contractor is legally bound to construct the works.
- Proprietary: 'Proprietary' mean identifiable by naming manufacturer, supplier, installer, trade name, brand name, catalogue or reference number.
- Provide: 'Provide' and similar expressions mean 'supply and install' and include development of the design beyond that documented.
- Readily accessible: As defined in AS/NZS 3000.
- Registered testing authority:
- . An organisation registered by the National Association of Testing Authorities (NATA) to test in the relevant field; or
- . An organisation outside Australia registered by an authority recognised by NATA through a mutual recognition agreement; or
- . An organisation recognised as being a Registered Testing Authority under legislation at the time the test was undertaken.
- Required: Means required by the documents, the local council or statutory authorities.
- Samples: Includes samples, prototypes and sample panels.
- Supply: 'Supply', 'furnish' and similar expressions mean 'supply only'.
- Tests:

- . Pre-completion tests: Tests carried out before completion tests.
  - \* Type tests: Tests carried out on an item identical with a production item, before delivery to the site.
  - \* Production tests: Tests carried out on a purchased item, before delivery to the site.
  - \* Site tests: Tests carried out on site.
- . Completion tests: Tests carried out on completed installations or systems before the date for practical completion, to demonstrate that the installation or system, including components, controls and equipment, operates correctly, safely and efficiently, and meets performance and other requirements. The superintendent may direct that completion tests be carried out after the date for practical completion.
- Tolerance: The permitted difference between the upper limit and the lower limit of dimension, value or quantity.
- Verification: Provision of evidence or proof that a performance requirement has been met or a default exists.
- Weatherproof: IPX6 to AS/NZS 60529.
- Witness points: Provides an opportunity to attend an activity but does not involve an obligation. The activity can proceed without approval from the contract administrator.

# 1.7 CONTRACT DOCUMENTS

# Services diagrammatic layouts

General: Layouts of service lines, plant and equipment shown on the drawings are diagrammatic only, except where figured dimensions are provided or calculable.

Before commencing work:

- Obtain measurements and other necessary information.
- Coordinate the design and installation in conjunction with all trades.

# Levels

General: Spot levels take precedence over contour lines and ground profile lines.

## 1.8 DRAWINGS AND MANUALS FOR EXISTING SERVICES

## General

General: No warranty is given as to the completeness or accuracy of drawings and/or manuals of existing services.

# 1.9 PERFORMANCE

# General

General: If required, provide structures, installations and components as follows:

- Fixed access ways: To AS 1657.
- Structural design actions: To AS/NZS 1170.0 and the **Structural design actions schedule**.
- Light level requirements: to AS 1680.2.4.

# 1.10 NOTICE

## Inspection

Concealment: If notice of inspection is required in respect of parts of the works that are to be concealed, advise when the inspection can be made before concealment.

Minimum notice for inspections to be made: Conform to the **Notices schedule**.

## Submissions

Proposed products schedules: If major products are not specified as proprietary items, submit a schedule of those proposed for use within 3 weeks of site possession.

## Tests

General: Give notice of the time and place of nominated tests.

Minimum notice for witnessing of tests to be made: Conform to the **Notices schedule**.

## 1.11 INSPECTION

## Attendance

General: Provide attendance for inspection and tests.

## 1.12 SUBMISSIONS

#### General

Default timing: Make submissions  $\geq$  5 business days prior to the ordering of products for, or starting the installation of, the respective portions of the works.

# Authorities

Authorities' approvals: Submit documents showing approval by the authorities whose requirements apply to the work.

Correspondence: Submit copies of correspondence and notes of meetings with authorities whose requirements apply to the work.

Hard copy submissions

Quantity:

- Loose documents larger than A3: One transparency on heavyweight plastic film the same size as the standard contract drawings.
- Loose documents up to and including A3: One copy.

## Errors

General: If a submission contains errors, make a new or amended submission as appropriate, indicating changes made since the previous submission.

## Identification

General: Identify the project, contractor, subcontractor or supplier, manufacturer, applicable product, model number and options, as appropriate and include pertinent contract document references. Include service connection requirements and product certification. Identify proposals for noncompliance with project requirements, and characteristics which may be detrimental to successful performance of the completed work.

# Inspection and testing plan

General: Submit an inspection and testing plan which is consistent with the construction program. Include particulars of test stages and procedures. Test reports: Submit written reports on nominated tests.

# Materials and components

Product certification: If products must conform to product certification schemes, submit evidence of conformance.

Product data: For proprietary equipment, submit the manufacturer's product data as follows:

- Technical specifications and drawings.
- Type-test reports.
- Performance and rating tables.
- Recommendations for installation and maintenance.
- Additional product data for services equipment:
  - . Model name, designation and number.
  - . Country of origin and manufacture.
  - . Capacity of all system elements.
  - . Size, including required clearances for installation.
  - Materials used in the construction.

## Substitution

Identified proprietary items: Identification of a proprietary item does not necessarily imply exclusive preference for the item so identified, but indicates the necessary properties of the item.

Performance: Equal to or greater than that specified.

Alternatives: If alternatives to the documented products, methods or systems are proposed, submit sufficient information to permit evaluation of the proposed alternatives including the following:

- Evidence of conformity to a cited standard.
- Samples.
- Essential technical information, in English.
- Reasons for the proposed substitutions.
- Statement of the extent of revisions to the contract documents.
- Statement of the extent of revisions to the construction program.
- Statement of cost implications including costs outside the contract.
- Statement of consequent alterations to other parts of the works.

Evidence: If the documented products or systems are unavailable within the time constraints of the construction program.

Criteria: If the substitution is for any reason other than unavailability, that the substitution:

- Is of net enhanced value to the principal.
- Is consistent with the contract documents and is as effectual as the identified proprietary item.

## Samples

Submission: Submit nominated samples.

Incorporation of samples: If it is intended to incorporate samples into the works, submit proposals. Incorporate samples in the works which have been endorsed for incorporation. Do not incorporate other samples. Retention of samples: Keep endorsed samples in good condition on site, until practical completion.

# Shop drawings

General: If required, submit dimensioned drawings showing details of the fabrication and installation of services and equipment, including relationship to building structure and other services, cable type and size, and marking details.

Diagrammatic layouts: Coordinate work shown diagrammatically in the contract documents, and submit dimensioned set-out drawings.

## Drawings

General: Minimum A1 drawing size.

Standard: To AS 1100 Parts 101 and 301, AS 1102 Parts 101, 102, 103, 106, 107, 108, and 111, and AS/NZS 3085.1 as applicable.

Building work drawings: Submit detailed dimensioned drawings showing all:

- Access doors and panels.
- Conduits to be cast in slabs.
- Holding down bolts and other anchorage and/or fixings required complete with loads to be imposed on the structure during installation and operation.
- Openings, penetrations and block-outs.
- Pipe sleeves.
- Plinths, kerbs and bases.
- Required external openings.

Services coordination: Ensure coordination with other building and service elements. Show adjusted positions on the shop and record drawings.

Space requirements: Check space requirements of equipment and services indicated diagrammatically in the contract documents and submit a report on consequent variations to the design.

## **Execution details**

General: Before starting the respective portions of the installation, submit the following:

- Embedded services: Proposed method for embedding services in concrete walls or floors or chasing into concrete or masonry walls.
- Fixing of services: Typical details of locations, types and methods of fixing of services to structure.
- Inaccessible services: If services will be enclosed and not accessible after completion, submit proposals for location of service runs and fittings.

# Marking and labelling

General: Before marking and labelling submit:

- Samples of the proposed labels.
- A schedule showing, for each item or type of item:
- . A description of the item or type of item sufficient to identify it.
- . The proposed text of the marking or label.
- . The proposed location of the marking or label.

## **Building penetrations**

General: If it is proposed to penetrate or fix to the following, submit details of the methods proposed to maintain the required structural, fire and other properties:

- Structural building elements including external walls, fire walls, fire doors and access panels, other tested and rated assemblies or elements, floor slabs and beams.
- Membrane elements including damp-proof courses, waterproofing membranes and roof coverings. If penetrating membranes, provide a waterproof seal between the membrane and the penetrating component.

# Technical data

Data to be submitted: Include at least the following information in technical submissions:

- Assumptions.
- Calculations.
- Certification of compliance with the applicable code or standard.
- Design basis and performance parameters.
- Drawings.
- Installation and maintenance requirements.
- Manufacturers' technical literature.
- Risk assessment.
- Samples where relevant.
- Sketch, single line diagram, flowchart.
- Technical data schedules corresponding to the equipment schedules in the contract documents. If there is a discrepancy between the two, substantiate the change.

## Certification

Submit certification that the plant and equipment submitted meets all requirements and capacities of the contract documents except for departures that are identified in the submission.

# 1.13 DESIGN

# General

Design by contractor: If the contractor provides design, use only appropriately qualified persons and comply with all statutory requirements.

Conflict with the documents: If it is believed that a conflict exists between statutory requirements and the documents, notify the contract administrator immediately and provide a recommendation to resolve the conflict.

# 2 PRODUCTS

# 2.1 PROPRIETARY ITEMS

## Manufacturers' or suppliers' recommendations

Proprietary items: Provide, including select, if no selection is given, transport, deliver, store, handle, protect, finish, adjust and prepare for use, manufactured items in accordance with the current written recommendations and instructions of the manufacturer or supplier.

Proprietary systems/assemblies: Assemble, install or fix to substrate in accordance with the current written recommendations and instructions of the manufacturer or supplier.

Project modifications: Advise of activities that supplement, or are contrary to, manufacturer's or

suppliers' written recommendations and instructions.

Product certification: If products must comply with product certification schemes, provide them in accordance with the certification requirements.

# Identified proprietary items

Implication: Identification of a proprietary item does not necessarily imply exclusive preference for the item so identified, but indicates the necessary properties of the item.

## Sealed containers

General: If materials or products are supplied by the manufacturer in closed or sealed containers or packages, bring the materials or products to point of use in the original containers or packages.

# 2.2 TESTS

## Attendance

General: Provide attendance on tests.

## **Testing authorities**

General: Except for site tests, have tests carried out by a Registered testing authority and submit test reports.

- Reports: Submit copies of test reports, including certificates for type tests, showing the observations and results of tests and conformance or non-conformance with requirements.
- Site tests: Use instruments calibrated by authorities accredited by a Registered testing authority.

## 2.3 MATERIALS AND COMPONENTS

#### Consistency

General: For each material or product use the same manufacturer or source and provide consistent type, size, quality and appearance.

Accessories: All accessories and outlets located in close proximity are to be of the same manufacture, size and material and, unless otherwise detailed, of the same colour.

#### **Corrosion resistance**

General: Conform to the following corrosivity category with regard to worksection corrosion resistance tables.

# 3 EXECUTION

## 3.1 PERFORMANCE

## General

Performance criteria: Meet the performance criteria as specified in the relevant worksections.

# 3.2 FIXING

# General

Suitability: If equipment and services are not suitable for fixing to non-structural building elements, fix directly to structure and trim around penetrations in non-structural elements.

## Fasteners

Use proprietary fasteners capable or transmitting the loads imposed, and sufficient to ensure the rigidity of the assembly.

# 3.3 DEMOLITION

## General

General: Decommission, isolate, demolish and remove from the site all existing redundant cables and equipment including minor associated components that become redundant as a result of the demolition.

Breaking down: Disassemble or cut up equipment where necessary to allow removal.

Recovered materials: Recover all components associated with the listed items. Minimise damage during removal and deliver to the locations scheduled.

# Demolished materials

Demolished materials classes

Ownership and implementation: Comply with the **Demolished materials classes table.** 

#### Demolished materials classes table

| Class  | Requirement   | Ownership            |
|--|---|----------------------|
| Recovered<br>items for re-<br>use in the<br>works      | Recover without<br>damage items<br>identified in the<br>Recovered items for<br>re-use in the works<br>schedule  | Principal/Proprietor |
| Recovered<br>items for<br>delivery to the<br>principal | Recover items<br>identified in the<br>Recovered items for<br>delivery to the<br>principal schedule  | Principal/Proprietor |
| Demolished<br>for removal                              | Remove from the site<br>demolished materials<br>identified in the<br><b>Demolish for</b><br><b>removal schedule</b> .<br>Do not burn or bury<br>on site<br>Transit: Prevent<br>spillage of<br>demolishing materials<br>in transit | Contractor           |

## **Re-used components**

General: Clean re-used components and test for compliance with current Australian Standards before returning to service. Provide results of compliance tests.

# 3.4 WORK ON EXISTING SYSTEMS

## General

General: Before starting work on existing systems, measure existing conditions. Submit the results for information.

- If the existing conditions are less than necessary to meet the requirements in the contract documents, submit proposals to rectify the deficiencies with related costing, time and other impacts. - Subject to the results from the preceding work on existing systems, achieve the performance in the contract documents.

## 3.5 SERVICES CONNECTIONS

## Connections

General: Connect to statutory authorities' services or service points. Excavate to locate and expose connection points. On completion reinstate the surfaces and facilities that have been disturbed.

## Statutory authorities' requirements

General: If the authorities elect to perform or supply part of the works, make the necessary arrangements. Install equipment supplied, but not installed, by the authorities.

#### 3.6 INSTALLATION

## General

Fixing: If non-structural building elements are not suitable for fixing equipment and services to, fix directly to structure and trim around holes or penetrations in non-structural elements.

Installation: Install equipment and services plumb, fix securely and organise reticulated services neatly. Allow for movement in both structure and services.

Concealment: Conceal all cables, ducts, trays, pipes etc unless installed in plant spaces, ceilings, riser cupboards, etc or unless otherwise detailed. If possible, do not locate on external walls.

Lifting: Provide heavy items of equipment with permanent fixtures for lifting as recommended by the manufacturer.

Suspended ground floors: Keep all parts of services under suspended ground floors > 150 mm clear of the ground surface. Make sure services do not impede access.

Arrangement: Arrange services so that services running together are parallel with each other and with adjacent building elements.

# Cable systems

Systems: Provide the following:

- Accessible concealed spaces: Thermoplastic insulated and sheathed cables.
- Inaccessible concealed spaces: Cable in PVC-U conduit.
- Plant rooms: Cable in heavy duty PVC-U conduit, or on tray or in duct.
- Plastered or rendered surfaces: Cable in PVC-U conduit.
- Stud walls without bulk insulation: Thermoplastic insulated and sheathed cables.
- Walls filled with bulk thermal insulation: Cables in PVC conduit.

## Installation of accessories

General: Install accessories in conformance with the **Installation of accessories table**.

Location: Final location of all outlets and equipment to be confirmed on site prior to installation.

300 mm

Default mounting heights to centre of accessory plate:

Outlets

Switches and controls 1100 mm

Flush mounting: Provide flush mounted accessories except in plant rooms.

Common face plates: Mount adjacent flush mounted accessories under a common faceplate.

Restricted location: Do not install wall boxes across junctions of wall finishes.

Surface mounting: Proprietary mounting blocks.

# Installation of accessories table

| Wall construction                  | Installation and concealed<br>cabling facilities   |
|------------------------------------|--|
| Rendered masonry<br>partition      | Flush wall box with conduit<br>chased into wall  |
| Double sided face brick partition  | Vertically mounted flush wall box<br>with conduit concealed in cut<br>bricks   |
| Face brick external<br>cavity wall | Flush wall box with thermoplastic<br>insulated cables in conduit run in<br>cavity and tied against inner brick<br>surface, or thermoplastic<br>sheathed cables run in cavity |
| Stud partition                     | Rewirable  |

## Installation of ceiling mounted appliances

Connections: Appliances: Provide flush mounted outlets on the ceiling next to support brackets.

Connections: Fixed equipment: Provide concealed permanent connections.

Fixing: For equipment and appliances heavier than 30 kg provide support through the suspended ceiling to the building structure. Brace appliances that have excessive bending moments, are heavy or vibrate, to prevent horizontal movement.

#### **Differential movement**

General: If the geotechnical site investigation report predicts differential movements between buildings and the ground in which conduits are buried, provide movement control joints in the conduits.

- Location: Adjacent to the conduit supports which are closest to the perimeter of the building.
- Arrangement: Arrange conduits to minimise the number of movement control joints.
- Magnitude: Accommodate the predicted movements.

## Holes and chases

General: If holes and chases are required in masonry walls, provide proposals to demonstrate that the structural integrity of the wall is maintained. Do not chase walls nominated as fire rated or acoustic. Parallel chases or recesses on opposite faces of a wall shall not be closer than 600 mm to each other.

Chasing of blockwork: Only in core-filled hollow blocks or in solid blocks which are not designated as structural and shall be to the **Concrete blockwork chasing table**.

## Concrete blockwork chasing table

| Block thickness ( mm) | Depth of chase<br>(maximum mm) |
|-----------------------|--------------------------------|
| 190                   | 35                             |
| 140                   | 25                             |

|    | Depth of chase<br>(maximum mm) |
|----|--------------------------------|
| 90 | 20                             |

## Penetrations

Fire rated building elements: Seal penetrations with a system conforming to AS 4072.1.

Non-fire rated building elements: Seal penetrations around conduits and sleeves. Seal around cables within sleeves. If the building element is acoustically rated, maintain the rating.

# Sleeves

General: If piping or conduit penetrates building elements, provide metal or PVC-U sleeves formed from pipe sections as follows:

- Movement: Arrange to permit normal pipe or conduit movement.
- Diameter (for non fire-rated building elements): Sufficient to provide an annular space around the pipe or pipe insulation of at least 12 mm.
- Prime paint ferrous surfaces.
- Terminations:
- . If cover plates are fitted: Flush with the finished building surface.
- . In fire-rated and acoustic-rated building elements: 50 mm beyond finished building surface.
- . In floors draining to floor wastes: 50 mm above finished floor.
- . Elsewhere: 5 mm beyond finished building surface.
- Termite management: To AS 3660.1.
- Thickness:
  - . Metal:  $\geq$  1 mm.
  - . PVC-U: ≥ 3 mm.

# Sleeves for cables

General: For penetrations of cables not enclosed in conduit through ground floor slabs, beams and external walls provide sleeves formed from PVC-U pipe sections.

- MIMS cables: Provide sleeves for penetrations through masonry.

# 3.7 CONCRETE PLINTHS

# Construction

General: Provide plinths conforming to the **Concrete plinths schedule** 

- Concrete: Grade N20.
- Finish: Steel float flush with the surround.
- Reinforcement: Single layer of F62 fabric.
- Surround: Provide galvanized steel surround at least 75 mm high and 1.6 mm thick. Fix to the floor with masonry anchors. Fill with concrete.

# 3.8 PLANT AND EQUIPMENT ACCESS

## General

Services and equipment: Locate and arrange all services and equipment so that:

- Failure of plant and equipment (including leaks) does not create a hazard for the building occupants.
- Failure of plant and equipment (including leaks) cause a minimum or no damage to the building, its finishes and contents.
- Inspection and maintenance operations can be arranged to minimise inconvenience and disruption to building occupants or damage to the building structure or finishes.
- Services and equipment are readily accessible for inspection and maintenance and arranged so that inspection and maintenance can be carried out in a safe and efficient manner. Include the following:
  - . Conform to the relevant requirements of AS 1470, AS 1657, AS/NZS 1892.1 and AS/NZS 2865.
  - . If parts of the plant require regular inspection and maintenance either locate plant so it is safely accessible from floor level or provide permanent access platforms and ladders.
  - . In false ceilings locate items of equipment that require inspection and maintenance above tiled parts where possible. If this is not possible (for example if above set plaster or other inaccessible ceilings) provide access panels. Arrange services and plant locations to reduce the number of access panels. Coordinate with other trades to use common access panels where feasible.
  - Modify manufacturer's standard equipment when necessary to provide the plant access in the contract documents.

# 3.9 SEISMIC RESTRAINT

# Provisions

General: Arrange all components, other than service items exempted in AS 1170.4, to resist seismic loads determined in accordance with AS 1170.4. Securely fix all plant and equipment to the building structure. Do not rely on gravity and/or friction to resist seismic forces.

Anti-vibration mounts: Use horizontally restrained type.

Components: Do not use components that will be damaged by earthquake conditions. Protect systems against the adverse effects of components such as mercury switches that, although not damaged by earthquake, may malfunction.

# 3.10 PAINTING AND FINISHES

# General

General: If exposed to view (including in plant rooms) paint new services and equipment.

Surfaces painted or finished off-site: Conform to *Metals and prefinishes.* 

Exceptions: Do not paint chromium or nickel plating, anodised aluminium, GRP, stainless steel, nonmetallic flexible materials and normally lubricated machined surfaces. Surfaces with finishes applied off-site need not be re-painted on-site provided the corrosion resistance of the finish is not less than that of the respective finish in this clause.

## Standard

General: Conform to the recommendations of AS/NZS 2311 Sections 3, 6 and 7 or AS/NZS 2312 Sections 5, 8 and 10, as applicable.

## Low VOC emitting paints

Provide the following low odour/low environmental impact paint types with the following VOC limits:

- Primers and undercoats: < 5 g/litre.
- Low gloss white or light coloured latex paints for broardwall areas: < 5 g/litre.</li>
- Coloured low gloss latex paints: < 85 g/litre.
- Gloss latex paints: < 90 g/litre.

#### **Painting systems**

New unpainted interior surfaces: To AS/NZS 2311 Table 5.1.

New unpainted exterior surfaces: To AS/NZS 2311 Table 5.2.

#### **Paint application**

Coats: Apply the first coat immediately after substrate preparation and before contamination of the substrate can occur. Ensure each coat of paint or clear finish is uniform in colour, gloss, thickness and texture and free of runs, sags, blisters or other discontinuities.

Combinations: Do not combine paints from different manufacturers in a paint system.

Protection: Remove fixtures before starting to paint and refix in position undamaged on completion.

## 3.11 MARKING AND LABELLING

#### General

General: Mark services and equipment to provide a ready means of identification.

- Locations exposed to weather: Provide durable materials.
- Pipes, conduits and ducts: Identify and label to AS 1345.
- Cables: Label at each end to indicate the origin and destination of the cable.

Consistency: Label and mark equipment using a consistent scheme across all services elements of the project.

Operating and maintenance manuals: Provide marking an labelling text identical to the text and terminology used in operating and maintenance manuals.

## Accessories

Label isolating switches and outlets to identify circuit origin.

## Labels and notices

General: Select from the following materials:

- Cast metal.
- For indoor applications only, engraved two-colour laminated plastic.
- Proprietary pre-printed self-adhesive flexible plastic labels.
- Stainless steel or brass  $\geq$  1 mm thick with black filled engraved lettering.

Emergency functions: To AS 1319.

Colours: Generally in conformance with AS 1345 as appropriate, otherwise black lettering on white background except as follows.

- Danger, warning labels: White lettering on red background.
- Main switch and caution labels: Red lettering on white background.

Edges: If labels exceed 1.5 mm thickness, radius or bevel the edges.

Fixing: Fix labels securely using screws, rivets, proprietary self-adhesive labels or double-sided adhesive tape.

- If labels are mounted in extruded aluminium sections, use rivets or countersunk screws to fix the extrusions.
- Use aluminium or monel rivets for aluminium labels.

Label locations: Locate labels so that they are easily seen and are either attached to, below or next to the item being marked.

Label text: To correspond to terminology and identifying number of the respective item as shown on the record drawings and documents.

# Lettering heights:

- Danger, warning and caution notices: ≥ 10 mm for main heading, ≥ 5 mm for remainder.
- Equipment labels within cabinets:  $\geq$  3.5 mm.
- Identifying labels on outside of cabinets:  $\geq$  5 mm.
- Isolating switches:  $\geq$  5 mm.
- Switchboards, main assembly designation:  $\geq 25$  mm.
- Switchboards, outgoing functional units:  $\ge 8$  mm.
- Switchboards, sub assembly designations:  $\geq$  15 mm.
- Other locations:  $\geq$  3 mm.

Operable devices: Mark to provide a ready means of identification. Include the following:

- Controls.
- Indicators, gauges, meters and the like.
- Isolating switches.
- Outlets.

## **Underground cable routes**

Survey: Accurately record the routes of underground cables before backfilling. Include on the record drawings.

Location marking: Accurately mark the location of underground cables with route markers consisting of a marker plate set flush in a concrete base.

Markers: Place markers at each joint, route junction, change of direction, termination and building entry point and in straight runs at intervals of not more than 100 m.

Marker bases: 200 mm diameter x 200 mm deep, minimum concrete.

Direction marking: Show the direction of the cable run by means of direction arrows on the marker plate. Indicate distance to the next marker.

Plates: Brass, minimum size 75 x 75 x 1 mm thick.

Plate fixing: Waterproof adhesive and 4 brass or stainless steel countersunk screws.

Marker height: Set the marker plate flush with paved surfaces, and 25 mm above other surfaces.

Marker tape: Where electric bricks or covers are not provided over underground wiring, provide a 150 mm wide yellow or orange marker tape bearing the words '*WARNING – electric cable buried below*', laid in the trench 150 mm below ground level.

## 3.12 POST-CONSTRUCTION MANDATORY INSPECTIONS AND MAINTENANCE

## General

General: For the duration of the defects liability period, provide inspections and maintenance of safety measures required by the following:

- The Building Code of Australia.
- AS 1851.
- Other statutory requirements applicable to the work.

Records: Provide mandatory records.

Certification: Certify that mandatory inspections and maintenance have been carried out and that the respective items comply with statutory requirements. Submit certification.

Annual inspection: Provide an annual inspection and maintenance immediately prior to the end of the defects liability period.

## 3.13 OPERATION AND MAINTENANCE MANUALS

# General

General: Submit operation and maintenance manuals for installations.

Authors and compilers: Personnel experienced in the maintenance and operation of equipment and systems installed, and with editorial ability.

Referenced documents: If referenced documents or technical worksections require that manuals be submitted, include corresponding material in the operation and maintenance manuals.

Subdivision: By installation or system, depending on project size.

Date for draft submission: 2 weeks prior to commencement of training.

Date for final submission: Within 2 weeks after practical completion.

# Contents

General: Include the following:

- Certificates:
- . Certificates from authorities.
- . Copies of manufacturers' warranties.
- . Product certification.
- Directory: Names, addresses, and telephone and facsimile numbers of principal consultant, subconsultants, contractor, subcontractors and names of responsible parties.
- Drawings:
  - . Record drawings, full size.

- Drawings and technical data: As necessary for the efficient operation and maintenance of the installation.
- Equipment descriptions:
  - . Name, address and telephone and facsimile numbers of the manufacturer and supplier of items of equipment installed, together with catalogue list numbers.
  - . Schedules (system by system) of equipment, stating locations, duties, performance figures and dates of manufacture. Provide a unique code number cross-referenced to the record and diagrammatic drawings and schedules, including spare parts schedule, for each item of equipment installed.
- Maintenance procedures:
  - . Detailed recommendations for preventative maintenance frequency and procedures.
  - . Manufacturer's technical literature as appropriate. Register with manufacturer as necessary. Retain copies delivered with equipment.
  - . Safe trouble-shooting, disassembly, repair and reassembly, cleaning, alignment and adjustment, balancing and checking procedures. Provide logical step-by-step sequence of instructions for each procedure.
  - . Schedule of spares recommended to be held on site, being those items subject to wear or deterioration and which may involve the principal in extended deliveries when replacements are required. Include complete nomenclature and model numbers, and local sources of supply.
- Operation procedures:
  - . Manufacturers' technical literature as appropriate.
- Table of contents: For each volume. Title to match cover.
- Installation description: General description of the installation.
- Systems descriptions: Technical description of the systems installed, written to ensure that the principal's staff fully understand the scope and facilities provided. Identify function, normal operating characteristics, and limiting conditions.
- Systems performance: Technical description of the mode of operation of the systems installed.
- Equipment descriptions:
  - . Manufacturers' technical literature for equipment installed, assembled specifically for the project, excluding irrelevant matter. Mark each product data sheet to clearly identify specific products and component parts used in the installation, and data applicable to the installation.
  - . Supplements to product data to illustrate relations of component parts. Include typed text as necessary.
- Operation procedures:
  - . Safe starting up, running in, operating and shutting down procedures for systems installed. Include logical step-by-step sequence of instructions for each procedure.

- . Control sequences and flow diagrams for systems installed.
- . Legend for colour-coded services.
- . Schedules of fixed and variable equipment settings established during commissioning and maintenance.
- Maintenance procedures:
- . Schedule of normal consumable items, local sources of supply, and expected replacement intervals up to a running time of 40 000 hours. Include lubricant and lubrication schedules for equipment.
- . Instructions for use of tools and testing equipment.
- . Emergency procedures, including telephone numbers for emergency services, and procedures for fault finding.
- . Material safety data sheets (MSDS).
- Maintenance records:
  - . Documentation to AS 1851 clause 18.2.5.
- Certificates:
  - . Copies of test certificates for the installation and equipment used in the installation.
  - . Test reports.
- Drawings:
  - . Single line diagrams.
  - . Service route layouts.
- . Switchgear and controlgear assembly circuit schedules including electrical service characteristics, controls and communications.

## Format - electronic copies

Printing: Provide material that can be legibly printed on A4 size paper.

Scope: Provide the same material as documented for hardcopy in electronic format.

Quantity and format: Refer to **Electronic** submissions.

## Format – hard copy

General: A4 size loose leaf, in commercial quality, 4 ring binders with hard covers, each indexed, divided and titled. Include the following features:

- Cover: Identify each binder with typed or printed title 'OPERATION AND MAINTENANCE MANUAL', to spine. Identify title of project, volume number, volume subject matter, and date of issue.
- Dividers: Durable divider for each separate element, with typed description of system and major equipment components. Clearly print short titles under laminated plastic tabs.
- Drawings: Fold drawings to A4 size and accommodate them in the binders so that they may be unfolded without being detached from the rings. Provide with reinforced punched binder tabs.
- Pagination: Number pages.
- Ring size: 50 mm maximum, with compressor bars.
- Text: Manufacturers' printed data, including associated diagrams, or typewritten, single-sided on bond paper, in clear concise English.

Number of copies: 3.

# 3.14 RECORD DRAWINGS

## General

General: Submit record drawings. Show the 'as installed' locations of building elements, plant and equipment. Include 'as installed' amendments to shop drawings. Show off-the-grid dimensions where applicable.

Date for submission: Within 2 weeks after practical completion.

Content: Show dimensions, types and location of the services in relation to permanent site features and other underground services. Show the spatial relationship to building structure and other services. Include all changes made during commissioning and the maintenance period.

Drawings: Include all documented shop drawings.

Extensions and/or changes to existing: If a drawing shows extensions and/or alterations to existing installations, include sufficient of the existing installation to make the drawing comprehensible without reference to drawings of the original installation.

# Accuracy

Documents: Incorporate all modifications made during the progress of the work and testing period. Show any provisions for the future.

Endorsement: Sign and date all record drawings. Keep one set of shop drawings on site at all times expressly for the purpose of marking changes made during the progress of the works.

# **Drawing layout**

General: Use the same borders and title block as the contract drawings.

# Quantity and format

General: Refer to Submissions.

# 3.15 TOOLS AND SPARE PARTS

## Tools and spare parts schedule

General: At least 8 weeks before the date for practical completion, submit a schedule of tools, portable instruments and spare parts necessary for maintenance of the installation. For each item state the recommended quantity and the manufacturer's current price. Include the following in the prices:

- Checking receipt, marking and numbering in accordance with the spare parts schedule.
- Packaging and delivery to site.
- Painting, greasing and packing to prevent deterioration during storage.
- Referencing equipment schedules in the operation and maintenance manuals.
- Suitable means of identifying, storing and securing the tools and instruments. Include instructions for use.

# Spares

General: Provide spare parts listed in the appropriate worksections.

Replacement: Replace spare parts consumed during the maintenance period.

## 3.16 COMMISSIONING

#### **Circuit protection**

General: Confirm that circuit protective devices are sized and adjusted to protect installed circuits.

#### Controls

General: Calibrate, set and adjust control instruments, control systems and safety controls.

## Notice

General: Give notice for inspection to be made of the commissioning of the installation.

## Reports

General: Submit reports indicating observations and results of tests and compliance or non-compliance with requirements.

## 3.17 CLEANING

## General

General: Before practical completion, clean throughout, including all exterior and interior surfaces except those totally and permanently concealed from view.

Practical completion: At practical completion, clean the following:

- Insides of switchgear and controlgear assemblies. - Luminaires.
- Switchgear and contactors, and other electrical contacts. Adjust as necessary.

Labels: Remove all labels not required for maintenance.

#### 3.18 COMPLETION

## Samples

General: Remove unincorporated samples on completion.

## Warranties

General: If a warranty is documented or if a manufacturer's standard warranty extends beyond the end of the defects liability period, name the principal as warrantee. Register with manufacturers as necessary. Retain copies delivered with components and equipment.

Commencement: Commence warranty periods at practical completion or at acceptance of installation, if acceptance is not concurrent with practical completion.

Approval of installer: If installation is not by manufacturer, and product warranty is conditional on the manufacturer's approval of the installer, submit the manufacturer's written approval of the installing firm.

# 3.19 COMPLETION TESTS

## General

General: Test the works under the contract to demonstrate compliance with the specified performance requirements.

## **Functional checks**

General: Carry out functional and operational checks on energised equipment and circuits and make adjustments for the correct operation of safety devices.

## **Proprietary equipment**

General: Submit type test reports confirming compliance of proprietary equipment.

#### Sound pressure level measurements

Correction for background noise: To AS/NZS 2107 Table B1.

External: To AS 1055.1.

Internal: To AS/NZS 2107.

Measurement positions: If a test position is designated only by reference to a room or space, do not take measurements less than 1 m from the floor, ground or walls.

Sound pressure level analysis: Measure the sound pressure level and the background sound pressure level over the full range of octave band centre frequencies from 31.5 Hz to 8 kHz at the designated positions.

Sound pressure levels: Measure the A-weighted sound pressure levels and the A-weighted background sound pressure levels at the designated positions.

## **Test instruments**

General: Use instruments calibrated by a registered testing authority.

# 3.20 TRAINING

## General

Duration: Instruction to be available for the whole of the commissioning and running-in periods.

Format: Conduct training at agreed times, at system or equipment location. Also provide seminar instruction to cover all major components.

Operation and maintenance manuals: Use items and procedures listed in the final draft operation and maintenance manuals as the basis for instruction. Review contents in detail with the principal's staff.

Certification: Provide written certification of attendance and participation in training for each attendee. Provide register of certificates issued.

# Demonstrators

General: Use only gualified manufacturer's representatives who are knowledgeable about the installations.

## Maintenance

General: Explain and demonstrate to the principal's staff the purpose, function and maintenance of the installations.

## Operation

General: Explain and demonstrate to the principal's staff the purpose, function and operation of the installations.

#### 3.21 MAINTENANCE

## General

General: During the maintenance and defects liability periods, carry out periodic inspections and maintenance work as recommended by manufacturers of supplied equipment, and promptly rectify faults.

Emergencies: Attend emergency calls promptly.

# Maintenance program

General: Submit details of maintenance procedures and program, relating to installed plant and equipment, 6 weeks before the date for practical completion. Indicate dates of service visits. State contact telephone numbers of service operators and describe arrangements for emergency calls.

#### **Maintenance records**

General: Submit, in binders which match the manuals, loose leaf log book pages designed for recording completion activities including operational and maintenance procedures, materials used, test results, comments for future maintenance actions and notes covering the condition of the installation. Include completed log book pages recording the operational and maintenance activities performed up to the time of practical completion.

Certificates: Include test and approval certificates.

Certification: On satisfactory completion of the installation, submit certificates stating that each installation is operating correctly.

Number of pages: The greater of 100 pages or enough pages for the maintenance period and a further 12 months.

Referenced documents: If referenced documents or technical worksection s require that log books or records be submitted, include this material in the maintenance records.

Service visits: Record comments on the functioning of the systems, work carried out, items requiring corrective action, adjustments made and name of service operator. Obtain the signature of the principal's designated representative.

#### Site control

General: Report to the principal's designated representative on arriving at and before leaving the site.

# 0181 ADHESIVES, SEALANTS AND FASTENERS

## 1 GENERAL

## 1.1 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

## 1.2 SUBMISSIONS

#### Installed sealant tests

Sampling: For each sealant test take 3 samples of installed and cured sealant, each at least 50 mm long, from completed joints.

Testing: Submit the results of tests to the **Installed** sealant tests schedule.

Reinstatement: Make good the joints from which the samples were taken.

#### Sealants

Samples: Submit colour samples of visible joint sealants.

Documents: Submit technical data sheets.

## 1.3 INSPECTION

#### Notice

Inspection: Give notice so that inspection may be made of joints and penetrations prepared for the application of sealants to the **Installed sealant** tests schedule.

# 1.4 PERFORMANCE

## Adhesives and sealants

General: Provide adhesives and sealants capable of transmitting imposed loads, sufficient to ensure the rigidity of the assembly, or integrity of the joint and which will not cause discolouration of finished surfaces.

Compatibility: Do not use sealants or adhesives that are incompatible with the products to which they are applied.

Movement: Where an adhered or sealed joint may be subject to movement, select a system accredited to accommodate the projected movement under the conditions of service.

Refurbishment: Use sealants that can be safely removed and prepared for refurbishment.

#### Fasteners

Provide fasteners accredited for the particular use, capable of transmitting imposed loads and maintaining the rigidity of the assembly.

## 2 PRODUCTS

# 2.1 ADHESIVES

Standards Mastic adhesive: To AS 2329. Polymer emulsion adhesive for timber: To AS 2754.2, not inferior to Type 3.

# High strength adhesive tape

General description: A foam of cross linked polyethylene or closed cell acrylic coated both sides with a high performance acrylic adhesive system, encased in release liners of paper or polyester.

Product classification: Ensure product suitability for the following substrates:

- Firm high strength foam tapes for high energy surfaces including most bare metals such as stainless steel and aluminium.
- Conformable high strength foam for medium energy surfaces including many plastics and paints, and bare metals.
- Conformable high strength foam for lower energy surfaces including many plastics, most paints and powder coatings, and bare metals.

Thickness: Select the tape to ensure a mismatch between surfaces does not exceed half the tape thickness under the applied lamination pressure.

## 2.2 SEALANTS

## Standards

General: To ISO 11600.

## External masonry joints

General: Provide sealant and bond breaking backing materials compatible with each other and the substrate and which are non-staining to masonry. Do not use bituminous materials with absorbent masonry units.

Bond breaking backing:

- Bond breaking materials: Non-adhesive to sealant, or faced with a non-adhering material.
- Foamed materials: Closed-cell or impregnated, not water-absorbing.

## Fire rated control joints

General: Provide sealant materials that maintain the nominated fire resistant rating.

- Fire stopping: To AS 4072.1.

# Pointing and bedding

General: Provide sealants for fast moving joints in light weight building elements that are compatible with the contact materials.

Bond breaking backing:

- Bond breaking materials: Non-adhesive to sealant, or faced with a non-adhering material.
- Foamed materials: Closed-cell or impregnated, not water-absorbing.

## Floor movement joints

General: Provide trafficable sealants for that are compatible with the contact materials.

Bond breaking backing:

- Bond breaking materials: Non-adhesive to sealant, or faced with a non-adhering material.
- Foamed materials: Closed-cell or impregnated, not water-absorbing.

# 2.3 FASTENERS

## General

Masonry anchors: Proprietary expansion or chemical type.

Plain washers: To AS 1237.1.

- Provide washers to the heads and nuts of bolts, and the nuts of coach bolts.

Plugs: Proprietary purpose-made plastic.

Powder-actuated fasteners: To AS/NZS 1873.4.

Stainless steel fasteners: To ASTM A240/240M.

Steel nails: To AS 2334.

 Length: At least 2.5 x the thickness of the member being secured, and at least 4 x the thickness if the member is plywood or building board < 10 mm thick.

Unified hexagon bolts, screws and nuts: To AS/NZS 2465.

Fasteners in CCA treated timber: Epoxy coated or stainless steel.

# Bolts

Coach bolts: To AS/NZS 1390.

Hexagon bolts Grades A and B: To AS 1110.1.

Hexagon bolts Grade C: To AS 1111.1.

# Corrosion resistance

Corrosivity category: To the *General requirements* worksection.

Steel products: Conform to the **Corrosion resistance table** or provide proprietary products with metallic and/or organic coatings of equivalent corrosion resistance.

# Corrosion resistance table – low corrosivity category

| Situati<br>on                           | Self<br>drillin<br>g | Threaded<br>fasteners and<br>anchors                          |                   | Powder actuated<br>fasteners                                 |   |

# Finishes

Electroplating:

- Metric thread: To AS 1897.
- Imperial thread: To AS 4397.

Galvanizing:

- Threaded fasteners: To AS 1214.
- Other fasteners: To AS/NZS 4680.

Mild steel fasteners: Galvanize if:

- Embedded in masonry.
- In external timbers.
- In contact with chemically treated timber, other than CCA treated timber.

Epoxy coated:

- CCA Treated timber.

# Nuts

Hexagon chamfered thin nuts Grades A and B: To AS 1112.4.

Hexagon nuts Grade C: To AS 1112.3.

Hexagon nuts Style 1 Grades A and B: To AS 1112.1.

Hexagon nuts Style 2 Grades A and B: To AS 1112.2.

# Screws

Coach screws: To AS/NZS 1393.

Hexagon screws Grades A and B: To AS 1110.2.

Hexagon screws: Grade C To AS 1111.2. Hexagon socket screws: To AS 1420 and AS/NZS 1421.

Machine screws: To AS/NZS 1427.

Self-drilling screws: To AS 3566.1 and AS 3566.2. Self-tapping screws:

- Crossed recessed countersunk (flat common head style): To AS/NZS 4407.
- Crossed recessed pan: To AS/NZS 4406.
- Crossed recessed raised countersunk (oval): To AS/NZS 4408.
- Hexagon: To AS/NZS 4402.
- Hexagon flange: To AS/NZS 4410.
- Hexagon washer: To AS/NZS 4409.
- Slotted countersunk (flat common head style): To AS/NZS 4404.
- Slotted pan: To AS/NZS 4403.
- Slotted raised countersunk (oval common head style): To AS/NZS 4405.

## Blind rivets

Description: Expanding end type with snap mandril. Type: Closed end for external application, open end for internal application.

End material:

- Aluminium base alloy for metallic coated or colourbond coated steel.
- Stainless steel for stainless steel sheet.
- Copper for copper sheet.
- Size:
- For sheet metal to sheet metal: 3 mm.
- For sheet metal to supports, brackets and rolled steel angles: 4.8 mm.

## Performance

Loads: Provide fasteners capable of transmitting the loads imposed, and sufficient to ensure the rigidity of the assembly.

# 3 EXECUTION

# 3.1 ADHESIVES

## Preparation

Substrates: Ensure substrates are:

- Clean and free of any deposit or finish which may impair adhesion.
- If framed or discontinuous, support members are in full lengths without splicing.
- If solid or continuous, excessive projections are removed.
- If previously painted, cracked or flaking paint is removed and the surface lightly sanded.

# Contact adhesive

Precautions: Do not use if:

- A substrate is polystyrene foam.
- A PVC substrate may allow plasticiser migration.
- The adhesive solvent can discolour the finished surface.

- Dispersal of the adhesive solvent is impaired.

Two way method: Immediately after application press firmly to transfer adhesive and then pull both surfaces apart. Allow to tack off and then reposition and press firmly together. Tap areas in contact with a hammer and padded block.

One way method: Immediately after application bring substrates together and maintain maximum surface contact for 24 hours by clamps, nails or screws as appropriate. If highly stressed employ permanent mechanical fasteners.

## High strength adhesive tape

Preparation:

- Non-porous surfaces: Clean with surface cleaning solvents such as isopropyl alcohol / water, wash down and allow to dry.
- Porous surfaces: Prime the surface with a contact adhesive compatible with the tape adhesive system.

Follow the recommendations of the manufacturer for application to the following: Copper, brass, plasticized vinyl and hydrophilic surfaces such as glass and ceramics in a high humidity environment.

Applied lamination pressure: Ensure the tape experiences 100 kPa.

Application temperature: Generally above  $10^{\circ}$ C, consult the manufacturer.

Completion: Do not apply loads to the assembly for 72 hours at 21°C.

# 3.2 SEALANT JOINTING

## Preparation for jointing

Cleaning: Cut flush joint surface protrusions and make good. Mechanically clean joint surfaces free of any deposit or finish which may impair adhesion of the sealant. Immediately before jointing remove loose particles from the joint, using oil-free compressed air.

Bond breaking: Install bond breaking backing material.

Taping: Protect the surface on each side of the joint using 50 mm wide masking tape or equivalent means. On completion of pointing remove the tape and remove any stains or marks from the surface.

Primer: Apply the recommended primer to the surfaces in contact with sealant materials.

## Sealant joint proportions

General weatherproofing joints (width:depth):

- 1:1 for joint widths < 12 mm.
- 2:1 for joint widths > 12 mm.

## Sealant application

General: Apply the sealant to dry joint surfaces using a pneumatic applicator gun. Ensure the sealant completely fills the joint to the required depth; that it is in good contact with the full depth of the sides and that there is no air trapped in the joint. Do not apply the sealant outside the recommended working time for the material or the primer.

## Weather conditions

Two pack polyurethanes: Do not apply the sealant if ambient conditions are outside the following:

- Temperature: < 5°C or > 40°C.
- Humidity: To the manufacturer's recommendations.

## Joint finish

General: Force the sealant into the joint and finish with a smooth, slightly concave surface using a tool designed for the purpose.

## Protection

General: Protect the joint from inclement weather during the setting or curing period of the material.

# 0182 FIRE-STOPPING

## 1 GENERAL

# 1.1 CROSS REFERENCES

## General

General: Conform to the General requirements worksection.

# 1.2 GENERAL STANDARDS

## General

Service penetration fire-stopping systems: To BCA clause C3.15.

Control joint fire-stopping systems: To AS 4072.1.

## 1.3 INSPECTION

## Notice

Inspection: Give sufficient notice so that inspection may be made of the following:

- Service penetrations completed and ready for firestopping.
- Finished fire-stopping, before being concealed.

## 1.4 TESTS

#### Service penetration fire-stopping systems Insulation measurements: Required.

Multiple penetration fire-stopping systems Insulation measurements: Required.

## 1.5 SAMPLES

## Sample panels

General: Supply a sample panel of each firestopping assembly, on representative substrates. If built into the works, mark them.

Size: 500 mm run for junction seals and 500 x 500 mm area for penetration seals.

# 1.6 SUBMISSIONS

## Manufacturers' information

Type tests: Submit type test certificates for each combination of fire-stopping system, application, type of service, substrate and penetration orientation. Include drawings of tested details.

- Physical performance: Submit report to AS 4072.1 Appendix C.

Product data: Submit evidence that systems specified without reference to brand conform to specified requirements.

Instructions: Submit copies of relevant manufacturers' instructions, for systems specified without reference to brand.

Material safety data sheets (MSDS): Submit MSDS for systems specified without reference to brand.

# Notice

General: Give notice if substrates or penetrants or both are not suitable for fire-stopping.

# 2 PRODUCTS

# 2.1 MATERIALS

# General

Shelf life: Ensure materials used have not exceeded their shelf life.

Toxic materials: Free of asbestos and lead and free of, nor requiring the use of, toxic solvents.

Toxicity in fire: Non-toxic.

# Fire-stop mortars

Type: Re-enterable cement-based compound, mixed with water. Non-shrinking, moisture resistant. Insoluble in water after setting.

## Formulated compound of incombustible fibres

Material: Formulated compound mixed with mineral fibres, non-shrinking, moisture resistant. Insoluble in water after setting.

## Fibre stuffing

Material: Mineral fibre stuffing insulation, dry and free of other contaminants.

## Standard: AS/NZS 4859.1 Section 8.

#### **Fire-stop sealants**

Material: Elastomeric sealant. Soft, permanently flexible, non-sag, non-shrinking, moisture resistant. Capable of providing a smoke-tight, gas-tight and waterproof seal when properly installed. Insoluble in water after setting.

## Fire-stop foams

Material: Single component compound of reactive foam ingredients, non-shrinking, moisture resistant. Insoluble in water after setting.

# Fire-stop putty

Material: Single component, mouldable, permanently flexible, non-shrinking, moisture resistant, intumescent compound which expands on exposure to surface heat gain, forming a highvolume thermally insulating char that closes gaps and voids, resists the turbulence of a severe fire. Capable of being placed by hand to form an immediate fire seal. Insoluble in water after setting.

# 2.2 COMPONENTS

## Fire-stop collars

Material: Mechanical device with incombustible intumescent fillers covered with sheet steel jacket. Airtight and watertight.

#### **Fire-stop pillows**

Material: Formed self-contained compressible flexible mineral fibre in cloth bags, rated to permit frequent changes in service.

## 3 EXECUTION

# 3.1 EXECUTION GENERALLY

## General

Extent: Fire-stop and smoke-stop interruptions to fire-rated assemblies, materials and components, including penetrations through fire-rated elements, breaks within fire-rated elements (e.g. expansion joints), and junctions between fire-rated elements.

The **Fire-stopping systems schedule** is not necessarily comprehensive.

Sequence: Fire-stop after services have been installed through penetrations and properly spaced and supported, after sleeving where appropriate, and after removal of temporary lines, but before restricting access to the penetrations, including before dry lining.

Ventilation: Supply ventilation for non-aqueous solvent-cured materials.

Density: Apply fire-stopping material to uniform density.

Fire-stopping exposed to view: Finish surfaces to a uniform and level condition.

Cable separation: Maintain.

Protection: Protect adjacent surfaces from damage arising through installation of fire-stopping. Protect completed fire-stopping from damage arising from other work.

Loose or damaged fire-stopping material: Remove and replace.

Penetrations by pipes and ducts: Allow for thermal movement of the pipes and ducts.

Preventing displacement: Reinforce or support firestopping materials with non-combustible materials when:

- The unsupported span of the fire-stopping materials > 100 mm.
- The fire-stopping materials are non-rigid (unless shown to be satisfactory by test).

Large openings: Provide fire-stopping capable of supporting the same loads as the surrounding element or provide similar structural support around the opening.

# Preparation

Cleaning: Clean substrates of dirt, dust, grease, oil, loose material, and other matter which may affect bond of fire-stop material.

Primer: Clean and dry substrates for primers and sealants.

Restraint: Install backing and/or damming materials to arrest liquid material leakage. Remove temporary dams after material has cured.

# 3.2 SYSTEMS

## Fire-stop mortars

Ambient conditions: Do not install below 5°C.

## Fibre stuffing

Installation: Compress to 40% of its uncompressed volume.

## **Fire-stop sealants**

Ambient conditions: Do not store above 32°C. Do not install outside the temperature range recommended by the sealant manufacturer. Do not install when humidity exceeds that recommended by the sealant manufacturer for safe installation.

## Fire-stop foams

Ambient conditions: Do not store above 32°C. Do not install below 15°C or above 32°C. Do not apply when temperature of substrate and air is below 15°C. Maintain this minimum temperature before, during and for 3 days after installation.

Installation: Test substrates for adhesion and prime if necessary. Place in layers to ensure homogenous density, filling cavities and spaces. Place sealant to completely seal junctions with adjacent dissimilar materials.

# **Fire-stop pillows**

Ambient conditions: Do not install in conditions outside of the manufacturer's recommendations.

# Labelling

Label each fire-stopping installation with a permanently fixed tag or sticker containing the following information:

- Manufacturer's name.
- Name and address of installer.
- Date of installation.

# 3.3 COMPLETION SUBMISSIONS

## Certification

General: Submit evidence of compliance, in accordance with the recommendations of AS 4072.1 Appendix B.

Certification: Submit a completed certification document for installed fire-stopped penetrations and control joints.

- Form: To Figure B1 of AS 4072.1.

Schedule: Submit a schedule of installed firestopped penetrations and control joints.

- Form: To Figure B2 of AS 4072.1.

# User manual

For fire-stopping systems which are intended to be modified in service, submit user manual.

# 3.4 MAINTENANCE

# Cleaning

Remove spilled and excess fire-stopping materials without damaging other work.

# 0183 METALS AND PREFINISHES

## 1 GENERAL

## 1.1 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

## 2 PRODUCTS

# 2.1 METALS

## Aluminium and aluminium alloys

Drawn pipe: To AS/NZS 1867.

Drawn rod, bar and strip: To AS/NZS 1865.

Extrusions: To AS/NZS 1866.

Plate and sheets: To AS/NZS 1734.

## Coated steel

Electrogalvanizing ferrous hollow and open sections: To AS 4750.

Metallic-coated steel:

- Ferrous open sections zinc coated by an in-line process: To AS/NZS 4791.
- Ferrous hollow sections zinc coated by a continuous or specialised process: To AS/NZS 4792.

Metallic-coated steel sheet: To AS 1397. Metal thicknesses specified are base metal thicknesses. Steel wire: To AS/NZS 4534.

# Copper and copper alloys

Casting: To AS 1565.

Plate, sheet and strip: To AS 1566. Rods. bars and sections: To AS/NZS 1567.

#### Stainless steel

Bars: To ASTM A276.

Plate, sheet and strip: To ASTM A240/A240M.

Welded pipe (round): To AS 1769.

Welded pipe (square): To ASTM A554.

#### Steel

Sheet: To AS/NZS 1595.

Structural bars and sections: To AS/NZS 3679.1. Structural hollow section: To AS 1163.

## Steel for prefinishes

Cold rolled bar: To AS 1443 'bright'.

Cold rolled sheet: To AS/NZS 1595.

Designation: CA2S-E.

Electric resistance welded pipe: To AS 1450.

## 3 EXECUTION

# 3.1 GENERAL

# **Metal separation**

Incompatible sheet metals: Provide separation by one of the following:

- Apply an anti-corrosion low moisture transmission coating such as alkyd zinc phosphate primer or aluminium pigmented bituminous paint to contact surfaces.
- Insert a concealed separation layer such as polyethylene film, adhesive tape, or bituminous felt.

Incompatible fixings: Do not use.

Incompatible service pipes: Install lagging or grommets. Do not use absorbent, fibrous of paper products.

#### Brazing

General: Ensure brazed joints have sufficient lap to provide a mechanically sound joint.

Butt joints: Do not use butt jointing for joints subject to load. If butt joints are used, do not rely on the filler metal fillet only.

Filler metal: To AS/NZS 1167.1.

## Finishing

Visible joints: Finish visible joints made by welding, brazing or soldering using methods appropriate to the class of work (including grinding or buffing) before further treatment such as painting, galvanizing or electroplating. Ensure self-finished metals are without surface colour variations after jointing.

# Preparation

General: Before applying decorative or protective prefinishes to metal components, complete welding, cutting, drilling and other fabrication, and prepare the surface using a suitable method.

Standard: To AS 1627.

Priming steel surfaces: If site painting is specified to otherwise uncoated mild steel or similar surfaces:

- Prime after fabrication and before delivery to the works.
- After installation, repair damaged priming and complete the coverage to unprimed surfaces.

# Welding

Aluminium: To AS 1665. Stainless steel: To AS/NZS 1554.6. Steel: To AS/NZS 1554.1.

#### oleel. 10 Ao/N20 1004.1

# 3.2 SELF FINISHING

# Mechanical finishes

Bright finished copper alloy surfaces: For indoor applications, apply a clear lacquer protecting coating.

# 3.3 ELECTROPLATING

## **Electroplated coatings**

Chromium on metals: To AS 1192. Nickel on metals: To AS 1192. Service condition number: At least 2. Zinc on iron or steel: To AS 1789.

# 3.4 ANODISING

## Anodising

Standard: To AS 1231.

- Thickness grade:
- Indoor applications: At least AA 10.
- Outdoor applications: AA 15 to AA 20.

# 3.5 METAL SPRAYING

## **Metal spray**

Standard: To ISO 2063.

- Minimum thicknesses:
- Indoor applications: 125  $\mu m.$
- Outdoor applications: 175 μm.

Process: Electric arc.

Seal coat: Cover the metal spray finish with two coats of vinyl seal to a total dry film thickness of 80  $\mu m.$ 

## 3.6 POWDER COATING

## Standards

Application to aluminium and aluminium alloy substrates: AS 3715.

Application to substrates other than aluminium: AS 4506.

## Preparation

General: Use chemical pretreatments. If recommended, provide conversion coatings.

Aluminium: Pretreat to AS 3715 Appendix G.

Galvanized and metallic-coated steel: Clean by immersing in a suitable alkaline or acidic solution, apply a zinc phosphate chemical conversion coating, rinse and degas.

Unprotected steel: Remove rust to the recommendations of AS 1627.4 to grade Sa  $2\frac{1}{2}$  of AS 1627.9. Clean by immersing in trichloroethylene or an alkaline solution, and apply a coat of iron phosphate.

## Thermoset powder coating generally

Pre-clean: If surface contamination has occurred or is suspected, clean surface with a proprietary precleaning solvent/detergent prior to powder application.

Thermoset fluopolymer coating: Provide chemical conversion of the surface to amorphous chromium phosphate to ASTM 1730D Type B, Method 5 (Amorphous chromium phosphate treatment). Delete if fluoropolymer is not applicable.

Application: Use an electrostatic spray gun or fluidised bed and ensure no dust particles or other impurities blemish the final product.

Baking: After application, bake the film in an oven accurately controlled to the temperature and for the period recommended by the coating system manufacturer. Check for correct paint cure by solvent testing. Adjust pre-heat and line speed to ensure full cure. Damage: Protect the coatings from damage during coating operations, fabrication shipping, storage and installation.

Minor damage: Touch up as recommended by coating system manufacturer.

# Thermoset polyester powder coating Standards:

- Aluminium and aluminium alloy substrates: To AS 3715.
- Metal substrates other than aluminium: To AS 4506.

## Thermoset fluoropolymer coating

Description: Factory applied spray coatings on aluminium products, including  $\mathsf{PVF}_2$  and  $\mathsf{PFTE}$  coatings.

Standard: To AS 3715.

Quality control: Submit an ongoing application and performance quality control report. Include production methods and tests to the **Quality control table** using actual substrates for this project:

# 3.7 PREPAINTING

# Air-drying enamel

Application: Spray or brush.

Finish: Full gloss.

General use:

- Primer: Two-pack epoxy primer to AS/NZS 3750.13.
- Top coats: 2 coats to AS 3730.6.
- Oil resistant use:
- Primer: Two-pack epoxy primer to AS/NZS 3750.13.
- Top coats: 2 coats to AS 4025.1.

## Equipment paint system

Description: Brush or spray application using paint as follows:

- Full gloss enamel finish coats, oil and petrol resistant: AS 4025.1, two coats.
- Prime coat to metal surfaces generally: AS 4089 or AS 4025.4.
- Prime coat to zinc-coated steel: AS 3730.15.
- Undercoat: AS 4025.2.

## Prepainted metal products

Product type as noted in AS/NZS 2728: Not lower than the type appropriate to the field of application.

Two-pack liquid coating

Application: Spray.

Finish: Full gloss.

Primer: Two pack epoxy primer to AS/NZS 3750.13. Topcoat:

- Internal use: Proprietary polyurethane or epoxy acrylic system.
- External use: Proprietary polyurethane system.

#### 3.8 COMPLETION

#### Damage

General: If prefinishes are damaged, including damage caused by unauthorised site cutting or drilling, remove and replace the damaged item.

# Repair

General: If a repair is required to metallic coated sheet or electrogalvanized on inline galvanized steel products, clean the affected area and apply a twopack organic primer to AS/NZS 3750.9.

# 0186 BUILDING IT COMPONENTS

# 1 GENERAL

## 1.1 AIMS

#### Responsibilities

General: Provide IT components and systems as follows.

Selections: As documented.

# 1.2 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

#### 1.3 SUBMISSIONS

#### **Technical data**

General: Submit technical data for all components including the following:

- Hardware and software manufacturer's technical literature.

## 2 PRODUCTS

#### 2.1 ACTIVE COMPUTER HARDWARE

# Computer hardware

# Conform to the Computer hardware schedule.

Network hub/switch

Type: Managed Gigabit ethernet Layer 2.

Mounting: Rack mounting.

#### **Network router**

Type: Gigabit ethernet.

Functions: Static IP, dynamic IP, integrated DHCP, PPPoE, and device name support.

Mounting: Rack mounting.

#### Wireless access point

Compatibility: IEEE 802.11b and IEEE 802.11g.

Modes: Wireless access point, point-to-point bridge, point-to-multi-point wireless bridge, wireless client and wireless repeater.

#### ADSL modem

Graphical User Interface (GUI): Required to permit modification of settings to connect to Internet Service Provider (ISP).

Functions: Static IP, Dynamic IP, PPPoE/PPPoA and Bridge connections.

#### Coaxial cable modem

Graphical User Interface (GUI): Required to permit modification of settings to connect to Internet Service Provider (ISP).

Functions: Static IP, Dynamic IP, PPPoE/PPPoA and Bridge connections.

## **Backup/archive facilities**

Type: Tape.

Mounting: Rack mounting.

# Printers

General: Conform to the Printers schedule.

## 2.2 SOFTWARE

## General

General: Provide the software required for the operation and management of the building IT systems and equipment including the following:

- All passwords, access codes and other means used to limit or control access to, or modification (including extension) of, the software.
- All software and manuals necessary to modify or extend the software.
- Back-up copies of software in electronic format.
- Installation of all software updates issued before the end of the defects liability period.

Compatibility: Provide software systems that are planned to have upgrades backward compatible, so that each upgrade does not require user input or changes to base data or to the site specific installation.

Licence: Provide fully licensed versions of all software and licenses for all users defined in the documents.

OSI model: Provide software that operates on the open system interconnection (OSI) model.

# System software

# Conform to the System software schedule.

# Application software

Provide the software required for the operation and management of building services systems and equipment including the following:

- Absolute right and all necessary facilities for the principal to modify extend or reduce any or all functions, hardware and software that form part of the system.
- Full listings of all software supplied which has been developed, modified or adapted to meet the requirements of this project.

Function: Provide software that delivers accurate and reliable results.

Modular construction: Software programs must be constructed in modules to facilitate ease of maintenance and to reduce the delays in program execution.

#### Pre delivery tests

General: Verify that the software has been assembled and tested for operational performance prior to installation on site.

High level interface test: Where a high level interface to other systems is specified, test and verify software performance with the specified systems prior to installation on site.

# 3 EXECUTION

# 3.1 INSTALLATION

## Network integration

General: Integrate the equipment into the network operating system.

# Software integration

General: Integrate the software into the system and applications software.

# 3.2 COMPLETION

#### **Completion tests**

Completion: Verify the functional and operational performance of the software prior to completion.

Disaster recovery: Verify that the software recovers from disaster events without loss of data and without loss of reliability.

Reliability: Verify that the software system provides reliable reporting and results through alternative measurement methods.

# 0201 DEMOLITION

## 1 GENERAL

## 1.1 CROSS REFERENCES

## General

General: Conform to the *General requirements* worksection.

## 1.2 STANDARD

#### General

Demolition: To AS 2601.

## 1.3 INTERPRETATION

## Definitions

For the purposes of this worksection, the following definitions apply:

- Demolition: The complete or partial dismantling of a building or structure, by pre-planned and controlled methods or procedures.
- Dilapidation record: The photographic or video and written record made before commencement of demolition work of the condition of the portion of the existing building being retained, adjacent buildings, and other relevant structures or facilities.
- Dismantle: The reduction of an item to its components in a manner to allow re-assembly.
- Recover: The disconnection and removal of an item in a manner to allow re-installation.

## 1.4 INSPECTION

## Notice

Inspection: Give notice so that inspection may be made of the following:

- Adjacent structures before commencement of demolition.
- Services before disconnection or diversion.
- Trees as documented to be retained, before commencement of demolition.
- Contents of building before commencement of demolition.
- Structure after stripping and removal of roof coverings and external cladding.
- Underground structures after demolition above them.
- Excavations remaining after removal of underground work.
- Site after removal of demolished materials.
- Services after reconnection or diversion.

## 1.5 SUBMISSIONS

## Authorities

Evidence of compliance: Before commencing demolition, submit evidence of the following:

- Requirements of authorities relating to the work under the contract have been ascertained.
- A permit to demolish has been obtained from the appropriate authority.
- A scaffold permit has been obtained from the appropriate authority (if scaffolding is proposed to be used).
- Precautions necessary for protection of persons and property have been taken and suitable protective and safety devices have been provided to the approval of the relevant authority.
- Treatment for rodent infestation has been carried out and a certificate has been obtained from the appropriate authority.
- Fees and other costs have been paid.

#### Investigation and work plan

Work plan: Submit the work plan before demolition or stripping work. Include the following information:

- The method of protection and support for adjacent property.
- Locations and details of necessary service deviations and terminations.
- If removal of asbestos or of material containing asbestos is required, the information specified in NOHSC 2002 Code of Practice for the Safe Removal of Asbestos. Include information to be supplied to the removalist in clause 7.2.4, and information to be supplied by the removalist in clause 7.3.
- Confirmation of the sequence of work in **Demolition** below.
- Requirements of AS 2601 Section 2 Planning and execution.

## Records

Dilapidation record: Submit a copy of the dilapidation record for inspection. Submit to each owner of each adjacent property a copy of the part of the record relating to that property, and obtain their written agreement to the contents of the record, prior to commencement of demolition.

#### Stockpiles

Location: Submit the locations for on-site stockpiles to be used for demolished materials for recycling in the works. Coordinate with the locations of storage for other waste streams and prevent mixing or pollution.

## Recycling

Delivery location: Submit the name and address of the proposed recycling facility.

Certification: Provide evidence of delivery to the nominated recycling facility.

## 2 PRODUCTS

## 2.1 DEMOLISHED MATERIALS

## **Demolished materials classes**

Ownership and implementation: Comply with the **Demolished materials classes table.** 

| Demolished materials classes table | Э |
|------------------------------------|---|
|------------------------------------|---|

| Class | Requirement | Ownership |
|-------|-------------|-----------|
|       |             |           |

| Class   | Requirement   | Ownership            |
|---|---|----------------------|
| Recovered<br>items for re-<br>use in the<br>works       | Recover without<br>damage items<br>identified in the<br>Recovered items for<br>re-use in the works<br>schedule  | Principal/proprietor |
| Recovered<br>items for<br>delivery to the<br>principal  | Recover without<br>damage items<br>identified in the<br>Recovered items for<br>delivery to the<br>principal schedule  | Principal/proprietor |
| Demolished<br>material for<br>recycling in<br>the works | Stockpile material<br>identified in the<br>Demolished material<br>for recycling in the<br>works schedule  | Contractor           |
| Demolished<br>material for<br>recycling off<br>site     | Demolish and deliver<br>for recycling material<br>identified in the<br>Demolished material<br>for recycling off-site<br>schedule  | Contractor           |

# 3 EXECUTION

# 3.1 SUPPORT

## **Temporary support**

General: If temporary support is required, certification for its design and installation is required from a professional engineer engaged by the contractor.

Existing buildings: Until permanent support is provided, provide temporary support for sections of existing buildings which are to be altered and which normally rely for support on work to be demolished.

Ground support: Support excavations for demolition of underground structures.

Adjacent structures: Provide supports to adjacent structures where necessary, sufficient to prevent damage resulting from the works.

- Lateral supports: Provide lateral support equal to that given by the structure to be demolished.
- Vertical supports: Provide vertical support equal to that given by the structure to be demolished.

## **Permanent supports**

General: If permanent supports for adjacent structures are necessary and are not documented, give notice and obtain instructions.

# 3.2 PROTECTION

## Encroachment

General: Prevent the encroachment of demolished materials onto adjoining property, including public places.

## Weather protection

General: If walls or roofs are opened for alterations and additions or the surfaces of adjoining buildings are exposed, provide temporary covers to prevent water penetration. Provide covers to protect existing plant, equipment and materials intended for re-use.

# **Dust protection**

General: Provide dust-proof screens, bulkheads and covers to protect existing finishes and the immediate environment from dust and debris.

## Security

General: If a wall or roof is opened for alterations and additions, provide security against unauthorised entry to the building.

## **Temporary screens**

General: Fill the whole of designated temporary openings or other spaces using dust and weatherproof temporary screens, fixed securely to the existing structure, and install to ensure appropriate shedding of water to avoid damage to retained existing elements or adjacent structures and contents.

Type: Timber framed screens sheeted with 12 mm plywood and painted. Seal the junctions between the screens and the openings.

## Temporary access

General: Provide a substantial temporary doorset fitted with a rim deadlock, and remove on completion of demolition.

## **Exposed surfaces**

General: Where necessary protect and weatherproof the surfaces of adjacent structures exposed by demolition.

## **Recovered items**

General: Recover all components associated with the listed items that are essential for their re-use. Minimise damage during removal.

# 3.3 DEMOLITION

## **Dilapidation record**

Purpose: Use the dilapidation record to assess the damage and making good arising out of demolition work.

Availability: Keep the records of the investigations on site and available for inspection until practical completion of the contract.

## Encroachment

General: If encroachments from adjacent structures are encountered and are not documented, give notice and obtain instructions.

## Concrete slabs

General: Using a diamond saw, neatly cut back or trim to new alignment with a clean true face existing concrete slabs to be partially demolished or penetrated.

Recycling: If concrete crushing is proposed on site, submit details of plant and environmental controls.

## **Refrigeration systems**

General: Undertake demolition work on refrigeration systems in conformance with:

- AS/NZS 1677.2.
- The recommendations of SAA HB 40.1 and SAA HB 40.2.

## **Explosives**

General: Do not use explosives.

## 3.4 HAZARDOUS MATERIALS

#### General

General: Hazardous materials that have already been identified are set out in the **Identified** hazardous materials schedule.

# Hazardous materials

General: Give notice immediately hazardous materials or conditions are found, including the following:

- Asbestos or material containing asbestos.
- Flammable or explosive liquids or gases.
- Toxic, infective or contaminated materials.
- Radiation or radioactive materials.
- Noxious or explosive chemicals.
- Tanks or other containers which have been used for storage of explosive, toxic, infective or contaminated substances.

## 3.5 COMPLETION

## Notice of completion

General: Give at least 7 working days' notice of completion of demolition so that adjacent structures may be inspected following completion of demolition.

Making good: Make good any damage arising out of demolition work. Obtain written acceptance from the owner of each adjoining property of completeness and standard of making good.

#### **Temporary support**

General: Clear away at completion of demolition.

# 0223 SERVICE TRENCHING

## 1 GENERAL

## 1.1 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

## 1.2 DESIGN

#### Shoring and lining systems

Steel shoring and trench lining systems: To AS 4744.1.

Hydraulic shoring and trench lining equipment: To AS 5047.

## 1.3 INSPECTION

#### Notice

Inspection: Give notice so that inspection may be made at the following stages:

- Service trenches excavated before laying the service.
- Services laid in trenches and ready for backfilling.

## 1.4 TESTS

#### Density tests

Testing authority: Have density tests of pipe bedding and backfilling carried out by a Registered testing authority.

Test methods:

- Field dry density: AS 1289.5.3.2 or AS 1289.5.3.5.
- Standard maximum dry density: AS 1289.5.1.1.
- Dry density ratio: AS 1289.5.4.1.
- Density index: AS 1289.5.6.1.

## 1.5 SUBMISSIONS

#### Safety and stability

General: If shuttering and/or bracing of the sides of a trench is required for safety and stability, provide proposals.

# 2 EXECUTION

## 2.1 EXCAVATING

#### **Existing surfaces**

General: Before excavating trenches, saw-cut existing concrete and bituminous surfaces on each side of the trench to provide a straight even joint. Lift and store unit paving for later reinstatement.

#### Excavation

General: Excavate for underground services:

- To required lines and levels, with uniform grades.
- Straight between personnel access ways, inspection points and junctions.
- With stable sides.

# Trench widths

General: Keep trench widths to the minimum consistent with the laying and bedding of the relevant service and construction of personnel access ways and pits.

## **Trench depths**

General: As required by the relevant service and its bedding method.

Adjacent to footings: If excavation is necessary below the zone of influence of the underside of adjacent footings, give notice, and provide support for the footings as instructed.

#### Obstructions

General: Clear trenches of sharp projections. Cut back roots encountered in trenches to at least 600 mm clear of services. Remove other obstructions including stumps and boulders which may interfere with services or bedding.

## Dewatering

General: Keep trenches free of water. Place bedding material, services and backfilling on firm ground free of surface water.

# **Excess excavation**

General: If trench excavation exceeds the correct depth, reinstate to the correct depth and bearing value using compacted bedding material or sand stabilised with 1 part of cement to 20 parts of sand by volume.

# 2.2 BORING

## Subcontractor

General: If under road boring is required in lieu of trenches, engage a suitably qualified subcontractor to do the work.

# Process

General: Ensure a tight fit to the service pipes. If voids are encountered, fill by pressure grouting.

## 2.3 BACKFILLING

# General

General: Backfill service trenches as soon as possible after the service has been laid and bedded, if possible on the same working day. Place the backfill in layers  $\leq$  150 mm thick and compact to the nominated density which applies to the location of the trenches as shown on the drawings or in conformance with the **Backfill density schedule**.

#### **Marking services**

Underground marking tape: To AS/NZS 2648.1.

## **Backfill material**

General: General fill with no stones greater than 25 mm occurring within 150 mm of the service, or other materials as required for particular services or locations. Well graded, inorganic, non-perishable material, maximum size 75 mm, plasticity index  $\leq$  55 %.

Under roads and paved areas and within 4 m of structures: Coarse sand, controlled low strength material or fine crushed rock.

In topsoil areas: Complete the backfilling with topsoil for at least the top 100 mm.

In reactive clay: In sites classified M, M-D, H, H-D or E to AS 2870, re-use excavated site material at a moisture content within  $\pm$  1% of that of the adjoining in situ clay.

# 2.4 REINSTATEMENT OF SURFACES

## General

General: Reinstate existing surfaces removed or disturbed by trench excavations to match existing and adjacent work.

## Lawn areas

General: Provide 150 mm of loam and resow the lawn over the trench and other disturbed areas.

## Concrete surfaces

General: Provide crushed rock base and subbase to match the existing pavement. Prime coat the cut edges of the existing surfaces with cement slurry. Lay and compact concrete so that the edges are flush and the centre is cambered 10 mm above the adjoining existing surfaces.

Minimum thickness: 75 mm or the adjacent pavement thickness, whichever is thicker.

Reinforcement and dowels: If required, provide steel reinforcement with dowels into the adjacent concrete.

Joints: Provide joints in locations to coincide with and detail to match joints in existing pavements.

Concrete strength: 25 MPa.

Curing: Cure by keeping continuously wet for 7 days.

#### **Bituminous surfaces**

General: Provide crushed rock base and subbase to match the existing pavement. Prime coat the edges of the existing surfacing with bitumen. Lay and compact hot-mix asphalt so that the edges are flush and the centre is cambered 10 mm above the existing pavement. If hot pre-mix is not available, cold pre-mix may be used.

Minimum asphalt thickness: 50 mm or the adjacent pavement thickness, whichever is thicker.

#### Segmental paving

General: Provide sand bedding and compacted crushed rock base, if required to match the existing construction. Reinstate the paving units.

# 0501 DEMOLITION (INTERIOR AND ALTERATIONS)

## 1 GENERAL

## 1.1 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

## 1.2 STANDARD

#### General

Demolition: To AS 2601.

## 1.3 INTERPRETATION

#### Definitions

For the purposes of this worksection, the following definitions apply:

- Demolition: The complete or partial dismantling of a building or structure, by pre-planned and controlled methods or procedures.
- Dilapidation record: The photographic or video and written record made before commencement of demolition work of the condition of the portion of the existing building being retained, adjacent buildings, and other relevant structures or facilities.
- Dismantle: The reduction of an item to its components in a manner to allow re-assembly.
- Recover: The disconnection and removal of an item in a manner to allow re-installation.

## 1.4 INSPECTION

## Notice

Inspection: Give notice so that inspection may be made of the following:

- Services before disconnection or diversion.
- Contents of building before commencement of demolition.
- Site after removal of demolished materials.
- Services after reconnection or diversion.

## 1.5 SUBMISSIONS

#### **Authorities**

Evidence of compliance: Before commencing demolition, submit evidence of the following:

- Requirements of authorities relating to the work under the contract have been ascertained.
- A permit to demolish has been obtained from the appropriate authority.
- Precautions necessary for protection of persons and property have been taken and suitable protective and safety devices provided to the approval of the relevant authority.
- Treatment for rodent infestation has been carried out and a certificate has been obtained from the appropriate authority.

- Fees and other costs have been paid.

## Investigation and work plan

Work plan: Submit the work plan before demolition or stripping work. Include the following information:

- Locations and details of necessary service deviations and terminations.
- If removal of asbestos or of material containing asbestos is required, the information specified in NOHSC 2002 Code of Practice for the Safe Removal of Asbestos. Include information to be supplied to the removalist clause 7.2.4, and information to be supplied by the removalist clause 7.3.

- To AS 2601 Section 2.

#### Records

Dilapidation record: Submit a copy of the dilapidation record for inspection.

#### Recycling

Delivery location: Submit the name and address of the proposed recycling facility.

## 2 PRODUCTS

## 2.1 DEMOLISHED MATERIALS

#### **Demolished materials**

Ownership: Ownership of demolished materials is described in the **Demolished materials classes table**.

#### **Demolished materials classes**

Ownership and implementation: Comply with the **Demolished materials classes table.** 

#### Demolished materials classes table

| Class   | Requirement   | Ownership            |
|---|---|----------------------|
| Recovered<br>items for re-<br>use in the<br>works   | Recover without<br>damage items<br>identified in the<br>Recovered items for<br>re-use in the works<br>schedule  | Principal/proprietor |
| Demolished<br>material for<br>recycling off<br>site | Demolish and deliver<br>for recycling material<br>identified in the<br>Demolished material<br>for recycling off-site<br>schedule  | Contractor           |
| Demolished<br>for removal                           | Remove from the site<br>demolished materials<br>identified in the<br><b>Demolish for</b><br><b>removal schedule</b> .<br>Do not burn or bury<br>on site<br>Transit: Prevent<br>spillage of<br>demolishing materials<br>in transit | Contractor           |

## 3 EXECUTION

## 3.1 SUPPORT

#### **Temporary support**

General: If temporary support is required, certification for its design and installation is required from a professional engineer engaged by the contractor.

Existing buildings: Until permanent support is provided, provide temporary support for sections of existing buildings which are to be altered and which normally rely for support on work to be demolished.

#### 3.2 PROTECTION

#### Encroachment

General: Prevent the encroachment of demolished materials onto adjoining property, including public places.

#### **Dust protection**

General: Provide dust-proof screens, bulkheads and covers to protect existing finishes and the immediate environment from dust and debris.

#### Security

General: If a wall or roof is opened for alterations and additions, provide security against unauthorised entry to the building.

#### **Temporary screens**

General: Fill the whole of designated temporary openings or other spaces using dust and weatherproof temporary screens, fixed securely to the existing structure, and install to ensure appropriate shedding of water to avoid damage to retained existing elements or adjacent structures and contents.

Type: Timber framed screens sheeted with fibre cement and painted. Seal the junctions between the screens and the openings.

#### Temporary access

General: Provide a substantial temporary doorset fitted with a rim deadlock, and remove on completion of demolition.

## 3.3 DEMOLITION

#### **Dilapidation record**

Purpose: Use the dilapidation record to assess the damage and making good arising out of demolition work.

Availability: Keep the records of the investigations on site and available for inspection until practical completion of the contract.

## **Concrete slabs**

General: Using a diamond saw, neatly cut back or trim to new alignment with a clean true face existing concrete slabs to be partially demolished or penetrated.

#### Explosives

General: Do not use explosives.

## 3.4 HAZARDOUS MATERIALS

#### General

General: Hazardous materials that have already been identified are set out in the **Identified** hazardous materials schedule.

#### Hazardous materials

General: Give notice immediately hazardous materials or conditions are found, including the following:

- Asbestos or material containing asbestos.
- Flammable or explosive liquids or gases.
- Toxic, infective or contaminated materials.
- Radiation or radioactive materials.
- Noxious or explosive chemicals.
- Tanks or other containers which have been used for storage of explosive, toxic, infective or contaminated substances.

#### Asbestos removal

Method: Use wet removal methods as recommended in the Code of Practice for the Removal of Asbestos (NOHSC 2002), including Part 4 for insulation and lagging, and Part 9 for asbestos cement.

Monitoring: Have dust monitoring performed by an independent testing authority.

## 3.5 COMPLETION

#### Notice of completion

General: Give at least 7 working days' notice of completion of demolition so that adjacent structures may be inspected following completion of demolition.

Making good: Make good any damage arising out of demolition work. Obtain written acceptance from the owner of each adjoining property of completeness and standard of making good.

## Temporary support

General: Clear away at completion of demolition.

## 0901 ELECTRICAL GENERAL REQUIREMENTS

#### GENERAL 1

#### 1.1 AIMS

#### Responsibilities

General: Provide electrical systems as documented.

#### 1.2 **CROSS REFERENCES**

#### General

General: Conform to the General requirements worksection.

#### Associated worksections

Associated worksections: Conform to the following:

- Adhesives, sealants and fasteners.
- Fire-stopping.
- Metals and prefinishes for off-site painting and electroplated or in-line galvanized finishes.
- Demolition.
- Service trenching.

#### Precedence

Technical worksections: The requirements of subsequent electrical services worksections of the specification override conflicting requirements in this worksection.

#### **STANDARDS** 1.3

#### General

General: To AS/NZS 3000 Part 2 unless otherwise documented.

Electrical systems: To AS/NZS 3008.1.1 and SAA HB 301.

Degrees of protection (IP code): To AS/NZS 60529. EMC: To AS/NZS 61000.

Telecommunications systems: To AS/ACIF S008, AS/ACIF S009, AS/NZS 3080, SAA HB 243 and SAA HB 29.

#### **INTERPRETATIONS** 14

#### Abbreviations

General: For the purposes of this contract the abbreviations given below apply.

- EMC: Electromagnetic compatibility.

- EMI: Electromagnetic interference.

#### Definitions

General: For the purposes of this contract the definitions given below apply:

- Accessible: Readily accessible to AS/NZS 3000.
- High level interface: Systems transfer information in a digital format using an open system interface.
- Hot-dip galvanized: Zinc coated to AS/NZS 4680 after fabrication with coating thickness and mass to AS/NZS 4680 Table 1.
  - . Metallic-coated: Steel coated with zinc or aluminium-zinc alloy as follows:

- . Metallic-coated steel sheet: To AS 1397. Metal thicknesses specified are base metal thicknesses.
- Ferrous open sections coated by an in-line process: To AS/NZS 4791.
- Ferrous hollow sections coated by a continuous or specialised process: To AS/NZS 4792.
- Industrial: IP56 to AS/NZS 60529.
- Low level interface: Systems transfer information via terminals and voltage free contacts.
- Weatherproof: IPX6 to AS/NZS 60529.

#### DRAWINGS AND MANUALS FOR 1.5 **EXISTING SERVICES**

#### General

General: No warranty is given as to the completeness or accuracy of drawings and/or manuals of existing services.

#### 1.6 SUBMISSIONS

#### General

Default timing: Make submissions  $\geq$  5 business days prior to the ordering of products for, or starting the installation of, the respective portions of the works. Drawings

## General: Minimum A1 drawing size.

Standard: To AS 1100 Parts 101 and 301, AS 1102 Parts 101, 102, 103, 106, 107, 108, and 111, and AS/NZS 3085.1 as applicable.

Building work drawings: Submit detailed dimensioned drawings showing all:

- Access doors and panels.
- Conduits to be cast in slabs.
- Holding down bolts and other anchorage and/or fixings required complete with loads to be imposed on the structure during installation and operation.
- Openings, penetrations and block-outs.
- Pipe sleeves.
- Plinths, kerbs and bases.
- Required external openings.

Services coordination: Coordinate with other building and service elements. Show adjusted positions on the shop and record drawings.

Space requirements: Check space requirements of equipment and services indicated diagrammatically in the contract documents.

## Execution details

General: Before starting the respective portions of the installation, submit the following:

- Embedded services: Proposed method for embedding services in concrete walls or floors or chasing into concrete or masonry walls.
- Fixing of services: Typical details of locations, types and methods of fixing of services to structure.
- Inaccessible services: If services will be enclosed and not accessible after completion, submit proposals for location of service runs and fittings.

#### Marking and labelling

General: Before marking and labelling submit:

- Samples of the proposed labels.
- A schedule showing, for each item or type of item:
- . A description of the item or type of item sufficient to identify it.
- . The proposed text of the marking or label
- . The proposed location of the marking or label.

#### **Building penetrations**

General: If it is proposed to penetrate or fix to the following, submit details of the methods proposed to maintain the required structural, fire and other properties:

- Structural building elements including external walls, fire walls, fire doors and access panels, other tested and rated assemblies or elements, floor slabs and beams.
- Membrane elements including damp-proof courses, waterproofing membranes and roof coverings. If penetrating membranes, provide a waterproof seal between the membrane and the penetrating component.

## **Technical data**

Data to be submitted: Include at least the following information in technical submissions:

- Assumptions.
- Calculations.
- Certification of compliance with the applicable code or standard.
- Design basis and performance parameters.
- Drawings.
- Installation and maintenance requirements.
- Manufacturers' technical literature.
- Risk assessment.
- Samples where relevant.
- Sketch, single line diagram, flowchart.
- Technical data schedules corresponding to the equipment schedules in the contract documents. If there is a discrepancy between the two, substantiate the change.

#### Certification

Submit certification that the plant and equipment submitted meets all requirements and capacities of the contract documents except for departures that are identified in the submission.

## 2 PRODUCTS

## 2.1 ACCESSORIES

#### General

Responsibilities: Provide accessories as documented.

Proprietary equipment: The requirements of this specification over-ride the specifications inherent in the selection of a particular make and model of accessory.

Uniformity: All accessories and outlets located in close proximity are to be the same manufacture, size, finish and material.

Default finish: To be selected from the manufacturers standard range.

## 3 EXECUTION

## 3.1 PERFORMANCE

#### General

Performance criteria: Meet the performance criteria as documented.

## 3.2 DEMOLITION

#### General

General: Decommission, isolate, demolish and remove from the site all existing redundant cables and equipment including minor associated components that become redundant as a result of the demolition.

Breaking down: Disassemble or cut up equipment where necessary to allow removal.

Recovered materials: Recover all components associated with the listed items. Minimise damage during removal and deliver to the locations scheduled.

## Demolished materials

**Demolished materials classes** 

Ownership and implementation: Comply with the **Demolished materials classes table**.

#### Demolished materials classes table

| Class  | Requirement   | Ownership            |  |
|--|---|----------------------|--|
| Recovered<br>items for re-<br>use in the<br>works      | Recover without<br>damage items<br>identified in the<br>Recovered items for<br>re-use in the works<br>schedule  | Principal/Proprietor |  |
| Recovered<br>items for<br>delivery to the<br>principal | Recover items<br>identified in the<br>Recovered items for<br>delivery to the<br>principal schedule  | Principal/Proprietor |  |
| Demolished<br>for removal                              | Remove from the site<br>demolished materials<br>identified in the<br><b>Demolish for</b><br><b>removal schedule</b> .<br>Do not burn or bury<br>on site<br>Transit: Prevent<br>spillage of<br>demolishing materials<br>in transit | Contractor           |  |

## **Re-used components**

General: Clean re-used components and test for compliance with current Australian Standards before returning to service. Provide results of compliance tests.

## 3.3 WORK ON EXISTING SYSTEMS

#### General

General: Before starting work on existing systems, measure existing conditions. Submit the results for information.

- If the existing conditions are less than necessary to meet the requirements in the contract

documents, submit proposals to rectify the deficiencies with related costing, time and other impacts.

- Subject to the results from the preceding work on existing systems, achieve the performance in the contract documents.

## 3.4 SERVICES CONNECTIONS

#### Connections

General: Connect to network distributor services or service points. Excavate to locate and expose connection points. On completion reinstate the surfaces and facilities that have been disturbed.

#### Network distributors' requirements

General: If the network distributor elects to perform or supply part of the works, make the necessary arrangements. Install equipment supplied, but not installed, by the authorities.

#### 3.5 INSTALLATION

#### General

Fixing: If non-structural building elements are not suitable for fixing equipment and services to, fix directly to structure and trim around holes or penetrations in non-structural elements.

Installation: Install equipment and services plumb, fix securely and organise reticulated services neatly. Allow for movement in both structure and services.

Concealment: Conceal all cables, ducts, trays, pipes etc. unless installed in plant spaces, ceilings, riser cupboards, etc. or unless otherwise documented. If possible, do not locate on external walls.

Lifting: Provide heavy items of equipment with permanent fixtures for lifting as recommended by the manufacturer.

Suspended ground floors: Keep all parts of services under suspended ground floors > 150 mm clear of the ground surface. Make sure services do not impede access.

Arrangement: Arrange services so that services running together are parallel with each other and with adjacent building elements.

## Cable systems

Systems: Provide the following:

- Inaccessible concealed spaces: Cable in UPVC conduit.
- Face, plastered or rendered masonry surfaces: Cable in UPVC conduit.
- Walls filled with bulk thermal insulation: Cables in PVC conduit.
- Plant rooms: Cable in heavy duty UPVC conduit, or on tray or in duct.

#### Installation of accessories

General: Unless installed on purpose built ductwork. Install accessories in conformance with the Installation of accessories table.

Location: Final location of all outlets and equipment to be confirmed on site prior to installation.

Spacing from adjacent horizontal surface:  $\geq$  75 mm to the centre of accessory socket.

Default mounting heights to centre of accessory plate:

| Outlets               | 300 mm  |
|-----------------------|---------|
| Switches and controls | 1100 mm |

Flush mounting: Provide flush mounted accessories except in plant rooms.

Common face plates: Mount adjacent flush mounted accessories under a common faceplate.

Restricted location: Do not install wall boxes across junctions of wall finishes.

Surface mounting: Proprietary mounting blocks.

## Installation of accessories table

| Wall construction                  | Installation and concealed<br>cabling facilities   |
|------------------------------------|--|
| Rendered masonry partition         | Flush wall box with conduit<br>chased into wall  |
| Double sided face brick partition  | Vertically mounted flush wall box<br>with conduit concealed in cut<br>bricks   |
| Face brick external<br>cavity wall | Flush wall box with thermoplastic<br>insulated cables in conduit run in<br>cavity and tied against inner brick<br>surface, or thermoplastic<br>sheathed cables run in cavity |
| Stud partition                     | Flush plate secured to proprietary<br>support bracket or wall box  |

#### Installation of ceiling mounted appliances

Connections: Appliances: Provide flush mounted outlets on the ceiling next to support brackets.

Mounting: Mount appliances independent of ceiling tiles and suspended ceiling material.

Connections: Fixed equipment: Provide concealed permanent connections.

Fixing: For equipment and appliances heavier than 30 kg provide support through the suspended ceiling to the building structure. Brace appliances that have excessive bending moments, are heavy or vibrate, to prevent horizontal movement.

#### **Differential movement**

General: If the geotechnical site investigation report predicts differential movements between buildings and the ground in which conduits are buried, provide movement control joints in the conduits.

- Location: Adjacent to the conduit supports which are closest to the perimeter of the building.
- Arrangement: Arrange conduits to minimise the number of movement control joints.
- Magnitude: Accommodate the predicted movements.

## 3.6 BUILDING PENETRATIONS

#### Penetrations

Fire rated building elements: Seal penetrations with a system conforming to AS 4072.1.

Non-fire rated building elements: Seal penetrations around conduits and sleeves. Seal around cables within sleeves. If the building element is acoustically rated, maintain the rating.

#### Sleeves

General: If piping or conduit penetrates building elements, provide metal or UPVC sleeves formed from pipe sections as follows:

- Movement: Arrange to permit normal pipe or conduit movement.
- Diameter (for non fire-rated building elements): Sufficient to provide an annular space around the pipe or pipe insulation of at least 12 mm.
- Prime paint ferrous surfaces.
- Terminations:
- . If cover plates are fitted: Flush with the finished building surface.
- . In fire-rated and acoustic-rated building elements: 50 mm beyond finished building surface.
- . In floors draining to floor wastes: 50 mm above finished floor.
- . Elsewhere: 5 mm beyond finished building surface.
- Termite management: To AS 3660.1.
- Thickness:
  - . Metal: ≥ 1 mm.
  - . UPVC: ≥ 3 mm.

#### Sleeves for cables

General: For penetrations of cables not enclosed in conduit through ground floor slabs, beams and external walls provide sleeves formed from UPVC pipe sections.

- MIMS cables: Provide sleeves for penetrations through masonry.

## 3.7 CONCRETE PLINTHS

## Construction

- Concrete: Grade N20.
- Finish: Steel float flush with the surround.
- Reinforcement: Single layer of F62 fabric.
- Surround: Provide galvanized steel surround at least 75 mm high and 1.6 mm thick. Fix to the floor with masonry anchors. Fill with concrete.

## 3.8 PLANT AND EQUIPMENT ACCESS

#### General

Services and equipment: Locate and arrange all services and equipment so that:

- They comply with the relevant requirements of the appropriate Occupational Health and Safety regulations.
- Failure of plant and equipment (including leaks) does not create a hazard for the building occupants.
- Failure of plant and equipment (including leaks) cause a minimum or no damage to the building, its finishes and contents.
- Inspection and maintenance operations can be arranged to minimise inconvenience and disruption to building occupants or damage to the building structure or finishes.
- Services and equipment are readily accessible for inspection and maintenance and arranged so that

inspection and maintenance can be carried out in a safe and efficient manner. Include the following:

- . Conform to the relevant requirements of AS 1470, AS 1657, AS/NZS 1892.1 and AS/NZS 2865.
- . If parts of the plant require regular inspection and maintenance either locate plant so it is safely accessible from floor level or provide permanent access platforms and ladders.
- . In false ceilings locate items of equipment that require inspection and maintenance above tiled parts where possible. If this is not possible (for example if above set plaster or other inaccessible ceilings) provide access panels. Arrange services and plant locations to reduce the number of access panels. Coordinate with other trades to use common access panels where feasible.
- . Modify manufacturer's standard equipment when necessary to provide the plant access in the contract documents.

## 3.9 SEISMIC RESTRAINT

#### Provisions

General: Arrange all components, other than service items exempted in AS 1170.4, to resist seismic loads determined in accordance with AS 1170.4. Securely fix all plant and equipment to the building structure. Do not rely on gravity and/or friction to resist seismic forces.

Anti-vibration mounts: Use horizontally restrained type.

Components: Do not use components that will be damaged by earthquake conditions. Protect systems against the adverse effects of components such as mercury switches that, although not damaged by earthquake, may malfunction.

## 3.10 PAINTING AND FINISHES

#### General

General: If exposed to view (including in plant rooms) paint new services and equipment.

Surfaces painted or finished off-site: Conform to *Metals and prefinishes.* 

Exceptions: Do not paint chromium or nickel plating, anodised aluminium, GRP, stainless steel, nonmetallic flexible materials and normally lubricated machined surfaces. Surfaces with finishes applied off-site need not be re-painted on-site provided the corrosion resistance of the finish is not less than that of the respective finish in this clause.

#### Standard

General: Conform to the recommendations of AS/NZS 2311 Sections 3, 6 and 7 or AS/NZS 2312 Sections 5, 8 and 10, as applicable.

#### Low VOC emitting paints

Provide the following low odour/low environmental impact paint types with the following VOC limits:

- Primers and undercoats: < 5 g/litre.
- Low gloss white or light coloured latex paints for broadwall areas: < 5 g/litre.
- Coloured low gloss latex paints: < 85 g/litre.

- Gloss latex paints: < 90 g/litre.

## **Painting systems**

New unpainted interior surfaces: To AS/NZS 2311 Table 5.1.

New unpainted exterior surfaces: To AS/NZS 2311 Table 5.2.

#### Paint application

Coats: Apply the first coat immediately after substrate preparation and before contamination of the substrate can occur. Ensure each coat of paint or clear finish is uniform in colour, gloss, thickness and texture and free of runs, sags, blisters or other discontinuities.

Combinations: Do not combine paints from different manufacturers in a paint system.

Protection: Remove fixtures before starting to paint and refix in position undamaged on completion.

## 3.11 MARKING AND LABELLING

#### General

General: Mark services and equipment to provide a ready means of identification.

- Locations exposed to weather: Provide durable materials.
- Pipes, conduits and ducts: Identify and label to AS 1345.
- Cables: Label at each end to indicate the origin and destination of the cable.

Consistency: Label and mark equipment using a consistent scheme across all services elements of the project.

Operating and maintenance manuals: Provide marking an labelling text identical to the text and terminology used in operating and maintenance manuals.

#### Accessories

Label isolating switches and outlets to identify circuit origin.

## Labels and notices

General: Select from the following materials:

- Cast metal.
- For indoor applications only, engraved two-colour laminated plastic.
- Proprietary pre-printed self-adhesive flexible plastic labels.
- Stainless steel or brass ≥ 1 mm thick with black filled engraved lettering.

Emergency functions: To AS 1319.

Colours: Generally in conformance with AS 1345 as appropriate, otherwise black lettering on white background except as follows.

- Danger, warning labels: White lettering on red background.
- Main switch and caution labels: Red lettering on white background.

Edges: If labels exceed 1.5 mm thickness, radius or bevel the edges.

Fixing: Fix labels securely using screws, rivets, proprietary self-adhesive labels or double-sided adhesive tape.

- If labels are mounted in extruded aluminium sections, use rivets or countersunk screws to fix the extrusions.
- Use aluminium or monel rivets for aluminium labels.

Label locations: Locate labels so that they are easily seen and are either attached to, below or next to the item being marked.

Label text: To correspond to terminology and identifying number of the respective item as shown on the record drawings and documents.

#### Lettering heights:

- Danger, warning and caution notices: ≥ 10 mm for main heading, ≥ 5 mm for remainder.
- Equipment labels within cabinets: ≥ 3.5 mm.
- Identifying labels on outside of cabinets: ≥ 5 mm.
- Other locations: ≥ 3 mm.

Operable devices: Mark to provide a ready means of identification. Include the following:

- Controls.
- Indicators, gauges, meters and the like.
- Isolating switches.
- Outlets.

#### **Underground cable routes**

Survey: Accurately record the routes of underground cables before backfilling. Include on the record drawings.

Records: Provide digital photographic records of underground cable routes before backfilling. Include in operation and maintenance manual.

Location marking: Accurately mark the location of underground cables with route markers consisting of a marker plate set flush in a concrete base.

Markers: Place markers at each joint, route junction, change of direction, termination and building entry point and in straight runs at intervals of not more than 100 m.

Marker bases: 200 mm diameter x 200 mm deep, minimum concrete.

Direction marking: Show the direction of the cable run by means of direction arrows on the marker plate. Indicate distance to the next marker.

Plates: Brass, aluminium or mild steel hot-dipped galvanized, minimum size  $75 \times 75 \times 1$  mm thick.

Plate fixing: Waterproof adhesive and 4 brass or stainless steel countersunk screws.

Marker height: Set the marker plate flush with paved surfaces, and 25 mm above other surfaces.

Marker tape: Where electric bricks or covers are not provided over underground wiring, provide a 150 mm wide yellow or orange marker tape bearing the words '*WARNING – electric cable buried below*', laid in the trench 150 mm below ground level.

# 3.12 OPERATION AND MAINTENANCE MANUALS

#### Additional information

General: Provide maintenance manuals including the following in addition to that specified in the *General requirements* worksection:

- Installation description: General description of the installation.
- Systems descriptions: Technical description of the systems installed, written to ensure that the principal's staff fully understand the scope and facilities provided. Identify function, normal operating characteristics, and limiting conditions.
- Systems performance: Technical description of the mode of operation of the systems installed.
- Equipment descriptions:
- . Manufacturers' technical literature for equipment installed, assembled specifically for the project, excluding irrelevant matter. Mark each product data sheet to clearly identify specific products and component parts used in the installation, and data applicable to the installation.
- . Supplements to product data to illustrate relations of component parts. Include typed text as necessary.
- Operation procedures:
- . Safe starting up, running in, operating and shutting down procedures for systems installed. Include logical step-by-step sequence of instructions for each procedure.
- . Control sequences and flow diagrams for systems installed.
- . Legend for colour-coded services.
- . Schedules of fixed and variable equipment settings established during commissioning and maintenance.
- Maintenance procedures:
  - . Schedule of normal consumable items, local sources of supply, and expected replacement intervals up to a running time of 40 000 hours. Include lubricant and lubrication schedules for equipment.
  - . Instructions for use of tools and testing equipment.
  - . Emergency procedures, including telephone numbers for emergency services, and procedures for fault finding.
  - Material safety data sheets (MSDS).
- Certificates:
  - . Copies of test certificates for the installation and equipment used in the installation.
- . Test reports.
- Drawings:
  - . Single line diagrams.
- . Service route layouts.
- . Switchgear and controlgear assembly circuit schedules including electrical service characteristics, controls and communications.

## 3.13 RECORD DRAWINGS

#### General

General: Show dimensions, types and location of the services in relation to permanent site features and other underground services. Show the spatial relationship to building structure and other services. Include all changes made during commissioning and the maintenance period.

Drawings: Include all documented shop drawings.

Extensions and/or changes to existing: If a drawing shows extensions and/or alterations to existing installations, include sufficient of the existing installation to make the drawing comprehensible without reference to drawings of the original installation.

## 3.14 TOOLS AND SPARE PARTS

#### Tools and spare parts schedule

General: At least 8 weeks before the date for practical completion, submit a schedule of tools, portable instruments and spare parts necessary for maintenance of the installation. For each item state the recommended quantity and the manufacturer's current price. Include the following in the prices:

- Checking receipt, marking and numbering in accordance with the spare parts schedule.
- Packaging and delivery to site.
- Painting, greasing and packing to prevent deterioration during storage.
- Referencing equipment schedules in the operation and maintenance manuals.
- Suitable means of identifying, storing and securing the tools and instruments. Include instructions for use.

#### Spares

General: Provide spare parts listed in the appropriate worksections.

Replacement: Replace spare parts consumed during the maintenance period.

## 3.15 COMMISSIONING

#### **Circuit protection**

General: Confirm that circuit protective devices are sized and adjusted to protect installed circuits.

#### Controls

General: Calibrate, set and adjust control instruments, control systems and safety controls.

## Notice

General: Give sufficient notice for inspection to be made of the commissioning of the installation.

## Reports

General: Submit reports indicating observations and results of tests and compliance or non-compliance with requirements.

## 3.16 CLEANING

#### General

Practical completion: At practical completion, clean the following:

- Insides of switchgear and controlgear assemblies.
- Luminaires.
- Switchgear and contactors, and other electrical contacts. Adjust as necessary.

#### 3.17 COMPLETION TESTS

#### General

General: Test the works under the contract to demonstrate compliance with the documented performance requirements.

#### Functional checks

General: Carry out functional and operational checks on energised equipment and circuits and make final adjustments for the correct operation of safety devices and control functions.

#### **Proprietary equipment**

General: Submit type test reports confirming compliance of proprietary equipment.

#### Sound pressure level measurements

Correction for background noise: To AS/NZS 2107 Table B1.

External: To AS 1055.1.

Internal: To AS/NZS 2107.

Measurement positions: If a test position is designated only by reference to a room or space, do not take measurements less than 1 m from the floor, ground or walls.

Sound pressure level analysis: Measure the sound pressure level and the background sound pressure level over the full range of octave band centre frequencies from 31.5 Hz to 8 kHz at the designated positions.

Sound pressure levels: Measure the A-weighted sound pressure levels and the A-weighted background sound pressure levels at the designated positions.

#### Test instruments

General: Use instruments calibrated by a registered testing authority.

#### 3.18 TRAINING

#### General

Duration: Instruction to be available for the whole of the commissioning and running-in periods.

Format: Conduct training at agreed times, at system or equipment location. Also provide seminar instruction to cover all major components.

Operation and maintenance manuals: Use items and procedures listed in the final draft operation and maintenance manuals as the basis for instruction. Review contents in detail with the principal's staff.

Certification: Provide written certification of attendance and participation in training for each attendee. Provide register of certificates issued.

### Demonstrators

General: Use only qualified manufacturer's representatives who are knowledgeable about the installations.

#### Maintenance

General: Explain and demonstrate to the principal's staff the purpose, function and maintenance of the installations.

## Operation

General: Explain and demonstrate to the principal's staff the purpose, function and operation of the installations.

#### 3.19 MAINTENANCE

#### General

General: During the maintenance and defects liability periods, carry out periodic inspections and maintenance work as recommended by manufacturers of supplied equipment, and promptly rectify faults.

Emergencies: Attend emergency calls promptly.

#### Maintenance program

General: Submit details of maintenance procedures and program, relating to installed plant and equipment, 6 weeks before the date for practical completion. Indicate dates of service visits. State contact telephone numbers of service operators and describe arrangements for emergency calls.

#### Maintenance records

General: Submit, in binders which match the manuals, loose leaf log book pages designed for recording completion activities including operational and maintenance procedures, materials used, test results, comments for future maintenance actions and notes covering the condition of the installation. Include completed log book pages recording the operational and maintenance activities performed up to the time of practical completion.

Certificates: Include test and approval certificates.

Certification: On satisfactory completion of the installation, submit certificates stating that each installation is operating correctly.

Number of pages: The greater of 100 pages or enough pages for the maintenance period and a further 12 months.

Referenced documents: If referenced documents or technical worksection s require that log books or records be submitted, include this material in the maintenance records.

Service visits: Record comments on the functioning of the systems, work carried out, items requiring corrective action, adjustments made and name of service operator. Obtain the signature of the principal's designated representative.

#### Site control

General: Report to the principal's designated representative on arriving at and before leaving the site.

## 0902 ELECTRICAL DESIGN AND INSTALL

#### 1 GENERAL

## 1.1 AIMS

#### Responsibilities

General: Provide electrical systems as documented.

## Qualification

General: Use only persons appropriately experienced and qualified to undertake the electrical design work on the systems documented.

#### Performance

General: Carry out verification tests and measurements to show compliance with the documentation.

## 1.2 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

#### 1.3 STANDARDS

#### General

General: To AS/NZS 3000 Part 2 unless otherwise documented.

Electrical systems: To AS/NZS 3008.1.1 and SAA HB 301.

Degrees of protection (IP code): To AS/NZS 60529. EMC: To AS/NZS 61000.

Telecommunications systems: To AS/ACIF S008, AS/ACIF S009, AS/NZS 3080, SAA HB 243 and SAA HB 29.

## 2 EXECUTION

## 2.1 GENERAL

#### General

Arrangement: Arrange services so that services running together are parallel with each other and with adjacent building elements.

Fixing: If non-structural building elements are not suitable for fixing equipment and services to, fix directly to structure and trim around holes or penetrations in non-structural elements.

Installation: Install equipment and services plumb, fix securely and organise reticulated services neatly. Allow for movement in both structure and services.

Lifting: Provide heavy items of equipment with permanent fixtures for lifting as recommended by the manufacturer.

Suspended ground floors: Keep all parts of services under suspended ground floors > 150 mm clear of the ground surface. Make sure services do not impede access.

#### Submissions

Samples: Provide samples of all accessories and luminaires.

Technical data: Submit documentation to fully describe the proposed installation.

## Installation of accessories

General: Unless installed on purpose built ductwork. Install accessories in conformance with the Installation of accessories table.

Location: Final location of all outlets and equipment to be confirmed on site prior to installation.

Spacing from adjacent horizontal surface:  $\geq$  75 mm to the centre of accessory socket.

Default mounting heights to centre of accessory plate:

| Outlets               | 300 mm  |
|-----------------------|---------|
| Switches and controls | 1100 mm |

Flush mounting: Provide flush mounted accessories except in plant rooms.

Common face plates: Mount adjacent flush mounted accessories under a common faceplate.

Restricted location: Do not install wall boxes across junctions of wall finishes.

Surface mounting: Proprietary mounting blocks.

## Installation of accessories table

| Wall construction                  | Installation and concealed<br>cabling facilities   |
|------------------------------------|--|
| Rendered masonry partition         | Flush wall box with conduit<br>chased into wall  |
| Double sided face brick partition  | Vertically mounted flush wall box<br>with conduit concealed in cut<br>bricks   |
| Face brick external<br>cavity wall | Flush wall box with thermoplastic<br>insulated cables in conduit run in<br>cavity and tied against inner brick<br>surface, or thermoplastic<br>sheathed cables run in cavity |
| Stud partition                     | Flush plate secured to proprietary<br>support bracket or wall box  |

#### Installation of ceiling mounted appliances

Connections: Appliances: Provide flush mounted outlets on the ceiling next to support brackets.

Mounting: Mount appliances independent of ceiling tiles and suspended ceiling material.

Connections: Fixed equipment: Provide concealed permanent connections.

Fixing: For equipment and appliances heavier than 30 kg provide support through the suspended ceiling to the building structure. Brace appliances that have excessive bending moments, are heavy or vibrate, to prevent horizontal movement.

#### Manuals

General: Conform to the **Operation and maintenance manuals** clause in *General requirements*.

## Certification

General: Submit certification that the plant and equipment submitted meets all requirements and

capacities of the contract documents except for departures that are identified in the submission.

## 2.2 LOW VOLTAGE POWER SYSTEMS

#### General

General: Provide a complete operational low voltage power system, comprising the following and as documented:

- Supply from network distributor.
- Metering.
- Consumers mains.
- Submains.
- Final subcircuits.

#### Submissions

Technical data: Submit documentation to fully describe the proposed installation. As a minimum provide:

- Single line diagram(s).
- Fault levels at switchboards.
- Maximum demand calculations.
- Cable and conductor cross sectional area and insulation type.
- Submain cable routes and support or enclosure method.
- Switchboard cupboard layouts including risers.
- Busduct systems including routes, dimensions and connection details.
- Certify compliance with AS/NZS 3000, for electrical services.

#### Accessories

General: Provide the following and as documented:

- General power outlets.
- Isolating switches.
- Three phase outlets.

#### Wiring systems

Standard: To AS/NZS 3013.

Selection: Provide wiring systems appropriate to the installation conditions and the function of the load. Thermal insulation: In walls filled with thermal

insulation, install cables in PVC conduit.

## Power cables

General: Copper cable generally, multi-stranded except for MIMS.

Minimum size:

- Lighting subcircuits: 1.5 mm<sup>2</sup>.
- Power subcircuits: 2.5 mm<sup>2</sup>.
- Submains: 6 mm<sup>2</sup>.

Voltage drop: Install final subcircuit cables within the voltage drop parameters dictated by the route length and load.

Fault loop impedance: Provide final subcircuit cables selected to satisfy the requirements for automatic disconnection under short-circuit and earth fault/touch voltage conditions.

#### **Dummy load tests**

General: Where electrical tests are required and the actual load is not available, provide a dummy load equal to at least 75% of the design load.

## 2.3 SWITCHBOARDS

#### General

General: Provide proprietary switchboards to the following and as documented:

- Main switchboard.
- Distribution boards.

Rated short-circuit currents: Design for the maximum prospective symmetrical r.m.s. current values at rated operational voltage, at each assembly incoming supply terminal, excluding effects of current limiting devices.

## Standards

Standard: To AS/NZS 3439.1 and AS/NZS 3439.3.

#### Statutory authority's equipment

General: Refer to network distributor service rules to determine their requirements. Install equipment supplied by the network distributor, and provide wiring to complete the installation.

#### Rated short-circuit currents

General: The rated fault capacity of the assembly enclosure, busbars and outgoing protective devices is equal to the fault level of the system at the assembly.

## Busbars

General: Incorporate proprietary insulated busbar systems for the interconnection of isolators, circuit breakers and other circuit protective devices.

## Earthing

General: Make provision for connection of communications systems CET at switchboard earth bar to AS/ACIF S009.

## Doors

General: Provide lockable doors with a circuit card holder unless enclosed in cupboards or in an area which is not readily accessible to the public.

## IP rating

General: IP52 minimum. Weatherproof: IP56 minimum.

## Finishes

Interior: White.

Exterior: Manufacturers standard finish.

#### Supporting structure

General: Wall mounted for proprietary switchboards. Floor mounted: Assemblies >  $2 \text{ m}^2$ .

## Ventilation

General: Required to maintain design operating temperatures at full load.

## 2.4 SWITCHBOARD COMPONENTS

#### **Protective devices**

General: Select and adjust protective devices to grade and coordinate for overcurrent, and earth faults.

# Switch-isolator and combination fuse-switch units

Standard: To AS/NZS 60947.1 and AS/NZS 3947.3. Rated current: To suit unit installed in enclosure.

Rated fault capacity: Provide units selected for short-circuit making capacity that is at least the fault level at assembly incoming terminals.

Breaking capacity: At least the rated full load current.

Rated duty: Uninterrupted in non-ventilated enclosure.

Operation: Independent manual operation including positive 'ON/OFF indicator.

Locking: Provide for padlocking in the 'OFF position.

Handles: Removable only when switch is in open position.

Fuse links: Isolated when switch contacts are open.

**Moulded case and miniature circuit breakers** Moulded case breakers: To AS/NZS 60947.1, AS 2184 and AS 60947.2.

Miniature circuit breakers: To AS/NZS 60898.1 or AS 3111.

Trip type:

- Moulded case breakers: adjustable thermal, fixed magnetic.
- Miniature circuit breakers: Fixed thermal, fixed magnetic.

Current limiting: Moulded case breakers: required.

Fault capacity  $\geq$  10 kA: To AS 60947.2 and AS/NZS 60947.1.

Fault capacity < 10 kA, current rating < 100 A: Miniature overcurrent circuit breakers to AS/NZS 60898.1 or AS 3111

Mounting: Mount circuit breakers so that the 'ON/OFF and current rating indications are clearly visible with covers or escutcheons in position. Align operating toggles of each circuit breaker in the same plane.

Clip tray chassis: For miniature overcurrent circuit breakers provide clip tray assemblies capable of accepting single, double, or triple circuit breakers, and related busbars. Provide moulded clip-on pole fillers for unused portions.

#### **Residual current devices**

Integral type: Incorporate earth leakage in circuit breaker protection operation. To AS/NZS 61009.1.

# Maximum tripping current: 30 mA.

Fuses with enclosed fuse links Standards: To AS/NZS 60269.1, AS/NZS 60269.2.0 and AS/NZS 60269.2.1.

Fault level: Provide fuses suitable for the fault level at the assembly, and which discriminate with other protective equipment.

Let-through energy and peak cut-off current: To suit protected equipment.

Utilisation category: Distribution/general purpose: gG.

Fuse-holders: Mount fuse-holders so that fuse carriers may be withdrawn directly towards the operator and away from live parts. Provide fixed insulation which shrouds live metal when the fuse carrier is withdrawn.

Barriers: Provide barriers on both sides of each fuse link, preventing inadvertent electrical contact between phases by the insertion of screwdriver.

Fuse links: Enclosed, high rupturing capacity type mounted in a fuse carrier. If necessary for safe removal and insertion of the fuse carrier, provide extraction handles. Mount on clips within the spares cabinet.

Identification: Clearly indicate Australian manufacturer or distributor.

## Contactors

Standard: To AS/NZS 60947.4.1.

Rated operational current: Full load current of the load controlled.

Minimum rating: 16 A.

Contacts life: 1 million operations at AC-3 or DC-3.

Mounting: Mount with sufficient clearance to allow full access for maintenance, removal and replacement of coils and contacts, without the need to disconnect wiring or remove other equipment.

Auxiliary contacts: Provide auxiliary contacts with at least one normally-open and one normally-closed separate contacts with rating of 6 A at 230 V a.c.

Interconnection: Do not connect contactors in series or parallel to achieve ratings.

## 2.5 LIGHTING

## General

General: Provide a complete operational lighting system, tested and commissioned.

Interior lighting standard: To AS/NZS 1680 Parts 0, 2.4 and 2.5, and AS 1680 Parts 1, 2.1, 2.2, 2.3 and 3.

Exterior lighting standard: To AS/NZS 1158 Parts 0, 1.1, 1.3 and 3.1, and AS 1158 Parts 2 and 4.

Proprietary equipment: Provide only proprietary luminaires, fittings and accessories.

Modifications and refurbishing: Carry out to the original manufacturer's standards.

## Minimum energy performance standards

General: To AS/NZS 4783.2 and AS/NZS 4782.2.

Lamps: Provide all luminaires complete with lamps and accessories.

Verify operation: Install lamps in all luminaries and verify correct operation before completion Standards:

- Fluorescent: To AS 4782.1.
- Incandescent: To AS 2325.
- Tungsten halogen: To IEC 60357.

Low voltage lamps: Provide lamps strictly in accordance with the luminaire manufacturer's recommendation.

Dichroic lamps: Provide dichroic lamps with integral reflector.

## Lighting control system

General: Provide the following as documented:

- Lighting switches.
- Dimmers.
- Automatic control systems.

Documentation: Provide complete technical and operational documentation for the lighting control system.

#### Installation

Supports: Mount luminaires on proprietary supports by means of battens, trims, noggings, roses or packing material to suit location.

#### Completion

General: Verify the operation of all luminaires. Replace lamps which have been in service for a period > 50% of the lamp life as published by the lamp manufacturer.

#### 2.6 EMERGENCY EVACUATION LIGHTING

#### General

General: Provide a complete operational monitored, emergency evacuation lighting system, tested and commissioned in accordance with AS/NZS 2293 and as documented.

#### Single-point system luminaires

Visual indicator lights: Provide a red indicator, readily visible when the luminaire is in its operating location, which indicates that the battery is being charged.

Inverter system: Provide protection of the inverter system against damage in the event of failure, removal or replacement of the lamp, while in normal operation.

Local test switches: Provide a momentary action test switch, accessible from below the ceiling, on each luminaire to temporarily disconnect the mains supply and connect the battery to the lamp.

Common test switches: Provide a common test switch on the distribution board which disconnects main supply to the luminaries and tests for discharge performance, after testing, this switch must automatically revert to normal operating mode.

## Monitored system

Data connection: Provide internal monitoring facilities and provision for the connection of data cabling to a central monitoring computer where required for this project.

Proprietary systems: Use only proprietary systems with full compatibility between the monitoring system, operating software, and the luminaries selected.

#### Batteries

Type: Lead-acid or nickel-cadmium batteries capable of operating each lamp at its rated output continuously at least 2 hours during completion tests and 1.5 hours during subsequent tests.

Battery life: At least 3 years when operating under normal conditions at an ambient temperature of 25°C and subjected to charging and discharging at 6 monthly intervals.

Marking: Indelibly mark each battery with its date of manufacture.

## Power supply to single-point systems

General: Provide an unswitched active supply to each luminaire and exit sign, originating from the test switch control panel.

## Data monitoring for single-point systems

General: Provide a data cable system from each single-point luminaire connected to the monitoring computer.

## 2.7 TELECOMMUNICATIONS CABLING

#### General

General: Provide a complete operational telecommunications cabling system, tested and commissioned in accordance with AS/NZS 3080, AS/ACIF S009, SAA HB 29 and as appropriate SAA HB 252.

Accomodation: Provide accommodation for telecommunications cabling infrastructure complying with AS/NZS 3084 including the detailed requirements of Appendix ZA, ZB and ZC. Include the following as documented:

- Building distributor.
- Backbone cabling.
- Floor distributors.
- Consolidation points.
- Horizontal cabling.
- Telecommunications outlets.
- Fly leads.

#### System requirements

Application class to AS/NZS 3080 clause 6.3: E. Balanced system to AS/NZS 3080 clause 7 (data): Category 6.

Balanced system to AS/NZS 3080 clause 7 (voice): Category 6.

Conformance: Certify the design and installation for conformance with AS/NZS 3080 in accordance with the detailed requirements of clause 4.

System warranty: Warrant the specified

communications cabling performance for a minimum of 15 years.

## Equipment racks

Type: 19 inch rack.

Free standing racks: Provide adjustable feet.

## Modular connector patch panels

Terminations: Terminate directly to the modular connector.

Patch cords: Terminate cord ends with appropriate registered jacks.

#### **Optical fibre termination panels**

Break out trays: Provide fibre optic cable break out trays at each group of fibre optic cable terminations.

Loom cables: Neatly loom cables and lay stripped cables into the break out tray.

Secure cables: Ensure that cables are secured by the sheath and that there is no stress on the fibre optic cores.

#### Patch cords

General: Provide terminated patch cords for 100% of the total incoming and outgoing ports used.

#### Records

Record book: Provide a record book at each cross connect.

Records in pencil: Complete the records in pencil for each termination and jumper, providing origin and destination and type of service.

Location: Secure log books in each distribution frame records holder.

Identification and labelling, and record documentation: To AS/NZS 3085.1.

#### **Cable separation**

Low voltage cables: Separate telecommunications cables not enclosed in conduits or ducts from low voltage services by at least 150 mm.

Electromagnetic interference (EMI): Provide clearance to minimise the effect of EMI where communications cables are installed parallel and adjacent to power cables carrying loads in excess of 200 A.

## Installation

Crossover: Install cables neatly and without crossovers between cables.

Loom size: Loom cables into groups not exceeding 50 cables, and hold looms in place using reusable cable ties at least 20 mm wide. Do not exert compressive force on the cables when installing cable straps.

#### **Telecommunications outlets**

Outlets: Provide RJ45 8 way modular jacks except where documented otherwise.

Pinouts: The pinouts vary with the application. Determine required pinouts before making cable terminations.

#### Fly leads

General: Provide fly leads to 50% of the outlets installed.

#### Earthing system

Communication earth system (CES): Provide a communications earth terminal (CET) associated with the local protective earth (PE) system adjacent to each electrical distribution board.

## 2.8 AUTOMATIC FIRE DETECTION

#### General

General: Provide a fully operational, system, tested and commissioned in accordance with the AS 1670 series and AS 7240.

General: Provide equipment listed in the CSIRO CMSE ActivFire Register of Fire Protection Equipment.

## Base station monitoring system connection

Standard: To AS 7240.21.

Connection: Connect the installation to the fire alarm monitoring base station via telecommunications carrier lines.

## Installation wiring

Conductor size:  $\geq$  1.5 mm<sup>2</sup> TPI 230 V rated, with red and white insulation.

Sheathing: Red.

## Control and indicating equipment

General: To AS 7240.2.

Air-handling fire mode control panels: To AS 4428.7.

Alarm investigation facility (AIF): To AS 4428.10.

Alarm signalling equipment: To AS 4428.6.

Wire-free alarm zone circuits: To AS 4428.9.

#### **Fire indicator panels**

General: Provide metal cubicle-type enclosures.

#### Isolation

General: Provide isolating facilities on fire indicator panels to enable tests to be carried out without the transmission of alarm signals to the fire brigade.

#### Detectors

Duct sampling units (DSUs): To AS 1603.13.

Heat detectors: To AS 7240.5.

Integral heat detector/alarm units: To AS 1603.3.

Point type smoke detectors: To AS 1603.2.

Multi-point aspirated smoke detectors: To AS 1603.8.

Optical beam smoke detectors: To AS 1603.7.

Integral smoke detector/alarm units: To AS 12239.

#### Self-indicating detectors

General: Provide a light emitting diode mounted in a clearly visible position, which illuminates whenever detector operation causes an alarm condition to register on the fire indicator panel. Provide selfindicating devices which, if faulty, will not render the detector inoperative under fire conditions.

Mounting positions of light emitting diodes:

- Visible detectors: On the outside of the detector or its base.
- Detectors concealed above ceilings: On the underside of the ceiling immediately below the detector.
- Detectors in other concealed spaces: On a visible panel close to the entry to the concealed space housing the detector.

#### Installation

General: Install detectors so they can be easily inspected and tested in situ, and readily withdrawn for service.

Integral smoke detector/alarm units: To AS 1670.6.

## Manual call points

Standard: To AS 1603.5.

**External alarm indication** Circuits: To AS 4428.1.

Circuits. 10 AS 4420.1.

Strobe lights: To AS 1603.11.

Magnetic door holders Standard: To AS 4178.

#### **Control facilities**

General: Provide ancillary control device circuits and connections for automatically controlling and releasing magnetic door holders to operate the relevant doors under fire alarm conditions.

#### Fire fan control and indication panels

General: Provide fire detection and alarm signals for the fire fan control panel to be incorporated by mechanical services.

#### 2.9 EMERGENCY WARNING AND INTERCOMMUNICATION SYSTEM

## General

General: Provide a complete operational emergency warning and intercommunication system, tested and commissioned in accordance with AS 1670.4.

Accredited products: Provide equipment listed in the CSIRO CMSE ActivFire Register of Fire Protection Equipment.

#### Loudspeakers

Mounting: Securely fix to building elements. Flush mount in suspended ceilings and lift cars, and if practicable elsewhere; otherwise surface mount in an enclosure.

Wall mounting height: 150 mm below finished ceiling level.

#### **Evacuation zones**

Zones: Provide separate zones for each fire compartment, or a separate zone for each single storey.

#### **Emergency intercommunications**

Warden intercommunication points: Connect, as separate circuits, warden intercommunication point (WIP) handsets which are in the same zone.

Conferencing: Provide switching facilities which permit conference calls, between up to 5 warden intercommunication points, to be initiated from any emergency control panel.

Lift cars: Provide a terminal block outside the lift motor room. Cable from the terminal block to central control equipment. Provide a warden intercommunication point handset in each fire lift car.

Marking: Permanently mark with unique circuit or serial numbers, concealed.

## 2.10 ACCESS CONTROL

#### General

General: Provide a complete operational access control system, tested and commissioned in accordance with AS/NZS 2053 and AS/NZS 2201.1, \*AS 2201.3 and AS/NZS 2201.5, as applicable.

#### **Processors or panels**

Capacity: Provide separate entry/exit control modules for each designated door.

Users: Program the system to match the number of authorised users with unique access codes.

Time zones: At least 4 per day, with provision for weekends and public holidays.

#### **Door control devices**

General: Provide electric strikes, electric locks, drop bolts, or similar devices to suit door construction and hardware.

Fail-safe: Connect door control devices in a fail-safe mode to permit egress in the event of power failure.

Authorised products: Provide equipment listed in the ActivFire Register of Fire Protection Equipment.

Glass doors: Provide tumbler, drop bolts or magnetic holders.

Double leaf doors (solid frame): Provide an electric strike or lock on the fixed leaf, connected to the door frame by concealed flexible wiring.

## Activation

General: Provide keypads, card readers or other activation devices, and locate next to entry points. External: Provide weatherproof (IP56) hoods or housings for external units.

Default mounting height: 1100 mm from floor level.

#### **Vehicle control**

Vehicle access control: Provide a vehicle access control system combining connection to vehicular doors and boom gates, and interconnection to the main access control system.

Exit Loop detection: Provide a buried loop detection system adjacent to the exit point to activate boom gates or vehicular doors on approach by a vehicle. Connect so that doors or gates close after a pre-set time.

Interlock: Provide a photo electric beam safety interlock.

Interlock function: To prevent door or gate from closing until the vehicle has cleared the exit point.

Push-buttons and readers: Where practicable, provide direct wall mounting for push-buttons or readers; otherwise provide a mounting bollard and extension arm.

Default mounting height: 1000 mm from floor level.

Reed switches: Provide heavy duty reed switches on both sides of vehicle doors, which generate a door closed indication at the control panel.

#### Intercom

Base station: Provide an intercom base station at each external entry point, interconnected with the individual local stations. Include speakers and microphones.

Construction: Wall mounted flush stainless steel panel.

Weatherproofing: IP56.

Dial: Digital push-button type.

Schedule: Provide a weatherproof (IP56) schedule holder and card identifying individual local stations. Locate next to the intercom panel.

Local station: Provide wall mounted intercom local stations, interconnected with the base stations and external entry points.

Type: Surface mounted, removable handset type.

Operation: Provide an audible tone device to indicate that the individual station is being called, and a press-to-talk switch so that the local station can communicate with the base station only when the switch is held down.

Door control: Provide integral momentary action door release switches to operate the door release or opening mechanisms at each external entry point.

#### Interconnection to other services

General: Provide card readers or other devices to allow the interconnection to other systems as required. Provide and connect wiring to the designated services.

#### 2.11 TELEVISION DISTRIBUTION SYSTEM

#### General

General: Provide a complete operational analogue and digital television distribution system, tested and commissioned in accordance with AS/NZS 1367.

System design and performance: To AS/NZS 1367.

#### Network operators

Free-to-air bands: Provide a system suitable for the reception of all local Free-to-air services:

Cable: Arrange with the cable network operator for the connection to their cable network. Comply with the cable network operators' requirements.

Local: Provide video input sockets at the premises cabling head-end for the distribution of three inhouse video channels on the Free-to-air network.

#### Performance criteria

General: Performance to AS/NZS 1367.

## 2.12 LABELLING

#### General

General: Provide labels including control and circuit equipment ratings, functional units, notices for operational and maintenance personnel, incoming and outgoing circuit rating, sizes and origin of supply and kW ratings of motor starters.

#### **Identifying labels**

General: Provide labels fixed to access panels, doors, covers and escutcheon panels and internal equipment, indicating the relevant worksection and component.

## Single-line diagrams

Custom-built assemblies: Provide single-line diagrams.

Format: Non-fading print, at least A3 size, showing the situation as installed.

Mounting: Enclose in a non-reflective PVC frame and wall mount close to assembly.

#### Marking cables

General: Identify the origin of all wiring by means of legible indelible marking.

Identification labels: Provide durable labels fitted to each core and sheath, permanently marked with numbers, letters or both to suit the connection diagrams.

Identify multicore cables and trefoil groups at each end with durable non-ferrous tags clipped around each cable or trefoil group.

#### Telecommunications and television cabling

General: Label telecommunications cables. cross connects, outlets, in accordance with the requirements of AS/NZS 3080, and SAA HB 29 Figures 5-18.

Labels: Label cables to indicate the origin and destination of the cable. Label outlets to show the origin of the cross connect, the workstation or outlet number, and the port designation.

#### Location marking

General: Accurately mark the location of underground cables with route markers consisting of a marker plate set flush in a concrete base.

Location: Place markers at each joint, route junction, change of direction, termination and building entry point and in straight runs at intervals of not more than 100 m.

Concrete bases: 200 mm diameter x 200 mm deep, minimum.

Direction marking: Show the direction of the cable run by means of direction arrows on the marker plate. Indicate distance to the next marker. Plates: Brass, aluminium or mild steel hot-dipped galvanized minimum size  $75 \times 75 \times 1$  mm thick.

Plate fixing: Waterproof adhesive and 4 brass or stainless steel countersunk screws.

Marker height: Set the marker plate flush with paved surfaces, and 25 mm above other surfaces.

Marker tape for electrical services: Where electric bricks or covers are not provided over underground wiring, provide a 150 mm wide yellow or orange marker tape bearing the words '*WARNING – electric cable buried below*', laid in the trench 150 mm below ground level.

## Labelling – minimum lettering heights

Main assembly designation: 25 mm.

Distribution assembly designations: 15 mm.

Small proprietary distribution boards: 10 mm.

Main switches: 10 mm.

Outgoing functional units: 8 mm.

Identifying labels (on outside of cabinet rear covers): 4 mm.

Danger, warning and caution notices: 10 mm for main heading, 5 mm for remainder.

Other labels including equipment labels within cabinets: 3 mm.

#### Label colours

Generally: Black lettering on white background except as follows:

- Main switch and caution labels: Red lettering on white background.
- Danger, warning labels: White lettering on red background.

#### Fixing

General: Fix labels securely.

Fixing methods: Use screws and double-sided adhesive. Fixed in extruded aluminium sections attached to panels with rivets or countersunk screws.

Aluminium labels: Aluminium or monel rivets.

Restrictions: Do not use self-tapping or threadcutting screws.

Permanent fixing: Fix labels permanently in place.

| Component      | Fixing scheme          | Туре                       |
|----------------|------------------------|----------------------------|
| Cables         | Origin and destination | Self adhesive –<br>wrap on |
| Cross connects | Port number            | Proprietary                |
| Outlets        | SAA HB 29 Figs<br>5-18 | Engraved plate             |
| Wall boxes     | SAA HB 29 Figs<br>5-18 | Engraved<br>adhesive label |
| Patch cords    | Type of service        | Colour code                |

## 0911 CABLE SUPPORT AND DUCT SYSTEMS

#### 1 GENERAL

## 1.1 AIMS

### Responsibilities

General: Provide cable support, trunking and duct systems as documented.

#### 1.2 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

#### Associated worksections

Associated worksections: Conform to the following:

- Electrical general requirements.

## 1.3 SUBMISSIONS

## Shop drawings

General: Submit shop drawings showing the following:

- Cable tray and trunking routes.
- Layout of cable supports and enclosures on the current architectural background coordinated with the structure and other services.
- Layout of underground conduits, pits and drainage trenches.
- Invert levels for underground conduits.
- Depth of burial for cables and conduits.
- In situ pits.
- Provision for expansion and ground movement.
- Fabricated columns.
- Footing for columns.

#### **Technical data**

General: Submit technical data for the following:

- Ducted wiring enclosure systems.
- Cable support systems.
- Proprietary pits.
- Proprietary columns.
- Load calculations for aerial cable supports.

## 2 PRODUCTS

## 2.1 CONDUITS

General

Standards: AS/NZS 2053 Parts 1, 2, 3, 4, 5, 6, 7 and 8.

Туре

General: Rigid.

Sizes

Conduits:  $\geq$  20 mm.

 $\label{eq:Underground: 25 mm.} Underground: \geq 25 \ mm.$ 

Conduits for telecommunications:  $\geq$  25 mm.

#### **Fixings**

Saddles: Double sided fixed.

## Colour

Conduits for telecommunications systems: White. Galvanized water pipe

Medium or heavy: To AS 1074.

## 2.2 METALLIC CONDUITS AND FITTINGS

#### General

Standards: AS/NZS 2053.7 or AS/NZS 2053.8.

## Туре

General: Screwed steel.

Fixings

Saddles:

- Internal: Zinc plated.
- External: Hot-dipped galvanized.

#### **Corrosion protection**

Steel conduits: Paint ends and joint threads with zinc rich organic primer to AS/NZS 3750.9.

#### 2.3 NON-METALLIC CONDUITS AND FITTINGS

#### General

Standards: Non-metallic conduits and fittings: AS/NZS 2053 Parts 2, 3, 4, 5 or 6.

Solar radiation protection: Required for exposed conduits and fittings.

#### Flexible conduit

General: Provide flexible conduit to connect with equipment and plant subjected to vibration. If necessary, provide for adjustment or ease of maintenance. Provide the minimum possible length.

## Associated fittings

Type: The same type and material as the conduit. Wall boxes on UPVC conduits: For special size wall boxes not available in UPVC, provide prefabricated earthed metal boxes.

#### Inspection fittings

General: Provide inspection-type fittings only in accessible locations and where exposed to view.

## Joints

Type: Cemented or snap on joints.

## 2.4 CABLE DUCT/TRUNKING

#### General

#### Standards:

- Cable duct/trunking systems: To AS/NZS 4296.

#### Cable duct

Material: Metal.

Material finish: Metallic-coated to AS 1397 Grade G2, Coating Class Z275.

Construction: Solid.

Covers:

- Accessible locations: Screw-fixed or clip-on type removable only with the use of tools.

Accessories: Purpose-made to match the duct system.

Cable support: Except for horizontal runs where the covers are on top, support wiring with retaining clips at intervals of not more than 1000 mm.

#### Proprietary trunking systems

General: Provide proprietary, skirting duct, wall duct, floor duct and service column systems, incorporating segregation where used for multiple services. Provide rigid supports. Round off sharp edges and provide bushed or proprietary cable entries into metallic trunking.

Accessories: Provide proprietary fixings and mountings facilities for accessories and outlets. Covers: Screw-fixed or clip-on type removable only with the use of tools.

## 2.5 CABLE TRAY/LADDER SUPPORT SYSTEMS

#### General

System: Provide a complete cable support system consisting of trays or ladders and including brackets. fixings and accessories.

Selection: Run cables < 13 mm diameter on cable trays or in ducts.

Standard: NEMA VE-1.

Type tests: To NEMA VE-1.

Manufacture: Provide proprietary trays, ladders, fittings and accessories from a single manufacturer for the same support system.

Selection: Select cable tray/ladder in conjunction with support system installation to achieve the documented loading and deflection requirements. Spare capacity:  $\ge$  50%.

Support:

- Power cables: Trapeze or centre rail structure.
- Communications cables: Single sided.

Dimensions: To the preferred dimensions nominated in NEMA VE-1.

Material: Corrosion-resistant finished steel.

Material finish: Metallic-coated to AS 1397, Grade G2, Coating Class Z275.

Covers: Provide ventilated flat covers to cable trays/ladders installed in accessible locations.

## 2.6 CATENARY SYSTEMS

#### General

Catenary systems: May be used within suspended ceiling spaces in lieu of cable tray and ladder systems.

Wire: Provide stainless steel or coated galvanized cable and couplings for catenary systems.

#### 2.7 CABLE PITS

#### General

Cable draw-in pits: Provide. Sizes given are internal dimensions.

#### Proprietary cable pits

Pits  $\leq$  1200 x 1200 mm: Provide proprietary concrete or polymer moulded pits.

#### In situ construction

Pits > 1200 x 1200 mm: Provide either:

- Proprietary cable pits.
- Construct walls and bottoms from rendered brickwork or 75 mm thick reinforced concrete. Incorporate a waterproofing agent in the render or concrete.

## Pit covers

General: Provide pit covers to suit external loads. Fit flush with the top of the pit.

Standard: To AS 3996.

Weight: < 40 kg for any section of the cover.

Lifting handles: Provide a lifting handle for each size of cover section.

#### Drainage

General: Provide drainage from the bottom of cable pits, either to absorption trenches filled with rubble or to the stormwater drainage system.

Absorption trenches: Minimum size 300 x 300 x 2000 mm.

## 2.8 COLUMNS

#### General

Columns: Conform to the following for fabricated columns more than 2400 mm high which are designed to support accessories outdoors.

Standards: Comply with the following standards as appropriate:

- AS 1798 for public lighting poles.
- AS 3600 for concrete structures.
- AS 4100 for steel structures.
- AS/NZS 4676 for structural design of columns.
- AS 4680 for hot-dipped galvanized (zinc) coatings on ferrous articles.

#### 2.9 POWER POLES

#### General

Material: Hardwood.

Service connection: Provide pole mounted equipment including weatherproof box and service fuses at the service connection point as required by the Network Distributor.

## Design

Standards: To the local Network Distributors standards and to the local Service and Installation Rules.

## Hardwood poles

Selection: Dressed, natural, round poles with all sapwood removed.

Capping: Galvanized steel, domed cap extending 25 mm down the sides. Fix with galvanized steel nails.

Treatment: Provide termite and fungus treatment to 600 mm above ground level.

#### Hardwood crossarms

Material: 75 x 75 x 1500 minimum hardwood.

Fixing: Securely fix to pole with M20 galvanized bolts, nuts and washers.

Bracing: Provide two 5 x 40 x 690 galvanised steel fixed at 45 degrees to the pole below the cross arm with M12x75 galvanized coach screws in the pole

and M12 galvanized bolts, nuts and washers in the crossarms.

#### Design

General: Provide columns designed, manufactured and tested by a specialist manufacturer.

Footings: To be designed by an accredited structural engineer and independently certified.

Site specifics: Take into consideration the design wind category and the soil conditions.

Dimensions: To AS 1798.

#### Construction

General: Hot-dip galvanize columns and fittings after fabrication.

Bases: Provide columns with mounting bases for fixing to reinforced concrete footings via rag bolt assembly.

Rag bolt assembly: Holding bolts to be cut within 3 threads above top of base plate top lock nuts.

Base fixing: Galvanized holding down nut with galvanized lock nut above.

Base sealing: Seal space under pole base plate with grout.

Finish: Paint, colour as documented.

Accessory mountings: Provide adjustable mountings, to suit accessories. Include provision for rigidly clamping each item in position, once adjusted correctly.

Maintenance access: Provide pole stirrups secured to either side of the column for access to accessories. Locate the first stirrup  $\geq$  3 m above ground level.

Electrical connections: Provide a recess fitted with a flush mounted cover at the base of the column for access to cable connections and equipment.

Cable support: For connections higher than 3 m provide a catenary wire cable support system.

## 3 EXECUTION

## 3.1 UNSHEATHED CABLES – INSTALLATION

#### General

General: Provide permanently fixed enclosure systems, assembled before installing wiring. Provide draw wires to pull in conductor groups from outlet to outlet, or provide ducts with removable covers.

## 3.2 CONDUIT SYSTEMS – INSTALLATION

#### Set out

General: If exposed to view, install conduits in parallel runs with right angle changes of direction.

#### Bends

General: Install conduits with the equivalent of  $\leq 2$  right angled bends per cable draw-in run.

#### Conduits in roof spaces:

General: Locate below roof insulation and sarking. In accessible roof spaces, provide mechanical protection for light-duty conduits.

#### **Inspection fittings**

General: Locate in accessible positions.

#### Draw cords

General: Provide 5 mm<sup>2</sup> polypropylene draw cords in conduits not in use.

## Draw-in boxes

General: Provide draw-in boxes as follows:

- Spacing: < 30 m.
- At changes of level or direction.

Underground draw-in boxes: Provide casketed covers and seal against moisture. Install in accessible pits.

## Expansion

General: Allow for thermal expansion/contraction of conduits and fittings due to changes in ambient temperature conditions. Provide expansion couplings as required.

#### **Rigid conduits**

General: Provide straight long runs, smooth and free from rags, burrs and sharp edges. Set conduits to minimise the number of fittings.

## Routes

General: Run conduits concealed in wall chases, embedded in floor slabs or installed in inaccessible locations directly between points of termination, minimising the number of sets. Do not provide inspection fittings.

## Conduits in concrete slabs

Route: Do not run in concrete toppings. Do not run within pretensioning cable zones. Cross pretensioning cable zones at right angles. Route to avoid crossovers and minimise the number of conduits in any location. Space parallel conduits  $\geq$  50 mm apart.

Minimum cover: The greater of the conduit diameter and 20 mm.

Fixing: Fix directly to top of the bottom layer of reinforcing.

#### Hollow-block floors

Locate conduits in the core-filled sections of precast hollow-block type floors.

#### Columns

Conduits in columns:

- $\leq 4$  per column.
- ≤ 25 mm diameter.
- Locate conduits centrally in each column.

Bends: Enter columns via  $\geq$  150 mm radius sweep bends. Do not use elbows.

Chasing: Do not chase columns.

#### 3.3 CABLE TRAY/LADDER SUPPORT SYSTEMS – INSTALLATION

## General

Standard: To NEMA VE-2.

Design: Support cable trays/ladders to achieve the following:

- Concealed trays/ladders: Support spacing ≤ length of tray/ladder section.
- Visible trays/ladders: Loaded deflection ≤ span/350.

## Fixing to building structure

General: Fix supports to the building structure or fabric by means of  $\geq$  8 mm threaded rod hangers attached to hot-dipped galvanized U-brackets, or by means of proprietary brackets.

#### Cable fixing

General: Provide strapping or saddles suitable for fixing cable ties.

MIMS cables: provide non-magnetic straps.

#### Bend radius

General: Provide bends with an inside radius  $\geq$  12 times the outside diameter of the largest diameter cable carried.

#### **Cable protection**

General: Provide rounded support surfaces under cables where they leave trays or ladders.

#### Access

General: Locate trays and ladders to provide  $\geq$  150 mm free space above and  $\geq$  600 mm free space on at least one side.

#### Clearances

From hot water pipes: > 200 mm.

From boilers or furnaces: > 500 mm.

EMI: Locate support systems for electrical power cabling and communication cabling to minimise electromagnetic interference.

## 3.4 CATENARY SYSTEMS – INSTALLATION

#### General

Anchoring: Anchor catenary systems to the structure. Do not fix to any part of a suspended ceiling system.

Design loads: Provide catenary systems designed to support the proposed load of the cables with a spare capacity of 50% loading.

Fixing: Fix cables to the catenary system such that no cable is under stress due to tension or compression. Use proprietary fixings that allow cables to be added or removed without destroying the integrity of the system.

## 3.5 CABLES IN TRENCHES – INSTALLATION

#### Sand bed and surround

General: Provide clean sharp sand  $\geq$  150 mm around cables and conduits installed underground.

#### Sealing ducts and conduits

General: Seal buried entries to ducts and conduits with waterproof seals. Seal spare ducts and conduits immediately after installation. Seal other ducts and conduits after cable installation.

#### 3.6 COLUMNS – INSTALLATION

#### General

General: Install columns as documented including the provision of in situ reinforced concrete footings to the **Wiring enclosures and cable support** systems schedule.

#### 3.7 POWER POLES – INSTALLATION

#### General

Standards: To the Service and Installation Rules and to the standards published by the local Network Distributor for the project environment and for the selected aerial arrangement.

#### Hardwood poles

Burying depth: 1600 mm minimum.

Support: Baulk and stay to suit the design loads.

Cable protection: Provide protection for cables and conduits installed on the exterior of the pole to a height of 2000 mm above and 150 mm below ground using either galvanized water pipe or 3.2 mm thick hot dipped galvanized channel.

## 0921 LOW VOLTAGE POWER SYSTEMS

#### 1 GENERAL

## 1.1 AIMS

#### Responsibilities

General: Provide low voltage power systems as documented.

## 1.2 SYSTEM DESCRIPTION

#### **Network supply**

General: Liaise with the Network Distributor and provide network connection as documented.

Programme: Schedule the works and statutory inspections to suit the construction programme.

#### **Embedded generator supplies**

General: Provide embedded generator supplies as documented.

#### **Distribution system**

General: Provide power distribution system elements as documented.

#### Metering

Retail: Provide metering to the requirements of the principal, the selected electricity retailer and the network distributor.

Private: Provide private metering as documented.

#### Design

Design responsibilities: Refer to the definition of 'provide' in the *General requirements* worksection.

Design parameters: As documented.

Fault protection: Automatic disconnection to AS/NZS 3000 clause 2.4.

Maximum demand: Calculation method to AS/NZS 3000 Appendix C.

## 1.3 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

#### Associated worksections

Associated worksections: Conform to the following:

- Electrical general requirements.
- Cable support and duct systems.

#### 1.4 STANDARDS

#### General

General: To SAA HB 301.

Electrical equipment: To AS/NZS 3100.

Fire and mechanical performance classification: To AS/NZS 3013.

Selection of cables: To AS/NZS 3008.1.1.

Distribution cables: To AS/NZS 4961.

## Testing

Standard: To AS/NZS 3017.

#### 1.5 INTERPRETATIONS

#### Abbreviations

General: For the purposes of this worksection the abbreviations given below apply.

- MIMS: Mineral-insulated metal-sheathed.

#### Definitions

Embedded generator: Electricity generator connected to the local electrical distribution network. Extra-low voltage: Not exceeding 50 V a.c. or 120 V ripple-free d.c.

Low-voltage: Exceeding extra-low voltage, but not exceeding 1000 V a.c. or 1500 V d.c.

High voltage: Exceeding low-voltage.

## 1.6 SUBMISSIONS

#### Samples

General: Submit samples of all visible accessories and equipment.

#### **Technical data**

General: Submit the following information for each main, submain and final subcircuit for which calculation is the responsibility of the contractor.

- Single line diagram.
- Fault Levels at switchboards.
- Maximum demand calculations.
- Cable and conductor cross sectional area and insulation type.
- Cable operating temperature at design load conditions.
- Voltage drop calculations at design load conditions.
- Protective device characteristics, e.g. curves, l<sup>2</sup>t.
- Discrimination and grading of protective devices.
- Prospective short circuit current automatic disconnection times.
- Earth fault loop impedance calculations for testing and verification.
- Certify compliance with AS/NZS 3000, for electrical services.
- Stringing calculations for aerial cables.

Final subcircuits: May be treated as typical for common route lengths, loads and cable sizes.

## Shop drawings

General: Submit shop drawings of the following:

- Cable routes.
- Busduct systems including routes, dimensions and connection details.

## 2 PRODUCTS

## 2.1 WIRING SYSTEMS

## General

Selection: Provide wiring systems appropriate to the installation conditions and the function of the load.

## 2.2 POWER CABLES

#### Standard

PVC and XLPE cables: To AS/NZS 5000.1. Aerial cables: To AS 1746.

#### Cable

General: Select multi-stranded copper cable generally, except for mineral insulated metal sheathed (MIMS).

Minimum size:

- Lighting sub-circuits: 1.5 mm<sup>2</sup>.
- Power sub-circuits: 2.5 mm<sup>2</sup>.
- Sub-mains: 6 mm<sup>2</sup>.

Voltage drop: Select final subcircuit cables within the voltage drop parameters dictated by the route length and load.

Fault loop impedance: Select final subcircuit cables selected to satisfy the requirements for automatic disconnection under short circuit and earth fault/touch voltage conditions.

Underground residential distribution systems: Select cables according to AS/NZS 4026.

Distribution cables: To AS/NZS 4961.

## **Conductor colours**

General: For fixed wiring, provide coloured conductor insulation. If this is not practicable, slide at least 150 mm of close fitting coloured sleeving on to each conductor at the termination points.

Active conductors in single phase circuits: Red.

Active conductors in polyphase circuits:

- A phase: Red.
- B phase: White.
- C phase: Blue.

#### 2.3 BUSDUCTS

#### Systems

Type: Proprietary type-tested systems made up of integral lengths and fittings containing solid busbar conductors and housings, assembled in sections to form complete fully enclosed and insulated low impedance power distribution systems.

Standard: To AS 3439.2.

#### Selection

Ratings: Provide busduct selected to meet nominated current ratings and, if used as consumer's mains, to match the statutory authority's substation equipment.

Degree of protection: For complete assembly, at least the following:

- Indoor use: IP40.
- Weatherproof (partial exposure): IP54.
- Outdoor use: IP55.

#### Indoor system accessories

For current ratings  $\leq$  400 A: Provide fuse, fuse switch or circuit breaker type plug-in connection boxes. Provide interlocks to enable plug-in boxes to be safely installed or removed on an energised system. Provide plug-in boxes whereby earthing to the busduct housing is achieved before connection of active conductors. For current ratings > 400 A: Provide bolt on accessible T-off boxes.

Expansion joints: Provide expansion joints in vertical runs, to allow for expansion and contraction of the busduct system.

End caps: Provide end caps or covers to fully enclose ends of busducts not connected to equipment.

## 2.4 ACCESSORIES

#### General purpose socket outlets Standard:

- General: To AS/NZS 3112.
- Industrial: To AS/NZS 3123.

Pin arrangement: Mount outlets with the earth pins at the 6 o'clock position.

#### Plugs - 230/400 volt

General: Provide plugs with integral pins of the insulated type to AS/NZS 3112.

#### Permanently connected equipment

General: Provide final subcircuit to permanently connected equipment, as documented.

Isolation: Provide isolating switch adjacent to equipment.

Coordination: Coordinate with equipment supplier.

Wall/ceiling mounted equipment: Conceal final cable connection to equipment.

#### Isolating switches

Standard: To AS/NZS 3133.

Emergency stop switches

Standard: To IEC 60947-5-5.

## 3-phase outlets

Construction: Surface mounted type of high-impact resistant plastic, with flap lid on the outlet.

Minimum: 20 A, 400 V a.c.

Pin arrangement: Five round pins mounted with earth pins at the 6 o'clock position, neutral pins in the centre and the red, white and blue phases in a clockwise sequence when viewed from the front of the outlet.

Plug: Provide a matching plug top for each outlet.

#### Appliances

General: Provide appliances, as documented. Connection: Shorten lead to minimum length for plug connections.

#### Ceiling sweep fans

Standard: To AS/NZS 60335.2.80.

Horizontal clearance:  $\geq$  1200 mm from blade tip to wall cupboards or shelves that require access by ladder or steps.

Size: 1200 mm diameter unless otherwise documented.

Mounting height: Use longest proprietary suspension rod to ensure that height from blades to finished floor level: > 2200 mm.

Speed regulators, capacitive and electronic: Flush mounted with OFF position.

## 3 EXECUTION

## 3.1 EARTHING

#### Earthing systems

Standard: Provide an earthing system as documented.

## Electrodes

General: Provide electrodes to suit soil resistivity.

## Bonding

General: Provide bonding to AS/NZS 3000 clause 5.6.

#### Earth and bonding clamps

General: Provide proprietary earthing and bonding clamps.

Standard: To AS 1882.

#### 3.2 MINERAL INSULATED METAL SHEATHED CABLE (MIMS)

#### General

General: Maintain manufacturer's seals until joint or termination is made. Remove moisture by heating cable ends.

#### Seals

Temporary seals: Fit temporary seals to the open ends of cables cut and not immediately used.

Terminations: Fit termination seals at ends of cable runs as soon as the cable has been cut to length, stripped back, and the moisture driven out.

Through joints: Same fire-rating as the cable.

#### Sheath earthing

General: If MIMS cables enter metal enclosures, earth sheaths to non-ferrous plates secured to the enclosures. Where sheaths terminate at plates, fully insulate, colour code, and fix the conductors to the enclosures.

## Bonding

General: Bond metal sheaths of single core cables in multi-phase circuits with proprietary earth bonding clips or clamps.

## Separation

General: Separate MIMS cables from tough plastic sheathed (TPS) cables and UPVC conduits by at least 25 mm.

## **Eddy currents**

General: Arrange single core cable entries into nonferrous metal gland plates to minimise eddy currents.

## Vibration

Connections with vibrating equipment: Loop cables in a complete circle next to the point of connection.

#### **MIMS** cable terminations

MIMS cable systems: Test the insulation resistance as follows:

- At the time of termination.
- 24 hours later.

## 3.3 POWER CABLES

#### General

Standard: Classifications to AS/NZS 3013.

Handling cables: Report damage to cable insulation, serving or sheathing.

Stress: Ensure that installation methods do not exceed the cable's pulling tension. Use cable rollers for cable installed on tray/ladders or in underground enclosures.

Straight-through joints: Unless unavoidable due to length or difficult installation conditions, run cables without intermediate straight-through joints.

Cable joints: Locate in accessible positions in junction boxes and/or in pits.

Extra-low voltage circuits: Individual wiring of extralow voltage circuits: Tie together at regular intervals.

## Tagging

General: Identify multi core cables and trefoil groups at each end with stamped non-ferrous tags clipped around each cable or trefoil group.

## Marking

General: Identify the origin of all wiring by means of legible indelible marking.

## 3.4 FIRE-RATED (OTHER THAN MIMS)

#### Protection

General: If exposed to mechanical damage, provide protection to AS/NZS 3013.

#### 3.5 COPPER CONDUCTOR TERMINATIONS

## General

General: Other than for small accessory and luminaire terminals, terminate copper conductors to equipment, with compression-type lugs of the correct size for the conductor. Compress using the correct tool or solder.

#### Within assemblies and equipment

General: Loom and tie together conductors from within the same cable or conduit from the terminal block to the point of cable sheath or conduit termination. Neatly bend each conductor to enter directly into the terminal tunnel or terminal stud section, allowing sufficient slack for easy disconnection and reconnection.

Alternative: Run cables in UPVC cable duct with fitted cover.

Identification: Provide durable numbered ferrules fitted to each core, and permanently marked with numbers, letters or both to suit the connection diagrams.

Spare cores: Identify spare cores and terminate into spare terminals, if available. Otherwise, neatly insulate and neatly bind the spare cores to the terminated cores.

### 3.6 ALUMINIUM CONDUCTOR TERMINATIONS

## General

Conductor surface preparation: Remove oxide as follows:

- Wire brushing surfaces to be connected.
- Immediately applying oxidation inhibiting abrasive grease containing zinc or similar particles. Thoroughly cover the surfaces and work the

grease between the strands of stranded conductors.

Fittings: Unless joint contact surfaces are factory tinned or factory pre-filled with oxidation inhibiting abrasive grease, prepare as for conductors.

#### Aluminium-to-aluminium jointing

Compression method:

- Provide aluminium or aluminium alloy crimp lugs or ferrules selected to suit the size and shape of the conductors.
- Use compression dies selected to suit lugs or ferrules, with hexagonal dies for stranded conductors and indent dies for solid conductors.
- Fill lugs or ferrules with oxidation inhibiting abrasive grease.
- Insert conductors into lugs or ferrules, driving out excess grease.
- Apply dies to provide at least 2 indentations at each joint or termination.

Fusion weld method: Make joints by fusion welding with aluminium lugs. Protect cable insulation from heat by fixing substantial heat sinks to the cable near the joint. After completion of the weld, wire brush the joint and file sharp projections smooth.

#### Aluminium-to-copper jointing Method: Use compression method, as for Aluminium-to-aluminium jointing.

Connector types: Select from the following:

- Bi-metal: Lug or pin type with cast copper palm or pin, friction welded to an aluminium barrel section, subsequently factory filled with oxidation inhibiting abrasive grease.
- Case electro-tinned aluminium lug: Bolt the palm of the lug to the copper busbar or terminal by means of a stainless steel bolt and nut with a large diameter stainless steel flat washer and a spring cup washer.

## 3.7 AERIAL CABLES – POWER

## Aerial cables

Tension: String and tension cables to meet the project specific design criteria.

## Aerial connection – poles

For change of direction < 10 degrees: Pin insulators mounted on horizontal cross arms.

For change of direction  $\geq$  10 degrees: Shackle insulators secured by hooks on poles and bolts on crossarms or elsewhere.

Bundled conductors: To AS 3766.

## Aerial connection – building attachment

General: Provide proprietary up-stands, as required. Attachment: Shackle insulators and supports

securely bolted to building structure. Building entry: Angle conduit upwards at a minimum angle of 45 degrees for weather proofing.

## 3.8 BUSDUCT INSTALLATION

## General

Standard: To AS/NZS 3439.2.

Horizontal runs: Support bus ducts at maximum intervals of 2 m, with adjustable hangers and steel angle supports. Provide runs that are straight and level. Install hangers at least 300 mm from joint centres. Secure bus ducts to angle supports with proprietary clamps.

Vertical runs: Support with a combination of fixed and spring type hangers to allow for expansion and contraction of the bus duct system.

Fittings: Provide elbows, offsets and junctions for changes in direction. If necessary, provide weatherproof covers and gaskets.

## 3.9 COMPLETION TESTS

#### Site tests

Inspection: Visually inspect the installation to AS/NZS 3000 before testing. Submit record on a checklist.

Test and verify the installation to AS/NZS 3000 Section 8 using the methods outlined in AS/NZS 3017. Record and submit the results of all tests.

#### Dummy load tests

General: Where electrical tests are required and the actual load is not available, provide a dummy load equal to at least 75% of the design load.

## 3.10 SPARE PARTS

#### General

Spare parts: As documented.

## 0931 POWER GENERATION – DIESEL

#### 1 GENERAL

## 1.1 AIMS

## General

General: Provide proprietary packaged stand-by generating set(s) as documented, incorporating the following:

- Engine cooling system.
- Combustion air system.
- Exhaust system.
- Liquid fuel system.
- Acoustic enclosure.
- Control system.
- Connection to low voltage power system.

#### 1.2 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

#### Associated worksections

Associated worksections: Conform to the following:

- Liquid fuels.
- Electrical general requirements.
- Low voltage power systems.
- Switchboards proprietary.
- Switchboards custom-built.
- Switchboard components.

## 1.3 STANDARD

#### General

General: For the purpose of this worksection, compliance with the following standards relating to stand-alone systems are also applicable to those systems which are to be connected to the network supply:

- Stand-alone power systems: To AS/NZS 4509.1, AS/NZS 4509.2 and AS/NZS 4509.3.

Standard: To AS/NZS 3010.

#### 1.4 INTERPRETATIONS

#### Definitions

Net continuous rated output (or prime rating): Net continuous electrical output available at alternator terminals, not including the electrical power consumed by the generating set's dependent and essential auxiliaries.

Net short-time rated output (or stand-by rating): Net electrical output available from the generating set for 1 hour in every 12 hours at net continuous rated output, not including electrical power consumed by the generating set's dependent and essential auxiliaries. Start response time: Total elapsed time from receipt of start signal to final connection to load.

#### 1.5 PRE-COMPLETION TEST

#### **Factory inspection**

Requirement: Give sufficient notice so that inspection may be made of each complete generating set and associated systems at the manufacturer's or supplier's factory before delivery to the site.

## 1.6 SUBMISSIONS

#### **Technical data**

General: Submit technical data including the following:

- Technical description and specifications of each generating set, including output curves for base load and stand-by conditions, alternator and engine data, automatic voltage regulator, synchronising and load sharing modules and auxiliaries.
- Type test reports as follows:
  - . Generating sets.
  - . Alternators: To AS 1359.101.
- Net continuous rated output.
- Net short-time rated output.
- Transient and subtransient reactance of the alternators.
- Voltage regulation grade.
- Generating set efficiency at 50%, 75% and 100% load.
- Calculations for performance of acoustic enclosures and silencers.
- Evidence that the engine type has previously passed cold starting tests at the minimum ambient site temperature.

#### Shop drawings

General: Submit shop drawings indicating the following:

- General arrangement of equipment, generating sets, fuel tanks, exhaust silencers, control panels, batteries, cable tray runs.
- Single line schematic showing the interconnection with the building electrical system.
- Operating sequence in test and emergency modes as well as restoration of normal supply.
- Location and size of fuel tanks.
- Physical size of exhaust silencers including clearances from other system, building and structural elements.
- Physical size of generating set base and clearances for maintenance.
- Location and estimated size of control and distribution boards.
- Location of control and starting batteries.
- Acoustic performance criteria (engine, exhaust, air flow), to determine the level of sound proofing required.
- Maximum mass and overall dimensions of each separable assembly.

- Access clearances for operational maintenance and dismantling.
- Electrical single line diagram, and general arrangement for the complete system.
- Control diagrams.
- Alarms and shutdown annunciator text engraving schedule.
- Details of foundations and anti-vibration mountings.

## 2 PRODUCTS

### 2.1 GENERAL

#### Multiple generating sets

General: For multiple generating sets operating in parallel, provide generating sets of the same make and type.

#### Mounting

General: Mount the engine and alternator units on a common structural steel frame to support the generating set assembly and the engine local control board.

#### Coupling

General: Directly couple the engine and generator shafts with a self-aligning type coupling, capable of transmitting the engine maximum output torque under operating conditions, including starting and overload.

#### 2.2 ALTERNATORS

#### General

Standards: To AS 1359 Parts 0, 30, 31, 101, 102.1, 102.2, 107, 109, 114 and IEC 60034-5 and 60034-12.

Voltage waveform: Sinusoidal, with total wave form deviation not exceeding 10%.

Excitation: Provide self-regulated brushless type exciters.

Overspeed: Withstand a speed of 1.2 times unit rated speed for both alternator and engine.

Alternator underspeed withstand: Normal operation at net continuous rated output at a speed of 0.95 times unit rated speed, without overheating.

Sustained short-circuit withstand: At least 2.5 times full load steady state short-circuit current, for at least 5 s.

Number of poles: 4.

Enclosure classification: IP21, with screened ventilation openings.

Cooling method classification: Class IC 01, to AS 1359.106.

Insulation classification: Thermal class 180 (H), to IEC 60085.

## Anti-condensation heaters

General: Provide at least 2 anti-condensation heaters within the winding enclosure.

Rating: Rate heaters to maintain the windings and insulation at least  $6^{\circ}$ C above ambient temperature when the alternator is at rest and one heater is in service.

Location: Locate a heater at each end of alternator windings in a position which allows heat transfer to the winding insulation by convection, without exceeding maximum allowable insulation temperature. Do not fix heaters to windings.

Terminations: Connect heaters to separate identified terminals within a separate accessories terminal box which is connected to a permanent supply.

Connection diagram: Provide a connection diagram for the heaters. Locate within the terminal box.

## Winding thermistors

General: Provide thermistors to alternator stator windings.

Standard: To AS 60947.8.

Thermistor type: Positive temperature coefficient.

Thermistor temperatures:

- Engine shutdown: 160°C.
- Winding temperature high pre-alarm: 140°C.

#### **Terminal boxes**

Construction: Provide metal terminal boxes. Size to allow the current transformers, power and control cables and cable lugs to be neatly installed and terminated with necessary clearances between live parts and the box, and without placing undue strain on termination points.

Supply cable terminal box: Provide removable lid and side covers.

Terminals: Provide star connected windings. Bring both ends of each winding out to separate terminals. Establish a neutral terminal.

Sealing: Provide neoprene or bonded cork gaskets between terminal boxes and their frames and covers.

## 2.3 ENGINES

#### General

Sizing: Take into account the nature of loads including auxiliaries, harmonics and transient operation.

Bearings: Provide front and rear main bearings, so that crankshaft alignment is not affected by dismantling of the alternator.

## Governing

General: Provide electronic or mechanically controlled governors which enable engines to operate continuously at 1480 r/min from no-load to the maximum rated electrical load connected to the alternator. Provide filters which ensure that harmonics or switching spikes generated by the load do not interfere with the operation of the governor, overspeed or underspeed cut out devices.

Governing accuracy: Class M3, to AS 4594.

Governor adjustments: Provide adjustment settings for the following:

- Speed droop.
- Stability.
- Maximum speed.
- Acceleration rate.
- Load gain.

## 2.4 FUEL STORAGE

#### General

General: Conform to Liquid fuels.

#### 2.5 CONTROLS

## General

General: Provide automatic and manual modes to start and shut down generating sets in the selected sequence and, if operating in parallel, share the load to optimise their rated kW and kVAR capacities.

#### Manual sequence control

General: Provide controls to manually, start, synchronise and shut-down each generating set. Include emergency stop, synchroscope, meters, selector switches, check synchroniser and status indicating lights.

#### Automatic start control

General: Provide for the following:

- When a 'start' signal is received, generating sets start automatically, come on-line and, if appropriate synchronise before connecting to the load.
- Connection of alternators for sequential control of load sharing/shedding.
- Shutdown of alternate machines.

#### Automatic engine shutdown

General: Provide for generating sets to run to suit the load demand until receipt of the mains 'restored' signal is received. At this point the automatic sequenced engine shutdown signal must be activated after an adjustable time delay of 0 - 30 min.

#### **Engine shutdown**

General: Provide a shutdown control system which disconnects the alternators, and shuts down engines upon the occurrence of fault conditions, such that:

- Engines cannot be restarted before safety devices have been manually reset and system alarm sensors have returned to the normal state.
- The overspeed shutdown acts directly to disconnect the fuel supply independent of the governor.
- The shutdown control system may be reset by the operation of one reset switch, after safety devices have been manually reset.

#### **Emergency and fault shutdown**

General: Provide for the following conditions to register as audible and visible alarms and to cause each generating set main circuit breaker to open immediately and each generating set to immediately shutdown:

- Emergency stop push-button: Pressed.
- Generating set: Over voltage.
- Generating set protection: Activated.
- Generating set: Over current.
- Engine: Overspeed.
- Engine oil pressure: Low.
- Jacket water temperature: High.

#### Automatic synchronising

General: Provide synchronising modules which automatically synchronise each incoming alternator supply frequency and phase angle to the live busbars.

## **Emergency stop push-buttons**

Generating sets < 2 m long: Provide one pushbutton per generating set.

Other generating sets: Provide 2 push-buttons per generating set. Locate one on each side or locate one of the push-buttons in the engine local control board.

Type: 40 mm diameter red, palm operated type mounted in a metal wall box fixed to a free standing U channel pedestal. Wire to disconnect the generator and immediately shut down the engine when the controls are in the automatic or manual mode.

## 2.6 CONTROL PANELS

#### General

General: Provide control panels, switchgear and controlgear assemblies to *Switchboards – custom built*, *Switchboard components* and as documented.

Equipment: Accommodate equipment operating in parallel and stabilise load sharing between each generating set at all load steps. Include reverse power interlock.

#### Engine local control board

General: For each generating set, provide the following:

- Key operated local engine start/stop control.
- Controls for auto/off/manual/load test.
- Emergency manual shutdown.
- Speed indicator, kW meter, frequency meter, ammeter, kVAR meter, power factor meter, and hours run meter.
- Indicator showing generating set under local control.
- Oil pressure indicator.
- Coolant temperature indicator.
- Undervoltage protection: Adjustable down to 90% rated voltage with time delay 0 to 10 s.
- Under frequency protection with two stages.
- . First stage: Adjustable 47 50 Hz with time delay 0 to 10 s.
- . Second stage: Adjustable down to 40 Hz and with instantaneous trip.
- Automatic voltage regulator consisting of the following:
- . Switch to select manual or automatic voltage control.
- . Solid-state type automatic voltage regulator.
- Under and overvoltage sensing.
- Power transducers.
- Over and underspeed sensors.
- Alternator output control: For overload or fault protection provide the following:
- Type.

- Rating.
- Closing e.g. hand closing or power-assisted closing if the device is a circuit-breaker.
- Overload protection e.g. integral or separate relay.
- Tripping voltage supply. Only if separate tripping

voltage supply is required.

- Alternator voltage control:
- Manual control adjustment.
- Automatic voltage regulator:
- Voltage adjustment.
- Set point adjustment.

## 2.7 BATTERIES AND CHARGERS

#### General

General: Provide separate batteries and charger systems for the following:

- Engine start.
- Control and alarm functions.

#### Standards

Engine start batteries: To AS/NZS 4029.1, AS 4029.2 or AS 4029.3.

Battery chargers: To AS 4044.

Control and alarm batteries: To AS 3731.1, AS 3731.2, AS/NZS 4029.2 or AS 4029.3.

#### **Starting batteries**

Location: Locate in proprietary battery holders attached to the generating set, or on purpose-built stands next to the set and constructed of timber or other corrosion resistant material. Isolate batteries from vibration.

Covers: Provide a high-impact resistant transparent cover for each battery.

Capacity: Sufficient to crank the engine for 3 successive attempted starts, repeated at 5 min intervals.

Isolator: Provide a lockable isolator to prevent accidental starting.

#### Starting batteries chargers

General: Select the charger to suit the batteries supplied.

Mains power: Connect chargers to the mains power to ensure that power is maintained to the charger under all supply conditions.

Alarm outputs: Provide the following local audible and visual alarms together with facilities for extending them via a common alarm output to a remote location:

- Mains off.
- Over voltage.
- Over current.
- Low battery voltage.
- Insufficient charge rate.

#### **Control and alarm batteries**

Location: Segregate battery and charger equipment from generator control equipment.

Capacity: Sufficient to supply full generating set control, monitoring and alarm functions for a period of 48 hours, and then operate circuit breaker and transfer devices for 10 consecutive open-trip-close cycles with mains supply off and at minimum ambient temperature.

**Chargers – control and alarm batteries** General: Select the charger to suit the batteries supplied.

Alarm outputs: Provide the following local audible and visual alarms together with facilities for extending them via a common alarm output to a remote location:

- Mains off.
- Over voltage.
- Over current.
- Low battery voltage.
- Insufficient charge rate.

## 2.8 STARTING

#### Electric starting

General: Provide starter motors, batteries and chargers, and associated control equipment to automatically start each engine.

Wiring: Wire starter motors so that starter motor solenoid contacts are on the active side and field windings are at earth potential when the motor is de-energised. Provide an interlock, connected directly to the engine, to prevent the starter motor operating when the engine is running.

Starting interlock: Provide a starting lock out system which prevents further starting attempts after 3 successive unsuccessful attempts.

## 2.9 ACOUSTIC ENCLOSURES

#### General

General: Provide weatherproof acoustic enclosures to surround generating sets, including inlet and outlet sound attenuators.

#### Sound pressure level limit

General: 85 dB (A) at 12 locations 1 m from the enclosure exterior surface, at 1.5 m above floor or roof levels, measured with the generating set operating at constant maximum rated full load output, with doors closed and service penetrations sealed.

#### Dimensions

General: Size enclosures to accommodate diesel engine inlet and outlet attenuators and permit an unobstructed walkway at least 600 mm wide between the generating set and internal face of the enclosure.

#### Doors

General: Provide doors of same material as the enclosure. Provide door stays to each door.

## Ventilation

General: Provide ventilation to the enclosure so that:

- With generating sets running at full rated output the enclosure temperature rise does not exceed 10°C.
- Hazardous concentrations of toxic or explosive fumes and gases are prevented.

## 2.10 MARKING

#### **Rating plates**

Temperature-rise limits: If temperature-rise limits are achieved by de-rating an oversized generator, state the de-rated value.

Alternator mass: State alternator mass.

# Thermistor detector identification and warning plates

Thermistors: Provide details of thermistor type classification and reference temperature.

Warning: Provide a warning engraved in 4 mm high lettering as follows:

- WARNING – Do not apply more than 2.5 V across the protection thermistor devices.

Anti-condensation heater identification and warning: Locate next to heater terminals. State the number, voltage and power rating of the heaters, and the following separate warning engraved in red letters on a white background:

- WARNING – Anti-condensation heater. Circuit is live when the set is off.

#### Auxiliary wiring

Ferrules: Provide to wiring ends identifying each conductor.

#### Engine direction of rotation

General: If driving shafts or associated rotating parts are accessible, clearly and permanently mark the direction of rotation on an adjacent fixed surface.

Rotation identification: Provide a label within the supply cable terminal box identifying the relationship between the direction of rotation and the marking of terminals.

#### **Charger enclosure markings**

General: Provide enclosure with the following:

- Manufacturer's rating plates.
- Markings to AS 4044.
- Plate material: Stainless steel.

## 3 EXECUTION

## 3.1 GENERAL

#### Plinths

General: Provide reinforced concrete plinths for floor mounted equipment, sized to suit equipment footprints.

#### **Resilient mounts**

General: Provide at least 6 resilient mounting blocks between the frame and the plinth.

#### Drip trays

General: Provide removable drip trays under those parts of the assembly where fuel or lubricant leakage may occur. Provide overflow outlet pipes taken to a point where a receptacle can be fitted under the pipe outlet.

Capacity: At least 1.5 times the oil capacity of the engine sump.

Material: 1.6 mm galvanized steel with brazed joints and rolled edges.

## 3.2 PERMANENT TEST LOAD

#### General

General: Provide a permanent, fan cooled, resistive test load connected to the generating set control panel.

Arrangement: Enclose test load resistors and fan and associated switchgear and controls in 2 segregated enclosures within a common ventilated sheet metal enclosure.

Degree of protection:

- Indoor locations: IP41.
- Outdoor locations: IP55.

Rating: At least 50% rated output of combined generating sets.

Resistor bank: 415 V, 3 phase, delta connected, stainless steel finned, sheathed element type. Interconnect resistors with nickel plated copper links supported on stand-off insulators. Arrange resistor banks to suit switched load steps.

Resistor bank switching: Switched in at least 3 equal load steps, from the generating set control panel.

Internal wiring:

- Connection to elements: 150°C silicon rubber insulation.
- General internal wiring: V-90HT insulation.

Circuit breakers: Provide a main circuit breaker to connect the alternator supply and individual circuit breakers for each resistor group.

Protection: Provide a thermal overload relay for fan motor protection. Provide safety interlocks to disconnect the load if ventilation air flow is restricted or resistor temperature limits are exceeded.

Fan run-on: 5 min after load disconnection.

Remote monitoring: Provide outputs for remote monitoring of the following:

- Load step indication.
- Fan run-on.
- Common alarm for fan motor overload, air flow restriction, and safety interlock operation.

## 3.3 ENGINE COOLING

#### General

General: Provide a cooling system consisting of radiators, fans and pumps.

Cooling air ductwork: Connect the cooling air outlet to generator room cooling air outlet.

#### 3.4 ENGINE AIR INTAKE

#### General

Filters: Provide dry type air intake filters of sufficient capacity to permit continuous engine operation for 200 hours before filter servicing becomes necessary. Provide filter manometers.

Ductwork: To AS 4254.

Fans: Provide a fan selected for the installed system air pressure drop. Include power absorbed by the fan under site operating conditions when calculating generator output.

## 3.5 EXHAUST SYSTEM

#### General

General: Provide exhaust piping from the engine complete with silencers, piping, ductwork, supports and expansion devices.

#### Exhaust piping

Material: Grade 321 Stainless steel.

Diameter: Match engine exhaust manifold connection.

Connections: Provide flanged connections to silencers and pipe interconnections.

Vibration isolation: Provide a stainless steel flexible connection to the engine.

#### Weatherproofing

General: Provide weatherproof flashing, sleeves and acoustic seals where the exhaust system penetrates the roof or external walls.

#### Exhaust drainage

General: Grade the exhaust line away from the engine to drainage pockets, or connect to a suitable drainage outlet.

#### Exhaust pipe insulation

General: Insulate the full length of exhausts within buildings.

Insulation Material: Mineral wool, suitable for temperatures up to 260°C.

Maximum thermal conductivity: 0.036 W/m.K at 20°C.

Minimum thickness: 50 mm.

Application: Wrap insulation around exhaust pipes. Hold in place with 12 mm x 0.55 mm zinc-coated steel straps at 600 mm maximum centres.

Sheathing: Sheath insulation as follows:

- Sheathing not exposed to weather: 0.55 mm metallic-coated steel sheet.
- Sheathing exposed to weather: 0.55 mm metalliccoated steel sheet or 0.8 mm (minimum) aluminium sheet.
- Joints: Lap joints in sheathing at least 30 mm and rivet or screw at 150 mm maximum centres.
- Edges: Neatly cut around nozzles and cone down to flanges.
- Terminations: At terminations, return edges of sheathing to protect edges of insulation.

#### 3.6 FUEL SYSTEM

#### General

General: Comply with the *Liquid fuels* worksection. **Fuel connections** 

Fuel piping and associated auxiliary equipment: To AS 1940.

## Stop valves

General: Provide stop valves on the inlet to, and outlets from, the daily service tank.

#### 3.7 COMPLETION

#### Completion tests

General: For each generating set carry out the following:

- Check tightness of connections and securing devices.
- Verify correctness of operation of protection devices and systems including sensor settings. Simulate actual conditions as far as possible, in order to test responses to faults imposed.
- Functional checks to AS 4594.1 Table 7, List C, items C1 to C5 inclusive.
- Cold start with the engine having been at rest for the previous 24 hours, timed from receipt of mains failure signal to acceptance of full rated load in 3 load steps to within the limits of output voltage and frequency.
- Continuous operational trial consisting of:
  - . 4 hours at 100% rated power.
  - . 1 hour at 110% rated power.
  - . 30 min at 75% rated power.
  - 30 min at 50% rated power.
- Record fuel consumption for each step of the continuous trial.
- Sample engine oil from engine sump before and after tests. Perform laboratory analysis and submit a report on each oil sample.
- Continuous operational trial: During the trial, measure the following at maximum intervals of 30 minutes:
  - . Generator kW and kVAR output.
- . Generator output voltage.
- . Generator output current.
- . Generator output frequency.
- . Power factor.
- . Oil pressure and water temperature.
- . Electrical power requirements of continuously running electric motor driven ancillaries.
- . Each battery charger current and voltage readings.
- . Noise level.

Synchronisation and load sharing tests: For generating sets running in parallel perform tests to verify automatic synchronisation and load sharing including the following:

- Sequence start and shutdown of each generating set.
- Parallel operation of generating sets.
- Synchronising of generating sets.
- Equal load sharing of kW and kVAR over 5 equal load steps.
- Neutral switching sequence and operation, where provided.
- Operation of controls, switchgear and auxiliaries.

## Temporary test loads

General: Provide test loads including power and control wiring, ancillary equipment and test instruments to achieve the kW, kVAR and necessary load steps.

## Reports

General: Submit reports from manufacturers or suppliers verifying the performance of safety and control functions of each system.

#### Maintenance

Call out: Respond to call outs for breakdowns or other faults requiring corrective maintenance. Attend on site within 24 hours of notification. Rectify faults and replace faulty materials and equipment.

## 0933 POWER GENERATION – PHOTOVOLTAIC

## 1 GENERAL

#### 1.1 AIMS

#### General

General: Provide photovoltaic generating system(s) as documented, incorporating the following:

- Photovoltaic array.
- Regulator.
- Battery system.
- Inverter.
- Connection to low voltage power system.

#### Design

Irradiation data: Australian Bureau of Meteorology.

#### System provider

Requirement: The system provider is to be accredited by the Clean Energy Council of Australia.

#### 1.2 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

#### Associated worksections

Associated worksections: Conform to the following:

- Electrical general requirements.
- Low voltage power systems.
- Cable support and duct systems.
- Switchboards proprietary.
- Switchboards custom-built.
- Switchboard components.
- Lightning protection.

#### 1.3 STANDARD

### General

General: For the purpose of this worksection, compliance with the following standards relating to stand-alone systems are also applicable to those systems which are to be connected to the network supply:

- Stand-alone power systems: To AS/NZS 4509.1, AS/NZS 4509.2 and AS/NZS 4509.3
- Grid connected systems: To AS 4777.1, AS 4777.2 and AS 4777.3
- IEC 61836

#### 1.4 INTERPRETATIONS

## Definitions

General: To AS 4509.2

#### 1.5 SUBMISSIONS

#### **Rebate application**

General: Provide complete and timely application documentation for a grant under the appropriate Rebate Programme.

#### **Technical data**

General: Submit technical data including the following:

- Technical description and specifications of each component.
- Calculations and assumptions for all selections and systems.
- Type test reports.

#### Shop drawings

General: Submit shop drawings indicating the following:

- General arrangement of equipment.
- Single line schematic showing the interconnection with the building electrical system.
- Access clearances for operational maintenance and dismantling.
- Electrical single line diagram, and general arrangement for the complete system.
- Control diagrams.
- Support details.

## 2 PRODUCTS

## 2.1 GENERAL

#### General

Selection: To meet the system requirements as documented.

Marking: To AS/NZS 5033

## 2.2 PHOTOVOLTAIC MODULE

#### General

Selection: To AS 4509.2, AS 5033 and as documented.

## Array

Encapsulation: Required. Toughened glass: Required.

Protection rating:  $\geq$  IPX6.

Integral bypass diode protection: Required.

## Cells

Type: Crystalline. Standard: To IEC 61215 Efficiency:  $\geq$  12%.

## 2.3 REGULATOR

## General

Selection: To AS 4509.2 and as documented. Function: Charge cycle control including:

- Low battery voltage disconnect.

- Pulse width modulation.
- $\geq 3$  step series regulation.

Display: LCD display of:

- Battery voltage.
- Charge current.
- Ampere hours in and out.
- Load current.

Alarms: Visible and audible low and high battery voltage alarms.

Transient protection: Required.

## 2.4 BATTERY SYSTEM

#### General

Selection: To meet the documented performance. Blocking diodes: Required. Service life: ≥ 10 years. Standards AS 2676, AS 4086.1

## 2.5 INVERTER

## General

Selection: To meet the documented performance.

Waveform: True Sine wave.

Waveform quality: To AS 4777.

Voltage regulation: ± 8%.

Harmonic distortion of output current:< 4%.

Frequency regulation: ± 1%.

Efficiency:  $\geq$  90% at 10% load.

Protection: Overload, short circuit and transient required.

Automatic no-load shutdown: required.

Display:

- Output power.
- Grid stability.

#### Standards

General: To AS 4777.2 and AS 4777.3.

## Synchronisation

General: Provide self commutation modules which automatically synchronise the inverter supply frequency and phase angle to the low voltage network or other embedded generator system.

## 2.6 CONTROL SYSTEM

#### **Control panel**

General: Provide photovoltaic system control panels, switchgear and control gear assemblies to *Switchboards – custom built*, *Switchboard components* and as documented.

## 3 EXECUTION

## 3.1 INSTALLATION

#### General

Standard: To AS 5033. Photovoltaic array

Location: As documented.

Orientation: Fixed to AS 4509.2.

Tilt: Fixed to AS 4509.2 and AS 4509.3.

Structure: To AS 1170.2.

Lightning protection: Connect to photovoltaic array support system.

## Regulator

Location: Locate as documented.

#### **Battery system**

Standard: To AS 4086.2.

Location: Locate as documented.

Enclosure: To AS 4509.2.

Support: Mount in proprietary battery holders or on purpose-built stands constructed of timber or other corrosion resistant material.

#### Inverter

Location: Locate as documented.

# Standard: To AS 4777.1.

Low voltage connection General: Connect to low voltage power system as documented.

Surge diversion: Required.

#### Earthing

Standard: To AS 5033.

#### Support

Roof mounted plant and equipment:

- If a horizontal platform is required, or the area of the plant and equipment is extensive, seek the advice of a professional engineer for the documentation of a suitable platform.
- If balustrades or screening are required, seek the advice of a registered architect.
- For roof level support circumstances, if any of the following apply, seek the advice of a professional engineer:
- . The total load from any unit of plant or equipment exceeds 500 kg.
- . The load from a unit of plant or equipment to any single support point exceeds 100 kg.
- . The average loading of plant and equipment over the area extending 1 m on all sides beyond the plant and equipment exceeds 25 kg/m<sup>2</sup>.
- If the roof slope is greater than 10 degrees, adopt the manufacturers' documented installation procedures, or seek the advice of a professional engineer.
- In all other cases, under each support point use treated timbers (90 mm x 45 mm) laid parallel to the span of the roof sheeting or the roof pitch extending to the first purlin, rafter or batten more than 1 m from the plant or equipment.

Ground level mounted plant and equipment:

- If the ground slope is greater than 15 degrees, or the area of the plant and equipment is extensive, seek the advice of a professional engineer for the documentation of a suitable slab or platform.
- If balustrades or screening are required, seek the advice of a registered architect.
- In all other cases, provide proprietary plastic or concrete supports installed with falls that achieve a raised, impervious and water shedding bearing surface.

## 3.2 COMPLETION

## **Completion tests**

General: To AS 4509.3 and AS 5033.

#### Reports

General: Submit test reports from manufacturers or suppliers verifying the performance of safety and control functions of each system.

## Maintenance

Stand alone power systems: Maintain the system to AS 4509.3 during the defects liability period.

Grid connected systems: Maintain the system to AS 5033 Appendix H during the defects liability period.

Call out: Respond to call outs for breakdowns or other faults requiring corrective maintenance. Attend on site within 24 hours of notification. Rectify faults and replace faulty materials and equipment.

## Warranty

General: Provide manufacturers and installers warranties as documented.

## 0937 UNINTERRUPTIBLE POWER SUPPLY

## 1 GENERAL

## 1.1 AIMS

#### Responsibilities

General: Provide uninterruptible power supplies as follows and as documented.

## 1.2 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

#### Associated worksections

Associated worksections: Conform to the following:

- Electrical general requirements.
- Switchboards proprietary.
- Switchboards custom-built.
- Switchboard components.

## 1.3 STANDARD

#### General

General: To AS 62040.2 and AS 62040.3.

Converters: To AS 60146.2.

Batteries: To AS/NZS 4029.2 or AS 4029.3.

Batteries installation: To AS/NZS 2676 series and AS/NZS 3011 series.

#### Authorities

EMC: Comply with the requirements of the Australian Communications and Media Authority.

## 1.4 INTERPRETATIONS

## Abbreviations

General: For the purposes of this worksection the abbreviations given below apply.

- EMC: Electromagnetic compatibility.

## Definitions

General: For the purposes of this worksection the definitions given below apply.

- Uninterruptible power supply (UPS): Battery operated static inverter system.

## 1.5 TESTS

#### General

Standard: To AS/NZS 62040.3.

#### **Test loads**

General: Supply reactive test loads including power, control wiring and ancillary equipment.

Function: To achieve the kW, and kV.Ar and load steps necessary to demonstrate and verify the designated steady state and transient frequency and voltage responses and waveform deviation tests.

#### Functional unit tests

Rectifier: Factory tests to AS/NZS 62040.3 and AS/NZS 60146.1.1.

Inverter: Factory tests to AS/NZS 62040.3 and AS/NZS 60146.2.

Switch: Factory tests to AS/NZS 62040.3 and AS/NZS 60146.1.1.

Monitoring and control: Factory tests to AS/NZS 62040.3.

Battery: Factory tests to AS/NZS 62040.3 clause 6.6.15, 6.6.16, and 6.6.17.

Battery: Capacity test to AS/NZS 4029.

#### **Complete UPS**

On-site tests: Provide 'routine; and 'optional' tests to AS/NZS 62040.3 Table 4 in conformance with the **On-site tests schedule**.

EMC: To AS 62040.2.

Power line condition: Test input power factor and harmonic content on completed installation.

## 1.6 SUBMISSIONS

#### **Design – documentation**

Standard: Submit technical data to AS 62040.3. Calculations: Submit calculated input power factor and harmonic content.

#### Shop drawings

General: Include the following:

- The UPS system general arrangement and layout with details of connections, circuit breakers, cable sizes, overall dimensions, weight, location of access doors, cable terminating locations, and necessary clearances.
- Functional block diagram.
- The general arrangement of the remote manual by-pass switch/cabinet and indication/alarm panel with details of installation requirements.
- Type and rating of equipment items.
- Battery layout and associated details.

## 2 EXECUTION

#### 2.1 COMPLETION

#### Spares

General: Supply spare parts necessary to maintain the mean time to repair.

Storage: Package and label spare parts for long-term storage within the UPS room.

#### **Completion tests**

General: Test run the UPS system continuously connected to the test load, for at least 48 hours. Record line and load voltage, current frequency and temperature measurements.

## 2.2 MAINTENANCE

General: Respond to call outs for breakdowns or other faults requiring corrective maintenance. Attend on site within 24 hours of notification. Rectify faults, and replace faulty materials and equipment.

## 0941 SWITCHBOARDS – PROPRIETARY

#### 1 GENERAL

## 1.1 AIMS

#### Responsibilities

General: Provide switchboards as follows and as documented.

## 1.2 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

#### Associated worksections

Associated worksections: Conform to the following:

- Electrical general requirements.
- Low voltage power systems.
- Switchboard components.

#### 1.3 STANDARDS

#### General

Standards: To AS/NZS 3439.3.

#### 1.4 INTERPRETATIONS

## Definitions

General: For the purposes of this worksection the definitions given below apply.

- Proprietary assemblies: Low voltage switchgear and controlgear assemblies available as a catalogue item, consisting of manufacturer's standard layouts and equipment.
- Rated currents: Rated currents are continuous uninterrupted current ratings within the assembly environment under in-service operating conditions.
- Rated short-circuit currents: Maximum prospective symmetrical root mean square (r.m.s.) current values at rated operational voltage, at each assembly incoming supply terminal, excluding effects of current limiting devices.

#### 1.5 SUBMISSIONS

# Product data for proprietary assemblies

General: Submit the following:

- Makes, types and model numbers of items of equipment.
- Type test certificates for components, functional units and assemblies including internal arcing-fault tests and factory test data
- Overall dimensions.
- Fault level.
- IP rating.
- Rated current of components.
- Number of poles and spare capacity.
- Mounting details.
- Door swings.

- Paint colours and finishes.
- Access details.
- Schedule of labels.

## 2 PRODUCTS

#### 2.1 GENERAL

#### Busbars

General: Incorporate proprietary insulated busbar systems for the interconnection of isolators, circuit breakers and other circuit protective devices.

#### Earthing

General: Make provision for connection of communications systems CET at switchboard earth bar to AS/ACIF S009.

#### Doors

General: Provide lockable doors with a circuit card holder unless enclosed in cupboards or in an area which is not readily accessible to the public.

## IP rating

General: IP42 minimum. Weatherproof: IP56 minimum. **Finishes** 

#### Interior: White

Exterior: Installed in cupboards, switchrooms and plant rooms: Manufacturers standard powder coated finish.

Exterior: Installed elsewhere: To non-standard selected powder coated colour.

## Supporting structure

General: Wall mounted for proprietary switchboards. Floor mounted: Assemblies >  $2 \text{ m}^2$ .

## Ventilation

General: Required to maintain design operating temperatures at full load.

#### 3 EXECUTION

#### 3.1 GENERAL

#### Fixing

General: Before making inter-panel connections, fix assemblies and metering equipment enclosures into position, level and plumb.

#### **Cable entries**

General: Neatly adapt one or more cable entry plates, if fitted, to accept incoming cable enclosure. Provide the minimum number of entry plates to leave spare capacity for future cable entries. Do not run cables into the top of weatherproof assemblies.

Single core cables: Pass separately through nonferrous gland plates. Do not provide metal saddles. Provide glands for all single core cables.

#### Cable enclosures

Cable enclosures: Continue cable enclosures to or into assemblies and fit cable entry plates so that the IP rating of the assembly and the fire rating of the cable are maintained.

#### **Cable supports**

Cable supports: Support or tie mains and submains cables within 200 mm of terminations. Provide cable

supports suitable for stresses resulting from short circuit conditions.

#### 3.2 MAINTENANCE

#### General

Standard: To \*AS 2467

## 0942 SWITCHBOARDS – CUSTOM-BUILT

## 1 GENERAL

## 1.1 AIMS

#### Responsibilities

General: Provide switchboards as follows and as documented.

## 1.2 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

#### Associated worksections

Associated worksections: Conform to the following:

- Electrical general requirements.
- Low voltage power systems.
- Switchboard components.

#### 1.3 STANDARD

#### General

Standards: To AS/NZS 3439.1.

#### 1.4 INTERPRETATIONS

#### Abbreviations

General: For the purposes of this worksection the abbreviations given below apply.

- TTA: Type tested assemblies.
- NTTA: Non-type tested assemblies.
- PTTA: Partially type tested assemblies.

#### Definitions

General: For the purposes of this worksection the definitions given below apply.

- Custom-built assemblies: Low voltage switchgear and controlgear assemblies manufactured to order.
- Rated currents: Rated currents are continuous uninterrupted current ratings within the assembly environment under in-service operating conditions.
- Rated short-circuit currents: Maximum prospective symmetrical root mean square (r.m.s.) current values at rated operational voltage, at each assembly incoming supply terminal, excluding effects of current limiting devices.

#### 1.5 TESTS

#### Routine tests

Standard: To AS 3439.1.

Assemblies: Electrical and mechanical routine function tests at the factory using externally connected simulated circuits and equipment.

Dielectric testing: NTTAs and PTTAs: 2.5 kV r.m.s. for 15 s.

## 1.6 INSPECTION

#### Notice

Inspection: Give sufficient notice so inspection may be made of the following:

- Fabrication and painting completed.
- Factory assembly completed, with busbars exposed and functional units in place.
- Assembly ready for routine testing.
- Assembly installed prior to connection.
- Assembly installed and connected.

## 1.7 SUBMISSIONS

#### Calculations

General: Submit detailed certified calculations verifying design characteristics.

Standard: To AS 3865 and AS 4388.

## Type test data

General: Submit type test certificates for components, functional units and assemblies. Verify that type tests and internal arcing-fault tests, if any, were carried out at not less than the designated fault currents at rated operational voltage.

Alterations to TTAs: Submit records of alterations made to assemblies since the tests.

## **Routine tests**

General: Submit reports.

## **Technical data**

Calculations: Submit design calculations of non-type tested and non-proprietary busbar assemblies.

## Shop drawings

General: Submit shop drawings showing:

- Types, model numbers and ratings of assemblies.
- Component details, functional units and transient protection.
- Detailed dimensions.
- Shipping sections, general arrangement, plan view, front elevations and cross-section of each compartment.
- Projections from the assembly that may affect clearances or inadvertent operation, such as handles, knobs, arcing-fault venting flaps and withdrawable components.
- Fault level and rated short circuit capacity characteristics.
- IP rating.
- Fixing details for floor or wall mounting.
- Front and back equipment connections and top and bottom cable entries.
- Door swings.
- External and internal paint colours and paint systems.
- Quantity, brand name, type and rating of control and protection equipment.
- Construction and plinth details, ventilation openings, internal arcing-fault venting and gland plate details.
- Terminal block layouts and control circuit identification.

- Single line power and circuit diagrams.
- Details of mains and submain routes within assemblies.
- Busbar arrangements, links and supports, spacing between busbar phases and spacing between assemblies, the enclosure and other equipment and clearances to earthed metals.
- Dimensions of busbars and interconnecting cables in sufficient detail for calculations to be performed.
- Form of separation and details of shrouding of terminals.
- Labels and engraving schedules.

## 2 PRODUCTS

## 2.1 CUSTOM-BUILT SWITCHBOARD CONSTRUCTION

## General

General: Provide custom-built switchboards as documented.

#### Layout

General: Position equipment to provide safe and easy access for operation and maintenance. Group devices according to function.

Compartments: Separate shipping sections, subsections, cable and busbar zones, functional unit modules and low voltage equipment compartments by means of vertical and horizontal steel partitions which suit the layout and form of separation.

Form 1 enclosures: Separate into compartments by means of partitions at 1.8 m maximum centres.

Equipment on doors: Set out in a logical manner in functional unit groups, so it is accessible without the use of tools or keys.

#### Segregation

General: Segregate BCA emergency equipment from non-emergency equipment by means of metal partitions designed to prevent the spread of a fault from non-emergency equipment to emergency equipment.

#### **Enclosure materials**

General: Fabricate from sheet metal of rigid folded and welded construction. Obtain approval for nonwelded forms of construction.

Material: Metallic-coated sheet steel to AS 1397.

Material thickness: Diagonal dimension < 900 mm:≥ 1.6 mm.

Diagonal dimension ≥ 900 mm:≥2.0 mm.

Coating class:

- Indoor assemblies: Z200.
- Outdoor assemblies: Z450.

#### Insect proofing

General: Cover ventilation openings with noncombustible and corrosion resistant 1 mm mesh.

## Equipment mounting panels

General: To support the weight of mounted equipment.

Metallic panels: Construct from  $\geq$  3 mm thick metal with heavy metal angle supports or plates bolted or welded to enclosure sides.

Non-metallic panels: Provide non-metallic panels selected to suit the weight of the mounted equipment and design the mounting structure for stability and stiffness.

Non-metallic boards: To IEC 60893-1.

## Equipment fixing

Spacing: Provide 50 mm minimum clearance between the following:

- Busbars for lifts, fire services and building emergency services.
- General installation services, busbars and equipment.

Mounting: Bolts, set screws fitted into tapped holes in metal mounting panels, studs or proprietary attachment clips. Provide accessible equipment fixings which allow equipment changes after assembly commissioning.

Installation: For lightweight equipment, provide combination rails and proprietary clips.

## Earth continuity

General: Strip painted surfaces and coat with corrosion resistant material immediately before bolting to the earth bar. Provide serrated washers under bolt heads and nuts at painted, structural metal-to-metal joints.

#### Construction

Lifting provisions: For assemblies with shipping dimensions exceeding 1800 mm high x 600 mm wide, provide fixings in the supporting structure and removable attachments for lifting.

Supporting structure: Provide concealed fixings or brackets to allow assemblies to be mounted and fixed in position without removing equipment.

Floor-mounting: Provide mild steel channel plinth, galvanized to class Z600, with toe-out profile, nominal 75 mm high x 40 mm wide x 6 mm thick, for mounting complete assemblies on site. Drill M12 clearance holes in assembly and channel and bolt assemblies to channel. Prime drilled holes with zinc rich organic primer to AS/NZS 3750.9.

Ventilation: Provide ventilation to maintain design operating temperatures at full load.

## 2.2 CABLE ENTRIES

#### General

General: Provide cable entry facilities within assembly cable zones for incoming and outgoing power and control cabling. Provide sufficient clear space within each enclosure next to cable entries to allow incoming and outgoing cables and wiring to be neatly run and terminated, without undue bunching and sharp bends.

## Cover and gland plates

Cover plates: Provide 150 mm maximum width cover plates butted together and covering the continuous cable entry slot.

Gland plates: Provide removable gland plates fitted with gaskets to maintain the degree of protection.

Materials: 1.5 mm thick steel, 5 mm thick composite material or laminated phenolic. 6 mm thick brass for MIMS cables and cable glands.

## 2.3 BUS TRUNKING SYSTEM ENTRY

#### General

General: Provide entry plates with close tolerance cut-out to accommodate busbars, fitted with a flange bolted and sealed to assembly enclosure to maintain assembly IP rating. Earth busway enclosure to assembly protective earth conductor. Fit busway flanges at assembly manufacturer's premises and retain for transportation.

## 2.4 DOORS AND COVERS

#### General

Provide lockable doors with a circuit card holder unless enclosed in cupboards.

Door layout

Maximum width: 900 mm. Minimum swing: At least 90°.

Door stays: Provide stays to outdoor assembly doors.

Adjacent doors: Space adjacent doors to allow both to open to 90° at the same time.

#### **Door construction**

Protection: Provide single right angle return on all sides and fit suitable resilient sealing rubber to provide the documented IP rating and prevent damage to paintwork.

Hinges: Provide corrosion-resistant pintle hinges or integrally constructed hinges to support doors. For removable doors, provide staggered pin lengths to achieve progressive engagement as doors are fitted. Provide 3 hinges for doors higher than 1000 mm. Provide restraining devices and opposed hinges for non lift-off doors.

Door hardware: Provide the following:

- Corrosion resistant lever-type handles, operating a latching system with latching bar and guides strong enough to withstand explosive force resulting from fault conditions within the assembly.
- Dual, edge mounted, corrosion resistant T handles with provision for key locking cylinder.
- Captive, corrosion resistant knurled thumb screws.

Locking: Incorporate cylinder locks in the latching system. Key alike, 2 keys per assembly.

Door mounted equipment: Protect or shroud door mounted equipment and terminals to prevent inadvertent contact with live terminals, wiring, or both.

Earthing: Maintain earth continuity to door mounted indicating or control equipment with multi-stranded, flexible earth wire, or braid of equal cross-sectional area, bonded to the door.

## Covers

Maximum dimensions: 900 mm wide and 1.2 m<sup>2</sup> surface area.

Fixing: Fix to frames with at least 4 fixings. Provide corrosion-resistant acorn nuts if the cover exceeds 600 mm in width. Rest cover edges on the cubicle

body or on mullions. Do not provide interlocked covers.

Handles: Provide corrosion resistant D type handles.

## Escutcheons

General: For doors enclosing circuit breakers, provide escutcheon plates as barriers between operating mechanisms and live parts.

## Escutcheon plates

General: Provide plates or removable covers with neat circuit breaker toggle cut-outs allowing interchangeability of 1, 2 and 3 pole circuit breakers. Provide corrosion-resistant lifting handles or knobs. Provide unused circuit breaker toggle cut-outs with blanking in-fill pole covers.

Maximum dimensions: 900 mm wide and 1.2  $\mbox{m}^2$  surface area.

## 2.5 FACTORY FINISHES

#### General

Standard: To AS 2700.

Extent: Apply protective coatings to internal and external metal surfaces of assembly cabinets including covers, except to stainless steel, galvanized, electroplated, or anodised surfaces and to ventilation mesh covers.

Finish coats: Thermoset powder coating to AS 4506 or two-pack liquid coating of AS/NZS 3750.13 primer and proprietary or epoxy acrylic full gloss spray finish to **Factory finishes schedule**.

## Factory finishes schedule

| Mounting structure<br>(brackets) | To match enclosure   |
|----------------------------------|--|
| Enclosure                        | Indoor assemblies: Orange<br>X15<br>Outdoor assemblies:<br>Avocado green G34<br>Assembly interior: White |
| Escutcheons                      | Removable equipment<br>panels: Off white Y35   |
| Doors                            | To match enclosure   |
| Plinths                          | Black  |

## 2.6 BUSBARS

#### General

General: Provide main circuit supply busbars within assemblies, extending from incoming supply terminals to the line side of protective equipment for outgoing functional units and for future functional units.

Standards: To AS 3768, AS 3865 and AS 4388. **Definitions** 

Incoming busbars: Busbars connecting incoming terminals to line side terminals of main switches.

Main circuit supply busbars: Busbars connecting incoming functional unit terminals, or incoming busbars where no main switches are included, to outgoing functional unit terminals or outgoing functional unit tee-offs.

Tee-off busbars: Busbars connecting main busbars to incoming terminals of outgoing functional units.

#### **Custom-built busbar construction**

Material: Hard-drawn high-conductivity electrolytic tough pitched copper alloy bars, designation 110.

Temperature rise limits - active and neutral conductors:

- Maximum rated current temperature rise limits: 65  $\pm$  1.5°C by type test or calculation to AS 3768 or AS 4388.

Maximum short-circuit withstand current temperature rise limits: 160°C by calculation to AS 3865.

Cross section: Rectangular with radiused edges.

Supports: Sufficient to withstand thermal and magnetic stresses due to maximum prospective fault currents.

Support material: Non-hygroscopic insulation capable of holding busbars at 105°C.

## Proprietary busbars

Type: Multi-pole proprietary insulated busbar assemblies or busbar systems, verified for short circuit capacity and temperature rise-limits by type tests.

## Phase sequence

General: For main busbars and connections to switching devices, set-out phase sequence for phases A, B and C, from left-to-right, top-to-bottom and front-to-back when viewed from the front of the assembly.

#### Colour coding

General: Provide 25 mm minimum width colour bands permanently applied to busbars at 500 mm maximum intervals with at least one colour band for each busbar section within each compartment.

Active busbars: Red, white and blue respectively for the A, B and C phase.

Neutral busbar: Black.

MEN link: Green-yellow and black.

Protective earth busbar: Green-yellow.

Restrictions: Do not provide adhesive type colour bands.

#### **Current carrying capacity**

Active conductors: Take into account thermal stresses due to short circuit current, assuming magnetic material enclosures located indoors in well-ventilated rooms and 90°C final temperature.

Neutral conductors: Size to match incoming neutral conductor current carrying capacity.

Protective earth conductors: Size for at least 50% of the rated short circuit withstand current for 100% of the time duration.

## Tee-off busbars current rating

For individual outgoing functional units: Equal to maximum frame size rating of the functional unit.

For multiple functional units: Equal to the diversity factors of AS 3439.1, based on frame size rating.

## MEN links

MEN links > 10  $\text{mm}^2$  in cross-section: Bolted removable busbar links stamped MEN LINK, located in the incoming compartment, between neutral and earth busbars.

#### Fault current limiters

General: Rate busbars connected to fault current limiters to 100% of the indicated fault current limiter circuit breaker frame size or fuse base rating.

## **Busbar links**

General: For current transformers, provide removable busbar links  $\leq$  450 mm long.

## **Cable connection flags**

General: Provide and support busbar flags for equipment with main terminals too small for cable lugs. Provide flags sized to suit cable lug termination, with current rating of at least the maximum equipment frame size.

Phase isolation: Provide phase isolation between flags where the minimum clearance distances phase-to-phase and phase-to-earth are below the component terminal spacing.

## **Future extensions**

General: Pre-drill the main circuit supply busbar for future extensions and extend busbar droppers into future functional unit locations.

#### Jointing

Type: High tensile steel bolts, washers and nuts, with lock nuts or spring washers. Do not use tapped holes and studs or the like for jointing current carrying sections.

#### Custom-built busbar insulation

Active and neutral busbars and joints: Select from the following:

- Polyethylene: At least 0.4 mm thick with dielectric strength of 2.5 kV r.m.s for 1 minute, applied by a fluidised bed process in which the material is phase coloured and directly cured onto the bars.
- Close fitting busbar insulation mouldings at least 1 mm thick.
- Heat shrink material: Only on rounded edge busbars.

Taped joints: Apply non-adhesive stop-off type tape, coloured to match adjacent insulation and half lapped to achieve a thickness at least that of the solid insulation.

Damaged insulation: Repair damaged insulation before energising.

## 2.7 NEUTRAL LINKS AND EARTH BARS

## Terminals

General: Provide terminals for future circuits.

## Links

Assembly capacity > 36 poles: Provide neutral links and earth bars at the top and bottom of the circuit breaker section.

Assembly capacity  $\leq$  36 poles: Provide links and bars at the point of entry of incoming supply cables.

Mounting: Mount neutral links on an insulated base. Control circuits: Provide separate neutral links and earth bars.

Labels: Provide labels for neutral and earth terminals.

Cables > 10  $\text{mm}^2$ : Provide bolts or studs.

Communications earth: Make provision for connection of communications systems earth at switchboard earth bar to AS/ACIF S009.

## 2.8 INTERNAL WIRING

#### Wiring

General: Cable type: 0.6/1 kV copper cables. Provide V-90HT insulation where directly connected to active and neutral busbars.

## **Cable interconnections**

General: For the main circuit supply, provide cable interconnections as follows:

- $\geq 1.5 \text{ mm}^2$  internal cables, with minimum V75 insulation rating with stranded copper conductors rated to AS/NZS 3008.1.1. Provide cables with current ratings suitable for the internal assembly ambient air temperature and for temperature rise limits of equipment within the assembly.
- Run cables clear of busbars and metal edges.
- Provide cables capable of withstanding maximum thermal and magnetic stresses associated with relevant fault level and duration.
- Run cables neatly. Provide slotted trunking sized for future cables or tie at 150 mm maximum intervals with ties strong enough to withstand magnetic stresses created at the specified fault current. Do not provide adhesive supports.
- Ensure wiring for future equipment can be installed without removal of existing equipment.
- Identify power and control cables at both ends with neat fitting ring type ferrules agreeing with record circuit diagrams. Mark to AS/NZS 4383.
- Terminate control cables and motor control circuits in tunnel terminals or, if necessary, provide suitable palm type lugs and correct crimp tool.
- For equipment mounted on hinged doors run cables on the hinge side to avoid restricting the door opening. Bundle cables with spiral wrap PVC and secure to door.
- If recommended by device manufacturers, provide shielded wiring.

Adjacent circuit breakers: If suitable proprietary multi-pole busbar assemblies are available to link adjacent circuit breakers, do not provide cable interconnections.

## Cables > 6 mm<sup>2</sup>

Terminations:

- Tunnel terminals: Single cables.
- Other connection points or terminals:  $\leq$  2 cables.

Doors: Do not run cables to hinged doors or removable panels.

Supports:

- Spacing at enclosure: ≤ 200 mm from a termination.
- Spacing generally: ≤ 400 mm.
- Strength: Capable of withstanding forces exerted during fault conditions.

Single core cables rated  $\geq$  300 A: Do not provide ferrous type metal cable saddles.

Terminals marked: Terminate marked cables for connection to external controls in correspondingly marked terminals within the assembly.

## Control and indication circuits

General: Provide conductors sized to suit the current carrying capacity of the particular circuit. Minimum size:  $1 \text{ mm}^2$  with 32/0.2 stranding.

## Cable colours

General: Colour code wiring as follows:

- A phase: Red.
- B phase: White.
- C phase: Blue.
- Neutral: Black.
- Earthing: Green-yellow.

## 2.9 TERMINATIONS

#### Submains, light and power circuits

General: Connect direct to the control equipment terminals.

Shipping breaks: Provide terminal blocks for interconnecting wiring on each side of shipping breaks.

## 3 EXECUTION

## 3.1 ASSEMBLY INSTALLATION

## Fixing

General: Before making inter-panel connections, fix assemblies and metering equipment enclosures into position, level and plumb.

## 3.2 ASSEMBLY ENTRIES

#### Cable entries

General: Neatly adapt one or more cable entry plates, if fitted, to accept incoming cable enclosure. Provide the minimum number of entry plates to leave spare capacity for future cable entries. Do not run cables into the top of weatherproof assemblies.

Single core cables rated > 300 A: Pass separately through non-ferrous gland plates. Do not use metal saddles.

#### Cable enclosures

General: Continue cable enclosures to or into assemblies and fit cable entry plates so that the IP rating of the assembly and the fire rating of the cable are maintained.

## **Cable supports**

General: Support or tie mains and submains cables within 200 mm of terminations. Provide cable supports suitable for stresses resulting from short circuit conditions.

## Bus trunking system entry

General: Provide entry plates with close tolerance cut-out to accommodate busbars, fitted with a flange bolted and sealed to assembly enclosure to maintain assembly IP rating. Earth busway enclosure to assembly protective earth conductor. Fit busway flanges at assembly manufacturer's premises and retain for transportation.

## 3.3 MARKING AND LABELLING

#### General

General: Label the switchboard assembly in conformance with AS/NZS 3439.1 including the following:

- Size and type of all incoming and outgoing mains and submains.
- Emergency operating procedures.

## 3.4 COMPLETION

#### Maintenance

Standard: To \*AS 2467

General: Carry out the following:

- Rectify faults, make adjustments and replace consumable and faulty materials and equipment within 24 hours of notification.
- Monthly inspections and maintenance work to maintain the assembly, including battery systems.

## 0943 SWITCHBOARD COMPONENTS

## 1 GENERAL

## 1.1 AIMS

## Responsibilities

General: Provide switchboard components as follows and as documented.

## 1.2 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

## Associated worksections

Associated worksections: Conform to the following:

- Electrical general requirements.
- Switchboards proprietary.
- Switchboards custom-built.

## 1.3 DESIGN

#### Statutory authority's equipment

General: Liaise with the supply authority with regard to the installation and coordinate with their protective and control equipment.

#### 1.4 SUBMISSIONS

#### **Technical data**

General: Submit technical data for all components.

## 2 PRODUCTS

#### 2.1 GENERAL

#### General

Selection: To comply with the requirements of AS/NZS 3000 clause 1.7 and Section 2.

Rated duty: Uninterrupted.

Rated making capacity (peak):  $\geq$  2.1 x fault level (RMS) at assembly incoming terminals.

Utilisation category: To AS 60947.1 clause 4.4.

- Circuits consisting of motors or other highly inductive loads: At least AC-23.
- Other circuits: At least AC-22.

Coordination: Select and adjust protective devices to discriminate under over-current, and earth faults. Enclosure: IP4X minimum.

#### 2.2 SWITCH-ISOLATOR AND COMBINATION FUSE-SWITCH UNITS

#### General

Standard: To AS 60947.1 and AS/NZS 3947.3. Poles: 3.

Operation: Independent manual operation including positive ON/OFF indicator.

Shrouding: Effective over range of switch positions.

Rated breaking capacity: ≥ rated full load current.

#### Fuse-switch units

Operation: Provide an extendable operating handle. Fuse links: To be isolated when switch contacts are open. Provide 3 phase sets of high rupturing capacity (HRC) fuse links.

## 2.3 AUTO-TRANSFER SWITCHES

#### General

Standard: To AS 60947.1 and AS 3947.6.1.

Type: 3 pole automatic type with supervisory circuits which initiate and restore the changeover transfer operation.

Load side connections: Segregate from incoming side.

Classification:

- Contactors: PC.
- Circuits: CB.

Utilization category: To AS/NZS 3947.6.1 clause 4.4.

Interlocks: Provide electrical and mechanical interlocks.

#### 2.4 MOULDED CASE AND MINIATURE CIRCUIT BREAKERS

#### General

Moulded case breakers: To AS 60947.1, AS 2184 and AS 60947.2.

Miniature circuit breakers: To AS/NZS 60898.1 or AS 3111.

Operation: Independent manual operation including positive ON/OFF indicator.

Trip type:

- Moulded case breakers: Adjustable thermal, fixed magnetic.
- Miniature circuit breakers: Fixed thermal, fixed magnetic.
- Current limiting:
- Moulded case breakers: Required.

Isolation facility: Required.

Mounting: Mount circuit breakers so that the ON/OFF and current rating indications are clearly visible with covers or escutcheons in position. Align operating toggles of each circuit breaker in the same plane.

Utilisation category: Moulded case breakers:

- Final subcircuits category: Category A.
- Mains and submains: Category B.

Trip settings: Set as documented, seal, and label.

Trip units: Connect interchangeable and integrally fused trip units so that trip units are not live when circuit breaker contacts are open.

## 2.5 RESIDUAL CURRENT OPERATED CIRCUIT BREAKERS (RCBO)

Standard: To AS/NZS 3190.

Integral non-overload protection type: To AS/NZS 61008.1.

Integral overload protection type: To AS/NZS 61009.1.

Modular type: To AS 60947.2. Default tripping current: 30 mA.

## 2.6 AIR CIRCUIT BREAKERS

## General

Standard: To AS 60947.1 and AS 60947.2.

Type: Open construction, withdrawable 3 pole, front connected.

Utilisation category: Category B.

Closing operation: Provide independent manual operation with trip free closing mechanisms and positive mechanically operated *ON and OFF* indication.

Opening operation: Provide independent manually operated release for opening.

Auxiliary switch contacts: Provide contacts with minimum rated operational current of 6 A at 240 V, 50 Hz. Provide at least one spare normally-open and one spare normally-closed contacts. Provide shunt trip release coil circuits with an earlymake/late-break series connected auxiliary contact.

Protection system: Provide a fully adjustable solid state protection system integral to the circuit breaker and incorporating a solid state protection relay.

Locking: Provide for circuit breakers to be locked in the open position.

Electrical Interlock: Control circuitry of functional units with normally-opened and normally-closed auxiliary contacts.

Operating mechanism charging: Manual.

Mechanical Interlock: Provide with captive type coded key with squared face key with alphabetical or numerical coded operating face.

Door interlock: Except for compartment doors that serve only as covers, provide interlocks to prevent compartment doors being open if the circuit breakers are closed.

Abnormal operations: Provide circuit breakers which preclude the following operations:

- Slow closing or opening of contacts.
- Manual independent hand closure, if springs fail.
- Release of charged springs while contacts are closed.

Maintenance: Provide for slow closing of the circuit breaker mechanism during disconnected maintenance.

## Withdrawable type

Mounting: Mount circuit breaker on a withdrawable carriage for racking in or withdrawing, and for positively fixing the unit into any of the 3 following positions:

- Connected.
- Test/isolated.
- Disconnected.

Auxiliary contacts: Provide contacts which are disconnected in the isolated position and connected in the test position.

Interlocking: Provide interlocking which prevents circuit breaker being racked in or withdrawn unless it is in a tripped condition and prevents the circuit breaker being closed unless located in either the connected or test/isolated position. Provide stored energy devices which are automatically discharged by any racking operation.

Shutters: Provide automatic shutters, which can be locked, covering busbar and incoming/outgoing circuit connections and labelled *BUSBARS* and *CIRCUIT* respectively.

Earthing: Provide earthing connection between withdrawable carriage and assembly earth busbar which makes before, and breaks after, other contacts on the circuit breaker carriage.

## 2.7 FUSES WITH ENCLOSED FUSE LINKS

Standards: To AS 60269.1, AS 60269.2.0 and AS 60269.2.1.

Fuse links: Enclosed, high rupturing capacity type mounted in a fuse carrier.

Breaking range and utilisation category:

- Distribution/general purpose: gG.

- Motors: gM.

Fuse-holders: Mount fuse-holders so that fuse carriers may be withdrawn directly towards the operator and away from live parts. Provide fixed insulation which shrouds live metal when the fuse carrier is withdrawn.

Barriers: Provide barriers on both sides of each fuse link, preventing inadvertent electrical contact between phases by the insertion of screwdriver.

Spare fuse links: Provide 3 spare fuse links for each rating of fuse link on each assembly. Mount spares on clips within the spares cabinet.

Spare fuse holder carriers: Provide 3 spare fuse holder carriers for each size of fuse holder carriers on each assembly. Mount spares on clips within the spares cabinet.

Busbar mounted fuse holders: Provide fuse carriers with retaining clips, minimum fuse holder 32 A.

#### 2.8 CIRCUIT BREAKER INTEGRAL PROTECTIVE RELAYS

General: Provide integral protective relays which provide for tripping in the event of relay operation, and for manually resetting. Provide operation indicators with a set of change over voltage free alarm contacts, for connection to an alarm circuit.

Mounting: Integral type: Readily accessible for viewing and adjustment with doors and covers in position.

Mounting: External type: Flush.

#### 2.9 CURRENT TRANSFORMERS (PROTECTION)

#### General

Standard: To AS 60044.1.

Type: Cast resin encapsulated window type with busbar clamping devices.

Rated short time current: At least the short time current equivalent to the assembly fault level.

Rated short-time: At least the maximum time setting of the related protective relay. Minimum 1 s.

Rated primary current: Equal to assigned current rating of the associated functional unit.

Rated secondary current: 5 A. Connect star point to earth.

Interposing transformers: Provide as recommended by the protective relay manufacturer.

Characteristics: Conform to the recommendations of the protective relay manufacturer.

Test links: Provide test terminals and current transformer secondary shorting links in accessible positions within instrument panels. Provide a set of DIN-type rail mounted test links, consisting of screw clamped slide links and earth links, for each current transformer group.

Installation: Install transformers to permit easy removal.

Removable links: Provide removable links of minimum lengths for transformers fitted on busbar systems.

Markings: Mount transformers in the assembly enclosure, so that polarity markings and nameplate details are readily viewed right side up without removing the transformers.

## 2.10 TRANSIENT PROTECTION

#### Standards

Assemblies connected to the MEN earthing system: To AS 4070 Category II.

## **Primary protection**

General: Provide shunt connected metal oxide varistors at assembly incoming supply terminals, on the line side of incoming functional units.

Visual indicator: Provide visual indication of status of transient detection.

Alarm contacts: Provide one set of normally closed 'dry' contacts indicating occurrence of a surge transient.

#### Secondary protection

General: Provide metal oxide varistors or zener diode surge protection to assembly in-built equipment and to semi-conductor components which are not able to withstand transient overvoltages exceeding primary protection letthrough residual levels.

## 2.11 CURRENT TRANSFORMERS (METERING)

#### Standard

Measurement current transformers: To AS 60044.1.

#### **Test links**

General: Provide test links for connection of calibration instruments and meters and for shorting of current transformer secondaries.

Energy meters, maximum demand meters, ammeters and protection relays: Provide with railmounted links consisting of screw-clamped slide links and an earth link.

## Test studs

General: For energy and demand meters provide rail-mounted potential test studs or plug connections

next to associated current transformer links. Provide at least one set of test studs for each compartment.

## Accuracy classification

Energy measurements: Class 0.5.

Indicating instruments: Class 3.

## Ratings

Rated short time current: At least the short time withstand current equivalent of the circuit in which the transformer is installed.

Rated primary current: At least equal to the current rating of the functional unit.

Secondary windings: Rated at 5 A, burden of 0.4  $\Omega$  (10 VA) with star point earthed.

## Туре

General: If practicable, cast resin encapsulated window-type with busbar clamping devices. Otherwise wound-primary type with mounting feet.

## Installation

General: Install transformers to permit easy removal.

Removable links: Provide removable links of minimum length for transformers fitted on busbar systems.

## 2.12 INSTRUMENTS AND METERS

#### Standard

Socket mounting system: To AS 1284.4.

## Accuracy

Indicating Instruments and accessories:  $\leq$  Class 1.5.

Thermal maximum demand indicators: Class 3.

Electricity meters: Class 0.5.

Power factor meters, phase angle meters and synchroscopes: 2 electrical degrees maximum error. Transducers: Class 0.5.

#### Mounting

General: Flush mount.

## Labels

General: If associated exclusively with one phase, label meters *RED*, *WHITE*, or *BLUE* as applicable.

## **Protection devices**

Meter potential protection devices: Group together behind associated meter cover or hinged door, preferably next to current transformer test links.

#### Accessories

General: Mount next to associated instruments, inside cabinets.

#### Transducers

General: If necessary for transducer operation, provide auxiliary supply. Connect outputs to dedicated rail-mounted isolating type terminals.

## Ammeters

Type: Moving iron type oil dampened for motor starter circuits.

Overscale: For ammeters subject to motor starting currents, overscale to at least 5 x full load current.

Selector switches: 4-position type with positions designated *R/W/B/OFF*. Mount under or beside relevant ammeters.

## Maximum demand indicators

General: Provide a meter in each phase with 15 minute response time. Provide for sealing the reset mechanism. Provide a combination 3-point indicator consisting of an instantaneous red ammeter pointer, a red maximum demand slave pointer with external reset facility, and a white maximum demand pointer.

Instantaneous type: Combined type with bi-metal maximum demand ammeter element and moving iron instantaneous ammeter element.

Thermal type: Combined type with bi-metal maximum demand ammeter element.

## Voltmeters

Type: Moving iron, 90°.

Selector switches: 7-position voltage transfer type for measurement of phase-to-phase and phase-toneutral voltages with off. Mount under or next to relevant voltmeters.

#### Wattmeters and varmeters

General: Suitable for balanced 3 phase, 4 wire loads. Connect to measurement transducers.

## Hours-run meters

General: 6 figure (minimum), horizontal linear digits dial with last digit read-out in 0.1 hour increments.

#### Watthour meters

Standard: To AS 62053.21.

Type: Electronic.

3-phase metering: Polyphase meters suitable for balanced 3 phase, 4 wire loads.

1 or 2 phase metering: Single phase meters.

Current rating: To suit load and overload conditions. Provide direct connect meters suitable for current range of 15 to 100 A and meters with current transformers suitable to 5 A secondary.

Register: Provide a direct reading register of the large figure type. Mark on the scale the metering transformer ratios and the multiplying factor applied to the meter constant.

Covers: Seal main covers.

## **Frequency meters**

Type: Either an analogue type, or vibrating reed type with 7 reeds.

Analogue type: Graduated in 0.1 Hz increments. Scales:

- Analogue: Graduated 45/65 Hz.
- Vibrating reed: Horizontal reed bar graduated 47/53 Hz.

#### Synchroscopes

General: Continuously rated, rotating vane type movement, with spring loaded bearings and silicon fluid dampening, positive and negative arrows, black pointer and 12 o'clock marking.

Scales: 360°.

## Phase angle meters

General: Provide for 3 phase, 4 wire balanced loads.

Scales: 0.5 leading to 0.5 lagging.

## 2.13 CONTACTORS

Standard: To AS 60947.4.1.

Type: Enclosed, block type, air break, electromagnetic.

Poles: 3.

Rated operational current: The greater of:

- Full load current of the load controlled.

- ≥ 16 A.

Mechanical durability: 10 million cycles to AS 60947.4.1.

Electric durability:  $\geq$  1 million operations at AC-22 to AS 60947.4.1.

Mounting: Mount with sufficient clearance to allow full access for maintenance, removal and replacement of coils and contacts, without the need to disconnect wiring or remove other equipment.

Auxiliary contacts: Provide auxiliary contacts with at least one normally-open and one normally-closed separate contacts with rating of 6 A at 230 V a.c., utilisation category: AC-1.

Slave relay: If the number of auxiliary contacts exceeds the number which can be accommodated, provide separate slave relays.

# 2.14 CONTROL DEVICES AND SWITCHING ELEMENTS

## Standards

General: To AS 60947.1 and AS 60947.5.1.

Switching elements:

- Electrical emergency stop device with mechanical latching function: To AS 60947.5.4.
- Electromechanical control circuit devices: To AS 60947.5.1.
- Proximity switches: To AS 60947.5.2.

## **Rotary switches**

General: Cam operated type with switch positions arranged with displacement of 60°.

Off position: Locate at the 12 o'clock position. Test positions must spring return to off position.

Rated operational current: At least 6 A at 230 V a.c.

Escutcheon plates: Provide rectangular plates securely fixed to the assembly panel. Identify switch position and function.

## Time switches

Operation: 365 day operation.

Mains failure operation: 100 hour minimum operating capacity.

Contact rating:  $\geq$  16 A at 230 V a.c.

Construction: Provide readily accessible means of adjustment. Provide operational settings which are clearly visible when switch cover is fitted.

Dial: Digital with hour and minute display.

Override switch (manual): Required.

Control relays

Standards: To AS 60947.5.1.

Operation: Suitable for continuous operation. Provide relays selected in conformance with the **Control relay selection table**. Construction: Plug-in types. Receptacle bases with captive clips which can be operated without using tools.

Contact elements: Electrically separate, double break with silver alloy, non-welding contacts.

Configuration: For standard relays, provide assemblies with  $\geq$  2 sets of contacts and expandable to 8 sets of contacts in the same assembly. Provide at least one normally-open and one normally-closed contact.

On site conversion: Provide contact blocks readily convertible to either normally-open or normally-closed contacts.

## Control relay selection table

|               | -   |                       |                                  |                          |  |
|---------------|---|-----------------------|----------------------------------|--------------------------|--|
| Relay<br>type | Minimu<br>m<br>mechan<br>ical life<br>(million<br>operati<br>ons) | Base                  | Minimu<br>m<br>contact<br>rating | Inter-<br>change<br>able | Minimu<br>m<br>number<br>of<br>contact<br>element<br>s |
| 1             | 5   | Plug-in               | 1.25I <sub>L</sub>               | Yes                      | 2  |
| 2             | 10  | Plug-in               | 5 A at<br>240 V                  | Yes                      | 2  |
| 3             | 10  | Fixed<br>mountin<br>g | 5 A at<br>240 V                  | Yes                      | 4  |

#### Time delay relays

Adjustable range: Adjustable over the full timing range with timing repeatability within  $\pm$  12.5% of nominal setting.

Electronic relays: Incorporate light emitting diodes indicating energisation states of relays.

## Synchronous relays

General: Provide synchronous motor drive type relay fitted with anti-stalling device which protects gearing during normal operation.

#### Phase failure relays

General: Provide separate solid-state phase failure relays which release at the following:

- < 85% of normal voltage.
- Single phase failure.
- Reverse phase sequence after an appropriate time delay.

Sensing circuit: To reject induced voltage spikes and disturbances with frequencies other than 50 Hz. Back-up protection: Provide high rupturing capacity fuses to each phase.

#### **Push-buttons**

Type: Oil-tight, minimum 22 mm diameter, or 22 x 22 mm.

Rated operational current: At least 4 A at 240 V a.c.

Emergency stop devices with mechanical latching: To AS/NZS 3947.5.5.

Marking: Identify functions of each push-button. For latched STOP or EMERGENCY STOP pushbuttons, provide label with instructions for releasing latches.

# 2.15 SEMICONDUCTOR CONTROLLERS AND CONTACTORS

## General

General: Provide semiconductor controllers and contactors rated for the characteristics of the controlled load.

Standard: To AS/NZS 3947.4.3.

## 2.16 PROGRAMMABLE LOGIC CONTROLLERS

## General

General: Provide complete programmable logic controllers including central processing unit, input/output modules and mounting hardware, and which are as follows:

- Modular in construction and of the same manufacture, with interchangeable peripherals and software.
- Have an integral power supply of sufficient capacity to satisfy the requirements of the central processing unit and input/output module combinations which can be located within the mounting hardware.
- Designed and constructed to operate in electrically noisy environments.
- Located in the low voltage control section of the associated functional unit.

#### Central processing units

General: Provide the following:

- Separate run, monitor and program functions.
- Operating system: Stored in non-volatile memory.
- Programmed software: Stored so that loss of power to the unit for a period up to 1 year will not cause corruption of data and will allow automatic restarting and correct operation immediately on power restoration.

Inputs and outputs (minimum):

- External inputs: 24.
- External outputs: 16.
- Internal relays: 128.

#### Input/output modules

Status: Clearly identified and indicated by a light emitting diode.

Diodes: Not obscured by assembly wiring.

Analog input: 4 to 20 mA or 0 to 10 V d.c., optoisolated.

Analog output: 4 to 20 mA or 0 to 10 V d.c., into a burden of  $\ge$  600  $\Omega$ .

Digital input: 24 V d.c., opto-isolated.

Digital output: Volt-free relay contacts or optoisolated solid state switches for switching an output load of at least 2 A at 24 V a.c. or d.c.

## Programmer

Operation: Using ladder logic, allowing for editing without the need to re-enter the whole program. Include test and monitoring functions which facilitate testing, running and debugging of software and provide for input/output number check.

Hand-held programmers: Provide moulded connectors and 2 m connection cable.

## 2.17 CONTROL AND PROTECTIVE SWITCHING DEVICES OR EQUIPMENT

## 2.18 CONTROLLER DEVICE INTERFACES

## General

General: Provide interfaces between equipment and control systems including the following:

- Programmable logic controllers.
- Metering systems.
- Building management systems.

Standard: To AS 62026.1, AS/NZS 62026.2, AS/NZS 62026.3 and AS/NZS 62026.5.

Actuator sensor interface: To AS/NZS 62026.2. Provide control system components with an actuator sensor interface. The actuator sensor interface may be integrated into field devices, or be used in separate modules.

Devicenet: Provide control system components with a devicenet connection based controller-device interface, suitable for use on a Controller Area Network to AS/NZS 62026.3.

Smart distributed system (SDS): Provide control system components with a SDS controller-device interface, suitable for use on a Controller Area Network to AS/NZS 62026.5.

Seriplex: Provide a Seriplex interface and communications system between single or multiple controllers and control circuit devices or switching elements.

## 2.19 INDICATOR LIGHTS

## Standard

General: To AS 60947.5.1.

#### Incandescent indicators

Type: Incandescent oil tight type minimum 22 mm diameter or 22 x 22 mm.

Lamps: Changeable from front of panel without removing the holder.

Lamp rating: 1.2 to 5 W.

#### **Neon indicators**

General: 240 V, 12 mm diameter with in-built resistor.

#### **LED** indicators

General: 12 or 24 V as necessary, in corrosionresistant bezel, nominal 5 mm diameter.

#### Press-to-test

Compartments/subsections with < 5 indicating lights: Provide each indicating light with a fitted integral press-to-test lamp actuator.

Compartments/subsections with  $\geq$  5 indicating lights: Provide a common press-to-test lamp push-button.

## 2.20 INDICATING COUNTERS

## General

General: Provide the following:

- At least 6 digits.
- Digits at least 3.5 mm high.
- Continuous duty rated.
- Non-reset type.

- 500 V surge diverters.

## 2.21 ALARM ANNUNCIATORS

#### General

General: Provide the following:

- Labelled annunciator illuminated windows, to indicate status and alarm conditions.
- Lamp test acknowledge-mute and reset individual push-buttons.
- Audible alarm and associated logic circuitry.

## Mode of operation

General: Provide the following functions:

- Fault conditions: To initiate flashing of appropriate annunciator lamps and sounding of audible alarms.
- Operation of acknowledge and mute buttons: To silence audible alarms and change annunciator lamps to the steady state on condition.
- Window: To extinguish only when fault condition has been cleared and alarm reset push-button has been activated.
- Subsequent alarms on other inputs: To reactivate the audible alarm and flash the appropriate annunciator lamp.
- Resetting: After correction of the fault condition, provide on-site choice of either automatic resetting or manual resetting at the annunciator panel.

#### Туре

General: Extra-low voltage, solid state, flush mounted, window type.

## Lamps

General: Provide annunciators with 2 extra-low voltage lamps per window.

Rated voltage of lamps105% of the annunciator system voltage.

Replacing: Changeable from front of panel without affecting condition of annunciator.

Vibration: Provide lamps which do not disconnect due to vibration.

#### Extra-low voltage power supply

General: Provide an extra-low voltage power supply for the alarm annunciator.

## Windows

Nominal size: 15 x 35 mm.

Engraving: Filled in black.

- Background colours: White for status monitoring, red for alarms and shutdown functions.

## 2.22 AUDIBLE ALARM DEVICES

#### Sound level

General: The greater of the following:

- 65 dB(A) at 1 m.
- 15 dB(A) above ambient sound levels at any location in designated areas.

## 2.23 EXTRA-LOW VOLTAGE TRANSFORMERS

## General

General: Provide the following:

- Centre tap on secondary winding.

- Primary and secondary windings wired out on opposite sides of transformer case.
- Primary and secondary windings separated by means of an earthed screen wired out to an insulated terminal.
- Transformer rating ≥ 125% of maximum output load, taking account of degree of ventilation and ambient temperature within assembly, and supplied load.

## 2.24 BATTERIES AND CHARGERS

## Standards

Valve regulated sealed lead-acid batteries: To AS/NZS 4029.2.

Vented nickel-cadmium batteries: To AS 3731.1.

Chargers: To AS 4044 Type 2.

#### General

General: Provide a battery and charger system for circuit breaker tripping, closing and automatic changeover switch operation. Locate within the switchroom or switchboard assembly.

#### **Circuit breaker operation**

General: Provide a d.c. supply for circuit breaker operation from battery system and charger.

## Performance

General: Capable of 10 consecutive air-circuit breaker or moulded case circuit breaker operations for the designated quantity of circuit breakers. Each operation consists of open-close of main contacts for 0.5 s duration, with 1 s intervals between operations, and minimum discharge current of 4 A, with batteries in 50% discharge condition. Maintain a minimum terminal voltage of 80% of rated voltage at the completion of the 10 operations.

System voltage: 110 V d.c.

## **Battery chargers**

Type: Free standing, floor mounted, ventilated cabinet type with separate charger and battery subsections.

Degree of protection: IP42.

Tapping: Provide tappings on the transformer to permit adjustment over a range of 95% – 105% of secondary winding voltage on open circuit.

Circuitry: Solid state, micro-processor type, constant voltage, fully automatic, incorporating a smoothing network to give an output wave form at least as smooth as that of a 3-phase bridge system, and automatic boost and float charge functions to ensure maximum battery life and rated performance. Provide facilities for manual boost and test.

Maximum design transient: 70% of the component manufacturer's peak inverse ratings.

Instruments, controls and indicators: Group for ease of operation. Provide analogue or digital instruments for the following:

- Charger output current.
- System voltage.
- Load current.

a.c. input protection: Miniature circuit breakers. Protect outgoing tripping supply with a 2 pole d.c. miniature circuit breaker.

Alarm indication: Provide alarm indication to monitor the following:

- a.c. supply.
- Boost charge on.
- Charge fail.
- Low battery voltage.
- High battery voltage.
- Low electrolyte for vented cells.
- Earth fault, secondary side.

## Safety signs and labels

Standard: To AS 2676.1.

Safety signs: Provide cautionary, regulatory and emergency safety signs to charger enclosure and switchroom.

## 2.25 ANTI-CONDENSATION HEATERS

## General

Rating: Provide heaters rated at not less than 20 W/m<sup>2</sup> of total external area including top of weatherproof enclosure.

Type: Black heat type which may be touched without injury, mechanically protected and thermostatically controlled.

## 2.26 SPARES CABINET

## General

General: Provide a spares cabinet with main name plate, labelled shelves and non-lockable door. Size for storing racking handles, special tools, spare lamps, spare fuse links and other equipment necessary for satisfactory assembly operation.

Location: Either of the following:

- Incorporated into assembly enclosure.
- Wall mounted in main switchroom.
- Finish: To match switchboard assembly.

## 3 EXECUTION

## 3.1 MARKING AND LABELLING

## General

General: Provide labels including control and circuit equipment ratings, functional units, notices for operational and maintenance personnel, incoming and outgoing circuit rating, sizes and origin of supply and kW ratings of motor starters.

Lettering heights: Include the following requirements:

- Isolating switches: ≥ 5 mm.
- Switchboards, main assembly designation:
   ≥ 25 mm.
- Switchboards, outgoing functional units:  $\geq$  8 mm.
- Switchboards, sub assembly designations:
   ≥ 15 mm.

# Labels on assembly exteriors

Manufacturer's name: Required.

Assemblies: Label with essential markings.

Designation labels: For other than main assemblies, provide designation label stating source of electrical supply. Identify separate sections of enclosures.

Assembly controls: Label controls and fault current limiters, including the following:

- Circuit designation for main switches, main controls and submains controls.
- Details of consumers mains and submains.
- Incoming busbar or cable rating to first tee-off.
- Fuse link size.

## Labels on assembly interiors

General: Provide labels for equipment within assemblies. Locate so that it is clear which equipment is referred to, and so that lettering is not obscured by equipment or wiring.

Moulded case circuit breakers: If circuit breaker manufacturer's markings are obscured by operating handle mechanisms or motor operators, provide additional markings open to view on, or next to, the circuit breaker.

Arrestors: Label each group of primary arrestors, stating their purpose and the necessary characteristics.

## Danger, warning and caution notices

Busbars: If polymer membrane coating is used without further insulation, provide warning notices on the front cover near the main switch or local main switch and on rear covers, indicating that busbars are not insulated.

Fault current limiters: In assembly sections containing fault current limiter fuses provide caution notices fixed next to the fault current limiters, stating that replacement fuse links are to match the installed fuse link ratings, make and characteristics. Provide separate label stating make and fault current limiting fuse ratings.

Externally controlled equipment: To prevent accidental contact with live parts, provide warning notices for equipment on assemblies not isolated by main switch or local main switch.

Stand-by power: Provide warning notices stating that assemblies may be energised from the standby supply at any time.

Anti-condensation heaters: To prevent accidental switching off, provide caution notices for anti-condensation heaters.

Insulation and shrouding: For insulation or shrouding requiring removal during normal assembly maintenance, provide danger notices with appropriate wording for replacement of insulation shrouding before re-energising assemblies.

Positioning: Locate notices so that they can be readily seen, next to or, if impracticable, on busbar chamber covers of functional units and behind the front cover of functional units. Provide circuit identification labels in the cabling chamber of each functional unit, located next to external terminations.

#### Schedule cards

General: For general light and power distribution assemblies, provide schedule cards of minimum

size 200 x 150 mm, with typewritten text showing the following as-installed information:

- Submain designation, rating and short-circuit protective device.
- Light and power circuit numbers and current ratings, cable sizes and type and areas supplied.
- Mounting: Mount schedule cards in a holder fixed to the inside of the assembly or cupboard door, next to the distribution circuit switches. Protect with hard plastic transparent covers.

## Single-line diagrams

Main and submain assemblies: Provide single-line diagrams.

Format: Non-fading print, at least A3 size, showing the situation as installed.

Mounting: Enclose in a non-reflective PVC frame and wall mount close to assembly.

## Marking cables

General: Identify the origin of all wiring by means of legible indelible marking.

Identification labels: Provide durable labels fitted to each core and sheath, permanently marked with numbers, letters or both to suit the connection diagrams.

Multicore cables and trefoil groups: Identify multicore cables and trefoil groups at each end with durable non-ferrous tags clipped around each cable or trefoil group.

## 0947 POWER FACTOR CORRECTION

#### 1 GENERAL

## 1.1 AIMS

## Responsibilities

General: Provide power factor correction as follows and as documented.

## General

Type: Microprocessor controlled.

Function: To maintain the system power factor in the documented range and to provide harmonic filtering under all load conditions.

Components: To be sized and selected to:

- Limit the increase in incoming supply voltage total harmonic distortion to < 2.5%.
- Limit the total harmonic distortion to < 4%.
- Prevent interference with Supply Authority frequency injection systems

Harmonics: Reduce parallel supply impedance resonance using a series connected reactors tuned to limit the total harmonic current within the capacitors to < 5% of their nominal rating.

Service life of all components: > 10 years.

#### Standards

Electronic compatibility (EMC) requirements: To AS/NZS 61000.

## 1.2 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

#### Associated worksections

Associated worksections: Conform to the following:

- Electrical general requirements.
- Low voltage power systems.
- Switchboards custom-built.
- Switchboard components.

## 1.3 INTERPRETATIONS

#### Abbreviations

General: For the purposes of this worksection the abbreviations given below apply.

- PFC: Power factor correction equipment.

#### 1.4 INSPECTIONS

#### Notice

Inspection: Give sufficient notice so inspection may be made of the following:

 Equipment is ready for inspection prior to despatch from factory.

## 1.5 SUBMISSIONS

#### Technical data

General: Submit the following:

- EMC technical data to AS/NZS 61000.
- Design calculations for the sizing of all capacitors and reactors.

## Shop drawings

Shop drawings: Provide the following:

- The system general arrangement and layout with details of connections, circuit breakers, cable sizes, overall dimensions, weight, location of access doors, cable terminating locations and necessary clearances.
- Control schematics. Provide a description of operation with all control schematics.
- Functional block diagram.
- Heat generated by the PFC.
- Type and rating of all equipment items.

## 1.6 PRE-COMPLETION TESTS

#### Capacitors

General: Carry out capacitance and d.c. dielectric tests. Submit the capacitor unit test report before factory inspection.

## 2 PRODUCTS

## 2.1 CAPACITORS

#### General

Standard: To IEC 60831-1 and IEC 60831-2.

Type: Vacuum oil impregnated metallised polypropylene (MPP).

Automatic overpressure disconnection: Required.

Capacitance tolerance: Within -5% to +10%.

Construction: Cylindrical with single capacitor unit per can.

Dielectric rating: ≥ 500 V RMS at 50 Hz selected to accommodate the series reactor voltage.

Discharge resistance: Required.

Loss: < 0.5W/kVAR (low loss type).

Removal: Arranged to permit removal of faulty module while the remaining capacitors continue to function normally.

Surface temperature: Rated to achieve < 60°C. Terminals: Tunnel or post type.

## 2.2 CONTACTORS

#### General

Type: Step-switching.

Utilisation category: for capacitor switching AC-6b. Rating: For capacitor switching duty at  $\geq$  1.5 times the capacitor step full load current.

#### 2.3 CONTROLLER

#### General

General: Provide a site-programmable, microprocessor, step controller, incorporating nonvolatile programme and data memory. Include the following:

- Automatic cycling of use of capacitor steps: Required.

- Automatic isolation in the event of capacitor over temperature or over current: Required.
- Data interface for remote monitoring and data download: RS232.
- Local alarms for:
- . Over temperature.
- . Over voltage.
- . Reactive power exceeding adjustable programmed levels.
- Local digital display and remote monitoring of:
- . Power factor.
- . Incoming supply load (amps, kW and kVAR).
- . Number of steps in use.
- . Percent harmonic current.
- . Harmonic currents.
- . Stored data for ≥ 1 week in date/time format.
- Manual-off-auto selection: Required.
- Remote alarm output contact for remote group alarm facility: Required.
- Supply from an alternative source: Provide terminals and logic to disable all capacitor steps.
- Time delay after restoration of power supply:  $\geq$  60 s before switching in the first stage.
- Time delay between stages: Switching adjustable to be from 1 to 300 s.

Software: Provide 3 copies of proprietary software for remote monitoring and alarms.

## 2.4 CURRENT TRANSFORMER INTERFACE

## General

General: Provide interface to a 5 A secondary, 10 V.A, class 1, PFC current sensing transformer installed in the relevant switchboard.

## 2.5 INDUCTORS

## General

Carrying capacity:  $\geq$  1.5 times the rated capacitor current at 50 Hz without saturating at 40°C ambient. Cores: Insulated, laminated, high permeability silicon iron.

Flux density at rated current: < 0.85 tesla.

Inductance tolerance: Within ± 5% at rated current.

Losses: Very low loss design.

Mounting hardware: Non-ferrous.

Q factor: > 10.

Separate inductors for each capacitor step: Required.

Windings: High purity copper with Class F temperature rated insulation.

## 3 EXECUTION

## 3.1 INSTALLATION

## General

General: Connect the PFC to the power system as documented.

## Power system

Protection: Provide protective devices to grade and discriminate with upstream devices. Individually protect each kVAR step.

## Capacitors

Insulation: Insulate all live parts.

Layout: Arrange capacitors for easy removal and replacement.

Mount capacitors in separate cubicle compartment, segregated from inductors, fuses and switchgear.

Ventilation: Separate capacitors by > 25 mm of air space.

## Inductors

General: Mount inductors in separate cubicle compartment, segregated from capacitors, fuses and switchgear.

## Cubicle

Construction: To Switchboards – custom-built. Colour: Match main switchboard.

Cooling fans: Muffin type axial fans.

Temperature rise: Ventilate the PFC cabinet so internal temperature rise is  $< 5^{\circ}$ C above ambient in each cabinet compartment.

## 3.2 COMPLETION

## Warranties

Warranty: Provide 24-month warranty with six monthly service.

## 0951 LIGHTING

## 1 GENERAL

## 1.1 AIMS

## Responsibilities

General: Provide lighting as documented.

## 1.2 PROJECT REQUIREMENTS

#### **Proprietary equipment**

General: The requirements of this specification for lamps, ballasts and luminaire control equipment over-ride the specifications inherent in the selection of a particular make and model of luminaire.

#### **Minimum energy performance standards (MEPS)** General: To AS/NZS 4783.2 and AS/NZS 4782.2.

## 1.3 CROSS REFERENCES

## General

General: Conform to the *General requirements* worksection.

## Associated worksections

Associated worksections: Conform to the following:

- Electrical general requirements.

- Low voltage power systems.

## 1.4 STANDARDS

#### Standards

Air-handling luminaires: To AS/NZS 60598.2.19.

EMC compliance: To AS/NZS CISPR 15. Energy efficiency for ballasts and lamps: To

AS/NZS 4783.2.

Fixed general purpose luminaires: To AS/NZS 60598.2.1.

Floodlights: To AS/NZS 60598.2.5.

Harmonic limits: AS/NZS 61000.3.2.

Luminaires, general requirements and tests: To AS/NZS 60598.1.

Luminaires: To AS/NZS 60598.1.

Luminaires for swimming pools: To AS/NZS 60598.2.18.

Luminaires for use in clinical areas of hospitals and health care buildings: To AS/NZS 60598.2.25.

Luminaires with built-in transformers for filament lamps: To AS/NZS 60598.2.6.

Portable general purpose luminaires: To AS/NZS 60598.2.4.

Recessed luminaires: To AS/NZS 60598.2.2. Road lighting luminaires: To AS/NZS 1158.6. Radio interference limits: To AS/NZS CISPR 15.

## 1.5 INTERPRETATIONS

## Abbreviations

General: For the purposes of this worksection the abbreviations given below apply.

- CCT: Correlated colour temperature.
- CRI: Colour rendering index.
- DALI: Digital addressable lighting interface.
- EEI: Energy efficiency index.
- ELV: Extra low voltage.
- ILCOS: International lamp coding system.
- PLC: Programmable logic controllers.
- SBC: Small bayonet cap.
- SES: Small Edison screw.

## Definitions

General: For the purposes of this worksection the definitions given below apply.

- Control system: A lighting control system comprising a combination of some or all of the following:
- . Automatic sensing and control components.
- . Timers.
- . Manual overrides.
- . Programming using a computer interface.
- Proprietary luminaires: Luminaires available as a catalogue item.
- Custom-built luminaires: Luminaires manufactured to order.

## 1.6 SUBMISSIONS

## **Technical data**

General: Submit technical data of the following:

- Luminaires
- Lamps
- Ballasts
- Power factor correction equipment
- Lighting control systems.
- All accessories.

## Shop drawings

General: Submit shop drawings of lighting column mounting bases.

#### Samples

General: Submit samples of all luminaires and accessories.

## 2 PRODUCTS

## 2.1 PROPRIETARY LUMINAIRES

## General

General: Provide proprietary luminaires complete with lamps, luminaire control equipment, lighting control equipment, and accessories as documented.

## 2.2 LAMPS

# Standards

Fluorescent: To AS 4782.1 and AS 4782.2.

High pressure mercury vapour: To IEC 60188.

High pressure sodium vapour: To IEC 60662.

Incandescent: To AS 2325.

Low pressure sodium vapour: To IEC 60192.

Self ballasted lamps: To AS/NZS 60968 and AS/NZS 60969.

Single capped fluorescent lamps: To AS/NZS 60901.

Tungsten halogen: To IEC 60357.

#### Fluorescent lamps

Colour corrected temperature: 4000 K.

Colour rendering: Group 1B to AS/NZS 1680.1.

## Incandescent lamps

Type: Tungsten filament for general lighting service, rated 250 V.

Bulb finish: Internally frosted.

## Lamp cap type table

| Lamp rating    | Cap type   |
|----------------|--|
| ≤ 100 W        | Bayonet (B22), medium Edison screw<br>(E27), small Edison screw (E14), or<br>small bayonet (SBC) |
| > 100, ≤ 200 W | Medium Edison screw (E27) or<br>bayonet (B22)  |
| > 200 W        | Goliath Edison screw (E40/45)  |

## **Tungsten halogen lamps**

Tungsten halogen lamps not enclosed behind glass: low pressure, low UV emission type.

Low voltage dichroic lamps: Provide dichroic lamps with integral reflectors.

#### 2.3 BALLASTS

#### General

General: Provide ballasts for lighting systems selected to be compatible with the lamp and control method.

Standard: To AS/NZS 61558.1.

#### Electronic fluorescent lamp ballasts Standards: To AS/NZS 61347.2.3 and AS/NZS 60929.

Current total harmonic distortion: < 15%.

Number of ballasts: Provide separate ballasts for each lamp.

## Reactive fluorescent lamp ballasts

Standard: To AS/NZS 60921 and AS/NZS 61347.2.8.

AS/NZS 61347.2.8.

Connections: Provide quick-connect terminals or wiring, suitable for the operating temperature close to the ballast.

Number of ballasts: Provide separate ballasts for each lamp.

# Ballast performance measurement – fluorescent lamps

Standard: To AS/NZS 4783.1.

#### **Discharge lamp ballasts**

High-pressure mercury vapour, low-pressure sodium vapour, high-pressure sodium vapour and metal halid type: To AS/NZS 61347 and AS/NZS 60923.

Metal halide type:

- - < 150 W: Reactors or electronic controlgear.</p>
- > 150 W indoor: To the lamp manufacturer's recommendation.

- > 150 W outdoor: To the lamp manufacturer's recommendation.

Igniters: Provide igniters which cut out when lamp ignites and after pre-determined time period if lamp fails to ignite.

## 2.4 POWER FACTOR CORRECTION

#### General

General: Provide power factor correction on all luminaires to a minimum power factor of 0.9 lagging.

## Capacitors

Standard: To AS 61048 and AS 61049.

#### Integral fuses

General: Provide integral fuses for high intensity discharge (HID) lamp ballasts.

## 2.5 GEAR TRAY COVER

## General

Fixing: Screw fixed.

## 2.6 WIRING

#### Flexible cords

General: Provide recessed luminaires with an external  $\geq$  1.5 m length of 0.75 mm<sup>2</sup> 3-core V75 (minimum) PVC/PVC flexible cord, connected to a 10 A 3-pin moulded plug to AS/NZS 3112.

Other fittings flexible cord cross sectional area:  $\ge 1 \text{ mm}^2$ .

## 2.7 LIGHTING CONTROL

#### Manual controls

General: Provide manual control of luminaires into groups, zones and to individual devices as documented.

#### **Digital control system**

General: Provide a proprietary, microprocessorbased system to control lighting under automatic and user interface control as documented.

Control wiring: Daisy chained, Cat5 minimum, UTP cable, with distinctive sheath colour.

Controllers and contactors: Provide controllers and contactors rated for the characteristics of the controlled load and to AS/NZS 3947.4.3.

Dimmer control: Provide electronic dimmer controls compatible with the lighting control system and as documented.

Direct current interface for proximity sensors and amplifiers: To AS/NZS 3947.5.6.

Controller interfaces: Provide interfaces between lighting control systems and other **Selected** control systems.

## 2.8 ACCESSORIES

#### Lighting outlets

Pin arrangement: Standard: 3 flat pin with looping terminal.

## Lighting switches

General: Provide light switches as documented. Standard: To AS/NZS 3133.

Minimum: 10 A. 230 V a.c.

## **Key switches**

General: Proved key switches as documented.

#### **Run-on timer switches**

General: Proved run-on timer switches as documented.

Delay: Adjustable to 20 minutes.

#### **Dimmer switches**

General: Provide integral dimmer/switch units as documented.

#### **Proximity switches**

General: Provide proximity switches as documented.

Standard: To AS/NZS 60947.5.2.

## **Daylight switches**

General: Provide integral photo electric switch units as documented.

Performance: Adjustable between 50 and 1000 lux.

Time delay: > 2 minutes.

Illumination differential: > 50 lux.

## Motion detector switches

General: Provide movement detectors which cover designated areas as documented.

Timer: Incorporate 'on' timber adjustable between 1 and 5 minutes minimum and 30 minutes and 2 hours maximum.

Standard: To AS 2201.3.

Type: Passive infra-red.

## Manual time delay switches

General: Proved manual time delay relay switches as documented.

Type: Pneumatic.

Duration: Adjustable between 5 minutes and 15 minutes.

Indicator light: Required. Activated when artificial illumination is 'off'.

## 3 EXECUTION

## 3.1 RE-USE OF LUMINAIRES

#### Modifications and refurbishing

General: Modify and refurbish existing luminaires to manufacturer's current standards. Test for compliance with current Australian Standards before returning to service. Provide test results.

Component replacement: Starter and lamp. Diffuser: Clean.

#### 3.2 SUPPORTS

#### General

General: Install luminaires on proprietary supports by means of battens, trims, noggings, roses and packing material.

## **Suspended luminaires**

Rods: Steel pipe suspension rods fitted with gimbal joints.

Chains: Electroplated welded link chain.

Levelling wire: Stainless steel.

Levelling: Adjust the suspension system length so that the lighting system is level and even.

Horizontal tolerance:  $\pm$  3 mm between luminaires within the one space.

#### Surface mounted luminaires

General: Fit packing pieces to level luminaires and prevent distortion of luminaire bodies. Provide packing strips to align end to end luminaires.

Fixing: Provide 2 fixings at each end of fluorescent luminaires. A single fixing at each end in conjunction with 1.6 mm backing plates may be used for narrow luminaires.

#### **Recessed luminaries**

General: Install recessed luminaries in trimmed openings in the suspended ceiling.

## 3.3 WIRING CONNECTION

#### **Recessed luminaires**

General: Connect recessed luminaires to a plug socket outlet.

## Lighting tracks

General: Locate associated low voltage transformers within 600 mm of the track.

## 3.4 COMPLETION

#### General

General: Verify the operation of all luminaires.

Adjustment: Adjust aiming and controls for all luminaires under night time conditions.

Re-lamping: Replace lamps which have been in service for a period greater than 50% of the lamp life as published by the lamp manufacturer.

## 0952 LUMINAIRES – CUSTOM-BUILT

## 1 GENERAL

## 1.1 AIMS

## Responsibilities

General: Provide custom-built luminaires as follows and as documented.

## 1.2 LUMINAIRE PERFORMANCE

## Lamp performance

General: Provide reflectors, accessories and control equipment to the lamp manufacturer's recommendations and which allow the lamps to achieve the performance given in the lamp manufacturer's published data sheets.

#### Photometric performance

Provide luminaires which achieve the photometric and brightness characteristics as documented.

## 1.3 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

#### Associated worksections

Conform to associated worksections as follows:

- Electrical general requirements.
- Low voltage power systems.
- Lighting.

#### 1.4 INSPECTION

#### Notice

Inspection: Give notice when the first batch of each type is ready for delivery to site.

#### 1.5 SUBMISSIONS

## Shop drawings

General: Submit shop drawings of custom-built luminaires showing dimensions of equipment, details and location of accessories, details of materials and labelling details.

## **Technical data**

General: Submit photometric data for each type of custom-built luminaire in hard copy and in IES standard electronic format.

Standard: To AS 1680.3.

## Samples

Prototypes: Submit prototypes of each type of custom-built luminaire.

## 2 PRODUCTS

## 2.1 CONSTRUCTION

## Stiffness

General: Provide materials, body shape and methods of manufacture so that luminaires neither warp nor sag when installed.

## Ceiling trim

Provision for recessed mounting in suspended ceilings: To AS 2946.

## Moulded plastic bodies

Exterior use: UV stabilised.

#### 2.2 WIRING

#### **Terminal blocks**

General: Provide terminals with 2 screws each and capable of accommodating  $\geq$  three 2.5 mm<sup>2</sup> conductors.

## Flexible cords

General: Provide recessed luminaires with an external 1.5 m (minimum) length of 0.75 mm<sup>2</sup> 3-core V75 (minimum) PVC/PVC flexible cord, connected to a 10 A 3-pin moulded plug to AS/NZS 3112.

Other fittings flexible cord cross sectional area: To AS/NZS 60598.

## Minimum cable size

Screwed connectors: 24/0.2 mm.

Quick connectors: 1/0.75 mm.

## Fluorescent luminaires

Cable: V-90HT copper cable conductor.

Loom wiring: Neatly loom the wiring and install it clear of ballasts. Fix looms to the luminaire body with clips made from soft metal or polyethylene.

## Incandescent and discharge lamp luminaires

Cable: Wire between components and lampholder with V-90HT PVC, fibreglass, silicone, or tefloninsulated copper cable conductor, to suit the operating temperature within the luminaire.

Termination: Mount a fixed terminal block inside each luminaire.

## 2.3 ACCESSORIES

#### Location

General: Provide accessories selected for, and located to:

- Permit easy replacement.
- Limit magnetic interference with lamps.
- Minimise heat build up and its effect on other components.

## Spacing

General: If 2 or more accessories are installed in a single luminaire, space them to allow removal and replacement of individual items without the need to remove others.

## Fixing

General: Select from the following:

- Blind rivets.
- Nuts and similar devices: Captive type.

#### Bayonet cap and Edison screw accessories

General: Fix lampholder sockets to prevent rotation.

## **Fluorescent lampholders**

General: Mount each lampholder rigidly. Space lampholders laterally to allow for the installation and replacement of the lamps.

Dimensions and tolerances: To AS/NZS 4782.1.

## 2.4 LIGHT CONTROL

#### General

Provide light control elements comprising reflectors, diffusers etc. to achieve the performance as documented.

#### **Hinged diffusers**

General: Provide hinged diffusers securely connected to the luminaire body, with the diffuser held captive.

## 2.5 OTHER CONTROLGEAR

#### Standards

General: To AS/NZS 61347 Parts 1, 2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.8, 2.9, 2.10 and 2.11.

#### Fluorescent lamp starters

Standard: To AS 4111 or AS/NZS 60155. Starter switches: Provide starter switches which are compatible with the lamp and controlgear.

#### ELV transformers

General: For extra-low voltage tungsten halogen lamps provide the following:

- One transformer per lamp with power rating matching the lamp.
- Common transformers which maintain constant secondary voltage irrespective of load and maintain primary/supply mains fluctuation within normal limits.

Transformer regulation: 5%.

#### Regulation

Output voltage: Not in excess of the nominal rated lamp voltage at a load of 75% of nominal transformer rating.

## 3 EXECUTION

## 3.1 COMPLETION

#### General

General: Verify the operation of all luminaires.

## 0961 TELECOMMUNICATIONS CABLING

## 1 GENERAL

## 1.1 AIMS

## Responsibilities

General: Provide a passive telecommunications cabling network system as follows and as documented.

## 1.2 SYSTEM DESCRIPTION

#### **Network connection**

General: Provide network connection as documented.

Campus distributor General: Provide campus distributor as

documented.

Campus cabling General: Provide campus cabling as documented.

**Building distributor** General: Provide building distributor as documented.

**Backbone cabling** General: Provide backbone cabling as documented.

Floor distributors General: Provide floor distributors as documented.

**Consolidation points** General: Provide consolidation points as documented.

Telecommunications outlets

General: Provide telecommunications outlets as documented.

## Patching

General: Provide patching of telecommunications outlets and equipment as documented.

#### System performance

Application class to AS/NZS 3080 clause 6.3: E.

Balanced system to AS/NZS 3080 clause 7 (data): Category 6.

Balanced system to AS/NZS 3080 clause 7 (voice): Category 6.

Fibre system class: To AS/NZS 3080 clause 8. Warranty (years): 15 years minimum.

## 1.3 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

## Associated worksections

Associated worksections: Conform to the following:

- Electrical general requirements.
- Cable support and duct systems.

## 1.4 STANDARDS

#### General

Authorities: To the requirements of the Australian Communications and Media Authority (ACMA).

Cabling products: To AS/ACIF S008 and AS/NZS 3080.

Installation of cabling: To AS/ACIF S009, AS/NZS 3080, AS/NZS 3084, SAA HB 29 and SAA HB 243.

Installation of small office/home office cabling: To AS/ACIF S009, AS/NZS ISO/IEC 15018 and SAA HB 29.

Cable management and documentation: To AS/NZS 3085.1.

EMC: To the recommendations of AS/NZS 3080.

## 1.5 INTERPRETATION

#### Abbreviations

General: For the purposes of this worksection the abbreviations given below apply.

- EMC: Electromagnetic compatibility.
- EMI: Electromagnetic interference.
- EMR: Electromagnetic radiation.
- RU: Rack unit.
- CES: Communication earth systems.
- TRC: Telecommunications reference conductor.

#### 1.6 SUBMISSIONS

## **Technical data**

General: Submit technical data including the following:

- System design parameters: Performance.
- Voice and/or data transfer rate.
- Cable type and characteristics.
- Segregation requirements for EMI/EMR.
- Maximum length of cables.
- Cross-connect type and characteristics.
- Cross-connect block.
- Patch cords.
- Fibre optic terminations.
- Patch panel module.
- Cable management for racks.
- Rack.
- Fly leads.

#### Samples

Product data and samples: Submit for the following:

- Telecommunications outlet.

#### Shop drawings

General: Submit showing the following:

- Layouts of equipment racks.
- Cross-connect layout.
- Cabling diagram for complete system.
- Cable management system.

## Certification

General: Submit product and installation certification for the installation.

## 2 PRODUCTS

## 2.1 NETWORK TERMINATION

#### Network termination device

General: Provide network termination device as documented.

## 2.2 DISTRIBUTORS

#### Equipment racks

General: Provide equipment racks to the **Equipment racks schedule**.

#### **Cross connect patch panels**

General: Provide cross connect patch panels as documented.

Terminations: Terminate directly to the modular connector.

Fixed terminations:

- Rear terminals: 45° IDC punch down type.

- Front terminals: RJ45 modular connector.

Patch cords: Terminate cord ends with appropriate registered jacks.

#### **Optical fibre termination panels**

Break out trays: Provide fibre optic cable break out trays at each group of fibre optic cable terminations.

Loom cables: Neatly loom cables and lay stripped cables into the break out tray.

Secure cables: Ensure that cables are secured by the sheath and that there is no stress on the fibre optic cores.

#### Cable management

Record book: Provide a record book at each cross-connect.

Location: Secure log books in each distribution frame records holder.

Identification, labelling, and record documentation: To AS/NZS 3085.1.

## 2.3 CABLES

#### Copper

Standard: To AS/ACIF S008.

Balanced system cables: UTP.

## Fibre

Standard: To IEC 60793-2-10.

Default type: 6 core multimode OM3 50/125 mµ.

Length: Provide  $\geq$  1000 mm spare at each end.

# Component type: SC. External

Standard: Water penetration resistance to

# IEC 60794-1-2.

## 2.4 TELECOMMUNICATIONS OUTLETS

## General

Outlets: Provide RJ45 8 way modular jacks. Standard: To AS/ACIF S008. Pinouts: T568A to AS/NZS 3080.

## 2.5 FLY LEADS

## General

Type: Stranded. Length: 1200 mm. Quantity: 50% of outlets installed.

## 2.6 PATCH CORDS

## General

Type: Stranded. Length: 900 mm. Quantity: 100% of outlets installed. Termination: Registered jacks.

## 3 EXECUTION

## 3.1 GENERAL

## General

Standard: To AS/NZS 3084, AS/NZS 3080 and AS/ACIF S009.

Procedure: The space requirements as documented take precedence over the specific space requirements of AS/NZS 3084.

## 3.2 CABLES

## Installation

General: To manufacturers recommendations.

Crossover: Install cables neatly and without crossovers between cables.

Loom size: Loom cables into groups not exceeding 50 cables, and hold looms in place using reusable cable ties at least 20 mm wide. Do not exert compressive force on the cables when installing cable straps.

## **Cable separation**

For safety: To AS/ACIF S009, and by at least 150 mm.

Electromagnetic interference(EMI): To AS HB 29.

Fluorescent luminaires: Maintain a clearance of  $\geq$  300 mm.

## External cables

External cables: To ACIF C524.

## 3.3 TELECOMMUNICATIONS OUTLETS

## Installation

Mounting: Flush mount.

Style, material and colour of plates: To match adjacent power and switch plates.

## 3.4 EARTHING SYSTEM

#### General

Standard: to AS/ACIF S009 and SAA HB 29.

#### **Communication earth system**

Communication earth system (CES): Provide a communications earth terminal (CET) adjacent to each electrical switchboard. Connect the CET to the local protective earth (PE) system at the switchboard.

Distributor: Provide an earth bar within each distributor and connect to the local CET in accordance with SAA HB 29.

Interconnections: Verify that there are no interconnections between the lightning protective earthing system and the telecommunications earthing system.

## 3.5 LABELS

## Labelling

Telecommunications cables: Label cross-connects and outlets in accordance with the requirements of AS/NZS 3080 and SAA HB 29 Figures 5 - 18.

Cables: Label to indicate the origin and destination of the cable.

Outlets: Label to show the origin of the crossconnect, the workstation or outlet number and the port designation.

## Label type table

| Component      | Label scheme           | Туре                       |
|----------------|------------------------|----------------------------|
| Cables         | Origin and destination | Self adhesive – wrap on    |
| Cross-connects | Port Number            | Proprietary                |
| Outlets        | SAA HB 29 Fig 5-<br>18 | Engraved plate             |
| Wall boxes     | SAA HB 29 Fig 5-<br>18 | Engraved<br>adhesive label |
| Patch cords    | Type of service        | Colour code                |

## 3.6 TESTING

#### Standards

Testing of balanced cabling systems: To AS/NZS IEC 61935.1.

Testing of patch cords: To AS/NZS IEC 61935.2. General

## General: Carry out 100% channel tests.

Tests: To AS/NZS 3080 in conformance with

SAA HB 29. Include the following:

- Basic Link and Channel transmission tests including the following:
- . Wire map.
- . Length.
- . Attenuation.
- . NEXT.
- . ACR.
- . Propagation delay.
- . Delay skew.
- . Power sum NEXT.
- . Power sum ACR.
- . ELFEXT.
- . Power sum ELFEXT.
- . Return loss.
- Optical fibre cable: Carry out Basic Link transmission tests including the following:
  - . Length.
  - . Attenuation.

#### 3.7 COMPLETION

#### **Cable management**

General: Submit log books for each distribution frame with details of cable terminations and provisions for recording cable, line and jumper information.

Identification and labelling, and record documentation: To AS/NZS 3085.1.

## 0962 TELEVISION DISTRIBUTION SYSTEMS

## 1 GENERAL

#### 1.1 AIMS

#### Responsibilities

General: Provide a system suitable for the reception and distribution of television, video and sound signals as documented.

Network connection: Arrange with the network operator(s) for the connection of their network. Comply with the network operators' requirements.

Designer: Network operator's 'Approved Design Partner'.

Survey: Confirm location and height of Free to Air antenna by on-site measurements.

#### 1.2 SYSTEM DESCRIPTION

#### System type

Type: As documented.

#### Performance

General: To AS/NZS 1367.

Capacity: Provide the distribution system with the installed capacity to accommodate 30% additional outlets.

#### Signal sources

Free to air antennae system: Provide 'free to air' (FTA) antennae system terminating at the premises cabling interface.

Network operator: Provide for the connection of the network operator's system terminating at the premises cabling interface as documented.

Local signal source: Provide television input sockets at the premises cabling head-end for the distribution of in-house television channels on separate channels of the network.

#### Service entry

General: Provide service entry facilities to suit signal sources, head end equipment and distribution systems.

Location: As documented.

#### Head end equipment

General: Provide head end equipment to suit signal sources, distribution systems and documented performance.

Location: As documented.

#### **Distribution system**

General: Provide a cabling distribution network from the head end equipment to each network distribution tap.

FTA distribution taps: Provide FTA distribution taps.

Network distribution taps: For systems designed for more than one network operator provide individual distribution taps for each network operator. Colocate the taps with FTA taps in groups to facilitate selected connection or changes to outlet feeders.

Location: Group all equipment as documented.

## Outlets

General: Provide outlets and feeders from distribution tap(s) as documented.

Quantity: Provide separate sockets for each source and service.

## 1.3 CROSS REFERENCES

## General

General: Conform to the *General requirements* worksection.

## Associated worksections

Associated worksections: Conform to the following:

- Electrical general requirements.

- Cable support and duct systems.

## 1.4 STANDARDS

## General

System design and performance: To AS/NZS 1367. Application: Notwithstanding the specific building types inherent in clause 1.1.1 of AS/NZS 1367 the standard is deemed to apply to all building types. Earthing and segregation: To AS/NZS 3000.

Safety requirements: To AS/NZS 1367 Section 2. Electromagnetic compatibility: To AS/NZS 1367 Section 3.

## 1.5 INTERPRETATIONS

## Abbreviations

General: For the purposes of this worksection the abbreviations given below apply.

- BER: Bit error ratio.

## 1.6 SUBMISSIONS

#### General

Documentation: To AS/NZS 1367 Appendix D.

## Certification

Designer: Network operator's 'Approved Design Partner' approval.

#### **Technical data**

General: Prior to commencing the work submit the following:

- Design frequencies.
- Free to Air reception quality report, citing methods used for determination. Address all signals that the system is to receive.
- Calculations of signal levels at outlets and at the input and output of amplifiers, splitters and taps.

#### Correspondence with network operators

Correspondence: Provide copies of correspondence and notes of meetings with all subscription network operators.

Service agreements: Arrange for each service provider to submit service agreements for execution by the principal.

## Shop drawings

General: Prior to commencing the work submit the following in accordance with AS/NZS 1367 clause D3 and D4:

- Schematic diagram, proposed location of all components and interconnecting cabling.
- Antennae types and their method of mounting.

#### Product data

Product data: Submit for all system components. **Samples** 

#### Samples

System components: Submit samples that are visible after installation, including but not limited to:

- Outlets.
- Labelling.

## **Record drawings**

General: Include minimum and maximum signal frequency (channel) and their levels at the input and output of amplifiers, splitters, taps, tap ports and outlets.

## 1.7 TESTING

## General

Extent: Test 100% of the system to AS/NZS 1367. Setup: Use locally generated test signals to provide static conditions for level measurements. Carrier-to-noise measurements: Required.

## 2 PRODUCTS

## 2.1 FREE-TO-AIR ANTENNA

## General

Standard: To AS 1417.

#### Material:

- Boom: Galvanized steel.
- Elements: Aluminium ≥ 12 mm.

Connection: F type to IEC 60169-24.

Mounting hardware: Proprietary to suit antenna.

## 2.2 ACTIVE EQUIPMENT

## Masthead amplifier(s)

Selection: To meet system performance requirements.

## Head end amplifier(s0

Selection: To meet system performance requirements.

## **Distribution amplifiers**

Selection: To meet system performance requirements.

#### 2.3 PASSIVE EQUIPMENT

## Splitters

Selection: To meet system performance requirements.

#### Couplers

Selection: To meet system performance requirements.

## Taps

Selection: To meet system performance requirements.

## 2.4 COAXIAL CABLE

## Types

Standard: To AS/NZS 1367 clause 5.11. General: Minimum RG6 dual shield.

Underground: Flooded type.

## Connectors

Coaxial: F type to IEC 60169-24.

## 2.5 OUTLETS

## General

Outlet type:

- PAL (IEC 60169-2) type socket on the front and "F" type socket on the rear for terrestrial FTA services and down converted satellite services.
- PAL (IEC 60169-2) type on the front and "F" type on the rear for terrestrial FTA services and an "F" type on the front and on the rear for satellite services.
- "F" type socket on the rear and on the front for satellite services.
- "F" type socket on the rear and on the front for cable services.
- PAL (IEC 60169-2) type on the front and "F" type on the rear for terrestrial FTA services and an "F" type on the front and on the rear for cable services.
- PAL (IEC 60169-2) type socket on the front for FM radio services.

Outlet plate: Style, material and colour to match adjacent power and switch plates.

## 2.6 EXTERNAL COMPONENTS

#### General

Degree of weather protection: IPX4 to AS 60529.

## 3 EXECUTION

## 3.1 GENERAL

**Free-to-air antennae** Installation: To AS 1417.1.

## 3.2 DISTRIBUTION EQUIPMENT

#### General

Enclosure: Locate all active and passive distribution equipment in proprietary purpose built enclosures, located as documented.

## 3.3 COAXIAL CABLE

#### General

Standard: To AS/NZS 1367 Appendix G.

Conduit: Install coaxial cable in conduit or ducting as follows:

| Cables                            | Conduit (minimum) |
|-----------------------------------|-------------------|
| 2 No. double shielded RG6         | 20 mm             |
| > 1 No. RG6 tri or quad<br>shield | 25 mm             |
| > 1 No. double shielded RG11      | 32 mm             |

Bending radius: Conform to the minimum bending radius manufacturer's recommendations for the size of cable.

## 3.4 OUTLETS

## Installation

Mounting: Flush mount.

Screening: Fully screen all outlets.

## **Outlet fly leads**

General: Following commissioning of the system, provide 1500 mm fly leads to all outlets.

## 0971 EMERGENCY EVACUATION LIGHTING

## 1 GENERAL

## 1.1 AIMS

## Responsibilities

General: Provide single point emergency lighting and exit signs as follows and as documented.

## 1.2 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

#### Associated worksections

Associated worksections: Conform to the following:

- Electrical general requirements.
- Low voltage power systems.
- Luminaires custom-built.

## 1.3 STANDARDS

## General

System design, installation and operation: AS 2293.1.

Inspection and maintenance: To AS/NZS 2293.2.

## 1.4 SUBMISSIONS

#### Samples

General: Submit samples of all luminaires and exit signs.

#### **Technical data**

General: Submit technical data for each type of luminaire and exit sign including the following:

- Maximum luminaire spacing for a given mounting height.
- Luminaire classification to AS 2293.3.
- Central battery and charger performance test reports, including discharge and charging characteristics.

## Type test data

General: Submit type test data.

## Shop drawings

General: Submit the following:

- Construction details, overall dimensions and wiring arrangement for each custom built luminaire and exit sign.
- Details of the central monitoring and testing facility.
- For central systems:
- . Construction details and layout of the power source.
- . Details of room or enclosure housing the power source, including ventilation requirements.
- . Details of wiring method.

## 2 PRODUCTS

## 2.1 SINGLE-POINT SYSTEM LUMINAIRES

## General

Visual indicator lights: Provide a red indicator, readily visible when the luminaire is in its operating location, which indicates that the battery is being charged.

Inverter system: Provide protection of the inverter system against damage in the event of failure, removal or replacement of the lamp, while in normal operation.

Local test switches: Provide a momentary action test switch, accessible from below the ceiling, on each luminaire to temporarily disconnect the mains supply and connect the battery to the lamp.

Common test switches: Provide a common test switch on the local distribution board which disconnects main supply to the luminaires and tests for discharge performance. After testing, this switch must automatically revert to normal operating mode.

## Monitored system

Data connection: Provide internal monitoring facilities and provision for the connection of data cabling to a central monitoring computer.

## Batteries

Type: Lead-acid or nickel-cadmium batteries capable of operating each lamp at its rated output continuously at least 2 hours during completion tests and 1.5 hours during subsequent tests.

Battery life: At least 3 years when operating under normal conditions at an ambient temperature of 25°C and subjected to charging and discharging at 6 monthly intervals.

Marking: Indelibly mark each battery with its date of manufacture.

## 2.2 CENTRAL SYSTEM LUMINAIRES

#### **Fluorescent luminaires**

General: Provide inverters and transformers to operate lamps from the central power supply.

## Tungsten halogen luminaires

General: Provide inverters suitable for lamp wattage.

#### Power supply

#### Batteries

General: Provide a dedicated lead-acid or nickelcadmium battery and charger system which is as follows:

- Provides the operating voltage to luminaires at the most distant point of the system.
- Is of sufficient capacity to energise the system for at least 2 hours during completion tests.

## **Battery life**

General: At least 10 years when operating under normal conditions at an ambient temperature of 25°C and subjected to charging and discharging at 6 monthly intervals.

## Charger design

General: Provide a constant voltage type charger as follows:

- Provides a continuous trickle charge which maintains the battery system in a fully charged condition.
- Has circuitry which monitors and automatically limits charging current and output voltage.

Maximum charge current: 1.25 x rated output. Maximum battery terminal voltage: 10% above nominal battery voltage.

Capacity: Sufficient to:

- Withstand a short circuit at the output terminals.
- Limit the current to the rated maximum output.

Instruments: Provide voltmeters and ammeters which monitor battery terminal voltage, load current, charger voltage and charger current.

Remote alarm connections: Provide a set of voltage free relay contacts for transmission of the following alarms:

- Loss of normal supply to the charger.
- Low battery voltage.
- Loss of battery supply.

Inverter: For a.c. central systems, limit the input supply total harmonic distortion generated by the inverter to a maximum of 5%.

## Monitored system

Data connection: Provide monitoring facilities and provision for the connection of data cabling to a central monitoring computer.

## 2.3 MONITORING SYSTEM

## **Proprietary systems**

General: Provide proprietary systems with full compatibility between the monitoring system, operating software and the luminaries selected.

## 3 EXECUTION

## 3.1 SINGLE POINT SYSTEM

## **Power supply**

General: Provide an unswitched active supply to each luminaire and exit sign, originating from the test switch control panel.

#### Data monitoring

General: If a monitoring system is documented, provide a data cable system from each single-point luminaire and connect to the monitoring computer.

## **Test switch**

General: Provide a timed test switch at each distribution board.

Function: To energise emergency lights and exit signs and then to automatically reset controls after a maximum of 2 hours.

## 3.2 CENTRAL SYSTEM

#### Power supply

General: Provide an isolated supply from the central system via a segregated wiring system.

#### **Test switch**

General: Provide a timed test switch at each central system distribution board.

Function: To energise emergency lights and exit signs from the central system and then automatically reset after a maximum of 2 hours.

## 3.3 MARKING AND LABELLING

## Labelling

General: Label each luminaire with a unique identifying number and record the number and luminaire location in a schedule included in the emergency evacuation lighting operation and maintenance manual. The label must be permanently fixed, indelible and readable at a distance of 1 m.

## 3.4 TESTS

## General

General: Carry out tests, including out-of-hours tests, to demonstrate the emergency and evacuation system's performance. Include the following:

- Test components for correct function and operation.
- Demonstrate illumination performance on site, to at least the level stated in the manufacturer's performance specification for that device.
- Test operation of battery discharge test and control test switch functions, including discharge and restoration.
- Demonstrate system functions under mains fail condition.
- Demonstrate operation of the battery and charger including a full discharge/recharge over the designated time.

#### Mains supply

General: Before commissioning, ensure mains supply has been continuously connected for at least 24 hours.

## 3.5 COMPLETION

## Maintenance

Emergency evacuation lighting: To AS 2293.2.

Interval: Carry out the 6-monthly procedures before practical completion and again before the end of the maintenance period.

## 0972 FIRE DETECTION AND ALARMS

## 1 GENERAL

## 1.1 AIMS

## Responsibilities

General: Provide fire detection and alarm systems as follows and as documented.

## 1.2 SYSTEM DESCRIPTION

#### General

System type: Addressable.

Interface: Emergency warning and intercommunications system.

## 1.3 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

## Associated worksections

Associated worksections: Conform to the following:

- Electrical general requirements.

- Emergency warning and intercommunication.

## 1.4 STANDARD

General

Standard: To AS 1670.1 and AS 7240.13.

## 1.5 SUBMISSIONS

## **Technical data**

Product data: Submit for the following:

- Fire indicating panel.
- Detectors.
- Manual call points.
- Alarm bells.
- Magnetic door holders.

#### Samples

Samples: Submit for the following:

- Detectors.
- Manual call points.
- Alarm bells.
- Magnetic door holders.

#### Shop drawings

General: Submit showing the following:

- Fire detector layout.
- Dimensions and details of control and indicating equipment.
- Location.
- Circuit identification.
- Labelling details.

## 2 PRODUCTS

## 2.1 AUTHORISED PRODUCTS

#### General

Equipment: Provide equipment listed in the ActivFire Register of Fire Protection Equipment.

## 2.2 CONTROL AND INDICATING EQUIPMENT

#### Standards

General: To AS 7240.2. Air-handling fire mode control panels: To AS 4428.7.

Alarm investigation facility (AIF): To AS 4428.10.

Alarm signalling equipment: To AS 4428.6.

Power supply units: To AS 4428.5.

Fire fighters interface: To AS 4428.3.

Routing equipment: To AS 7240.21.

Wire-free alarm zone circuits: To AS 4428.9.

# Fire indicator panels

General: Provide metal cubicle-type enclosures.

## Isolation

Isolating facilities: Provide on fire indicator panels to enable tests to be carried out without the transmission of alarm signals to the fire brigade.

#### Capacity

Spare zones: 50% minimum.

## 2.3 DETECTORS

#### Standards

Carbon monoxide (CO) fire detectors: To AS 7240.6.

Duct sampling units (DSUs): To AS 1603.13. Heat detectors: To AS 7240.5.

Point type smoke detectors: To AS 7240.7.

Integral heat detector/alarm units: To AS 1603.3.

Integral smoke detector/alarm units: To AS 12239.

Multi-sensor fire detectors: To AS 7240.15.

Multi-point aspirated smoke detectors: To AS 1603.8.

Optical beam smoke detectors: To AS 1603.7.

Point type smoke detectors: To AS 1603.2.

Remote indicators: To AS 1603.15.

Visual warning devices: To AS 1603.11.

#### Self-indicating detectors

General: Provide a light emitting diode mounted in a clearly visible position, which illuminates whenever detector operation causes an alarm condition to register on the fire indicator panel. Provide selfindicating devices which, if faulty, will not render the detector inoperative under fire conditions.

Mounting positions of light emitting diodes:

- Visible detectors: On the outside of the detector or its base.
- Detectors concealed above ceilings: On the underside of the ceiling immediately below the detector.

- Detectors in other concealed spaces: On a visible panel close to the entry to the concealed space housing the detector.
- Remote indicators: To AS 1603.15.

#### 2.4 MANUAL CALL POINTS

#### General

Standard: To AS 1603.5.

## 2.5 EXTERNAL ALARM INDICATION

#### Standards

Bell circuits: To AS 4428.1. Strobe lights: To AS 1603.11.

## **Power supply**

To the strobe light and  $\leq 2$  others: From the fire indicator panel battery power supply.

To additional strobe lights: From the mains supply. Provide appropriate interface relays, operated by the fire indicator panel.

## 2.6 MAGNETIC DOOR HOLDERS

#### General

Standard: To AS 4178.

## **Control facilities**

Standard: To AS/NZS 1668.1.

Signals: Provide ancillary control device circuits and connections for automatically controlling and releasing magnetic door holders to operate the relevant doors under fire alarm conditions.

## 2.7 WARNING SYSTEM

#### General

Occupant warning system: To AS 1670.4 Section 3.22.

## 2.8 POWER SUPPLY

#### General

Surge protection: Ensure that normal operation is maintained and that voltage surges in the power source do not damage the control and indicating equipment.

Sealed batteries: Cycle the batteries before practical completion so that  $\geq$  100% of nominal capacity is available at practical completion.

#### 3 EXECUTION

#### 3.1 FIRE ALARM MONITORING

#### General

Standard: To AS 7240.21.

Connection: Connect the installation to a monitoring service provider. Connect using telecommunications fixed wire carrier lines.

#### 3.2 DETECTORS

#### Installation

General: Install detectors so they can be easily inspected and tested in situ, and readily withdrawn from service. Integral smoke detector/alarm units: To AS 1670.6.

## 3.3 INSTALLATION WIRING

#### General

To AS 1670.1 Section 3.24.

## 3.4 AIR HANDLING SYSTEMS

## **Fire fan control and indication panels (FFCP)** Standard: To AS/NZS 1668.1.

Signals: Provide fire detection and alarm signals for the fire fan control and indication panel (FFCP).

## 3.5 TESTING

#### General

Tests: Carry out tests, including out-of-hours tests, to demonstrate the automatic fire detection and alarm system's performance to AS 1670.1 Section 7 and the compliance Sections of the relevant parts of the AS 1603 series. Include the following:

- Test components for correct function and operation.
- Demonstrate detection and alarm performance on site, to at least the level stated in the manufacturer's performance specification for that device.
- Test alarm zone identification.
- Demonstrate air sampling system operation for 14 days with data logger to verify stability of detectors and devices.
- Demonstrate addressable device operation for 14 days with data logger to verify stability of detectors and devices.
- Test interface to interconnected systems.
- Demonstrate correct shutdown sequences during fire mode.
- In situ testers: To AS 1603.16.

#### 3.6 COMPLETION

#### Maintenance

Maintenance and records: To AS 1851.

## 0973 EMERGENCY WARNING AND INTERCOMMUNICATION

## 1 GENERAL

#### 1.1 AIMS

#### Responsibilities

General: Provide intercommunication and sound systems for emergency purposes as follows and as documented.

#### 1.2 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

## Associated worksections

Associated worksections: Conform to the following:

- Electrical general requirements.
- Cable support and duct systems.
- Fire detection and alarms.

#### 1.3 STANDARDS

#### General

Intercommunication system: To AS 1670.4 and AS 4428.4.

Sound system: To AS 1670.4 and AS 60849.

## 1.4 SUBMISSIONS

## **Technical data**

General: Submit product data for all components.

## Samples

General: Submit samples of the following:

- Visual alarm devices.
- Speakers.
- Handsets

#### Shop drawings

General: Submit shop drawings showing the following:

- Panel layouts and enclosures including associated building works.
- Cabling diagrams.
- Equipment layout.
- Speakers, handsets, visual alarm devices and wiring layouts.
- Warden intercommunication points.
- Loudspeaker enclosures.

#### **Test reports**

General: Submit test reports as follows:

- Sealed batteries test report.
- Commissioning test report.
- System installer's statement.
- System test certificates.
- System information in the forms provided in AS 1670.4.

## 2 PRODUCTS

## 2.1 GENERAL

## Authorised products

General: Provide equipment listed in the ActivFire Register of Fire Protection Equipment.

#### 2.2 CONTROL AND INDICATING EQUIPMENT (CIE)

## General

Type: Common unit for intercommunication and sound systems.

## 2.3 SOUND SYSTEM

#### System

Type: 100 volt.

Zoning:  $\geq$  1 per building, level and fire zone.

Signal source: automatic and local microphone at CIE.

#### Amplifiers

Selection: Select and adjust to meet performance requirements.

Type: 100 volt.

Quantity: ≥ 1 per zone.

Non-emergency input terminals:  $\geq$  1 per amplifier. Location: within CIE.

## Speakers

Selection: select and adjust to meet performance requirements.

Type: Tapped 100 volt.

## **Emergency call points** General: Required.

## 3 EXECUTION

## 3.1 GENERAL

## Field wiring

General: To *Electrical general requirements* and *Cable support and duct systems.* 

# 3.2 CONTROL AND INDICATING EQUIPMENT (CIE)

## General

Mounting: Flush mount in location as documented. Enclosure: Coordinate with surrounding building works.

## 3.3 SOUND SYSTEM

## Loudspeakers

Mounting: Securely fix to building elements. Flush mounting: Required in suspended ceilings. Wall mounting: 150 mm below finished ceiling level to top of speaker enclosure.

## 3.4 INTERCOMMUNICATION SYSTEM

#### Warden intercommunication points

Connection: Provide separate circuits for each WIP handset.

Conferencing: Provide switching facilities which permit conference calls, between up to 5 warden intercommunication points, to be initiated from any emergency control panel.

Lift cars: Provide a terminal block outside the lift motor room. Cable from the terminal block to central control equipment. Provide a warden intercommunication point handset in each fire lift car.

## 3.5 COMPLETION

## **Operational and maintenance manual** Standard: To AS 4428.4.

#### Maintenance

Standard: To AS 1851.

General: Perform Level 2 maintenance routines.

## **0979 LIGHTNING PROTECTION**

## 1 GENERAL

## 1.1 AIMS

#### Responsibilities

General: Provide a lightning protection system as follows and as documented.

## 1.2 CROSS REFERENCES

#### General

General: Conform to the *General requirements* worksection.

#### Associated worksections

Associated worksections: Conform to the following:

Electrical general requirements.

#### 1.3 STANDARD

#### General

Lightning protection system: To AS/NZS 1768.

## 1.4 SUBMISSIONS

#### Shop drawings

General: Submit layout drawings of the lightning protection system showing the following information:

- Details of the locations and types of joints, air and earth terminations, downconductors, materials used, and provisions for minimising galvanic action.
- Arrangement of components in earthing pits.
- Provision for building movement and building penetrations.
- Details of bonding to other high level and inground services entering, or in the vicinity of, the building.

## 1.5 TESTING

## General

Standard: To AS/NZS 1768.

#### 2 EXECUTION

## 2.1 INSTALLATION

#### General

Standards: To AS/NZS 1768.

#### **Thermal expansion**

General: Provide expansion loops in horizontal air terminations between fixing points.

#### Air terminations

General: Provide air terminations to the **Air** terminations schedule.

## **Down conductors**

General: Provide down conductors to the **Down** conductors schedule.

## **Test links**

General: Provide test links to the **Test links** schedule.

## Earth terminations

General: Provide earth terminations to the **Earth** terminations schedule.

#### Bonding

General: Provide bonding to the **Bonding** schedule.

Foundation or footing bonding: Provide threaded terminals welded to reinforcement.

#### Electrode pits

General: Locate driven earth electrodes in dedicated pits.

Marking: Mark pit covers with the words 'Lightning protection earth'.

## 2.2 COMPLETION

## Records

Standard: To AS/NZS 1768.

## 0981 ELECTRONIC SECURITY

## 1 GENERAL

## 1.1 AIMS

#### Responsibilities

General: Provide electronic security systems as follows and as documented.

Security classification: As documented.

#### System provider

Electronic security system provider: A licensed security organisation only.

## 1.2 CROSS REFERENCES

## General

General: Conform to the *General requirements* worksection.

## Associated worksections

Associated worksections: Conform to the following:

- Building IT components.
- Electrical general requirements.
- Cable support and duct systems.
- Uninterruptible power supply.
- Telecommunications cabling.

## 1.3 STANDARDS

## Intruder alarm systems

General: To AS/NZS 2201.1.

Alarm transmission system: To AS/NZS 2201.5. Internal detection devices: To AS 2201.3. Wire free systems: To AS 2201.4.

## CCTV systems

General: To AS 4806.2.

Remote monitored systems: To AS 4806.4

#### 1.4 SUBMISSIONS

## Samples

General: Submit samples of the following:

- Door contacts and reed switches.
- Key or card readers.
- Electric door strikes and door release devices.
- Duress alarm switches.

## Records

General: Submit records to AS/NZS 2201.1.

Licence: Submit copy.

#### **Technical data**

General: Submit data showing dimensions and space requirements for the following:

- Door contacts and reed switches.
- Detection devices.
- Key or card readers.
- Electric door strikes and door release devices.

- Television monitors, cameras and associated equipment.
- Intercom stations.
- Vehicle control systems.
- Duress alarm switches.

## Shop drawings

General: Prior to commencing work submit shop drawings showing the following:

- Schematic diagram of all systems.
- Panel layouts and dimensions.
- Power supply requirements.
- Wiring access necessary for door frames.
- Cut out dimensions.
- Fixing provisions for cameras and monitors.

## 2 PRODUCTS

## 2.1 GENERAL

## Alarm system panels or processors

Capacity: Provide separate sectors for each nominated internal access zone, and for normallyclosed and normally-open perimeter access zones. Tamper alarms: Provide tamper protection and

alarms.

Sector time delay: Provide one adjustable time delay entry/exit sector, with adjustment range 0 to 30 s and tamper protection.

Batteries and chargers:

- Sealed battery: Provide a sealed battery and charger system contained within each control panel with capacity as scheduled.

#### Activation

Activation device: Provide keypads, card readers and other activation devices as documented.

External: Provide weatherproof (IP56) hoods or housings for external units.

Default mounting height: 1100 mm from floor level.

#### External audible and visual alarms

General: Provide a corrosion-resistant weatherproof metal enclosures containing sirens and blue strobe lights. Fix in locations not readily accessible without a ladder.

#### Anti-tamper devices

Anti tamper devices: Provide anti-tamper devices to control panels, external equipment, control and activating devices, and access control devices.

Function: To register an instantaneous alarm if covers are removed or vital wiring is disconnected.

#### Alarm circuit supervision

Alarm circuit supervision: At each detection device, provide alarm circuit supervision by means of an end-of-line device connected via a separate circuit within the cable.

Function: To register an instantaneous alarm if cable characteristics change, such as when cut or short circuited.

## **Event logging printer**

Printer: Provide an event logging printer connected to the alarm and access control panel.

Function: To generate a printed report showing the date, time and category of alarm initiations and access control entries.

## **Remote monitoring**

Duration: Provide remote monitoring for the duration of the defects liability period.

Monitoring system: Provide a monitoring system in the alarm panel or processor for transmission of alarms and monitoring of the system by parties responsible for attending to alarms.

## 2.2 ACCESS CONTROL

#### Access control processors or panels

Capacity: Provide separate entry/exit control modules for each designated door.

Users: Program the system to match the number of authorised users with unique access codes.

Time zones: At least 4 per day, with provision for weekends and public holidays.

#### Door control devices

General: Provide electric strikes, electric locks, drop bolts, or similar devices to suit door construction and hardware.

Fail-safe: Connect door control devices in a fail-safe mode to permit egress in the event of power failure.

Authorised products: Provide equipment listed in the ActivFire Register of Fire Protection Equipment.

Glass doors: Provide tumbler, drop bolts or magnetic holders.

Double leaf doors (solid frame): Provide an electric strike or lock on the fixed leaf, connected to the door frame by concealed flexible wiring.

#### Vehicle control

Vehicle access control: Provide vehicle access control system combining connection to vehicular doors and boom gates, and interconnection to the main access control system.

Exit loop detection: Provide a buried loop detection system adjacent to the exit point to activate boom gates or vehicular doors on approach by a vehicle. Connect so that doors or gates close after a pre-set time.

Interlock: Provide a photo electric beam safety interlock.

Interlock function: To prevent door or gate from closing until the vehicle has cleared the exit point.

Push-buttons and readers: Where practicable, provide direct wall mounting for push-buttons or readers; otherwise provide a robust mounting bollard and extension arm.

Default mounting height: 1000 mm from floor level.

Reed switches: Provide heavy duty reed switches on both sides of vehicle doors to generate a door closed indication at the control panel.

#### Intercom

Base station: Provide intercom base station, interconnected with the individual local stations. Include speakers and microphones.

Entry station construction: Wall mounted flush stainless steel panel.

Weatherproofing: IP56.

Dial: Digital push-button type.

Schedule: Provide a weatherproof (IP56) schedule holder and card identifying individual local stations. Locate next to the base station intercom panel.

Local station: Provide wall mounted intercom local stations, interconnected with the base stations.

Internal station type: Surface mounted, removable handset type.

Operation: Provide an audible tone device to indicate that the individual station is being called, and a press-to-talk switch so that the entry station can communicate with the internal station only when the switch is held down.

Door control: Provide integral momentary action door release switches to operate the door release or opening mechanisms at each external entry point.

## 2.3 INTRUDER ALARM

## Movement detection devices

General: Provide movement detectors as documented.

Selection: To provide detection within the space occupied by the detector. Provide additional detectors to achieve coverage as necessary.

PIR detectors: Mirror optic type with  $\geq$  7 curtains.

Installation: To AS/NZS 2201.1.

## **Door contacts**

Reed switches: Provide magnetic reed switches which operate when:

- A personnel door is opened > 20 mm at the lock/latch edge.
- The fixed leaf of a double door is opened > 20 mm at the lock/latch edge.
- A vehicular door is opened > 100 mm.

Door lock sensors: Provide micro switches or magnetic contacts in lock keepers or door locks which incorporate a bolt movement sensing device.

Function: To detect bolt movements > 10 mm.

## **Duress alarm switches**

Desk or furniture mounting: Provide plug socket connections for duress alarm switches fixed to items of furniture. Conceal wiring and secure to avoid accidental disconnection.

Wall mounting: Recessed at 900 mm above finished floor level.

Disconnection alarm: Connect so that removal of plugs from sockets will automatically register as a duress alarm.

#### 2.4 VIDEO MONITORING

#### **CCTV** cameras

Positioning and adjustment: Position and aim cameras to provide optimum coverage and to minimise the effect of shadows or direct light sources.

Lenses: Provide lenses with apertures and focal lengths selected to provide coverage of designated

areas and to enable persons within the field of view to be readily distinguishable on monitors.

Motorised cameras: Provide camera drives which provide remote control of camera rotation and tilt, and of lens focal length.

External cameras: Provide corrosion-resistant weatherproof housings for cameras located externally, which allow cameras to perform to manufacturer's specification.

Fixing: Provide mounting brackets and hardware which rigidly fix cameras, monitors and accessories to buildings or structures.

#### **CCTV** monitors

General: Provide monitors compatible with the rest of the security system, and provide fixing brackets and hardware for wall-mounted and ceiling-mounted monitors.

#### **CCTV** recorders

General: Provide CCTV recording systems which stores the data in a digital form on electronic medium (e.g. hard disk). The recording device must provide the following:

- Index according to events.
- Fast search.
- Frame by frame search.
- Frame printing.
- Zoom and pan within a recorded frame.
- Back up daily to off-site storage.

Minimum data storage: 30 days.

#### CCTV video switching system

General: Provide a switching system which enables each camera to be scanned sequentially at predetermined intervals and which, on receipt of an alarm signal, interrupts the scanning sequence and switches to the relevant security zones.

## 3 EXECUTION

#### 3.1 GENERAL

#### Mains supplies

Permanent power supply: Provide permanent power supply to the following:

- Intruder alarm panels and access control panels including sub panels.
- Electric door strike local panels or control equipment.
- Intercom stations.
- CCTV monitors and cameras.
- Intercom stations.

Marking: Label the switchboard circuit breaker from which power for the security systems is obtained: SECURITY SYSTEM - Do not switch off.

#### Uninterruptible power supply

General: Provide a dedicated uninterruptible power supply and connect to the alarm or access control system, or both.

Capacity: At least 15 minutes, for the complete system in normal operation.

## Interconnection to other services

General: Provide functions and equipment to allow the interconnection to other systems. Provide and connect wiring to the designated services.

Lifts: Arrange for installation and connection of lift readers and associated equipment.

## Completion

Manuals

- Standard: Submit records to AS/NZS 2201.1.

Completion tests: Carry out tests, including out-ofhours tests, to demonstrate the security system's performance. Include the following:

- Test components for correct function and operation.
- Demonstrate that devices perform on site, to at least the level stated in the manufacturer's performance specification for that device.
- Test the operation of alarm sectors and panel functions, including open and short circuit tests.
- Demonstrate that the system functions under mains fail condition.
- Demonstrate operation of the battery and charger including a full discharge/recharge over the designated time.

Maintenance:

- Standard: To AS/NZS 2201.1.
- Breakdown call outs: Attend on site within 24 hours of notification. Rectify faults, and replace faulty materials and equipment.
- Frequency of routine visits:  $\leq$  3 monthly.
- Maintenance period performance monitoring
- Monitor: Access control system.
- Investigate: Causes of alarms.
- Alarm Report: < 2 days after alarm.
- False alarms:
- Notification of false alarms: On the first working day after a false alarm, submit notification of the circumstances surrounding the false alarm and action necessary to prevent similar occurrences.
- Alterations due to false alarms: Carry out alterations necessary to eliminate false alarms due to the following:
- . Technical faults, selection, siting or aiming of devices.
- . Environmental conditions evident at the time of installation.

1958 – 1966 Secondary Facilities only

# STYLE: Wyndham

#### **CONSTRUCTION:**

- Single and double storey
- Double loaded corridor
- Cavity brick construction with brick end walls
- Aluminium windows with aluminium ply inserts below 1000mm
- Sun shading- Reinforced concrete sun hoods or metal sun hoods
- Ventilating roof lights
- No insulation
- Concrete tile roofs or metal roofs

- Ground floor Timber frame
- First floor reinforced concrete slab
- Timber and steel frame construction

#### 1950 – 1960 Primary & Secondary Facilities

#### STYLE: Monocrete

# **CONSTRUCTION:**

- Masonry
- Single and double storey
- Double hung timber windows with overhanging edge beams
- Concrete pre cast panel walls and brick end walls
- Concrete tile roof

- External concrete columns with edge beams
- Ground floor Timber frame
- First floor concrete slab on precast concrete floor beams
- Timber or steel frame roof

1989 – Current Primary Facilities only

# STYLE: Component Design Range (CDR)

#### **CONSTRUCTION:**

- Mostly single storey
- Brick veneer or cavity brick construction
- Aluminium windows
- Translucent roof sheeting strips in home bases + library
- Insulation to walls behind metal cladding
- Mostly raked ceilings
- Corrugated metal roof
- Turbo Roof ventilators on upper storey

- Reinforced concrete slab on ground
- Timber and steel frame construction

#### 1969 – 1979 Secondary Facilities only

# STYLE: Study 2/2A

### CONSTRUCTION:

- Cavity brick external walls
- Double loaded corridor blocks with central high light windows
- Recessed windows with concrete sun hoods
- Aluminium sliding windows with hoppers
- Insulation under metal deck roof
- Skylight type roof structure with box gutter

- Reinforced concrete slab on ground construction
- Concrete frame brick infills and end walls
- Brick internal walls

1965 – 1979 Primary Facilities only

# STYLE: Vandersteen Transition

# **CONSTRUCTION:**

- Brick veneer construction
- Aluminium windows- full panel with aluminium ply below
- Mineral wool insulation to internal walls
- Sprayed concrete ceiling to ground floor
- Plasterboard ceiling lining to first floor
- Possible mineral wool insulation to ceilings
- Horizontal concrete sun hood
- Concrete tile roof

- Slab on ground construction
- Concrete frame structure
- Brick end walls
- Reinforced concrete balustrade to verandahs
- Timber roof trusses

1969 – 1981 Primary Facilities only

# **STYLE: Cluster**

#### **CONSTRUCTION:**

- Cavity brick construction
- Aluminium windows with aluminium infill panels
- Vertical high level louvres above windows
- Reinforced concrete sun hoods
- Concrete balustrades to verandahs
- Wide overhanging eaves
- Central roof light/ open court
- Concrete tile or metal roof

- Concrete slab on ground construction
- Load bearing masonry
- Timber frame roof

1950 – 1965 Primary Facilities only

## **STYLE: Vandersteen**

#### **CONSTRUCTION:**

- Mostly single storey
- Brick veneer construction
- Timber framed windows
- Windows with small lower hopper, higher level awning hopper style
- Tile roof

- Brick veneer external walls
- Raised timber flooring
- Timber roof trusses

1993 – 1999 Primary Facilities only

# STYLE: Rabong Kits

#### **CONSTRUCTION:**

- Brick veneer construction
- Aluminium windows
- Large eaves overhang
- Raked ceiling linings
- Insulation above ceiling linings to under side of roof
- Metal or tile roofing

- Reinforced concrete slab on ground construction
- Timber framed construction

1968 – 1973 Primary Facilities only

# STYLE: K- Plan

### **CONSTRUCTION:**

- Single storey
- Cavity brick or brick veneer construction
- Aluminium framed double hung windows with infill panels beneath
- Ceiling lining
- Western red cedar fascias
- Typically low pitched metal deck roof
- Insulation under metal deck roof

- Reinforced concrete slab on ground construction
- Load bearing masonry construction
- Generally steel framed roof

1905 – 1920 Primary and Secondary Facilities

#### STYLE: Double brick

#### **CONSTRUCTION:**

- Mainly brick and tile construction
- Some second storey light weight timber construction
- Multi-paned double hung timber windows
- Flat ceiling linings with roof cavity

- Load bearing masonry walls
- Ground floor timber framing
- First floor Reinforced concrete slab
- Timber roof framing

1915 - 1940 **Primary and Secondary Facilities** 

# **STYLE:** Timber portable

## **CONSTRUCTION:**

- Older timber buildings •
  - with vertical boards (no overlap of timber)
    horizontal boards with overlap
- Verandah •
- Corrugated iron roof and possibly unlined ceilings •

# **STRUCTURE:**

Timber frame •

1962 – 1975 Secondary Facilities

# STYLE: Doughnut

### **CONSTRUCTION:**

- Built around courtyard
- Reinforced concrete pre cast wall panels
- Cavity brick infill
- High level glass louvres above 2100mm to internal walkways
- Vertical louvres to east + west facades
- Concrete sun hoods
- Copper fascia
- Metal deck roof sloping into courtyard

- Reinforced concrete slab on ground construction
- Timber framed roof

### 1968 – 1981 Secondary Facilities only

# STYLE: Lib Lab Block

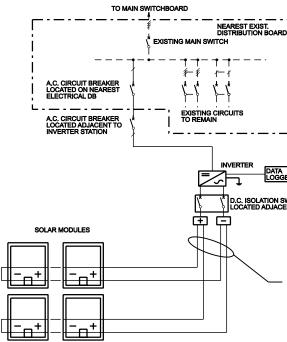

### **CONSTRUCTION:**

- Library first floor, Science laboratory on ground floor
- Cavity brick external walls
- Recessed windows
- Aluminium sliding windows with hopper
- Insulation under metal deck roof
- Exhaust fans fitted to skylight area
- Skylight type roof structure with box gutter

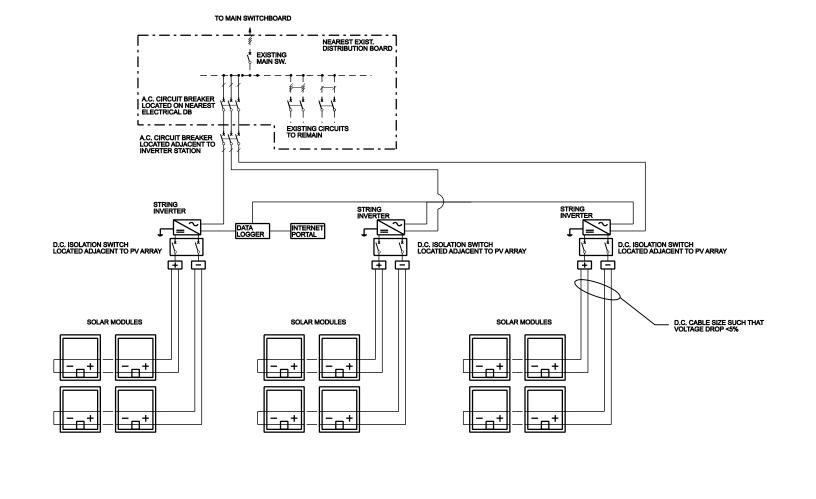

- Reinforced concrete slab on ground construction
- Reinforced concrete frame with brick infills
- Brick internal walls

#### NOTES:

# **TAFE NSW Institutes**

The directory is an annual publication which provides information about the NSW Department of Education and Training. The information in the directory is up-to-date as at March 2008.

#### The Internet/Intranet

The home page of the NSW Department of Education and Training can be found at http://www.det.nsw.edu.au. From here information on schools can be accessed through the Public Schools NSW link. Information on TAFE NSW institutes can be accessed through the TAFE NSW link.

#### Listing of School Names

To make it easier to find particular schools in the main alphabetical list, standard listing conventions are used.

Wherever possible, schools with a community name are listed together. The following rules apply:

Schools whose names begin with **The** are listed under the main name: The Channon is listed as **Channon**, **The** and **The Entrance Public School** is listed as **Entrance Public School**, **The**.

Schools whose names include north, east, south or west are generally listed by the main locality: North Auburn Public School is listed as Auburn North Public School and South Cardiff Public School is listed as Cardiff South Public School. There are exceptions, such as North Sydney Public School, South West Rocks Public School and East Hills Public School.

#### **Corrections and Suggestions**

Tell us about errors and omissions so that we do not repeat them in subsequent editions of the directory. There is a corrections page at the end of the directory. Please fill out and return as directed.

Please tell us about other information that could be included in future editions. Again, use the corrections page at the end of this directory.

Any inquiries about the directory can be made to the Schools Data Officer, Data Collections Unit, Planning and Innovation Directorate, NSW Department of Education and Training, GPO Box 33, Sydney 2001.

There are 10 school regions which align with TAFE NSW Institute boundaries and are supported by 78 School Education Groups (SEGs).

Each region has specialist resources including curriculum consultants, Aboriginal and equity consultants, staff to support student welfare and disabilities programs, arts and sports coordinators, regional school promotions officers, staff support officers, and school development officers.

School Education Groups provide the focus for localised delivery of teaching and learning support for schools. The School Education Group is a local point of access for community members.

# **TAFE NSW Curriculum Centres**

There are five Curriculum Centres that provide services in the development of educational programs and production of quality teaching and learning resources to assist in the delivery of vocational education and training. Four are based on industry groupings and the fifth is for access and general education. Each is located in a TAFE NSW Institute and is responsible to the General Manager Business, TAFE and Community Education.

# **Distance Education Schools and Centres**

The Department of Education and Training has in place distance education provision to deliver full-time educational programs to students who are isolated or whose special circumstances prevent them from attending school on a regular basis. Single subject (Years 9-12) programs are also provided in specific circumstances. Distance education provision is available from 17 locations across the state.

# **Environmental Education Centres**

The NSW Department of Education and Training manages 23 Environmental Education Centres throughout the State. The Centres complement school programs and their staff consult with teachers in designing activities and programs for all age groups and key learning areas. The staff of Environmental Education Centres also provide training and development for teachers and community members. The main role of Environmental Education Centres is to support environmental education and education for sustainability in public schools and assist schools and communities in the Department's Sustainable Schools Program.

Full details of Environmental Education Centres can be found in the main alphabetical list of schools.

DET also covers the salaries of staff in two Zoo Education Centres. Zoo Education Centres perform similar support functions to schools as Environmental Education Centres. The two Centres are:

Taronga Zoo Education Centre, Mosman Western Plains Zoo Education Centre, Dubbo

# **Multi-campus Colleges**

A multi-campus college comprises a number of campuses that work together as a single educational entity across a number of separate sites. Each campus is usually specialised in the sense that it targets the needs and interests of a particular group of students. For example, junior secondary campuses are designed to support the learning needs of young adolescents, while senior secondary campuses are designed to provide a more adult learning environment for post-compulsory students. A number of multi-campus colleges are co-located with TAFE and university campuses.

# **Parents as Teachers Program**

The Parents as Teachers Program works with families with children from birth to three years living in areas where indicators of disadvantage are high. Parents are supported in their parenting role through parent education programs, regular home visits, group meetings and printed information. The program aims to promote children's cognitive, language, social and motor development as these are recognised as being critical to future positive learning and development. A parenting consultant is located in a parenting centre in the school.

## Warilla Public School

Leawarra Ave Warilla 2528 Ph/Fax 02 4297 6138 The NSW Department of Education and Training (DET) operates 100 preschools across the State. Twenty-four of these preschools are located in communities with large numbers of Aboriginal families. Preschools provide educational programs to children for one year prior to enrolment in Kindergarten. The preschools are an integral part of the schools where they are located. Children are eligible for enrolment in preschool classes from the beginning of the school year if they turn four years of age on or before 31 July in that year.

Names in brackets are the Aboriginal names of preschools in Aboriginal communities.

### **Schools as Community Centres**

Schools as Community Centres is a government funded interagency program managed by the NSW Departments of Community Services, Health, Housing, Education and Training and Ageing, Disability and Home Care. The Department of Education and Training is the lead agency responsible for the administration of the program. The purpose of Schools as Community Centres program is to reduce the impact of disadvantage for children 0-8 by facilitating connections between families, organisations and schools in communities where indicators of disadvantage are high. The focus of the program is support, early intervention and prevention. A local facilitator is based in a community centre in the school.

### Secondary Intensive English Centres

Intensive English Centres (IECs) and the Intensive English High School (IEHS) provide intensive English as a Second Language (ESL) tuition to recently arrived, high school aged students whose first language is not English. These students who present for enrolment in high school should be referred to the local IEC/IEHS for assessment and possible enrolment. The IECs and IEHS listed below may be contacted directly for further information.

#### Warrawong IEC

Cowper St (PO Box 105) Warrawong 2502 Ph 02 4274 4346 Fax 02 4274 7054 Host School: Warrawong HS (8480) Email: Warrawong-i.School@det.nsw.edu.au Some secondary schools have a special focus, either in curriculum or in the nature of the student enrolment.

Entry to selective high schools and selective agricultural high schools will generally be dependent upon academic ability and student performance at the selective high school tests which are held for Year 6 students in March each year. A small number of vacancies may also occur in Years 8-12 each year.

Curriculum in specialist technology, languages, sports and performing arts high schools will provide a specialist focus as referred to in the school name. Enrolment at these schools may depend upon students meeting special criteria for enrolment. These criteria may include performance or audition according to the specialist focus of the school.

Senior high schools offer courses appropriate to the locally identified needs of post-compulsory school age students. Each senior high school will offer a differing curriculum based upon those needs.

State Training Centres provide a wide range of vocational education and training services and information for State Training Services. They are responsible for:

- administering and monitoring apprenticeships and traineeships registered with the Department
- engaging with industry and the community to determine and address regional and national skills shortage training needs, and monitoring vocational training programs funded by the Department
- overseeing contractual funding arrangements between the Department and registered training organisations, and group training companies
- working in collaboration with other sections of the Department (e.g. school careers advisors and regional vocational education consultants to promote school-based part-time apprenticeships/traineeships, trade schools, and vocational training programs for high school students),
- processing applications for Trade Skills Recognition from workers from NSW and overseas, and
- co-ordinating regional heats for the annual NSW State Training Awards.

Field and administrative staff, based in the Centres, can provide advice and assistance in person, over the phone or during a site visit to your school, college or workplace.

State Training Centres are located in 9 regional and metropolitan locations with an additional four outposted officers servicing major population centres. Phone 13 28 11 to be connected to your nearest Centre, at the cost of a local call.

The Department provides a service, through the NSW Vocational Training Tribunal (VTT), for people who are seeking recognition of their trade skills and the issue of *trade certification* in order to work in NSW. Applicants include people who have:

a) worked in a trade for more than four years but never undertaken supplementary formal training or

b) worked in a trade and gained formal qualifications issued in other states/territories in Australia or overseas or c) attained formal qualifications but require NSW trade certification in order to apply for licenses from a NSW licensing authority.

Applications for trades recognition are assessed by a panel of VTT appointed industry experts. Successful applicants are granted either: (a) a *Certificate of Proficiency* - that recognises on the job experience and relevant formal training undertaken; or (b) a *Craft Certificate* - that recognises on the job experience only. Applicants may be sent for a *trade skills test* with a registered training organisation as part of their assessment. Unsuccessful applicants may be referred to further vocational training if they wish to re-apply. For more information, a brochure and application form (including translated versions) contact:

Trade Skills Recognition Vocational Training Tribunal L12, 1 Oxford St Darlinghurst 2010 (or Locked Bag 53, PO Darlinghurst 1300) Ph 02 9266 8450, 8459, 8236, 8448

OR go to http://apprenticeship.det.nsw.edu.au and click on **Trade Skills Recognition** in the column under FREQUENTLY USED FEATURES for more information.

25 Trade Schools will be operating across NSW in locations with identified trade skills shortages. They will be attached to existing high schools and TAFE NSW colleges and allow students to take part in school based apprenticeships and traineeships while completing their Higher School Certificate. NSW HSC students who successfully complete part of a trade course while at school will be given credit towards the completion of their apprenticeship.

The student enrolments listed below were collected in the census of students in NSW government schools undertaken on Friday, 3 August 2007 and form part of the National School Statistics Collection. Please note that enrolment figures listed below can vary during the year or from year to year. Enrolment figures given are FTE (Full Time Equivalent) and may not reflect actual head count. The schools listed are those schools open as at August 2007.

### **Statistics of Government Schools**

Further information is available in the publications IN BRIEF and STATISTICAL BULLETIN.

#### **NSW Government Schools 2008**

| Primary Schools                 | 1625 |
|---------------------------------|------|
| Separate Infants Schools        | 17   |
| Central /Community Schools      | 67   |
| High Schools                    | 397  |
| Schools for Specific Purposes   | 114  |
| Environmental Education Centres | 23   |
| Total                           | 2243 |

There are also 100 Preschools attached to Primary and Infants Schools including one separate Preschool.

### Enrolments in NSW Government Schools 1988 – 2007

| Year | Primary | Secondary | SSP   | Total   |
|------|---------|-----------|-------|---------|
| 1988 | 434,811 | 318,484   | 4,626 | 757,921 |
| 1989 | 434,098 | 310,765   | 4,400 | 749,263 |
| 1990 | 434,814 | 304,006   | 4,366 | 743,186 |
| 1991 | 438,218 | 304,087   | 4,112 | 746,417 |
| 1992 | 444,059 | 308,752   | 4,041 | 756,852 |
| 1993 | 445,238 | 308,909   | 3,901 | 758,048 |
| 1994 | 445,599 | 306,717   | 3,798 | 756,114 |
| 1995 | 446,722 | 305,396   | 3,789 | 755,907 |
| 1996 | 450,465 | 306,823   | 3,749 | 761,037 |
| 1997 | 451,560 | 308,923   | 3,690 | 764,173 |
| 1998 | 452,565 | 309,137   | 3,673 | 765,375 |
| 1999 | 453,454 | 308,116   | 3,762 | 765,332 |
| 2000 | 454,363 | 303,681   | 3,792 | 761,836 |
| 2001 | 451,096 | 301,771   | 3,873 | 756,740 |
| 2002 | 447,897 | 302,988   | 3,915 | 754,800 |
| 2003 | 443,213 | 304,034   | 3,938 | 751,185 |
| 2004 | 438,677 | 302,850   | 3,981 | 745,508 |
| 2005 | 434,876 | 302,578   | 4,124 | 741,578 |
| 2006 | 432,660 | 303,622   | 4,133 | 740,415 |
| 2007 | 429,900 | 304,458   | 4,278 | 738,636 |

Notes: Since 1993 some students have enrolled part-time. All enrolments are reported in full-time equivalent units (FTEs) and include full-time and part-time students.

## School Openings and Closures 2007 – 2008

#### **Types and Classifications of Schools**

Government schools are designated Public, Infants, Central, Community, High, Schools for Specific Purposes and Environmental Education Centres. A school's classification is generally based on the number of students enrolled in the first term of the year of classification. When classification changes are approved, the reclassification usually operates from the beginning of the following school year.

#### Infants and Public Schools

Infants and public schools provide instruction in accordance with the primary curriculum. Where necessary, public schools may also provide part of the secondary curriculum. Infants schools enrol students from Kindergarten to Year 2 and public schools enrol students from Kindergarten to Year 6. Infants and public schools are classified as follows:

| Class 6 | An enrolment of 25 or less    |
|---------|-------------------------------|
| Class 5 | An enrolment from 26 to 159   |
| Class 4 | An enrolment from 160 to 300  |
| Class 3 | An enrolment from 301 to 450  |
| Class 2 | An enrolment from 451 to 700  |
| Class 1 | An enrolment of more than 700 |
|         |                               |

#### **Central Schools**

Central schools have primary and secondary departments and may be established where there is an enrolment in secondary classes of 20 or more students, including at least 8 students above Year 7. Central schools enrol students from Kindergarten to Year 10 or from Kindergarten to Year 12.

Central schools are classified as follows:

| Class 4 | An enrolment from 26 to 159   |
|---------|-------------------------------|
| Class 3 | An enrolment from 160 to 300  |
| Class 2 | An enrolment from 301 to 450  |
| Class 1 | An enrolment of more than 450 |

#### **Community Schools**

There are five community schools catering for Kindergarten to Year 12: Lucas Heights Community School, Hunter School of Performing Arts, Southern Cross School, Wadalba Community School and Evans River Community School. They have been classified as Class 8 or 9, and the principals of these schools are classified as secondary principals.

#### **High Schools**

High Schools enrol secondary students only and provide instruction in accordance with curricula leading to the School Certificate and the Higher School Certificate. High Schools enrol students from Year 7 to Year 12 and are classified as follows:

| Class 9 | An enrolment of 900 or less   |
|---------|-------------------------------|
| Class 8 | An enrolment of more than 900 |

#### **Schools for Specific Purposes**

Schools for Specific Purposes cater for students with specific needs. They are classified as follows: the number of permanent full time teaching staff at a school is multiplied by 30; the resulting number is then used to classify the school using the same scale as for public schools.

#### **Environmental Education Centres**

| Environmental Education Centres do not have           |
|---|
| permanent enrolments. They are classified as follows: |

| Class 1 | Those centres with less than 2 full-<br>time equivalent teachers |
|---------|--|
| Class 2 | Those centres with 2 or more full-time equivalent teachers       |

The alphabetical list of schools provides details for each government school. Following are notes on the contents of the alphabetical list and the codes used.

The first line of each entry includes the full school name, and the schools administrative code, shown in parentheses. The Foreword on page 2 details the listing procedures used in regard to schools beginning with The, and those with North, East, South and West in their names.

The second line of the entry contains the address of the school. The postal address is indicated in parentheses if the school has a post office box. The postal address town/suburb is as for the street address unless indicated otherwise. The third line of the entry contains the school's phone numbers and fax number.

The fourth line of the entry includes the School Education Group (SEG) the school is in, the classification of the school, transfer points, and allowances.

Transfer points are points allocated to teachers for each year of service at the school. TP1 indicates one transfer point for each year of service. Transfer points range from 1 to 8.

A is the abbreviation for the allowance connected with the school:

- The allowance for socio-economic isolation is shown as a number from 1 to 10, with 1 representing the greatest isolation.
- H or C indicates an allowance for hot or cold climate.
- L indicates those schools in the Western Division, which start one week later in Term 1.
- Y indicates schools in the City of Broken Hill.

#### Classification

Classification is shown as a number from 1 to 6 for public and infants schools; 1 to 4 for central schools; 8 to 9 for high schools and community schools; and 1 to 6 for schools for specific purposes. See the previous page for further details of the classification of schools.

The type of school is shown by a letter: P for primary schools, I for infants schools, C for central and community schools, S for secondary or high schools, SSP for Schools for Specific Purposes, and EEC for Environmental Education Centres. In cases such as Norfolk Island Central School, where the school is run by the Department of Education and Training but paid for by another authority, an asterisk rather than a letter is used, eg, 2\*.

#### Abbreviations in the alphabetical list of schools

| Α   | Allowances                              |
|-----|---|
| С   | Central or community school (Class)     |
| С   | Cold area living allowance (Allowances) |
| EEC | Environmental Education Centre          |
| н   | Hot area living allowance               |
| I   | Infants school                          |
| L   | Later start in Term 1                   |
| Р   | Primary school                          |
| S   | Secondary or high school                |
| SSP | School for Specific Purposes            |
| ТР  | Transfer points                         |
| Y   | Yancowina allowance (Broken Hill)       |
|     |   |

NB. Schools in the Broken Hill area operate on Australian Central time.

The last line of the entry is the school's email address.

**Corrections** 

If you wish to make changes to your school's entry in the alphabetical list of schools, please indicate the corrections below:

Fill in the school name and code number; then only the required change(s).

School Name School Code Number

## Please make the following changes for this school's entry:

Address

Postal Address

Telephone Number(s)

Fax Number(s)

Region/SEG

Your Name

Position

If you have any other corrections to make to the Directory, please indicate them below:

If you have any suggested improvements – details you would like to see added or omitted from the Directory, as general information or as part of the alphabetical list of schools – please indicate below:
